They were pacing up and down one of the graveled alleys that intersected the famous rhododendron shrubbery at Charnwood, and, as she spoke, Claire cast a half-frightened glance in the direction of the house. She knew that Sir Adrian was closeted with his lawyer, and that he was, therefore, and in the least likely to emerge from the obscurity of his study for some time to come. But as long as he was anywhere on the place she was totally unable to rid herself of the hateful consciousness of his presence.

He reminded her of some horrible and loathesome species of spider, at times remote and motionless in the centre of his web—that web in which, body and soul, she had been inextricably caught—but always liable to wake into sudden activity, and then strike mercilessly.

"Oh, I hope not!" she repeated, shivering a little. "If she only knew what marriage to the wrong man means! . . . And I'm certain Geoffrey is the wrong man. Why on earth does Blaise behave like this?"—impatiently. 'Anyone might think—Jean herself might think—he didn't care! And I'm positive he does."

"If he does, he's a fool. Quod Lord!" smoothly kicking a pebble out of his path—"imagine any sane man, with a—a—road before him, not taking it!" He swung round towards her suddenly. "Claire, if there were only a clear road—for us! If only I could get you away from all this!"—his glance embracing the grey old house, so beautiful and yet so much a prison, which just showed above the tops of the tall-growing rhododendrons.

"Oh, hush! Hush!"

Claire glanced round her affrightedly, as though the very leaves and blossoms had ears to hear and tongue sto repeat.

"One never knows"—she whispered the words barely above her breath—"where he is. He might easily be hidden in one of the alleys that run parallel with this."

(To Be Continued)

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator. Reasons they know from experience how soonest it is.

The most honor is being revived among women of Britain.

Little Helps For This Week

"For God hath not given us the spirit of fear; but of power, and of love, and of a sound mind."—2 Timothy 1.7.

Lord and Father, great and holy!
Fearing naught we come to Thee;
Fearing naught, though weak and lowly,
For Thy love has made us free
By the blue sky bending o'er us,
By the green earth's flowery zone,
Teach us, Lord, the angel chorus,
Thou art love and love alone.
—Frederic W. Farrar

"Fear may create the enforced obedience of the slave, love only can win the devotion of the child, and that is why God hath not sent to us—who know the truth and whom the truth has made free—the spirit of fear and bondage, but of love, and of power, and of a sound mind. And this love is the sole basis of holiness."—Ibid.

Relief From Asthma.

Who can ascribe the complete relief from suffering which follows the use of Dr J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes when its swift and gentle influence relieves the tightened, choking air tubes? It has made asthmatic affliction a thing of the past for thousands. It never fails. Good druggists everywhere have sold it for years

Television Coming

Captain Ian Mercont, who announced that he had made successful tests of a new short-wave radio telephone, disclosed recently that he is turning his inventive genius to television. "I expect soon," he said in an interview, "to be able to see and hear family in New York while I speak with them by wireless telephone."

Cross Baby

"Baby was awfully fretful," writes Mrs. H. A. Trevelyn, Rimbo, N.S., "until I started giving BABY'S OWN TABLETS. Now he is just wonderfully well." BABY'S OWN TABLETS are the ideal treatment for children's colds, fever, colic and upset stomach troubles. See certificate in each 25c package.

IMPORTANT NOTICE
Government of Alberta
INCOME TAX RETURNS

Income tax returns under the new Provincial Income Tax, are now due and should be filed with the Superintendent of Income Tax, Qu'Appelle Block, Edmonton.

BEFORE MAY 31, 1932

Forms for returns may be procured from any Provincial Government Office, such as court houses, land titles offices, land offices, municipal secretaries, sheriffs, bailiffs, etc. or from any bank, or direct from the Supt. of Income Tax, Edmonton.

All persons residing, employed, or carrying on business in Alberta, are liable to a tax on income, subject to the exemptions provided for in the Act.

Taxpayers are urged to go at once to the nearest office where forms may be procured, secure the necessary forms and make their returns immediately. Those who, after deducting the exemptions allowed in the Act, are not liable to a tax, need not file returns.

Full information re exemptions and method of filing returns, is contained on the forms themselves.

The general penalty for failure to file returns by the date specified is 5 percent of the amount of tax payable, with a maximum of $800. Specific penalties are provided for failure to file returns under certain classifications.

CLASSIFICATION OF FORMS

Form 1 is for Individuals other than farmers or ranchers.
Form 1A is for Farmers and Ranchers only.
Form 2 is for Corporations and Joint Stock Companies.
Form 3 is for Trustees, Executors, Administrators, Agents and Assignees.
Form 4 is for Employers, including educational, charitable and religious institutions, making a return of the names and amounts paid to directors, officials, agents or other employees during 1931.
Form 5 is for Companies and Joint Stock Companies making a return of all dividends and bonuses paid to shareholders and members during 1931.

Further information will be furnished on application to

St. Julien's Day

Sunday the 24th is the Anniversary of the Battle of St. Julien in which so many of our boys took their part. It will be marked by a joint service of Thanks and Praise in the Theatre at 7:30 p.m.

Come and make this service what it ought to be.

LETTER TO THE EDITOR

April 19th. 1932

We Were Wondering Why

The writer noticed in the last two issues of "The Record" where the council report was published, the following rather surprising statements. One store in town had supplied relief in one instance to the extent of $31.00 while the other store had furnished relief only to the extent of $10.00. One wondered still more when the next report appeared showing that the former store had meted out relief amounting to $114.60 while the latter had supplied relief totaling only $13.00. It seems very strange that in a town having only two stores that the relief given should be so unfairly divided. It is true that people given relief are allowed to get their requirements from whatever store they prefer. This in itself seems scarcely just. The money after all which is used to provide relief comes from the tax-payer. Surely we have some right in the spending of it particularly in this regard.

May the writer suggest in all fairness that the relief should be divided between the two stores.

Yours Truly,
A Ratepayer.

Fort Saskatchewan Record

VOL. 11 No. 7 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, MAY 6th, 1931 $1.50 PER YEAR IN ADVANCE

Tech Business Done At School Board Meeting

A meeting of the Fort Saskatchewan School Board was held in the Council Chambers on Monday, May 2nd, at 7.30 p.m.

Present—Mr. F. Atkinson, chairman, Trustees R. Todd, R. A. Brown, Dr. Grunert and Dr. Calhoun.

The minutes of the last meeting were read and adopted on motion of Mr. Todd.

The committee appointed at the last meeting to arrange for caretaker reported that C. A. Brown had been engaged for May and June at $8.00 per month. He will be assisted by his wife. This selection was approved on the motion of Mr. Brown.

The committee appointed by the Chairman at the last meeting to deal with the estimates for the current year submitted its report, when it was moved by Dr. Grunert, and adopted. That the amount required from the Town of Fort Saskatchewan for the School District No. 91 from 1st January 1932 to 31st of December 1932, would be $8600.00, and that demand be made in regular form for the same from time to time. That a copy of this resolution be sent to the Town Council.

A ruling was received through the Department of Education regarding the legal definition of "residence", in the province in regard to the payment of High School fees. The meaning of the word resident it would appear is determined, to some extent at least, by the intention of the Act, and that is that the parent of the child shall contribute to the expense of its education. Miss Jamieson the Secretary was instructed to send accounts to School Districts and parents, in which certain pupils in the school were concerned.

The matter of Mr. Todd's reporting High School pupils was brought up again, and the Chairman delegated Mr. Todd and Dr. Calhoun to redraft the resolution for consideration at a later meeting.

Mr. Anderson the Principal was present and submitted April attendance report, and gave the Board certain particulars regarding the school.

The following accounts were passed for payment on the motion of Dr. Calhoun—Hotel Furnishing Co., for paper towels $8.80; F. W. Smith $19.85; J. Coupe $1.50.

The meeting adjourned on the motion of Mr. Todd.

Holstein Cow Has Record for Triplets

Exponents of diversified farming methods for the three prairie provinces are quoting the record of a Holstein cow owned by Harold L. Pollett of North Adams, Mass., who has given birth to her second set of triplet calves in 13 months.

On March 21st 1931 the cow had triplet heifers. These born on April 15th, 1932 were two bulls and a heifer, each weighing between 35 and 40 pounds, half the normal weight of a calf at birth. All three are sturdy and will live.

Mr. C. Edwards recent Janitor of the Fort Public School has purchased a farm in the North Cooking Lake district. He left Monday morning for the farm.

PARTRIDGE HILL NEWS

Wheat seeding in general this week and it's going forward under ideal conditions as regards moisture.

Now wouldn't this be a happy world if we could just pull a lever and juggle the price of this commodity somewhere where it ought to be.

******

A meeting was held Monday night for the purpose of organizing a baseball team. Norman Lansby was appointed manager.

We may have more information next week in regarding the personal of the team.

I believe Tuesday has been chosen for practice night. Let's get behind and boost our ball team.

"THE BIG TRAIL" ALL-TALKING ROUTETONE TO BE SHOWN AT EMPRESS THEATRE

Ward Beal is a tackle on the football team of the University of Southern California and in that position he has played twice against Notre Dame.

In the off season Beal does a little picture work. He was selected by Raoul Walsh for a part in "The Big Trail."

Walsh, prior to production, ordered Beal to grow a beard and he would cast him as a member of the pioneer Bascom family.

Beal followed instructions to a fine hair as the following incident will verify.

Down on the Arizona desert one of the extra players in "The Big Trail", a passenger at least sixty years of age, went up with Beal and said:

"Hey, kid, where can a fellow get a drink?".

And the youthful Beal replied: "Right over thar, son."

Seeding is general in the district and with the recent rains and warm weather now, conditions are ideal for farmers and gardeners.

A large number of farmers have gone back to horses as a cheaper mode of power.

HIGHWAYS BAN IS PARTIALLY LIFTED

Half truck loads of freight can be carried on most of the main provincial highways as a result of the partial lifting of Monday, by Hon. G. L. McPherson, minister of public works of the ban prohibiting the traversing of the highways by trucks and buses.

The order, sent forward on April 25 completely barred such traffic until May 1. The order has now been varied to permit half loads, as the sun and drying winds have had a beneficial effect.

Trucks around town and the bus running between Vermilville and Edmonton resumed operations on Tuesday after having had a ten day lay off.

SPORTS COMMITTEE HOLD MEETING

At a meeting of the 24th of May Sports committee held in the Town Hall on Tuesday evening, it was decided to hold the sports on this day and a general outline of the different sports were drawn up at this meeting.

The program will consist of a baseball tournament, children's races, baseball, horse pulling contest, horse clime contest, and a grand dance in the evening in the memorial hall.

A good range of cash prizes have been put up for each event.

In the horse pulling contest the entries must be in the hands of the sport committee before May 24.

NEW CHEQUE TAX EFFECTIVE MONDAY

The new federal stamp tax on all cheque drafts, notes and bills of exchange went into effect Monday, following notice received by banks. The new rates were announced in the 1932 budget of the dominion.

All amounts over $5 and not exceeding $100 must bear a three cent stamp while a six cent stamp must be placed on all amounts of more than $100. The old last war a straight two cents on all amounts of more than $5.

YPRES VALLEY NEWS

Mr. and Mrs. Norman Latimer are receiving congratulations on the arrival of a baby girl.

*****

The Ypres Valley Ladies Aid are holding a social evening on June 3, at the baseball ground at Mr. Dittrich's, just across the corner from H. Lawrence's. Watch for further announcements.

*****

We are glad to hear that Mrs. A. Irwin is recovered after her operation, and hope to see her around again soon.

*****

There will be a Mother's Day Service at Ypres Valley on Sunday, May 8th.

*****

Mr. and Mrs. Harvey Cranston of the Fort spent last week-end renewing old acquaintances in Good Hope.

*****

Miss Ada Moyer has been home over the week-end.

*****

Mrs. Bert Davis has her sister Mrs. Olsin of Ryley visiting her.

Balancing Life's Budget.

With the problem of balancing budgets occupying the minds of all people entrusted with the duties and responsibilities of government whether in the Federal, Provincial or municipal fields; with the same problem uppermost in the minds of the executives of all our large transportation systems, industrial enterprises and financial institutions, with every business man, big and little, every head of a family on salary or earning wages, even men and women out of employment, all engaged with the same problem, the thought intrudes itself: "Are people, individually and collectively, more concerned with the dollar-and-cents balancing of their material budgets than they are with the much more important balancing of their lives?"

It is manifest, of course, vitally necessary that people should balance their material budgets. If they do not, bankruptcy in business and financial disaster has ahead. No individual, no corporation, no government, no nation, can go on indefinitely spending more money than they receive, or have Monetary budgets must be balanced: trade budgets must be balanced. Unless it is inconvenient as every import is likewise an export, and every export an import, there must balance, and if every nation insists on developing exports while refusing to receive imports, the world's economic structure is thrown out of balance and bankruptcy leading to disaster and ruin is inevitable.

But it is equally true, and a law of nature that cannot be ignored and dare not be defied without loss and suffering, that the budget of our very lives must be balanced. But inasmuch as disaster may not follow quite so quickly, and the payment of the penalty may be longer delayed, than is true in the financial world, most people neglect to properly balance their lives until it is too late.

In the struggle for material wealth, for success in business, for supremacy in political life, for victory in the field of sport, even to reach the top of the social ladder, what a vast number of people overwork and neglect the all-important asset of maintaining their physical health. Failing to do this, their lives are costly out of balance, for of what profit is commercial assistment of their desires if the price to be paid is impairment in health, bodily vigor and strength undermined? Achievement at such a price is too costly, and in fact, not achievement at all, but failure, because one cannot enjoy or long retain that which has seemingly been achieved.

How frequently has it happened that a brilliant student passing of high matric and scholastic honors through too close application to his or her studies, and the burning of the midnight oil, has so sapped both mental and physical strength that in the crowning hour of learning achieved, and apparently with a life of great promise just beginning, collapse has come.

Others in the race for material things either fail to balance their budget of their lives by any intellectual studies or pursuits. They fail to balance their lives with the beauties of nature, or music, or good literature. They even neglect the bank'ng of proper exercise and recreation. As a result of their unbalanced lives they become gross, self-centred, utterly selfish, and largely lost to all the finer things of life.

Man is a dual personality,—a combination of body and spirit. If his life's budget is to balance, he must devote attention both to his body and his needs and to the development of mind and spirit. He cannot afford to neglect either the one or the other; neglect of one means not only that it will suffer but the other will also suffer.

The balancing of life's budget calls for an all-round development of body and of spirit, and of the mind which is partly of the body and partly of the spirit. A man may excel as religious, but his problem is to have no religion, but to so doing he merely advertises the unbalanced character of his life. He is less than a complete man. A man may be perfect physically, that is, his body's mind and his spirit, he is merely a high type of animal. On the other hand, one who neglects his body and devotes his whole attention to the cultivation of all else, is a freak, and even his mental powers become distorted and unreliable because he lacks the necessary contact with and appreciation of natural human forces.

It is only through a true balancing of life's budget that man can possibly reach his highest destiny of happiness, health, contentment and usefulness in this world.

Would Train Nurses For Mental Hospital Work

Alberta Psychiatrist Speaks Of Success In Training Mental Cases

Combined training courses for graduate nurses, which would include as well as general hospital work a considerable amount of mental training was suggested by Dr. S. Hart, Alberta psychiatrist as the solution to the present nursing shortage problem at the annual convention of the Alberta Association of Registered Nurses (Edmonton).

The mental hospital nurse needs general training plus tact and good judgment to the extent that she can be trusted, he declared.

Readjustment of the public viewpoint to the mental case which is gradually taking place, is one of the greatest needs in dealing with the care of such patients, he said. It must be understood the patient is ill, as is the patient in the general hospital.

Dr. Draper spoke of the 25,000 patients in mental hospitals and 6,000 in mentality defective institutions in Canada. The age-old idea of an insane person entering the hospital and remaining behind prison doors for the remainder of his life is an untrue picture today. Sixty-one per cent of the number admitted were discharged last year.

The day is not far distant when criminals will be treated as mentally ill persons and dealt with by psychological measures, the doctor believed.

Miller's Worm Powders can do no injury to the most delicate child. Any child or infant in the world of adolescence can take this preparation without a moment's hesitation, knowing that it is a sure relief and a full protection from worms. Their many virtues which are responsible for such satisfaction and great suffering to legions of little ones.

Plenty Of British Capital

Is Available In Canada, For Sound Investment Purposes

Ministers of ordinary British investment for the development of empire enterprises where their returns are to be found in Canada, and for such projects, Major Gordon C. Hene, official of the Empire Development Association, of London, England, stated at Victoria.

"There is plenty of capital in Great Britain, despite the difficult years of times, looking for ordinary returns through investments in industrial and other undertakings, within the empire. Great sums are available for those that worthwhile projects in the British dominions have not been drawn upon to the extent that the mother country and might be desirable. One purpose of the Empire Development Association is to arrange for meetings of investment opportunities to lay before those having the capital to encourage and develop such undertakings," said Major Hene.

Douglas' Egyptian Liniment is unrivalled for speedy relief in rheumatism, lame back, inflammation, burns and sores.

Tax Dup'ication

Premier Brownlee, Of Alberta, Explores Double Taxation System

Duplication of income taxes by federal and provincial governments was deplored by Premier John E. Brownlee of Alberta, addressing the annual meeting of the Winnipeg Board of Trade. He said steps should be taken to revise the constitution of Canada to meet modern requirements and eliminate the duplication of taxation.

Appealing for confidence, Premier Brownlee declared: "Let us cease thinking and talking in the tone of economic depression. Mr. Bennett urged business men to cooperate with governments and industry in the solution of the serious problems. The most pressing problem was that of agriculture. Some means must be found of enabling the farmer to even up the burden of debts accumulated in the last two years.

Another problem was markets. Research in this field was needed. There were many untouched markets for western Canadian products. All should be sought out and explored.

The problem of governmental finance was also a serious one, but there could be no thought of inflation or any repudiation of debts. The Premier criticized those who pressed for government economy at all costs. Economy was important but could not be pressed a certain distance and after that it resulted in a curtailment of essential service

Churchill Development

Preparing Facilities For Both Insured and Outbound Cargoes

Construction of a freight shed for the purpose of running into Hudson's Bay by the Churchill route will be one of the features of work at the Bay port this year. Tenders for the shed will be let very soon, it is expected that about 250 men will be employed at Churchill by the Department of Railways and Canals instead of the 150 that were engaged last year. Dredging will be done by one dredge this summer, instead of the two that worked last year. The dredging programme will be completed this summer and will leave the harbor ready for the next twenty years, according to port authorities.

Construction of the extension to the conveyor system is underway now and will be completed about the middle of the summer. Only a small portion remains to be completed on the dock. Efforts are under way to obtain livestock facilities at Churchill for the summer, and equipment for unloading coal from inbound boats.

Is Fruitless For Itself

Dr Thomas' Eclectric Oil needs no testimonial of its powers other than itself. Whoever takes it for coughs or colds, for pain or continuous, for sprains or burns, for pains in the limbs or body, will know that it is a good friend indeed and needs no guarantee. This shows why this Oil is in general use.

Cuts Electric Sign Cost

Large Economies Will Be Effected Through New Flashing Device

A new electrical flashing device, by means of which a wave of light is sent along a row of lamps without the need of any costly mechanically moving parts, is expected to effect large economies in railroad signalling systems, moving street signs, traffic lights and in other fields. It was demonstrated for the first time in public by William A. Gleuing of the General Electric Research Laboratories, before the Science Forum of the New York Electrical Society.

Worms cause restlessness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

A Free Show

The fact that C. B. Cochran is putting on "The Miracle" again in London, England, again recalls a good story. Among those who were queuing up for the advance booking on the occasion of its last presentation were a fred and a Jew. When it came to the fred's turn he asked for twelve orchestra stalls and paid with a ten pound note, which fact staggered the Jew. "Come along, sir," said the box office man impatiently to the Jew, "how many seats do you want for The Miracle?" "None," he replied. "I've just seen it."

Bolivia is trying to arouse interest in gold mining.

Death Toll Among Deer

Shrubby Muskeg Plays Havoc With Deer in Northern Saskatchewan

Reports that have reached wide-spread death toll among the deer of Saskatchewan's northland have been reaching here. Starvation or some strange malady which may be a form of "sleeping sickness" is believed the cause of the animals' deaths.

Travellers from the Jack Pine lands of the Big River country tell of trees and hundreds of deer lying dead in the woods.

Game wardens instructed by A. H. Filer, provincial game commissioner, to trace down the reports, tells that on one day's journey while patrolling south of the Beaver River he came across the bodies of twelve deer. There was no apparent cause of death. The animals looked as if they had just laid down and died.

The lodges and river of these deer were reviewed and have been sent to the veterinary pathologist at the University of Saskatchewan, who will examine the organs in an endeavour to determine the cause of death. His report is the first official one to be made but the belief that the condition of the deer in the northland is to be investigated as soon as weather conditions permit travel

CANADIAN WOMEN FIND DUSTING DISTASTEFUL

Dust cloths going into discard; Unpleasant to use; a bother to Wash

DUSTLESS FURNITURE POLISH HAS GREAT VOGUE

Of all household tasks, that of dusting is the least appealing to the majority of women.

However, this condition, like many another connected with housework, is undergoing radical changes. In a great many Canadian homes the women are discarding dust cloths entirely, and are using Applewood Wonder Paper instead, for soon it actually does as it claims as it polishes, dusts a better and much quicker job than the old dust cloth ever did.

This new, and extremely modern Wonder Paper, is made from clean rags, and soft pure pulp, treated in a specially way with a dustless furniture polish; and soon the dirt instead of spreading it.

Applewood Wonder Paper comes in handy one package; twenty-five large sheets for twenty five cents. You crumple a sheet into a soft wad and go over the furniture requiring attention. Then when one side is soiled or worn, turn the Wonder Paper inside out. After you have given a quick and loving dusting to drawers and woodwork, you can still use Wonder Paper on the floors, if you wish.

And when you are through, there's no old duster to shake out or wash. Throw the soiled Wonder Paper away and you've completed the most tiresome part of housework in half the time and with half the effort.

Wonder Paper is made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box.

Special Offer

Most grocery, hardware and department stores have Applewood Wonder Paper in stock. If yours hasn't, we'll be pleased to supply you from the factory. Just fill in and mail this coupon.

Applewood Paper Products, Ltd.
Hamilton, Ontario.

Report Submitted On The Milling And Baking Qualities Of Spring Wheat Varieties

A report on the milling and baking qualities of Canadian spring wheat varieties has been released by the Dominion committee on agriculture.

The report was made to the National Research Council by J. G. Mitchell, assistant research biologist, University of Alberta, W. F. Geddes, professor of agricultural chemistry, University of Manitoba, and R. J. Lemmer, assistant professor of chemistry, University of Saskatchewan.

A co-operative study was made of the milling and baking quality of 35 varieties of spring wheat, now grown in western Canada. Samples were grown in adjacent plots by the Dominion Experimental Farms and Universities in Manitoba, Saskatchewan and Alberta in 1926, 1927 and 1928. Only samples which were sound enough to be placed in the statutory grades by official inspectors were used. Part of each sample was milled and baked in each of the three co-operating laboratories. Four baking formulas were used. The varieties were classified on the bases of loaf volume, texture, crumb color, general appearance of loaf, absorption and yield of straight flour. These classifications were combined to give classifications for baking quality and milling quality and finally for suitability for export and domestic milling. The best varieties classified in briefly:

1. Varieties which are entirely satisfactory Reward, Coron, Marquis, Pioneer No 245, Renfrew, Red Bobs 232 and Supreme.

2. Varieties which are fairly satisfactory Early Red Fife, Ruby and Early Triumph.

3. Varieties which are unsatisfactory. (a) White wheats: Quality, Admixture and Hard Federation. (b) Varieties differing from Marquis in milling characteristics: Garnet and Kota. (c) Varieties inferior to Marquis in baking characteristics: Garnet, Parker's Selection, Rowsonal, Thatcher, Kitchener, Preston and Marquillo.

4. Varieties which are very unsatisfactory: Early Prolific, Dickson and Vermillion.

Of Marquis, the report states it is true quantitative variety and is satisfactory in all respects.

Dealing with Reward, the report reads:

"Reward has a high weight per bushel and a satisfactory flour yield. It has a very high protein content. The baking possibilities are excellent. It gives loaves of large volume with good color, texture, appearance and absorption. Reward has the best strength and baking quality of the varieties tested."

Among the varieties placed in the class unsatisfactory for export or domestic milling in the report, perhaps the most extensively grown is Garnet. The report states:

"Garnet: The test weight and the yield of flour are satisfactory. Garnet differs from Marquis in its tempering properties and must be tempered more properly when mixed with that variety. For this reason the milling quality of Garnet is classed as fair. The protein content is low. It is satisfactory in absorption and in appearance of the loaves. The other baking characteristics are poor.

"It gives small loaves with poor texture, particularly when baked by the blend-brownie or malt-phosphate formulas. The color of the crumb is decidedly yellow. Garnet cannot be considered a desirable variety."

The report was dated on April 6.

"What a silly place to put a washboard!"—Sunbeam-Sirlz, Stockholm.

Not Easy To Answer

How Can Farmer Make Money With Prices As Low

We can tell the farmer to a decimal point how many acres of oat or stubble a team should plow in a ten-hour day with a team of horses or with a tractor. We can inform him that he should be able to grow potatoes for 30 cents per bushel. Showing that the average length of life of a corn-hind-er is 20.6 years, and that a gang-plow should live to the line old age of 19.3 years. Yes, sir, we can flurry specific statistics and figures which would amaze the man on the farm. But honestly, brother, when you ask how to make money selling milk to the factory at something under two cents per quart, and when you yearn for enlightenment on how to run fat on selling pigs with their hocks on at $4.25 per hundred, we must follow our usual policy of being dumb. Sorry, our answer is that we have a reasoning suspicion that you can't do it. — Stratford Beacon-Herald.

Work Under Handicap

Watch In Not Used By Russian Railway Men

The lack of watches in Soviet policies is partially blamed by the Transportation Journal for railway disasters, says a message from Moscow Wrecks occur, trains are late, and the transportation system suffers from lack of co-ordination, when employes cannot determine whether they are operating their trains according to the time-table. The Commissariat of Transport, tried the experiment of issuing watches to men in charge of train duty, and having them turned in at the close of work, so they would be available for the next shift. But the experiment failed, as many watches were stolen and the Commissariat of Supply to speed up the output of watches so that all railway men may have them.

Headgears Fear Fog

Only Danger Which Is Really Absorbing To Sea Captain

Fogs are the most dangerous hazards that confront navigators. A steamship is not greatly alarmed by a heavy gale; he doesn't worry much about a high running sea; he manoeuvres his craft to meet the storm. But sounds and within perilous passages without more than ordinary caution; but when a thick fog hangs over the water he immediately reduces the speed of his ship and keeps his ears open for the bellow of the foghorn that indicates the proximity of a dangerous shore or a hidden rock.

The U.S. army used very large 12 standard sizes of flags.

Plants Think On Seeing the Light

Scientist Says Vegetable Kingdom Has Senses and Uses Them

When you see a plant bending toward the light, it is thinking.

For plants have brains, according to experiments conducted by the Smithsonian Institution at Washington. Like human beings and animals, they also have eyes and legs and use them.

The relation between the vegetable and animal kingdom, discovery of which has been the remaining mystery, was disclosed by a doctor who has made a study of the actions of plants when exposed to light.

"There appears to exist in the plant a more or less localized region capable of receiving a stimulus," he said "It has been known that the most sensitive portion of a caterpillar—the leaf sheet surrounding the bud of an ascending shoot—is the first fifty millimetres of the tip. The first millimeter to 100 times as sensitive as the second, and 1,000 times as sensitive as the third millimeter none."

The tip of the plant corresponds to the eye. When light strikes the "eye," then the stem of the plant corresponding to the leg, bends much as a human being does in walking.

A Really New Invention

Quebec Man Has Potato Machine That Works Successfully

The completion of a potato digging machine of his own invention has recently been announced by Joseph Morau, of Ville St. Pierre near Montreal. He claims that it has been inspected by the responsible provincial government authorities and pronounced to be the only machine in existence today that will pick potatoes without injuring the vegetable. It weighs 300 lbs., is made up of twenty compartments and has been bonded with watermarked paper, it is incorrect to suppose that a specimen is not genuine because its paper is unmarked. There are many countries which do not avail themselves of this useful safeguard against the forgery of their postage stamps.

Under Pressure

Canada Suffering From a National Headache, Says Hon. R. J. Manion

"We are suffering from a national headache induced by a financial debauch," said Hon. R. J. Manion, Federal Minister of Railways and Canals, in the course of an address before the Toronto Liberal-Conservative Businessmen's Club at Toronto.

"There is undue pessimism, just as there was undue optimism in the boom days of 1928," he said, "Let us get back to the state of affairs existing during the war, and we will be one of the first countries to return to prosperity."

Jugo Issues Warning

A warning to the League of Nations and to Soviet Russia to keep "hands off Manchuria," was issued by General Sadao Araki, Japanese war minister, in a speech to the Kokusuikai, a patriotic society of Osaka.

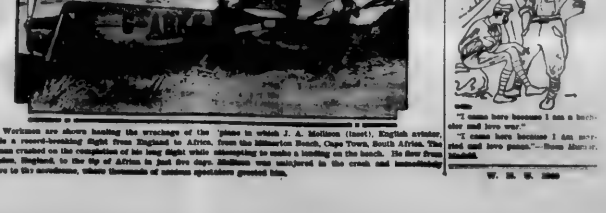
Inglorious End of Glorious Flight



Workmen are shown hauling the wreckage of the 'plane in which J. A. Mollison (inset), English aviator, made a record-breaking flight from England to Africa, from the Milnerton Beach, Cape Town, South Africa. The airman crashed on the completion of his long flight while attempting to make a landing on the beach. He flew from Portmarnock, Ireland, to the tip of Africa in just five days. Mollison was uninjured in the crash and immediately drove to the aerodrome, where thousands of welcome spectators greeted him.

Probable Carry-Over Of Wheat Is Expected To Be Smallest Since 1928, According To Estimates

Northern Grown Seed

Hamman Trails Advises Use To Avoid Danger From Rust

Prairie farmers who think the annual menace of rust should fight by use of northern grown seed grain, declared Hamman Trails, wheat king, at Edmonton.

Reports on Peace River seed went on the southern prairie affected, Hamman had shown practical interest by the first year, while resistance began to break down the second year. That individual change of seed every third year would prove good insurance against rust. He believed seed grown in northern Saskatchewan would be equally as effective for Manitoba and southern prairie farmers.

Trails dubbed the research hunt for good milling rust-resistance wheat variation as a "wild goose chase" and waste of time and money.

Watermark On Paper

Pulp In Passed Under Roller Which Bears Requisite Device

A watermark as a device which is incorporated in the body of a paper When paper is made by machinery the paper pulp is passed under a wire roller, known as the "dandy" roll, which bears the requisite watermark device. The paper is thus thinned where the wires of the "dandy" roll touch it, and as the paper is finished, these parts are more transparent than the rest. While a large number of postage stamps are printed on watermarked paper, it is incorrect to suppose that a specimen is not genuine because its paper is unmarked. There are many countries which do not avail themselves of this useful safeguard against the forgery of their postage stamps.

These days have been, according to

A survey of the world wheat situation shows varying conditions, but the bright spot for Canada is the estimate of a comparatively small carryover with indications of favorable export trade for the balance of the present crop year, ending July 31 1929.

Recent information places the possible carry-over at 104,000 000 bushels, the combined stocks 1928 and about 20,000,000 bushels less than on July 31, 1928.

In a review of world conditions, issued by the Dominion Bureau of Statistics, the European market to date is described as "broader today than at any time during the present crop year."

World import requirements for the balance of the crop year are placed at from 225,000,000 to 250,000,000 bushels. Under present conditions, Canada and the United States will be called on to supply 150,000,000 bushels, probably, says the bureau review, about 75,000,000 from each country.

Reports of below normal germination in the winter wheat belt of the United States have focused the eyes of the grain trade on the situation there. With early reports of a crop 43 per cent below the 1928 yield, weather conditions since the middle of March in the next few months will have an important effect upon the world situation.

Growing crops in Europe are subject of varying reports, but it is too early, adds the review, to offer definite conclusions. In general, crops in northern Europe are inclined to be backward, and in central Europe, including France, Spain and Italy, they are in good condition. The Danubian countries report favorable development, with the exception of Hungary, where wheat and rye prospects are unsatisfactory Reports from Russia continue to indicate difficulty in getting crops planted because of weather, and the Soviet continues to offer a bold bar speculation among students of the wheat situation.

Dentists Require More Than Mechanical Skill

Students Now Get Good Grounding In Medical Science

No profession offers better possibilities in the province of Quebec than the dental profession, Dr Walsh, acting dean of the Dental Faculty of McGill University, told members of the Gyro Club at Montreal. There was only one dentist for every 1,800 persons he pointed out.

Up to the present time, Dr. Walsh thought, the dental profession had been looked upon as merely a highly-skilled mechanical trade. All this was changing, however, and it was generally recognized now that students of dentistry were getting every bit as good as the medical students. He prophesied that the time was close at hand when people would not merely ask the dentist what was wrong with this or that tooth, but ply him with the question: "Is anything wrong with my mouth?"

Once Stuck To Grenfell

It is forty years since Sir Wilfred Grenfell went to the Labrador and set about helping the destressed natives. Now, thanks to him, the coast has five hospitals, seven nursing stations, two schools, co-operative stores, orphanages, trading centres, and children's homes.

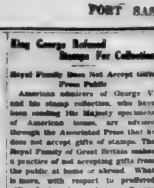
King George Refused Stamps For Collection

Royal Family Does Not Accept Gifts From Public

American admirers of George V intid his stamp collection, who boys been sending His Majesty specimens of American issues, are advised through the Associated Press that he does not accept gifts of stamps. The Royal Family of Great Britain makes a practice of not accepting gifts from the public at home or abroad. What is more, with respect to proffered gifts of American stamps, George V.'s world famous collection includes only stamps of the British Empire. This explanation is timely. An American sent him Majesty specimens of a recent issue of commemorative stamps from this country and was povish because they were not accepted. The story got into the newspapers and tended to convey the widely erroneous idea that King George was ungracious about the compliment paid him by the offer of the stamps. A statement of the Royal Family's practice in such matters should be sufficient to remove any such misunderstanding.—Detroit Free Press.



The Farming Mill

Valentine Interesting Regarding Its Use and Operation

(By H. G. L. Strange)

Good drill surveys that have been made by the Dominion Seed Branch show without a doubt that a vast amount of weed seeds and other impurities are seeded into the ground each year with seed grain. Investigation further shows that most of this grain had been cleaned through fanning mills. The reason for these impurities being present on the seed is unquestionably due to the fact that it is very difficult to clean grain properly unless the fanning mill is in good condition.

Based on the experience of many years of cleaning Registered Seed to the high standard of purity demanded by the Seeds Act, the writer has worked out a method of cleaning seed with a simple fanning mill that will be found to be prompt and effective.

In the first place only two screens are really needed for a fanning mill—a top screen that will scalp off large grains, pieces of straw and parts of pathological seeds, and a smaller screen underneath that will allow the weed seeds, small cracked grains, etc., to pass through, leaving on top of the bottom screen only the large plump kernels required for seed.

A fanning mill using two good screens is not difficult to get and a good work as will then be fitted with banks of screens perhaps better. Names of the latter are normal, however, will be light, as that a strong air blast is necessary to blow them out. The mill should be so adjusted as to spread that will produce such a blast of air as will blow over at least 10 per cent. of the grain, then it is certain that all light kernels are being separated.

If a fanning mill would continue to operate in this manner no weed seeds or other impurities would be present in the final cleaned seed. Unfortunately, the average fanning mill in use continues to work in this fashion for more than a few moments, the reason being that the screen, both top and bottom, soon begins to clog. The upper screen, very quickly plug up with small kernels, and so allow the weed seeds and impurities to pass over with the good grain.

Some fanning mills are fitted with devices that keep the screens somewhat on tapping hammers or tapping brushes. These devices, however, are very expensive and very often do not work properly, and so without these extras can be made to do good work providing the operator has the machine at hand every few minutes, remove the screens and carefully clean them with a stiff brush. If this is not done it is quite certain that most of the work of fanning grain will be wasted and that the seed will contain many weeds and other impurities.

Besides cleaning the screens frequently it is, of course, necessary to see that the grain is fed very slowly and evenly on to the screens and that the machine is also turned evenly, but fast enough to produce, as mentioned above, a strong blast of air.

All grain should be put all back twice through the fanning mill in this manner, feeding slowly each time. It is the writer's experience that the capacity of most fanning mills is underrated by the manufacturers on a basis of grain cleaning for market rather than for seed cleaning. Most machines, for instance, that are listed at 30 bushels an hour, will do a good job on seed at about eight bushels an hour only, and if more is forced through it is at the expense of good work. The machine of course is used to its best advantage when applied to finished mills by a grain dealer very well indeed, and machines should be specified to see that there is no chance scalpings or tailings from either the screens or the wind board.

ESAU SELLS HIS BIRTHRIGHT

Lesson Genesis 25:27-34.
Devotional Reading Hebrews 12 14-17.

Explanations and Comments

Isaac's Twins (continued). verses 27-28. Esau and Jacob, twins as to time of birth, were unlike in appearance and character. Esau, the first-born, was rough and hairy; he loved the outdoor life and was a skilful hunter. He was the favorite of his father, who, as is often the case, preferred the son who was unlike him in every way. Jacob was smooth-faced, and handsome, a quiet boy, at-home and he was the favorite of his mother. From these statements of parental favoritism any one could foretell future trouble.

Jacob's Usefulness, verses 29-31. One day Jacob boiled some pottage, a dish made of lentils or small beans. It is like dry much liked in Syria, and when Esau came in from the field weary and faint, he asked for it. He thought that the word "pottage" in Isaac's request to its origin in our text, forgetting that it is supplied from the context and is left out in the Hebrew. Literally, the translation is "Feed me with the red, this red, red. It strikes us with Esau's hunger and impatient eagerness for the savory dish. Therefore was his name called Edom. We are told Edom means "Red." Esau had red hair and complexion and it was red pottage for which he sold his birthright. The name was mentioned to give him this name. He is the reputed ancestor of the Edomites.

Selling His Birthright, verses 32-34. Jacob's answer to Esau. By the birthright he meant the rights and privileges of the firstborn which at Gen. 27, 28 included the blessing of the father as head of the family, who exercised a kind of priesthood, and a double portion of the father's property (Deuteronomy 21:17). The father's chief blessing was given to the firstborn son. It included the covenant blessing first given to Abraham.

His promise of a great posterity, or the inheritance of the land of Canaan. The special Hebrew meaning of Jehovah. It was a sharp bargain that Jacob drove, taking a mean advantage of Esau in his exhaustion and hunger. But he appreciated the value of the birthright as Esau could not, for Esau cared only for the gratification of the present moment. Enjoy the present and let the future take care of itself, was his rule of life.

"Amid all the craft and duplicity of Jacob's nature, there was immense capacity for religious fervor and religious faith. He could draw aside the veil of the unseen, and weigh its promises, and compare its treasures with the shows of earth. He could dream angel-haunted dreams, that flowed into mystic ladder over the gulf of space, linking all worlds. And Esau was occupied with plain, coarse, Jacob-like realities. Nevertheless, strange strivings of a nature which could not be satisfied with appetite, within the narrow limits of his lentil pot, which refused prize unless with heritage which was summed in the word 'birthright.'"—F. B. Meyer.

Esau's Folly, verses 33-34. "Esau lived to death," is an expression we hear and hear. The price reduction to the same footing with the same amount of meaning. "Esau was about to die," he exclaimed, "and what shall the birthright do to me?" What did he care for the birthright? He was only in the distant future? All he cared for now was the satisfying of his present hunger.

"We barter life for pottage! sell true bliss
For wealth, or power, for pleasure or renown!
Thus, Esau-like, our Father's blessing miss,
Then wash with fruitless tears our faded crown."—(Keble).

"YES, I AM 40 YEARS OLD!" says Irene Rich

"YES, I am 40 years old. I don't mind confessing it a bit," says Irene Rich, "and I have two grown daughters of whom I am very proud. A screen star never worries about birthdays, you know.

But in Hollywood, they guard complexion beauty above all else. They know it says youth quicker than anything else.

How does this lovely star guard complexion beauty? Just as so many other Hollywood actresses do—use the skin cream named. "I have used Lux Toilet Soap regularly for years," she says, "and am very grateful for it."

Just you will want to try this fragrant, white soap. The cakes of dollar-a-cake French soap for 10c.!

IRENE RICH and her two daughters (left to right) Lucille, twenty-one years old, Irene in background, Elinor, third mother, and Frances Irene. One of Miss Rich's recent photographs.

Salada Reduces Ten Prices

Salada Tea Company Makes Important Announcement

An announcement of a price reduction has just been made by Salada Tea Company of Canada, Limited which is of special interest to Albertans.

The president of a great monopoly, or the inheritance of the land of Canaan. The special Hebrew meaning of Jehovah. It was a sharp bargain that Jacob drove, taking a mean advantage of Esau in his exhaustion and hunger. But he appreciated the value of the birthright as Esau could not, for Esau cared only for the gratification of the present moment. "Amid all the craft and duplicity of Jacob's nature, there was immense capacity for religious fervor and religious faith. He could draw aside the veil of the unseen, and weigh its promises, and compare its treasures with the shows of earth. He could dream angel-haunted dreams, that flowed into mystic ladder over the gulf of space, linking all worlds. And Esau was occupied with plain, coarse, Jacob-like realities. Nevertheless, strange strivings of a nature which could not be satisfied with appetite, within the narrow limits of his lentil pot, which refused prize unless with heritage which was summed in the word 'birthright.'"—F. B. Meyer.

Esau's Folly, verses 33-34. "Esau lived to death," is an expression we hear and hear. The price reduction to the same footing with the same amount of meaning. "Esau was about to die," he exclaimed, "and what shall the birthright do to me?" What did he care for the birthright? He was only in the distant future? All he cared for now was the satisfying of his present hunger.

"We barter life for pottage! sell true bliss
For wealth, or power, for pleasure or renown!
Thus, Esau-like, our Father's blessing miss,
Then wash with fruitless tears our faded crown."—(Keble).

Gas in the Stomach Is Dangerous

Recommends Daily Use Of Simplified Magnesia To Overcome Trouble Caused By Acid Indigestion

One in the stomach accompanied by a belief bloated feeling after eating are of the most serious evidences of the presence of excess hydrochloric acid in the stomach, overfeeding or ill-advised "indigestion."

Acid stomachs are dangerous because they send irritation the delicate lining of the stomach, often leading to ulcers—sometimes cancer. Physicians advise nine-tenths of these troubles and more by counteracting the diseased gas which distends the stomach and hampers the normal functions of the vital internal organs, often affecting the heart.

It is the worst of folly to neglect such symptoms. Instead, at the first sign of stomach trouble add a little pure Bisurated Magnesia to your drinking water. This will drive the gas, sweeten the stomach, relieve the distress, and counteract the rising acidity before acid-stomach Magnesia the powder or tablet—never a liquid or milk) is harmless to the stomach, inexpensive and pleasant to take. Get a few ounces from your druggist or drug store. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

Effect Economies

Directors Of C.N.R. Have Worked Hard at His Direction

Ottawa, Ont. The directors of the Canadian National Railways worked hard in the interests of the system, W. A. Boyd, K.C., a member of the C.N.R. board told the House of Commons committee on railways and shipping here. Many economies have been effected, and the personnel of the board had at heart the success of the railways, Mr. Boyd cited the report of the sub-committee, of which he was chairman, as indicating the extent to which expenditures had been reduced.

W. N. U. 1040

VALERA POLICY IS TO REMAIN WITHIN EMPIRE

Dublin Irish Free State President Eamon de Valera, during debate in the Dail Eireann on his bill to abolish the oath of allegiance to the British crown made it clear the intention was to get rid of the oath without withdrawing the Irish Free State from the British Commonwealth of Nations.

As a prelude to the president's motion for second reading of the bill, the government was unexpectedly defeated on a side issue connected with the problem of unemployment. The vote, 76 to 68, brought shouts of "Resign!" from the opposition benches but Mr de Valera ignored them, and went on to the debate on the oath.

In quiet, unimpassioned tones, he made his case for the bill.

"We propose to honor scrupulously the pledge we gave the electors, we hold there is no obligation on us to consult the British Government with respect to the action we are taking. Deletion of the oath is quite consistent with the position of the Irish Free State as one of the co-equal partners in the British Commonwealth.

Turning to the proposal to delete the section of the constitution which makes that constitution subject to terms of the Anglo-Irish treaty, a provision which the bill also sends to remove, the president said his purpose was to put the treaty in the same position as other countries put their treaties.

It should not be possible, he maintained, for the courts to say municipal laws were subject to the terms of the treaty.

Mr. de Valera's pronouncement brought former Premier William T. Cosgrave to his feet to attack the bill as "the greatest piece of political chicanery in history." Its very simplicity, he said, was its own condemnation.

"The clause of the treaty is as binding as any other," Mr. Cosgrave declared. "Destroy one and you destroy all."

The bill, he contended, was a breach of the treaty, and the only way to alter that document was by mutual agreement between the Free State and

New Trade Treaty

Canada-New Zealand Agreement May Become Our Exports To Increase

Ottawa, Ont. Canada receives the full British preferential tariff on all exports to New Zealand, with the exception of six items, under the Canada-New Zealand trade agreement made public in the House of Commons by Hon. H. H. Stevens, Minister of Trade and Commerce. The pact is for one year by reason of the coming Imperial Economic Conference and will come into effect by proclamation following parliamentary approval by the sister dominion.

The potential normal market in New Zealand is $20,000,000 annually. Canada's normal yearly share in this Antipodean market has been $19,000,000 approximately, although in 1930 exports to New Zealand showed a value of $13,000,000. Mr. Stevens expressed the highest hope of increasing very considerably Canadian exports to the Antipodes.

On Speaking Terms

Prime Minister and Leader Of the Opposition Have No Personal Differences

Ottawa, Ont. Mr. King speaks to Mr. Bennett, and Mr. Bennett speaks to Mr. King. Prompted by an editorial in the Ottawa Journal the two political leaders solemnly assured the House of Commons they were on speaking terms.

So far as I am concerned said the Liberal leader, after reading the editorial, "I was not aware that I had ceased to be on speaking terms with the prime minister. It is true that I have not felt free to accept some of his invitations he kindly extended, but he knows that I have not been aware of any personal differences between us.

The prime minister said he was glad Mr. King had made this statement. "The last accusation Mr. Bennett continued, "I had the opportunity of speaking to him (Mr. King). I did not observe anything in his remarks which would indicate that he was unwilling to speak to me. Perhaps I spoke to him first on that occasion but inasmuch as there have been many acute differences between us it which he said he would not accept any statement made by me. I assume the newspapers concluded that as a matter of intelligent discrimination, I might decline to make any statement to him."

Expresses Sympathy

Prince Of Wales Is Moved By Plight Of Unemployed

Newcastle, England. The Prince of Wales expressed sympathy for the workless and made a plea to social workers for voluntary personal service to better what he termed deplorable conditions" during a tour of this distressed industrial district of England.

Moved by the plight of the unemployed, he made a little impromptu speech of sympathy to 300 of the jobless at an unemployment centre in South Hartlepool.

"Let me wish you the best of luck," he said. "My sympathy is with you all. I sincerely hope the employment that used to be is with you soon. Hard and hard times will not continue very much longer."

The scheduled speech surprised and pleased the hearers, who acknowledged it with cheers.

Tour Western Canada

Governor-General and Lady Bessborough Plan Western Trip In August

Ottawa, Ont. Circumstances permitting, Their Excellencies, the Governor-General and Lady Bessborough will leave Ottawa in the middle of August for a tour of western Canada.

Lady Bessborough, who has been visiting overseas, will still cross England for Canada on Saturday, April 30, arriving back in the capital about May 9.

WINS BY-ELECTION

Arthur Greenwood, former Minister of Health in the British Labor Government, who was victorious in the Nuneaton by-election when he defeated Ernest Graves, Conservative candidate. Greenwood, 13,566, Graves, 13,262

Reward Is Offered

R.C. Government Making Determined Effort To Discover Bombers

Victoria, B.C. Determined efforts to identify miscreants responsible for a long series of bombings of school buildings and other structures, and tampering with railway tracks in the interior of British Columbia have been launched by the government with the announcement of a reward of $2,000 for information leading to the discovery and arrest of those responsible for sabotage in the Doukhobor area.

T. D. Pattullo, Attorney-General, made the announcement following special efforts to trace those responsible. He attempted to train wrecking and bombing. In addition to the usual police stationed in the Doukhobor districts, 16 special constables have been sworn in under an intensive system of patrols. Guards have been stationed on public buildings.

Premier S. F. Tolmie announced that negotiations were being conducted with the federal authorities in connection with protection of public property on the main transportation system of the province.

A Troublesome Side Line

Say Henry Thornton Wishes C.N.R. Did Not Own Any Hotels

Ottawa, Ont. "I would be delighted if we did not own hotels anywhere. The rest of the railways put together," Sir Henry Thornton, president of the Canadian National Railways, told the House of Commons committee on railways and shipping here Wednesday, April 27. Many of those had been in existence before he became president of the system, while others had been built in order to equalize competition with the Canadian Pacific.

Bank Closing Not Intended

Premier Bracken Expected To Get Assistance From Government

Winnipeg, Man. Premier John Bracken told the Manitoba Legislature's committee inquiring into closing of the Provincial Savings Office that he had never negotiated with Prime Minister R B. Bennett with a view to closing the office He had hoped to get financial aid from the Dominion Government with which to meet heavy withdrawals but was turned down, he said, and only then was closing of the institution considered.

The Savings Office was closed in February after the federal government and banks had refused to grant Manitoba a loan which would have permitted continuance of business, remarked the premier

Hop To Australia

C. W. Scott, British Flyer, Makes Journey In Less Than Nine Days

Port Darwin, Australia. C. W. A Scott, British flyer, landed his aeroplane here to-day after a flight from Lympne, England, beating the former record for an air trip between the two countries by seven hours and 36 minutes.

Scott's time for the 12,136 miles was eight days, 12 hours and 55 minutes, and regained for him the record he lost last year when C. A. Butler made the flight in nine days, two hours and 29 minutes, one hour and 42 minutes faster than Scott's previous time.

Flyer took off from Lympne at 5 o'clock on the morning of April 19, and flew by way of Bruddisi, Italy, across Persia and India to Bourabaya, Java.

Banning Use Of Highways

Government Of Alberta Stand Huge Sum By Protecting Graveled Roads

Edmonton, Alberta. The Government of Alberta saved $500,000 through banning the use of certain highways owing to recent heavy snowfalls and rains, said Premier J. E. Brownlee, Wednesday, April 27 Mr. Brownlee was referring to protests of Edmonton transportation men who claimed the ban prevented them from doing business.

If heavy trucks of buses had been allowed on the highways during the excessive snow and rain, the highways would have been seriously damaged and the cost of repair would have been nearly half a million, said Mr Brownlee.

Hungree On Scissorstone

Geneva, Switzerland. Indictment of the submarine as the only offensive naval weapon by British and United States naval experts, met with sharp opposition from spokesmen for the continental powers on the naval commission at the disarmament conference.

BACK TO LAND PLAN IS HELPED BY RELIEF FUNDS

Ottawa, Ont. —Decision of the Federal Government to apply a portion of relief expenditures now being used in supporting unemployed families in resuming such families to gain a subsistence, where they may eventually establish themselves on a self-supporting basis."

Administration of the scheme will be under provincial jurisdiction with respect to the selection of families, location of suitable farms and settlement of families thereon. While responsibility for administration will rest upon the provinces it is intended that advisory committees, consisting of representatives of province, municipality, federal land settlement branch, Canadian Pacific and Canadian National Railways, will co-operate.

Adoption of the scheme in any locality will be dependent upon the approval and co-operation of the province and municipality concerned

Aviator Says Eskimos In Alaska Suffering

Many In Villages Destroyed By Tidal Wave Without Food

Fairbanks, Alaska. A picture of human misery "no dire as to be almost unbelievable," was drawn by Pilot Art Woodley, who arrived here from a flight over the country between the mouth of the Yukon River and the Hooper Bay region.

The region was struck by a tidal wave last December and several native villages destroyed. Woodley was accompanied on his flight by Very Rev. Francis Monager, superior of Jesuit Missions in Alaska.

Several hundred Eskimos in a number of the villages visited, Woodley and Father Monager said, were virtually without food. The ice cakes, which rode on the tidal wave were carried inland as far as 20 miles, they said and destroyed the Eskimos winter supply of food.

Missionaries have given aid, but their resources were reported by Father Monager to be limited Sickness is growing among the natives and there is a fear of floods as a result of the melting of heavy snow

Jury Was Lenient

Did Not Blame Accused For Kissing Pretty Girl

Warren, Ont —Lips of Warren maidens are so alluring that man can't be blamed for trying to kiss them, a jury of five Warren burghers decided in Judge Raymond Jarvis' division court Papa Honore Dubiens sued neighbor Giroux Ovila for trying to kiss his daughter, Elizabeth, but the jury took a look at Elizabeth and decided that man is weak and Ovila was not to blame.

Though the case was a claim action for $100, the jury brought in a verdict of "not guilty."

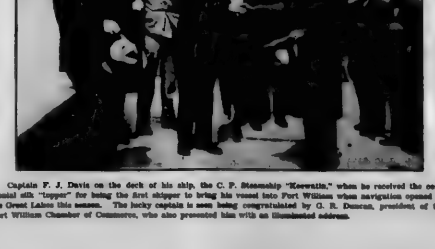
"Not guilty of what?" demanded Judge Pinard.

"Not guilty of anything," the jury replied.

Empire Has Selected

Ottawa, Ont.—F W Turnbull, K.C., member for Regina, has been selected as secretary of the Canadian delegation to the Empire Parliamentary Association Conference to be held at Bermuda. The delegation went via New York and will return May 11.

OPENING OF NAVIGATION



Captain F. J. Davis on the deck of his ship, the C. F. Steamship "Keewatin," when he received the ceremonial silk "topper" for being the first shipper to bring his vessel into Port William when navigation opened on the Great Lakes this season. The lucky captain is seen being congratulated by C. B. Duncan, president of the Port William Chamber of Commerce, who also presented him with an illuminated address.

The Canadian Cattle Trade

Started Revival In Trade With Good Britain In Mind

Canada last year shipped about 38,000 head of cattle to the British market which is a revival of a trade that many years ago ran into even greater proportions and then dropped off certainly The excellent health of Canadian cattle vetted before the most modern in England substantiates the claim made in this country all along

The feeling here is that the trade in the United Kingdom has gradually been coming to realize that the restrictions placed on Canadian cattle are unfair. One restriction is that cattle for shipment to Britain must be quarantined for three days before going on the ship. This may seem trivial but it adds to the cost as do various markings which must be put on the cattle.

Cattle are shipped from Canada on list or store cattle. The former are slaughtered after they reach Birkenhead or Glasgow. The store cattle are inspected by a representative of the British ministry of agriculture who decides which cattle are "store fat" and which are stores. The "store fat" and the store cattle are then both moved to other points under license for sale to farmers who desire to finish them.

The store have then to be held for six days before going to the farmer and the "store fat" for 30 days before going to farmer. In the case of the "store fat" cattle this restriction makes it almost impossible that they be killed at the week-ends when they are ready or not as the long hold would be too expensive.

The Irish Free State cattle meet no such restrictions. The result is that Canadian shippers often do not find it advantageous to ship store cattle to Britain and the bulk of the shipments are confined to fat cattle. It is contended that Canada could supply considerable numbers of these cattle which the British farmer could finish advantageously in all concerned if the restrictions were removed.

Wheat Surplus Is Small

Canada's Carry-Over Estimated As Smallest Since 1928

A survey of the wheat situation shows varying conditions but the bright spot for Canada is the estimate of a comparatively small carry-over with indications of favourable export trade. The balances of the present crop year ending July 31, 1932. Recent estimates place the probable carry-over at 164,000,000, the smallest since 1928 and the 58,000,000 bushels less than on July 31, 1931

In a review of world conditions, the European market is described as "remote today than at any time during the present crop year." World import requirements for the balance of the crop year are placed at from 240,000,000 to 250,000,000. Under present conditions Canada and the United States will be called on to supply 180,000,000 bushels, probably 75,000,000 from each country.

Ice Breaker For R.R. Route

The government icebreaker N. B. McLean will make another trip into Hudson Bay waters this summer under the direction of the Department of Marine. The vessel will probably leave Quebec early in June with a party of engineers and medical experts who will complete the work of charting and clearing the waters and facilitate navigation along that route.

"Wouldn't you love to have been born in Paris?"

"Shut up! I can't speak a word of French."—Dave Hauser, Medrid.

Facing a Crisis

Complete Look Of Demand For Six-month Cessation Of Operations For Dusters

The diamond fringe of the world are facing a crisis caused by the almost complete lack of demand for their wares.

More than 15,000,000 worth of diamonds for which no customer can be found lie in the vaults of the diamond merchants of London, England.

If they were dumped on the market to fetch the best price obtainable the slump in prices would ruin every jeweler in the world.

Scores of diamond throughout the world in 1931 were smaller than in any year since the war.

The normal demand is £12,000,000 worth. Last year fewer than £2,000,000 worth were sold.

Anglo-Russian Trade Agreement

British Government Considering the Matter Of Cancelling the Pact

The British Government is considering the possibility of cancelling the Anglo-Russian trade agreement with a view to a more equal distribution of trade between Russia and Great Britain, it was announced in the House of the Board of Trade, declared in the House of Commons.

The minister said the government had been impressed by the fact there was a huge preponderance of sales of Russian products to Great Britain in return for comparatively small purchases of British goods by the Soviet.

Was Poisoned By King Mitwood

To Be Another Trial

Ramsay's Restaurant in the Strand, London, England, the scene of Landru's gayest life in "the naughty nineties," will be sold at auction soon. The restaurant was established by the owner. The effort seems to be simply to set up the time and in many way or other to prevent the notorious person. That people degenerate into talking machines. They run until they run down. To talk well one must first think well. One cannot say what one does not know. The Daily King Edward VIII. became its patroness.

Russia's Cash Bills

Have Crop Average Title Year Than Ever Before

More tractors and other agricultural machines are in the fields of Russia than ever before and on April 20, the news area was double that on the same date last year.

The government figures showed 16,156,720 acres had been sown on that date as compared with 8,307,920 acres sown on April 20, 1931. This year's planting programme calls for increasing the cultivation of 362,875,000 acres as compared with last year's 262,722,000 a

Many Licenses Needed

So many licenses are needed nowadays for the pursuit of almost any recreation—for shooting game, selling game, employing men, keeping a dog, carrying a gun, slaughtering horses, driving a car, owning a bicycle, fishing a net, or selling provisions.

To Thank God for each day's blessings.

To Present Farmers' Views

Wheat Pool Wants Agriculturists' Interests Represented At Imperial Conference

Saskatchewan wheat pool directors are behind the plans for placing western agricultural views before the conference.

Full record with these plans of the recently-organized co-operative conference of Saskatchewan as agricultural interests is to be laid before the forthcoming conference at Ottawa, in July, the views of western agriculture, was expressed by the directorial members of the Saskatchewan wheat pool, said in Regina recently.

Representatives of various agricultural bodies have been invited to attend, including the pools, the Saskatchewan Rural Municipalities Association and others met recently to discuss and formulate plans for drawing the attention of imperial statesmen to the problems of western agriculture. A committee was appointed to go further into the question and to make recommendation.

The committee went to secure further information with a view to holding a second conference of Saskatchewan interests.

The committee appointed has now stated that joint action on the support of all agricultural bodies be taken in Alberta and Manitoba before the conference.

To Consume Well

Gas Stove Study People, Ladies, Should Know

We do much talking. Some of this talking is profitable. Some is not. Here you over paid close attention to the fact that that is not the time to say cookery receipts or miscellaneous "gas-gossip"? asks a correspondent. The short answer is be simply to set up the time and in many way or other to prevent the notorious person. That people degenerate into talking machines. They run until they run down. To talk well one must first think well. One cannot say what one does not know. The Daily King Edward VIII. became its patroness.

Fox Farm Not Farm In Eyes Of Law

Judgment Confirms Assessment Put On Property in Quebec

A fox farm is not a farm in the eyes of the law as far the tax assessor is concerned, Mr Justice Stackhouse decided in Superior Court at Montreal The judgment confirmed the assessment placed by the town of Laval Des Rapides on property of the Laval Des Rapides Fox Farms

Prior to 1931 the assessors had assessed the property at $3,500 as farm land under cultivation but in that year a change was made and the property was dropped from the 'farm' category and the assessment was increased to $15,481 The action is now confirmed by the court

His lordship pointed out that the law relating to taxation of farm lands requires that the land should "be under cultivation or farmed by a tiller farmer or market gardener who lives upon the produce thereof."

Hay Sent By Post

Can Shipped In Parcels For Rural-bound Cattle

A ton of hay was mailed early in April by parcel post to feed dairy cattle in the snow-bound town of Riverton, Colo., which had been isolated for several days.

A Durango firm was unable to ship the hay because the railroad was blocked by snow slides. So it was placed in bundles to conform with the maximum size and weight specified for parcel post and mailed. It required 214 dollars worth of stamps. The hay was transported by pack mules at a cost to the post office department of two cents a pound, said a report to the State Utilities Commission.

A Real Runner

The young athlete had been bragging about his powers as a runner to his country cousin.

Presently they came to a corner of the street and a sudden gust of wind whipped off the hat and carried it down the street. He, however, made no attempt to retrieve it.

"You are such a wonderful runner, and yet you cannot get my hat," said his cousin indignantly.

He gave a supercilious smile.

"Just you wait a moment," he said. "I must give it a hundred yards start before I chase it."

It Takes No Extra Time

To say "Thank You"
To think kindly of your associates
To be orderly and neat.
To hold your tongue.
To smile when you meet your friends.
To take orders from superiors cheerfully.

Must Be Given A Fair Chance

Insurance and Real Estate Understanding Pastor In Churchill Home

The Churchill route, if given a fair chance, will prove itself economically practical in a shorter period of years than did the St Lawrence route, according to Lieut.-Colonel F J James, of Regina, vice president of the "On-to-the Bay Association

Other points stressed by Colonel James in an interview were Resolutions under cultivation and the great fluctuation in the farmer or market gardener who lives upon the produce thereof."

New Instrument For Symphony Orchestras

Carpenter's Saxo Tuba Solo Place to Recruit Concert

Add the lowly carpenter's saw to the list of symphony orchestral instruments. A bandville stage novelty, the saw took a solo place in a recent concert of the Cincinnati symphony orchestra. The player was Robert Alter, Cincinnati business man. He played composition written especially for his "instrument" by the solo violinist of the orchestra and the solo flutist.

"Don't you think she's ignorant?"

"Ignorant! Why, my dear, you've never met a woman who knew less about more things."

"I can't let you have three weeks' holiday now!"

"Then may I have an advance of salary so that I can send my wife away for a holiday? I must have a rest."—Strikeabuna, Cairo.

Planning New Antarctic Expedition

Undertaking what Sir Ernest Shackleton called "the last great adventure in South Polar exploration," Lincoln Ellsworth (left inset), is planning a flight in the dirigible Norge over the great Antarctic continent in September, 1933. Ernest Holmes (right inset), Australian explorer, who accompanied Shackleton on the South Pole, will plan the expedition, which will establish its base at Framheim, on the Bay of Whales, not far from the bases of Admirals Byrd and Byrd. It is planned to cover the 1,500 miles that separate the Ross Sea, on one side of the Antarctic, 2,500 miles. Much portion of the above map shows the unexplored land. Shaded portions represents explored land.

Reduce the Acid

SICK stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated

Too much acid makes the stomach and intestines sour. Alkali helps acid instantly. The best form is Phillips Milk of Magnesia. Because some bottles those medicines many times its full strength of Phillips'—that's why and with physicians everywhere

Take a spoonful in a glass and you'll unhappy condition will probably end in five minutes. There's no alkali known which is safer, quicker and better-liked methods will prove it to you. Get genuine Phillips Milk of Magnesia prescribed by physicians in correcting excess acids.

CHAPTER XX.

The Shadow Of the Future

Gold of gorse and purple of heather, a shimmering haze of heat quivering above the undulating green of the Moor, and somewhere, high up in the cloud-flecked blue above, the exultant, piercing sweet carol of a lark.

"Oh! How utterly perfect this is!" sighed Jean.

She was lying at full length on the springy turf, her chin cupped in her hands, her elbows denting little cosy hollows of darkness in the close mesh of green moss.

Tormarin, equally prone, was beside her, his eyes measuring, not the open vista of rolling moor, hummocked with jagged tors of brown-grey stone but the sun as it rioted through a glory of red-brown hair and touched changeful glints of gold into topaz eyes.

There was a queer little throb in Jean's voice, the low note of almost passionate delight which sheer beauty never failed to draw from her. It plucked at the chords of memory, and Tormarin's thoughts leaped back suddenly to that day they had spent together in the mountains when, as they emerged from the pinewood's gloom to the revelation of the great white-pinnacled Alps, she had turned to him with the very cry: "It's so beautiful that it makes one's heart ache!"

"Do you remember——" he began involuntarily, then checked himself.

"'M-m ?" she queried. The little interrogative murmur was tantalizing in its soft, note of intimacy.

The Jean of the last few days the days immediately following their quarrel—had temporarily vanished. The beauty of the Moor had taken hold of her, and all the mockery and little-sweetness which she had lavishly reserved for Tormarin's benefit was absent from her manner. She was just her natural sweet and wholesome self.

"'M-m? Do I remember—what ?"

"I was thinking what a pagan little beauty lover you are! You must adopted the Alps. Now you are worshipping Dartmoor."

She nodded.

"I don't see why you should call it pagan. Though I should say it was equally Christian. I think we were meant to love beauty. Otherwise there wouldn't have been such a lot of it about. God didn't put it around just by accident."

"Quite probably you're right," agreed Blaise. "In which case you must be" he smiled an exasperating Christian."

"Positively I believe they're talking theology!"

Claire rose gliddily gay and free from the previous emotional which normally dulled the cadence of youth broke suddenly on their ears as she and Nick, rounding the corner of a big granite boulder discovered the two recumbent forms

"You disgustingly lazy people—she pursued indignantly. Everybody's dashing wildly to and fro unpacking the lunch baskets while you two are just lounging here in blissful idleness"

It's obvious with me" murmured Tormarin lazily. And a moment Claire, neither you nor Nick appear to be perversely overtaxing yourselves beneath the present circumstances."

I carried some of the drinks up this confounded hill" submitted Nick. "And damned heavy they were too! I think I shall positively why people should be so thirsty at a picnic I'm sure Blaise has shaved in enough liquid refreshment to float a ship.

"Praise be!" interpolated Blaise piously.

"Oh we've done our share" supplemented Claire. "And now we're going to the spring who lives here to have our sandwiches cold."

"Before lunch" subjoined Nick so that in case they're depressingly few you can slay us with flagons afterwards"

Jean sat up suddenly, her face slightly white and interested.

"Do you mean that there is a real gypsy who tells real fortunes?" she demanded.

"Quite quite real. She's supposed to be extraordinarily good," replied Nick "She is a lady of property, though since she has acquired a few square yards of the Moor from the Duchy and built herself a little shanty she has the reprieve in the name of Keturah Stanley"

"I should like to have my fortune told," murmured Jean meditatively.

"I'll take you," volunteered Blaise.

There was a suddenly alert look in his face, as though he, too, would like to hear Jean's fortune told.

"We'll all go, then," said Claire "You must let Keturah tell yours as well, Blaise."

He shook his head.

"Thanks, no," he answered briefly "I know my fortune quite as well as I have any wish to."

Tormarin's curt refusal somewhat quenched the gaiety of the moment, and rather soberly they all four made their way down the slope to where, in a little sheltered hollow at the foot of the tor, the outright glinted on the corrugated iron roofing of a tiny two-roomed hut, built of wood.

Outside, sitting on an inverted pail and contentedly puffing away at a clay pipe, they discovered a small shrivelled old woman, cunning herself, like a cat, in the midday warmth.

The lifted face was brown and weather-parched, revealing an immensely old, delicately-featured face, which might have been carved out of yellow ivory. It was a network of wrinkles, colourless save for the piercing black eyes that sparkled beneath arched black brows, while the fine-cut nostrils and beautifully moulded mouth spoke unmistakably of race—of the old untainted blood which in some gypsy families has run clear, unmixed and undiluted, through countless generations.

There was an old dignity about the shrunken, still upright figure as she rose from her seat—the freedom of one whose work has never bowed to the yoke of custom. And a woman whose kingdom is the sun and sea and earth and air as God gave them to Adam and when the visitors had accosted her she greeted them in such a rich, unfounded bell-mouthed Nick And damned heavy they were too! I think I shall positively why people should be so thirsty at a picnic I'm sure Blaise has shaved in enough liquid refreshment to float a ship.

"Praise be!" interpolated Blaise piously.

"Oh we've done our share" supplemented Claire. "And now we're going to the spring who lives here to have our sandwiches cold."

"Before lunch" subjoined Nick so that in case they're depressingly few you can slay us with flagons afterwards"

Jean sat up suddenly, her face slightly white and interested.

"Do you mean that there is a real gypsy who tells real fortunes?" she demanded.

"Quite quite real. She's supposed to be extraordinarily good," replied Nick "She is a lady of property, though since she has acquired a few square yards of the Moor from the Duchy and built herself a little shanty she has the reprieve in the name of Keturah Stanley"

"I should like to have my fortune told," murmured Jean meditatively.

"I'll take you," volunteered Blaise.

There was a suddenly alert look in his face, as though he, too, would like to hear Jean's fortune told.

"We'll all go, then," said Claire "You must let Keturah tell yours as well, Blaise."

He shook his head.

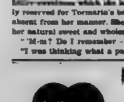
"Thanks, no," he answered briefly "I know my fortune quite as well as I have any wish to."

Tormarin's curt refusal somewhat quenched the gaiety of the moment, and rather soberly they all four made their way down the slope to where, in a little sheltered hollow at the foot of the tor, the outright glinted on the corrugated iron roofing of a tiny two-roomed hut, built of wood.

Outside, sitting on an inverted pail and contentedly puffing away at a clay pipe, they discovered a small shrivelled old woman, cunning herself, like a cat, in the midday warmth.

The lifted face was brown and weather-parched, revealing an immensely old, delicately-featured face, which might have been carved out of yellow ivory. It was a network of wrinkles, colourless save for the piercing black eyes that sparkled beneath arched black brows, while the fine-cut nostrils and beautifully moulded mouth spoke unmistakably of race—of the old untainted blood which in some gypsy families has run clear, unmixed and undiluted, through countless generations.

There was an old dignity about the



Nerves A Complete Wreck but By Half The Right

Mrs. John Rose, Park Lake, Ont., writes:—"I was troubled so much with my nerves I was a complete wreck.

I could not do my work, and would have to sit up half the night on account of not being able to sleep.

One day a friend recommended Milburn's Heart and Nerve Pills. I used one box and can truly say by the time I had taken all I found myself well up over."

Price 50c a box

Sold by all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

"No repairs in 22 years," says home owner

This Year's Exhibition

Visitors are delighted with the seamless operation of my doors," says a home owner of Monongah, West Virginia. The doors and hinges have been in use service 22 years, and during this time I haven't spent a cent for repairs. I've never used anything but 3 in One oil."

Many home-owners who pride themselves on the spotless appearance of their homes are always about the lubrication of hinges and locks. Try a few drops of 3-in-One Oil today and see how quickly it brings out the dirt and squeaks. For 3-in-One, a blend of mineral, animal and vegetable oils is distinctly different from all other oils. It clean and protects as well as lubricates.

For 35 years 3-in-One has been recommended as the best oil for sewing machines, vacuum cleaners, lawn mowers, hinges and general household lubrication. Insist on 3-in-One Oil at good stores everywhere. For your protection look for the trade mark 3-in-One, printed in red on every package.

Claire and Nick were the first to dare the rapids. The old woman looked on them in follies her into the cottage, while Tormarin and Jean waited outside and when they emerged they were both very laughing their faces eager and half excited like the faces of children promised some delightful treat.

She's given you luck then?" said Jean, smiling in sympathy

The gipsy interposed quickly.

"Even I for me to give any one luck away the luck But I know that, back of they gave black clouds the young lady's—a mortal fear! of, the sun shines natural. I tell ee me dear"—nodding encouragingly to Claire, while her keen old eyes narrowed to pin-points of light. "you'll see it, yourself and afore another year's crop by Ee- Bay! You'll know as I tell'el ee dearie"

Then, with a sudden gesture that summoned Jean to follow her, she disappeared once more into the interior of her hut

Jean hesitated nervously in the doorway For a moment she was conscious of an awful feeling of dismay for the impending interview a dread of what this woman, whose eyes seemed the only live thing in her old, old face, might have to tell her

"Come with me," she appealed to Blaise And he nodded and followed across the threshold.

The scent of a peat fire came warm and fragrant to her nostrils as she stepped out of the sunlight into the comparative dusk of the little shanty, mingling curiously with an aroma of savoury stew which issued from a big pot hung above the fire, bubbling and chuckling as it simmered.

The gipsy, as though by force of habit, gave a stir to its contents and then, settling herself on a three-legged stool, she took Jean's hand in her wrinkled, claw-like fingers and peered at the palm in silence.

"Your way bairn so plain to me as t'other young lady's," she muttered at last, in an odd, sing-song tone. "There's life an' death an' fire an' flame afore ye see the sun shinin' clear. . . . And if so be ye take the wrong turnin', you'll never see it. And there'll be no pointer to guide ee. Tes your awn smart must tell ee how to walk through the darkness. For there's darkness comin' . . . . black darkness."

(To Be Continued.)

Good Reason For Economy

A head salesman went into a drug store the other day and ordered a plate of crackers and a glass of water. A friend who happened to be in the same store, asked him: "What's the matter, Mac? On a diet?"

"No," snapped the other. "On commission."

Nearly 600 types of cheese are produced in the United States.

Paris is opening many new schools.

Investors Keep Busy

Automatic Oyster Opener Price Of This Year's Exhibition

Double-action fly swatter—combustible soap—ball-ringing fishing rods—toothpaste tube collapsers—automatic oyster openers—adjustable baby feeders

These are among the 5,000 inventions arriving at Grand Central Palace for the fourth international patent exposition.

The new fly-swatter operates with a scissors movement and eliminates the possibility of spots on walls or furnishings.

The soap turns out to be a squeegee rubber mitten with a ventilated palm in which liquid is enclosed. The suds force their way through. The toothpaste tube collapser is two rollers turned by a small crank and forces out every last drop of the paste

One fishing rod has a bell attached and can be stuck in the ground while the angler dozes. When the fish bites the bell rings

The automatic oyster opener is really the prize of the show. Its inventor is Oscar Abbatis, of Baltimore, Md. The device is operated by means of a crank which forces a flat, spear-shaped knife between the shells of the oyster opening it in a minute.

The baby feeder is merely an adjustable bottle which can be attached to the crib and never shakes the reach of the occupant.

Nigeria Oil Agency come in the train of advance. The victim himself is down, and sleep is driven from his eyes. What grateful relief is the immediate effect of Dr. J D Kellogg's Asthma Remedy It banishes the frightful conditions clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child Insist on the genuine at your nearby druggist

Britain's Youthful Peers

Thirty-Two Are Not Old Enough For House Of Lords

Britain has 32 peers who cannot take their seats in the House of Lords because they are not of age Many bearers of old titles are still playing with their blocks, among them being Lord Wrashall, three, and Lord Montagu, of Beaulieu, five. Lord Galesborough is eight, Lord Haig, son of the late British Commander, is 13. And the Earl of Shrewsbury and Talbot who is premier earl in the peerages of both Lord England and Scotland, is 17, as is Lord Normanbrae, premier viscount of Scotland.

Persian Rules Invaluable

Persian Rules Invaluable to the whole family To the mother, a burden and to loveliness. To the child a soothing, healing balm. And to the father, a splendid hair fixative and cooling shaving lotion. Persian Rules tones and refreshes the skin Hence hands delightfully soft and white Indispensable to dainty women. Little gentle rubbing and it is absorbed. Use Persian Rules, making the skin truly rose-leaf in texture

She—Why did the land agent speak of that property as a parcel?

He—Because it is tied up, I suppose.

ACIDITY FOR 10 YEARS

Relieve to Found the Remedy

Many people endure suffering unnecessarily. This man died. If he had known ten years ago what he learned to-day, he would have been spared a great deal of suffering.

"I had suffered with a few hours in appreciation of your Kruschen Salts. I had suffered over 10 years from chronic acidity of the stomach. I tried nearly everything, and was advised by a friend to try Kruschen, which I have taken for the last few months, and I am pleased to say I have had no return of the acidity." Kruschen Salts acidity neutralizes acid, takes all the unwanted out of it, and puts it right from the beginning. And by stimulating your organs of elimination to perfect regular action, Kruschen will prevent the harmful toxins from ever accumulating again. After that you'll experience no more misery after meals. Kruschen will keep your inside clean and sweet. Pure and healthy blood will be your reward. Kruschen is sold by every chemist in the world, and costs only a few pence. Ask for a bottle and insist on it being supplied, and you'll be immensely pleased.

Little Helps For This Week

"Then hast put gladness in my heart."—Psalm IV. 7.

Cheerfulness
Doth express
A settled, pious gladness,
Which is not prone to grudging,
From murmuring refrain.
—Anne Collins.

What indeed does not that word cheerfulness imply? It means a contented spirit; it means a pure heart; it means a kind and sunny disposition; it means humility and charity; it means a generous appreciation of others, and a modest estimate of self.
—William Makepeace Thackeray.

It is a Dutch proverb that "point costs nothing," such are its pruning qualities in dang-rous growth. Well, sunshine costs less, yet is finer pigment; and so of cheerfulness, the more it is spent, more of it remains Ralph Waldo Emerson

When you CAN'T QUIT

A HEADACHE is often the sign of fatigue. When tiredness throbs in your head, it's time to rest. If you can't stop work, you can stop the pain. Aspirin will do it, every time. Take two or three tablets, a swallow of water, and carry-on—in perfect comfort.

Don't work with nerves on edge or try all day to forget some nagging pain that Aspirin will end in a jiffy! Aspirin can do you no harm; just be sure that it is Aspirin with Bayer on each tablet.

In every package you'll find proven directions for headaches, colds and sore throat: neuralgia, neuritis, etc. Carry these tablets with you, and be prepared. To check a sudden cold on the street-car; quiet a grumbling tooth at the office; relieve a headache in the theatre; spare you a sleepless night when nerves are "jumping."

And no modern girl needs "time out" for the time of month! Your little box of Aspirin tablets is sure relief for all such pain.

Take Aspirin for any ache or pain, and take enough to end it. It can't harm you. At drug stores everywhere. Made in Canada.

A Quick Way to.... Restore an Estate

Are you among the thousands who have suffered from the great depression? Have you had to make a hasty survey of your financial position only to find that you are worth less by thousands of dollars than you were? Do you realize that death compels a liquidation of securities at current values?

How can that situation be met?

You can instantly restore your estate to a healthy basis by taking out more insurance. The sure way is to insure to the point of safety — at least.

Over five hundred million dollars of life insurance was taken out in the Sun Life Company last year — much of it by level-headed men who balanced their accounts by this simple method.

oooooo

Don't forget the Picnic to be held at Tynes Valley on June 3rd. Baseball, Basketball, Horse Shoes, Pitch Pond and various other items.

Supper will be served at 6 o'clock.

An amendment to Manitoba's Mortgage Act, enabling loan companies and vendors of land to advance seed grain to farmers, was necessitated when the Dominion government failed to agree to pay one-third of any losses that might be sustained if any through seed grain loans advanced by municipalities under the Seed Grain Act. The municipalities were loath to make loans of seed grain without government backing. However, the amendment to the Mortgage Act will enable farmers to borrow seed on the strength of a promissory note, describing the land to be seeded, with the note filed with the clerk of the country court.

Worms more than anything else have made fertile soil fit for plants.

LAMONT NOT TO HOLD AGRICULTURAL FAIR

Lamont will hold no agricultural fair this year. This decision was reached at a meeting of the Board of Directors held in Lamont last week.

The government grant, which has amounted to 50 per cent of the prize awards given in other years, has been stopped this year, and while other points are carrying on the event, the directors at the meeting thought that under present conditions it would be an overwhelming load.

At the meeting of the Board it was decided to hold a sports day, the date of which has not yet been set.

FERDIE'S DAY, SATURDAY, MAY 21st

Ferdie's Day at the University of Alberta which was formerly advertised for April 9th and was postponed on account of the bad condition of the roads at that time, is to be held on Saturday, May 21st.

The program will commence at 10:30 a.m. and will follow through as originally planned. With the main rush of spring seeding over, and favorable road conditions, it is expected that a large number of farmers and livestock men through out the province, will arrange to spend the day at the University.

Here and There

Forty British sportsmen will make up five parties which have arranged to fish trout and salmon on the Miramichi River, N.B., during 1932, according to announcement by the provincial director of information and tourist travel.

Canada shipped more than 5,000,000 pairs of rubber and rubber-soled boots and shoes valued at six approximately $4,000,000 to more than 30 countries during 1931, according to information given out by the Dominion Department of Trade and Commerce.

Travelling Canadian Pacific agents across the Dominion from Detroit and visiting Niagara Falls, Toronto, Ottawa, Montreal and Saint John prior to sailing by S.S. Melita for their home countries, eight Overseas Ford Motor cars were lavishly entertained at all cities they stopped at.

S.S. Montclare, the ship that inaugurated Canadian Pacific transatlantic cruise service at Halifax this winter after a lapse of twenty years, saluted the port with a 21-gun blast of her vibrant Grand Friday evening when she sailed on her last visit to Maritime ports for the 1931-1932 season.

Sentinel will send an official Trade Mission ship to Canada this spring with a view to developing closer business relations with the Dominion. Over a hundred British firms have already booked space on the ship which has been fitted out for the purposes by the Corporation of Glasgow.

Her Majesty, Queen Mary, and her two sons, the Duke of York and Prince George, showed keen interest in the Canadian Industries Exhibition in the Bermuda Pavilion at the Empire Exhibition, Wembley, on Empire Day, when, on behalf of their visit, the Queen was received by Hon. G. Howard Ferguson, High Commissioner for Canada.

The highest Canadian honorarium ever awarded was made in March when Rear Admiral Richard Evelyn Byrd, Chilton White of Boyd, Minnesota, U.S.A., was awarded the Hubbard Medal by the National Geographic Society for his flight over the South Pole. The presentation was made by Dr. Gilbert Grosvenor, editor of the "National Geographic Magazine" in the Constitution Hall, Washington, D.C. The medal, first awarded in 1904, is named in honor of Gardiner Greene Hubbard, founder of the Society and father-in-law of Alexander Graham Bell.

Bargain rates are forecast for emigrant trains on the Canadian Pacific Railway, said C. B. Foster, passenger traffic manager of the railway, on his recent arrival in Winnipeg after an official visit to the Pacific Coast. The successful experiment in popular low rates prevailing in Eastern Canada this year has invited consideration of the extension of the project to the West, he added.

In commissioner of his policy at home—it is said between the higher centres of population in Eastern Canada and the Canadian Pacific Railway will on April 9 organize one of the most ambitious of these projects by running a round trip excursion from Toronto to Montreal at a rate below one-fourth of that of the ordinary tourist fare. There is every indication of heavy participation in the excursion

Annual Report of The Fort Saskatchewan Cemetery

To All Interested in the Fort Saskatchewan Cemetery

In 1929 the Fort Saskatchewan Women's Institute undertook to take the land in having the Cemetery taken care of and each year since then about 200 persons have been circularized in this connection. In 1929 over sixty persons gave cash donations amounting in all to $811.50. The following year twenty-three persons contributed and the total receipts for that year were $346.85. Last year only twelve persons contributed money and the total receipts amounted to $190.55.

This decline in revenue does not necessarily mean a corresponding decline in interest as many gave very generously during the first years when the money was most needed to put the land in shape and to buy the shrubs.

The Cemetery now has fine sturdy lilac and honeysuckle shrubs on three sides and last year a windbreak of spruce was planted all along the north side with wonderful success. This was accomplished without any expense through the good offices of Messrs W. A. Graham, G. T. Montgomery and Warden J. D. McLean, all of whom volunteered their services, and to whom the Committee hereby makes public their thanks and appreciation.

These years have made a wonderful improvement in the general appearance of the Cemetery and if it is to be kept up funds for a caretaker must be forthcoming. We know that money is scarce but if every family represented would give even a little, there would be plenty to carry on.

To all those who have helped from year to year with money or labor, there must be a sense of satisfaction in seeing the gradual transformation of what was once a neglected and untidy place. Shall we keep it up? Will you help?

In order to reduce expense, no letters will be sent to local people who will please take this report as a personal appeal. All contributions should be given to Mrs. J. D. McLean or myself and these will be acknowledged in the Record.

The financial statement follows:—

Teamwork

The two words so term embodying the thing most needed now and most likely to be needed in an increasing way for the long pull back to more satisfactory economic and business conditions is, in our opinion, "Teamwork". If there ever was a time which called for "the long pull and the strong pull altogether" that time is now.

A former following his horses as he guides a plough along the furrows knows what teamwork on the part of the horses means: also teamwork between the horses and the ploughman. Pooling by machines the full value and necessity of such teamwork in an even more striking manner when it is lacking, and, as the outcome, proper results are not being achieved.

Men participating in the many fields of sport have a full appreciation of the value of teamwork. Every successful captain of a team drills it into his men. But how frequently one reads that such-and-such a team, while composed of brilliant and superior individual players, lost out to an individually inferior team because of a lack of co-ordinated effort, in a word, teamwork. And this lack of teamwork all too frequently results because one or more of these individually brilliant players desire to keep themselves in the "spotlight," play to the gallery, and win plaudits for themselves rather than for the team as a whole.

Success in military exploits depends to a very large extent upon teamwork, the co-ordination of every arm of the service to the achievement of one common object, the co-operation of each unit with every other unit, both in preparation and final action, to the end that victory be won. Without this "union is service", the bravest men in the world are likely to suffer defeat at the hands of an inferior but more united force. Victory does not always rest with the big battalions, but with the compact body which moves and acts with precision as one man.

The same principle applies with equal truth and power in the realm of national, political, and community life. If in an army the artillery considered that it, and it alone, was the effective instrument in winning battles, and, instead of co-operating with the infantry, tanks, machine-gunners and aircraft, actually ignored and even strove against them, the enemy would win. Yet, how often groups of people having a common object in community effort or in the political arena, instead of working together to achieve that object, actually oppose each other solely because they do not agree upon every detail of their programme, nor see eye to eye as to the methods by and through which the reforms desired by all are to be brought about. And the result, of course, is victory for the other group or policy to which they are all opposed.

There are many time-honoured maxims which point the truth that teamwork is essential to success. "In union there is strength," "United we stand, divided we fall", while for the enemy forces there is always the further maxim "Divide and rule."

Teamwork can only be brought about by a willingness to compromise. Some good people regard the word "compromise" as something essentially wrong, as a great evil. True, right cannot compromise with wrong, nor honesty with dishonesty, but where two are striving for what both believe to be right, and in opposition to what they are agreed is unwise or wrong. It is the height of folly to divide into separate and opposing camps, weakening each other and the cause they both desire to see triumph because of minor differences of opinion as to exact objective to be achieved or the methods by which it shall be achieved. Unless there is compromise, rather than each one hastening upon separate courses of their own, to confusion or others, failure for both must inevitably follow and victory be recorded for the common enemy.

The experience through which the world is passing have impressed a majority of people with the need for more or less radical changes in our economic and social structure. That change is necessary is fairly well recognized, but some desire to move much more rapidly and drastically than others. Some believe the remedy for our ills is to be found in co-operation with others, again, advocate something else. All want improvement, reform. But through divided councils, lack of co-operation, in a word, an absence of teamwork, nothing but confusion has thus far resulted, while those interested, he who are more or less satisfied with things as they are, by working together, are enabled to dominate.

This condition prevails in society, business, community effort, in municipal, provincial, and international politics. It is even found in family life. It is fatal to progress—a continuously delaying factor in the onward march of reform.

What the world needs today is not antagonisms, but mutual sympathy not competition, but co-operation, not isolated effort, but co-ordination of effort—not single-handed play, but teamwork. And these things can only be brought about by compromise. So, let's compromise and develop mutual strength through teamwork. The world will then begin to get somewhere, and out of the slough of depression in which it continues to flounder.

Tee Bad For the Wife

A farmer appeared at the other day at a theatre that is accepting two dozen eggs the price of admission. He handed a paper sack to the ticket-taker.

"There's a couple of dozen eggs, mister," he said. "I want to see your show. I'd have brought the missus with me if the hens had shelled out a little better."

Called His Shot

The time had come to dish up the rations, and in an Irish regiment the quartermaster and his assistant had been portioning them out in preparation for distribution.

The assistant turned to the quartermaster and, with a twinkle in his eye, said, "Av ye please, sorr, there's a bad ounce. What'll I give it to?"

"Keep it yourself," Mike replied the quartermaster.

Chinn Leading Commerce

China is the leading customer for complete aircraft made in the United States. In both 1930 and 1931 China was the largest buyer of all other countries. The Chinese like American machines because their territory bears a remarkable similarity to flying conditions to those in the United States.

Worms and tapeworms are the vitality of children and cannot thrive. A simple and effective remedy is Miller's Worm or Graves' Worm Exterminator.

Saskatchewan now has Farms and Alberta 97,000.

Keep On Working

Despite Disarmament Talk New War Weapons Being Invented

Just as a fillip to the disarmament discussions, we suppose, we are advised that Maddelds Limited, munition manufacturers of Sheffield, England, have developed a high explosive shell that will pierce the best quality of armor plate one foot thick, from a distance of ten miles.

While the world talks much of disarming, the men who sit back and invent new schemes for killing millions keep right on working—and producing results.

Down in Weight and Very Pale

Mrs. Beare Thankful For Way in Which Dr. Williams' Pink Pills Helped Her Back To Health

Colonel Weight and Color

Mrs. Mable R. Beare, New Westminster, B.C. "After a long and very trying illness, which began in 1930, I found I could not eat a hearty meal. In fact, I was afraid to go away from the table hungry, from a dislike I dared not taste, and also very pale. I had often read about Dr. Williams' Pink Pills, so thought I would give them a trial. I soon found I was able to eat with any one, and life began to look brighter. My weight came up to 118 lbs. and my lips and cheeks had lots of color. I am more than thankful I ever took Dr. Williams' Pink Pills, and I only hope others will try them."

Dr. Williams' Pink Pills actually create an abundance of new red blood, which is the reason they have given new vitality and health to thousands of such nervously exhausted women. Equally helpful for growing girls. Try them. At your druggist's in the new green container. 50c.

The First Bicycle

A Frenchman, Count Sivrac, is said to have originated the idea for a bicycle. His first machine appeared in Paris during 1690. It consisted of a wooden frame and two wheels. Locomotion was achieved by pushing on the ground with the feet.

Low Ocean Fares

Britain Preparing For Greater Invasion Of Tourists From Canada Than Ever Before

British is preparing for a greater invasion of tourists from Canada and the United States than ever before, this season. This is due to more determined efforts on the part of the Travel Association of Great Britain and Ireland, who have highly organized their resources for welcoming visitors to the Old Land.

Recent ocean rate reductions to the extent of 30 per cent have now made it possible to spend a summer holiday by going to Europe, doing whatever sight-seeing one's time permits, and returning to this country for an all-inclusive charge of less than seven dollars a day, according to the Cunard and Anchor-Donaldson lines. These tours in Europe include the best sight-seeing in the time available, chiefly by motor coach, as well as by rail and steamer. These tours also include visits to the Continent, in France and Belgium especially.

"Modern Third Class" is used for the ocean crossing and to many people who have experienced Third Class data back to many years ago when they first came to Canada, this class offers surprising comfort. Nowadays, in fact, third class is more comfortable than first class was thirty or forty years ago.

Ontario and Quebec provinces expect to reap some benefit from the mass of tourists who pass through Montreal on their way to Europe, as many western Canada and United States visitors spend some time seeing Ottawa, Toronto and Montreal, en route.

Like a Grip At the Throat.

For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in utter dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passages as thermometer can testify. It is sold by dealers everywhere.

Large shipments of construction materials continue to arrive in Manchuria.

Eggs laid in spring keep better in water glass than do eggs laid in summer or fall.

Some Of The Advantages As Well As Disadvantages In Growing Of Reward Wheat

(By H. G. L. Strange)

As the wheat fields in Western Canada began to extend northward the need was felt for a wheat variety that would mature earlier than Marquis so as to avoid damage from early fall frosts. Several new varieties had been produced by plant breeders to fill this purpose, notably the Red Bobs selections, originated by Dr. Seager Wheeler, Supreme, Early Triumph and Red Bobs 222, the latter having been re-selected by the University of Alberta, also the varieties Garnet and Reward produced by the Dominion Experimental Farms, Ottawa.

Because of its high yield Garnet wheat quickly became popular and in the last few years has increased by leaps and bounds in Northern Alberta and Northern Saskatchewan. Some concern, however, has been felt that because the milling qualities of Garnet are somewhat different to those of Marquis, and because Garnet flour has a slightly yellowish tinge, that the quality and reputations of Canadian wheat on the world's markets might be harmed if too large an amount of Garnet should be grown.

Because of this concern some have recommended that none of the other earlier varieties might be better. Reward wheat is one that is widely recommended.

Reward was originated at the Dominion Experimental Farm, Ottawa, and is the result of a cross between Marquis and Prelude made by Dr. Charles Saunders in 1912. Under the direction of Mr. L. H. Newman, the present Dominion Cerealist, the variety was tested for several years by several hundred co-operators in different parts of the west. Finally the variety was released by the Minister of Agriculture for further trials by farmers in 1928.

Reward wheat has this year been accepted for registration by the Canadian Seed Growers' Association, which means that the scientific plant breeders of Canadian institutions consider that the variety is of good economic value and is well-suited for use in Western Canada. There can, therefore, be no need for hesitation in the use of this variety by any farmers who find that their districts and farms are suited to Reward wheat. The Dominion Cerealist has now standardized the variety and Registered Seed will be true to name when sold and sealed in the east, will undoubtedly be available to farmers in the near future.

The official description of Reward wheat is as follows: Time of maturity 5 to 6 days earlier than Marquis—height of plant 3 to 4 inches shorter than Marquis on the average—strength of stem a little stronger than Marquis—awns almost except for a few apical awns, usually tipped—color in length, glume covering, slightly to heavily pubescent (or hairy), depressional and normal density, grain color red, usually darker than Marquis, grain texture hard, rarely pitheaded or starchy.

The head of Reward is generally shorter and more lax than Marquis, while the spikelets are usually more or less irregularly arranged, giving the head a characteristic ragged or spiral appearance. As previously stated the glumes are pubescent or covered with short hairs which can usually easily be seen with the naked eye, magnifying glass. This is one of the diverse with a magnifying glass. This is one of the characters that help to identifying the variety.

The milling and baking values of Reward wheat are excellent. It gives a high yield of flour. It bakes into bread giving a large well piled loaf of excellent color and texture. The berry is uniformly plump, of a clear red color, seldom being pitchoid or starchy. This is the reason this variety will often bring No. 1 Hard and No. 1 Northern in the Northerly districts where Marquis and some other varieties seldom obtain better than a No. 3 grade.

The straw is shorter and stiffer than in either Marquis or Garnet, and in wet years Reward will often stand up when some other varieties particularly Garnet go down. The chaff is light, on the kernel, which enables it to stand a considerable amount of moisture in the fall without sprouting on the stock, such as the case happens with other sorts, particularly with Garnet.

It is from 5 to 8 days earlier than Marquis, or about as early as Garnet when in most places, although in other places it is 2 or 3 days later than Garnet, but it is always earlier than Marquis.

Weighs very high to the bushel usually five or three pounds more than Marquis, Garnet or other sorts. Weights of 65 and 66 pounds to the bushel are quite common with Reward wheat. Reward is probably the best of all varieties of Hard Red Spring Wheat for Exhibition purposes. Its high weight per bushel, bright plump and pleasing berry of good lustre usually win it a high place in competition with other varieties.

Reward is found a rust resistant wheat, but because of its earliness in rust years often suffers less damage from rust than many of the other varieties. Investigations show that Reward wheat does not shatter as much as some of the other varieties, particularly Garnet.

On rolling land wheat on the high ridges usually ripens before that in the low lands and in the valleys and these high places uncut after ripening for a considerable time without any harm from shelling or discoloring, thus the whole field can be allowed to ripen thoroughly before cutting; therefore the sample should be of an even color and ripeness over the whole rolling land. Its stiff short straw, early maturity, non-shattering head and ability to stand after ripening without much loss of plumpness, weight or color, makes Reward wheat a most valuable variety to use for Combine Harvesting.

The most defect of Reward wheat at the present moment seems to be that on the whole the yield is lower than either Marquis or Garnet, but in some districts farmers state the yield of Reward is higher than Marquis or Garnet, and in many districts where most farmers report lower yields of Reward there are often one or two farmers who report higher yields. In most cases those who report high yields of Reward have seeded from a Registered Seed, but have been in touch with Marquis or Garnet. Every case investigated where the farmer seeded two bushels of Reward to the acre reported as giving a satisfactory yield.

Empire Reforestation

R. C. Douglas To Now Grows Extensively in England

During the eleven years ending in September, 1930, the Forestry Commissioners of Great Britain planted a total of 22,320,000 Douglas fir trees on various sites in England, Wales and Scotland. All these trees were raised from seed furnished by the Forest Service, Department of the Interior, through their seed-extracting plant at New Westminster, British Columbia. A considerable quantity of seed of other western species was furnished to the Commissioners from the same source. The New Zealand Government also took a large quantity of tree seed.

Economic Improvement in French

Indo-China shows increasing commerce.

"But the best smile on the 18th of the month. Aren't you supercilious?"

"A little, but it's my wife who's smiling." —Buen Humor, Madrid.

Recent Discovery Interests Astronomers

May Be Astroroid Nearer To Earth Than Any Yet Found

Astronomers at Mount Wilson Observatory and others in this country and Europe are keeping a close watch on Delporte's object—an asteroid or comet discovered recently by an astronomer at the University of Brussels.

"Our observations of it have disclosed no tail and seemingly only reflected light"—said Dr. Frederick H. Seare, indicating that it is an asteroid and one much closer to the earth than any yet found.

He is assistant director of the local observatory, a branch of the Carnegie Institution of Washington.

"Discovery of an asteroid nearer the earth," Dr. Seare said, "would enable us to obtain a more accurate value of the distance from the earth to the sun—upon which the measurement of distances to all heavenly bodies is based.

"We are much in the position of a surveyor computing the width of a river by shooting at a given point across the stream from two different points on his side of it and determining the angles of the imaginary triangle. The farther apart the stream the more accurate his measurements will be.

"Our computation of 93,000,000 miles as the distance of the sun from the earth is based on the estimate of 12,000,000 miles as the distance from the earth to Eros—the nearest asteroid yet found."

Prices May Be Better

Possibility Of Advance In Wheat Predicted By U.S. Official

A "strong possibility" of better wheat prices are seen by Joseph S. Milnor, president and general manager of the Grain Stabilization Corporation. In a statement Milnor said:

"While in Europe I visited France, Italy, Germany, Belgium and England, and also met our foreign representatives from other countries. Europe will receive rather heavy imports of wheat between now and the next harvesting of their new crop Russia has practically completed the shipment of wheat it has from the last crop and the supplies from that source will be negligible until after harvest. Elsewhere, Europe must look principally to Canada, the United States and Argentina for their supplies."

Russia announces the successful production of rubber from a plant named "kovsagis."

Electrically heated uniforms and shoes for traffic policemen have been demonstrated.

A new process makes the basic color of Portland cement tan instead of gray.

Great Britain And United States Unite In Opposing Abolition Of The Larger Naval Vessels

Rainy Lake Map Sheet

Lake Country West Of Winnipeg Is a Paradise For Canoeists

Very informative and interesting is the Rainy Lake Map Sheet of the National Topographic series, recently published by the Topographical Survey, Department of the Interior, Ottawa.

The map covers the country on the international boundary from Quetico Ontario Provincial Park on the east to within thirty-three miles of the town of Rainy River on the west. In addition to agricultural, mineral, forest and water power resources embraced in the area, it is known as a great hunting and fishing region. The Port Arthur Rainy River and Winnipeg line of the Canadian National Railways runs through the district from east to west, picking its way through the maze of lakes and rivers, which were the means of transportation from the time of the opening up of Western Canada until the railway came, almost the beginning of the present century. The lakes and brush on country are a paradise for the canoeist, the fishermen, and the hunter, and the waterways are so intricate that the voyageurs of the days of the fur companies from the time of La Verendrye onward were always searching for shorter routes for the carriage of their furs and trade goods.

The chief route of penetration to Fort Frances, named after Lady Simpson, the wife of Sir George Simpson, one of the famous governors of the Hudson's Bay Company. Fort Francis is situated on Rainy River a few miles below the point where it emerges from Rainy Lake. Near it are shown the water powers with which its name is associated. On the south side of the river in United States is the town of International Falls. The agricultural areas are chiefly in the western portion, extending west from Fort Francis to the townships indicated on the extreme western edge of the map.

The railways and highways of United States which bring travellers and tourists into this part of Canada are also shown. The map which is now complete in all topographic detail of this district than any previously issued, may be had at a nominal price upon application to the Director of the Topographical Survey, Department of the Interior, Ottawa.

"I met your husband yesterday, but he didn't see me."

"I know. He told me."

Another thing that doesn't turn out as you wish is the auto ahead of you.

Just An Old English Custom

A. R. Garner may be truly said to carry his responsibilities lightly as he observes an old English custom and carries his bride, the former Miss Marjorie Pretwell, through the door of St. Cuthbert's Church, Yorkshire, after the ceremony.

"Germany's 10,000-ton battleship casts one-half as much as your battleships You would be wrong money if you adopted Germany's restricted tonnage methods of construction."

He heatedly attacked the charges made by Charles Lindbergh, of France, that the "pocket" ships are offensive He referred to the charges as a myth and introduced a technical presentation of why the light ships were built speedy and heavily armed to defend Germany against the superior tonnage of foreign attackers.

He also criticized the United States thesis of the defensive nature of battleships, saying

"What about the blockade of our ports, which was the decisive turning point of the World War?"

"Why is your husband in such a rage?"

"They are praising marriage over the wireless"—Jugendspiegel, Berlin.

When TEETHING makes HIM FUSSY

One of the most important things you can do to make a teething baby comfortable is to see that his bowels do their work of carrying off waste matter promptly. To aid nature in The thin, pure vegetable preparation universally made for babies and children. Castoria acts as gently you can desire. It is young infants' favorite aid. Yet it is always effective, for children two. Remember, Castoria contains no harmful drugs. It is absolutely safe. Observe the directions. When your baby is fretful with teething or a bad upset, give a teaspoon full of Castoria. Be sure you get genuine Castoria with the name

WORLD HAPPENINGS BRIEFLY TOLD

The Royal Canadian Mounted Police took over the policing of Prince Edward Island on May 1.

The highway programme of the government on relief road work cost approximately $9,000,000.

E. C. Cox, of Limerick, Sask., is the winner of the Alexander Laird scholarship in English at Queen's University, it was announced.

More than 4,000 miles of roads in the national highway system of Italy were surfaced with bituminous dressing in the last 12 months.

The Duke of Connaught, Uncle of the King and former Governor-General of Canada, celebrated his 82nd birthday May 1, in his villa on the Riviera.

There is a possibility that Rt. Hon. Stanley Baldwin may not attend the Empire Economic Conference, because of the ill health of Premier Ramsay MacDonald.

The new trade treaty between Canada and New Zealand was given approval by the New Zealand Parliament when the bill ratifying the agreement was given third reading.

A bill to protect the northern Pacific halibut fishery industry, through carrying out a halibut convention between Canada and the United States, has been signed by President Hoover.

As part of its drive against Communism, the Australian Government recently took a number of children from the homes of their Communistic parents and placed them in a state home.

An impressive military funeral was held at Ottawa when Inspector Alfred E. Joy, of the Royal Canadian Mounted Police, was buried. He was to have been married the day following his death.

How Earth Is Divided

Statistics estimate that 60 per cent. of the land area of the earth is desert, 30 per cent. is productive, and 10 per cent. is poor grazing land, forest, high mountains and waste. There is no agreement as to the exact portion that is inhabitable.

Flood Sufferers In China Are Starving

United Relief Bodies Urged Of Western Manitobans Immediate Assistance

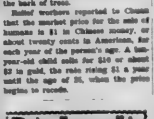
Moves of how 4,000,000 Chinese flood sufferers in the Hwai River Valley north of Ankwei are existing chiefly on grass and bark, while some are being sold in a human market, was brought to the attention of the League of Nations' Manchurian Commission at Peiping.

The affected area was estimated as twice the size of New York State.

The chief supply of food has been relief wheat from the United States. But owing to the trouble at Shanghai between the Chinese and Japanese and inconvenient transportation conditions only 4,000 tons of wheat from that source has reached the Hwai Valley, said Shemen Peter Chang, superintendent of the National Flood Relief Commission, for the North Anhwei area.

It will be late in June before the wheat crop will be matured and the problem is to feed the starving millions, while the authorities do everything possible to improve transportation. Meanwhile, the refugees have been eating grass, weeds, sprouts and the bark of trees.

Relief workers reported to Chang that the market price for the sale of humans is $1 in Chinese money, or about twenty cents in American, for each year of the person's age. A ten-year-old child sells for $10 or about $2 in gold, while one rating $1 a piece until the age of 25, when the price begins to recede.



IN THIS PRETTY DRESS, BOYCOTT-ERIN IS DRESSED BY USING A PLAIN AND PRINTED FABRIC

They girls love to have free and easy, to wear clothes with shirts to match them.

Those who look best with the fulness falling from the yoke, the favorite for trade may be satisfied.

It's a darling dress. The yoke and applied band at the hem are beautiful in white batiste all covered in lace work.

It's such a cunning column, and requires less fabric.

Dainty prints, voile prints, gingham or linen, candy striped cotton flannel checks are plain are also suitable.

Style No. 430 is designed for sizes 2, 4 and 6 years. Size 4 requires 1¼ yards of 35-inch figured with ¾ yard of 35-inch plain material and 1½ yards of binding.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

SUNDAY SCHOOL LESSON

MAY 15

JACOB AT BETHEL

Golden Text: "I am with thee and will keep thee whithersoever thou goest" — Genesis 28:15.

Lesson Genesis 27:28 Devotional Reading: Psalm 139:1-12.

Explanations and Comments

Jacob's Heaven, verses 10-15. Jacob was fleeing from Esau's wrath: He was going toward Haran when, quite by accident it would seem from the expression "He lighted upon a certain place," he came to the hillside near Bethel and there in a dream he had his vision of God.

God pity the boy who leaves home and does not carry with him some kind of pointing finger that shows the way to God, some memories, some imaginations, that lead him to the place where God may be met.—Ralph Connor.

Needing something for a pillow he could find nothing but a stone that one of the sisters on the hillside. When Rachel Taylor returned to this country he had no use for soft pillows and more than once enjoyed such a headrest of books.

The sun hung low in the sky as Jacob approached Bethel, and his last night before falling asleep had been the hills around him. . . . Nothing is such a strain that rise one above the other like dreaming, and nobody dreamed of a flight of stone steps or ladder reaching to heaven. The dream symbolized the truth that there is communication between heaven and earth, between God and man.

"The Spirit of God always conveys His teaching to his servants in language borrowed from their surroundings. John's Revelation is full of reminiscences of the Augean, which sometimes surmounted around the Temple of Diana, and the walls of the city were bathed in fire, and at other times banks on them in yearly flight. David's Psalms make constant reference to the wild hill country of Judea in which so many of them were composed." R. F. Meyer.

"It is melancholy to hear of Bethels in the dim. For past if we are to consider that that ladder between the soul and God has been pulled up, or pulled down, and that direct vision of God is impossible."—Ruben M. Jones.

"Heaven is not far from the earth. Even in the bleak and barren stretches of our life, when we feel lonely and desolate, there may come to us experiences which are full of heaven and the very gates of heaven." J. R. McPolyn.

Oh Jacob's dream ladder the angels of God were ascending and descending, symbolizing the thought that there is communication between God and man. Before this Jacob knew that God is now he learned that God was omnipresent. When he was living at home, where his life was made comfortable by the favoritism of Rebekah, his mother, there was no room in his mind for a revelation from God. But alone on the rocky hillside, with no one to help him, God found him surrounded by divine influence. Proof dence often thus prepares the way for revelation.

And then in Jacob's dream Jehovah appeared beside him and gave words of encouragement and hope. Just as the stony landscape where he was lying was woven into the dream, so were the words of his father Isaac and that parting blessing. "God Almighty bless thee, . . . and give thee the blessing of Abraham . . . that thou mayest inherit the land of thy sojournings, which God gave unto Abraham." verses 3, 4. He heard God promise that he should inherit the land that his descendants should be "as the dust of the earth" in number, that in him and in them "all the families of the earth should be blessed."

And then God added the assurance of His companionship and protection. "And behold I am with thee and will keep thee whithersoever thou goest." "The God of Bethel" has become a name for God's ever-watchful care.

Do we think of God as the Comrade of our ways, as with us in all the experiences of life? Has the thought of the nearness of the presence of God been a working power in our lives? In peace will I both lay me down and sleep; for Thou, Jehovah, alone makest me to dwell in safety. Psalm 4:8.

Word Is Fame

What is fame? Upon the walls of the corridor leading to the Parliamentary restaurant at Ottawa, there are etchings of all the Prime Ministers of Great Britain. The other day, when two American visitors were walking down this corridor, one of them stopped, pointed his cane at the etching of Disraeli, and knowingly remarked: "Ah, George Arliss."

Curtain Is Right

Friend: Say, there's a bunch of people outside waiting to be presented to you. Among them is a bishop who says he married you some time ago.

Plane Surprises Natives

Dayaks Of Borneo Wanted To Know If Flying Machine Laid Eggs

The head-hunting Dayaks of Borneo were so intrigued at the sight of their first aeroplane that they wanted to know whether it laid eggs.

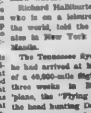
Richard Hallibarton, of Memphis, who is on a leisurely flight around the world, told the story in connection with his earlier visit to Borneo.

The Tennessee flyer's message said he had arrived at Manila at the end of a 40,000-mile flight and had spent three weeks in Borneo with his plane, the "Flying Carpet," visiting the head hunting Dayaks, who never had seen an aeroplane.

"Took the chief flying in native undress, except for goggles," the cable-gram said. "Apparently big event in Dayak's history War boats were filled with warriors who came 100 miles to see the chief fly. Dayaks asked if aeroplane laid eggs."

Cried at Night

"Night after night, as soon as we would get settled in bed, baby would start crying. BABY'S OWN TABLETS changed all this. What a blessed relief," writes Mrs. Arthur Baker, jr., Winsor, Que. Give Baby's Own Tablets for teething troubles, colds, fevers, colic. Absolutely SAFE. 25c package.



Dr. Williams' BABY'S OWN TABLETS

The forests of Quebec cover an area of more than 185,000,000 acres according to recent estimates.

Argentina has only about 7,000 plants using steam for power.

Porto Rico imported $1,000,000 worth of jute bags in 1931.

MINARD'S KING OF PAIN LINIMENT

GRAIN SHIPMENTS REPORTED FOR RUSSIAN POINTS

Vancouver, B.C. The Vancouver Sun publishes the following

"Turning on the most significant development in the Vancouver grain season, confirmation was secured of the sale of 1,500,000 bushels of grain for shipment to Russia from this port.

"Five vessels have been chartered to carry it to Vladivostok. The "Gastlemoor" now loading here, is one Names of the other four have not been disclosed.

With Russia three months ago negotiated for the greatest measure to other wheat exporting countries, now back in world markets as a buyer Vancouver grain men believed possibly 10,000,000 bushels of wheat would move through Vancouver to Siberia in the next few months.

The sale of grain going out on these five ships is a continuing channel understood of six weeks ago was definitely understood to be supplies for Russian troops assembled in Siberia since the Manchurian border trouble with Japan.

"Had a great deal is known about the shipments since most of the wheat was negotiated in London, where Thomas Kane, of Kerr, Milford and Company arranged four of the cargoes, it is understood.

"Two more ships to carry the wheat were fixed in London, and the other three are stated to have been secured through the Canadian Transport Company of Vancouver.

"While the requirements of the Russian military forces in Siberia are no more than the chief cause of the Canadian orders, the underlying reason for the shipments is believed to be new trade conditions in the Volga section of Russia.

Defendants Are Freed

One Hour Sentence Is Imposed In Connection With Woods Conviction

Honolulu. Governor Lawrence M. Judd freed the four defendants of the famous Massie-Kahahawai case hour after they had been sentenced to 10 years at hard labor at Oahu prison.

Sentence was passed in a surprise move on Lieut. Thomas H. Massie, his mother-in-law, Mrs. Granville Fortescue, and the two seamen, E. J. Lord and Albert O. Jones.

Their hour of confinement was spent in the nominal custody of the sheriff at Lieut. Fortescue's home, a street from the judiciary building where for several weeks they battled unsuccessfully for freedom on charges of slaying Joseph Kahahawai, asserted attacker of Mr. Massie.

Governor Judd, in commuting the sentence to one hour, merely said he was acting on a petition of the four defendants in which their counsel pleaded and was commuting the sentence to one hour.

Editor Arrested

Finnish Newspaper Man Of Sudbury Whisked Away Under Police

Sudbury, Ont. Arvo Vaara, editor of the Finnish daily "Vapaus" and Martin Parker, translator, arrested by the Canadian Mounted Police raid on the newspaper's offices, were booked into an automobile and rushed out of town in a motherly direction. Five plain clothes detectives guarded them.

Mounted police refused to divulge the destination of the car bearing their prisoners and declined to discuss the case.

Find Money in Bank

Hamilton, Ont. Buried as a pauper recently, Obadiah Martin had $16,000 in the bank Markle died in a receiving house, and his landlady recently found a bank book bearing a record of deposits. Investigation proved the money was actually there.

Brave Expert Higher

Ottawa, Ont. During the first three months of the present year the total exportation of bacon and ham to Great Britain was 1,849,000 pounds as compared with 1,362,700 in the corresponding period of 1931.

Curtail Waste Of Gas

Steps Are Taken To Cut Down Gas Production In Turner Valley

Calgary, Alberta. Turner Valley gas conservation board formed by the government to curtail the waste of gas in Turner Valley gas field, announced that orders would be issued immediately requiring oil companies to cut down gas production. The board aims to lower production to 300,000,000 cubic feet daily in an effort to prolong the life of the gas fields.

It is understood oil companies will be informed that they have 60 hours to reduce their gas yield to comply with the board's objective.

Production of gas will not be curtailed greatly and most of the waste gas flares at the Turner Valley Wells will be conserved.

The board members have elected A. A. Carpenter chairman. Other members of the board are John Millar, of the Department of Mines, Ottawa, and Dr. B. F. Wallace, president of the University of Alberta.

Adventurous Cruise

Small Vessel To Sail For Southern Seas In Search Of Treasure

Vancouver. A small vessel, the 60-foot auxiliary schooner Wanderer" will dip her flag in farewell to Canada, Sept. 1, in a new search for the Malaspina cruiser Shipwrecked 600 years ago, and believed by Lieut.-Commander Geoffrey Cloyd, of Toronto, the little vessel's skipper, to be the richest treasure ship ever sunk.

The crew is to be six men, a woman and the other three also stated to have been secured through the Canadian Transport Company of Vancouver.

While the requirements of the Russian military forces in Siberia are no more than the chief cause of the Canadian orders, the underlying reason for the shipments is believed to be new trade conditions in the Volga section of Russia.

Protests Against Use Of American Ports

Maritime Senator Thinks Route For Canadian Grain Should Be Changed

He said United ... embarkation ... and waterfront ... provided employ... during Can... dian grain while ... ports of Halifax and ... as regards Canadian grain traffic.

Churchill Insurance Rates

Effort To Be Made To Secure Lower Rates On Grain Shipments

Ottawa, Ont. Every effort is being made to secure insurance rates that will encourage grain shippers to use the new terminal facilities at Churchill on Hudson Bay, Hon. C. H. Cahan secretary of state, advised the House in answer to questions.

The Imperial shipping board in England was considering a reduction in the rate in 1931, Mr. Cahan said, and added he knew hopes of further reductions in the near future.

Will Use Regular Service

London, England.—The British delegation to the Imperial Conference at Ottawa will travel by the regular passenger service across the Atlantic and not in a vessel of the royal navy. This was the reply in the House of Commons to a query by Thomas Griffiths, Labor member.

Indians Getting Franchise

Money Being Recognized As Entitled To Their Votes

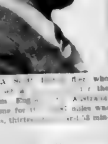
Ottawa, Ont.—The enfranchisement of Indians is proceeding with individuals receiving full citizenship by order-in-council as circumstances warrant. Hon. T. G. Murphy, superintendent-general of Indian Affairs, told Dr Peter McGibbon (Conn., Muskoka), in the House of Commons. Dr. McGibbon said in his constituency were two bands of Indians, to whose intelligence and industry he paid high tribute. They wanted full citizenship, and Dr. McGibbon felt they ought to have it.

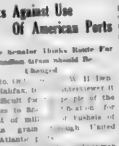
Will Not Modify Bill

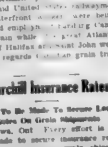
Dublin, Irish Free State.—The Republican Government of the Irish Free State effectively put down two opposition amendments which would have modified its bill to abolish the oath of allegiance to the British crown as a requisite to tenure of public office.

Death Toll Heavy

Jolo, Philippine Islands.—Belated reports brought the number of persons killed on the Island of Sulu by the recent typhoon to at least 65. It is feared that many others are dead. The authorities estimated that 60,000 were rendered homeless.







Germany's Rebuilt Navy

Here are two of the first pictures to be made of the new German navy built to replace the Imperial Navy which was scuttled at Scapa Flow, Scotland, after surrender to the British. Seniors of the cruiser Koenigsberg are shown at anti-aircraft gunnery practice, during recent manoeuvres in the Baltic Sea. Note that the men are equipped with the latest shock gas masks. Inset shows some of the ships of the fleet in line.

Prepare For Conference

Alberta Arranging For Suggestions To Present To Imperial Parley

Edmonton, Alberta. First steps toward preparing an Alberta statement for submission to the Imperial Conference in Ottawa next July are now being taken, it was announced by Premier Brownlee. As a preliminary step, letters are being sent to organizations representing the economic interests in the province, in which they are invited to forward any suggestions they may have to offer.

It is expected that the Dominion Government will extend an invitation to the provinces to submit suggestions as to the position to be taken by Canadian interests at the conference.

The Alberta Government will also participate in a joint conference to which the Saskatchewan Government has invited its two neighboring provinces and which will be held about June 8. An exchange of views in preparation for the Ottawa conference will be the purpose of this interprovincial meeting, but Mr. Brownlee pointed out that it may not be found desirable to make a joint representation, inasmuch as the interests and resources of this province are somewhat varied than those of the other two provinces.

Dawson Ice Breaks Early

Woman Was Winner Of Annual Prize For Guessing Date

Dawson, Y.T. The ice in Yukon River moved out in front of Dawson on May 1 at 7.32 p.m., Y.T., thus depriving Dawson's annual ice guessing contest of interest this year were awarded solely to Dawson City and the immediate vicinity.

Total pool was $1,800, given as one prize and won by Mrs. Negum of Gold Bottom Creek, with a guess of May 7, 1 p.m.

This is one of the earliest breakups of the ice at Dawson in the memory of the white men.

Naval Appointments

Ottawa, Ont. The appointment of Commander W. C. Hendrer as commander-in-charge at Esquimalt, B.C., effective from May 27, was announced by the Department of National Defence. It was also announced that Commander G. C. Jones would take command of H.M.C.S. Skeena, and the western division on May 23.

U.S. Takes All Cheques

Washington, D.C.—A flat rate of four cents on the sale of each $100 bond was voted by the United States senate finance committee. The rate was the same as set for stock sales. The committee made all cheques subject to the two cents tax, eliminating the $5 exemption allowed in its original proposal

BILL IS DRAFTED TO DEAL WITH UNEMPLOYMENT

Ottawa, Ont The House of Commons took the first step to clothe the government with wide powers to combat unemployment. A bill was given first reading which would confer almost blanket power on the ministry until the end of the fiscal year next March. Debate on the resolution which prefaced the introduction of the bill was desultory.

Under the terms of the bill, which may meet more concerted opposition in its later stages, the government would possess power to negotiate agreements with the provinces, grant financial assistance to them and take steps "to protect the credit and financial position of the Dominion or any province." Money might be loaned to public or private undertakings. One clause of the bill would enable the government to "assist in defraying the cost of the transportation of the products of the field, farm, forest, sea, river and mines, and this has given rise to speculation concerning a bounty system on the products of some primary industries.

The bill contained no limit on the money that might be expended by the Dominion.

The back-to-the-land movement if encouraged by the government should not be confined to crown lands, said W. W. Kennedy, (Conn., Winnipeg South Centre). He knew of many good farms which had been returned to the municipalities for various reasons and it was to these farms also that the unemployed could be assisted and equipped that the movement should be directed

Hon. W. R. Motherwell (Lib., Melville), said Saskatchewan had for many years, before the three successive crop failures in 1929-31, produced more wheat than all the rest of the Dominion together. In connection with the five-cent bonus on wheat a request had been made to the government, he said, for an acreage bonus of $1 per acre of seeded acreage. Hon. W. R. Motherwell suggested, the government might announce its attitude towards the request for an acreage bonus.

Amazing Spirit Manifested

No Evidence Of Complaining On Part Of Homeless Men and Farmers

Vancouver, B.C.—Impressed with the amazing spirit of optimism and courage manifested by the unemployed throughout the Canadian prairies, Hon. H. H. Stevens, Minister of Trade and Commerce, reached Vancouver for consultation at the University of British Columbia.

There is no evidence of whining or complaining on the part of business men and farmers in the prairie provinces," he said. "Crop prospects are good and when harvest comes there should be a wide demand for labor. It is noticeable that there is a return to the old horse power in replacing machine power on the land."

Passed Both Houses

Royal Assent Is Given To Number Of Bills

Ottawa, Ont.—Chief Justice Anglin, as Deputy to the Governor-General gave royal assent in the senate to a number of bills which had passed both houses. Those bills include the following: To amend the patent act, to amend the petroleum and naphtha inspection act; respecting debts due to the crown; to amend the opium and narcotic drugs act, 1929; to amend the Yukon quartz mining act; respecting the Canadian Pacific Railway Company; to amend the destructive insect and pest act; to incorporate Lake of the Woods International Bridge Company.

Receive Flower Seeds

Toronto, Ont. Flowers will bloom again in drouth-stricken western Canada. A letter received by W. L. Aiken, Toronto, originator of the idea of despatching flower seeds to western Canadians, expressed gratitude for the thoughtfulness of Ontario people." The letter was signed by C. B. Daniel, general manager of the Saskatchewan Relief Commission.

Fish In Hudson Bay

Former Fishermen To Make Thorough Exploration Of Northern Waters This Summer

Given aid by the Federal Government John Ingebrechtsen, pioneer fisherman in Northern Bay, will explore the fishing grounds of the Bay as far north as Ripples Bay., 130 miles north of Churchill.

There are salmon as well as salmon trout in the waters of Hudson Bay, believes Ingebrechtsen, who with five fishermen waiting in the small vessel, the Ulite Svendrup made an investigation of the waters of the west coast of the Bay north of Churchill last summer, and found fish in commercial quantities. The expedition found sufficient fish on their initial venture to pay the expenses of the summer, but they came away without any surplus to start this season's work.

Mr Ingebrechtsen claims that if he can obtain a suitable outfit this year he and his men will go so far north as Ripples Bay, which lies some 130 miles north of Chesterfield Inlet. The object is to get up as near the sea as possible as the fish are most plentiful in such regions, he claims. Further north and in the vicinity of Churchill, the abundance of whales and seals has a tendency to frighten the commercial fish, including salmon, and fish and other species, away from the shore waters. Near the northern Bay fields whales and seals are rarely seen in summer, he says.

Last summer the fishermen explored about 250 miles of the west coast line of the Bay. This year they plan to explore some 300 miles more, this to be in the northern field, where they believe there is more fish.

Colloid Symposium

Two Hundred Experts Will Attend Meeting In Ottawa

Two hundred experts in colloid chemistry—the chemistry of emulsions and such non-crystalline substances as wood, rubber, leather, rayon, gelatin, wool and silk—are expected to be in Ottawa from June 16 to June 18.

In 1923 the American Chemical Society called the first colloid symposium. One has been held annually since that year the fourth was held in Toronto in 1926, the tenth and second to be held in Canada is to assemble here in the New National Research Laboratories Building now being completed.

Dr. Emil Hatschek, who has been actively engaged in the study of colloids for the past 25 years, in the course of four books on the subject and lectures on colloids at the Sir John Cass Technical Institute, London, England, has consented to give an address at the Ottawa meeting.

At least eight Canadians are to deliver papers.

Dr. G. S. Whitby, Director of the Division of Chemistry, National Research Laboratories, is head of the general committee in charge of arrangements for the meetings.

"I wish I knew how to make a barrel of money," sighed the Little Man.

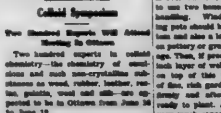
"That's easy," replied the Big Man. "Spend a half a barrel of money in advertising and you'll soon have a barrel of money."

One of the questions in a general knowledge test held at a local preparatory school was:

"Who is Bernard Shaw?"

Among the replies was:

"The old man who always puts his photo in the paper."



"The ancient Britons were so thick—"

"Oh, and they are all dead."—Il Travaso, Rome.

NOTES ON CANADIANA

A Couple Of Flowers For Everyone May Be Grown In the Vegetable Garden

To avoid marring the beauty of the regular flower garden by putting unsightly vegetables in the flower garden and, of course, they may be cut freely without disfiguring any border.

Shelling and Filling Window Boxes

Hanging pots and window boxes will add to the attractiveness of the home. Boxes can be purchased and stained green or any other color to blend with the surroundings, though screw-eyes are inserted. These can be purchased at any hardware store, and they are essential to prevent the box warping or bursting after the same has been watered a few times. The best method of lining a box is to cut as wide and the same deep, so that there will be less chance of the soil drying out. It is also a help to cut the window, sill, but where the latter is over six feet, it may be advisable to use two boxes for convenience in shelling. Window boxes and hanging pots should have holes in the bottom and also a layer of cinders, broken crockery or gravel, to provide drainage. Then, if procurable, put in a four inch layer of well-rotted manure, and then fill up with a mixture of loam, of fine, rich garden soil. From down already and after watering you are ready to plant. As the box or pot is very much exposed to the air, it will be necessary to water every day and even oftener during very hot weather. It is also essential to add some good chemical fertilizer dissolved in water, from time to time, to keep flowers constantly in bloom. At the back, or not in prominence, focus, and ornamental grasses. In the middle, petunias, nasturtiums and other medium height flowers are advised. At the front, alyssum, ageratum and lobelia can be placed with one or two trailing plants such as Canary Bird, Wandering Jew and climbing nasturtiums. The latter can be planted as seeds. Shelled Peas or beans after have to filled until plants get thoroughly established.

Basket For B.C. Fish

Prawns Beings Are Finding Ready Sale In Hong Kong

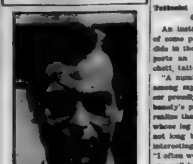
White restaurants of far-away Hong Kong have recently been introduced to a new fish food from British Columbia in the shape of frozen prawns, and they are reported to have received it with relish. Enterprising Scots people in British Columbia, set to find and develop new markets, have discovered that their frozen barrings are a favorite dish in the British settlement at Hong Kong.

For many years past British Columbia fish producers have done a thriving business with the export of herring, but the export of frozen herring to Chinese ports is a new departure. The first refrigerated herring shipped to China are used by the Chinese people themselves, while the name of the prawns serving in Hong Kong restaurants made to white consumers.—Public ation News Bulletin.

Teacher—Sammy, do you know what a gentleman farmer is?

Sammy—Yes, ma'am. It's a man who loves cows but don't know how to milk 'em.

An eminent bacteriologist says that boiling is the greatest safety measure against colds, the germs being killed instantly when the water is boiling. Quite a few germs are made to white consumers.—Pub-



It is understood that Prince George will probably be created a Duke in the King's Birthday honours list. The Prince will be thirty on December 20th, and he is already older than any of his brothers at the time they received their titles.

Export Handicapped

Canadian Products Held To Lack Uniformity Of Quality

Hon. H. H. Stevens, Minister of Trade and Commerce, says the departments of representatives in Great Britain are handicapped in their efforts to maintain the flow of Canadian products in that country by lack of uniformity of quality and indifference regarding uniformity of supply on the part of Canadian exporters. The complaints regarding lack of uniformity of supply have been made in regard to a number of commodities, including apples, eggs, butter and canned goods, while lack of uniformity of quality has been particularly alleged against apples, eggs and canned goods. The shortcomings that should be overcome forthwith if Canada expect trade to be to thrive.—Toronto Mail and Empire.

To Speed Mails

Planes To Be Catapulted From Ships At Sea

Germans seamen, catapulted from the decks of the North German Lloyd liners "Bremen" and "Europa," will make 50 scheduled ship-to-shore flights with trans-Atlantic mails, according to an announcement.

Undaunted by the tragedy last year, when the seaplane New York, from the "Bremen," crashed on Cobequid Bay, N.S., and carried two aviators to their deaths, the company now intends to establish a permanent service. The route, with a stop at Southamp ton for fuel, was marked by Joachim Blankenburg and Karl Kirchhoff during a successful flight last September.

The first flight this year will be weathered, a "plane catapulted at sea 800 miles east of Sydney and flying to Sydney and thence to New York via Cape Cod.

The modern speedometric movement goes back to the year 1848.

People Have Queer Taste

Testimony Tells Of Strange Designs Chosen By Clients

An instance of the peculiar tastes of some people is recounted by Claude in the Sunday Pictorial, who reports an interview with Prof Burchell, tattooist, of London, England.

"A number of titled women are among my clients," said the Professor proudly. "Often I see a society's beauty's picture in the paper and realize that she was the woman upon whose leg I tattooed, say, a butterfly not long before." He went on to tell interesting details. Things like this: "I often wonder why Lady —— will, by one well-known woman got me to put two large green snakes round her.

A surgeon whose name is often in newspapers is also decorated with elaborate thoroughness, but many people who call at the little shop do so for more ordinary beauty treatment. "I have just finished as an actor," the Professor told me. "I put some color in his cheeks and whitened his red nose, and now he looks a new man. One man recently insisted that a scar should be tattooed across his face. While a woman wanted her child to have two small birthmarks tattooed.

One Form Of Madness

Nations Needing Money Spend Millions Yearly On Armaments

Every day new evidence is afforded that this is a mad world. The nations are headed for bankruptcy, yet they are spending more than four million dollars a day on armaments—think of it, $4,000,000,000. All of them have renounced the right to make war. And a hundred million of their people are in dire want.

Should the disarmament conference now proceeding at Geneva arrange for a fifty per cent. reduction in expenditures on armaments, to be made effective progressively, the ultimate saving would be two billion dollars per year or five million dollars per day. Of this saving $1,200,000,000 would be made by Germany, which at once to economic collapse, and $300,-000,000 by the United States.

Until the causes of the people everywhere join with business interests in demanding that the waste of money on military preparations be curtailed the world will continue that form of madness.

Just Point Of View

Outlook Of Individuals Determines How Wealthy They Are

If a man can lose billions without seeming poverty, it is evident that neither fact to grief or chagrin should say he who loses only amount to hundreds or thousands or even millions. It is all a matter of imagination. If you consider yourself "passing rich on forty pounds a year" then you are rich, if you consider yourself poor on $6,000 a year or on $100,000 a year then you are undoubtedly poor.

We have also a number of old water out of our stocks. We ought to pay some attention to supposing the water out of our conceit.

Real "Alice" of Wonderland

Many people whose happiest childhood days were spent over a copy of Lewis Carroll's immortal "Alice in Wonderland" will soon have a chance to see the original Alice who inspired the famous story. In the person of Mrs. Alice Hargreaves, who is coming from her home in England to attend the Lewis Carroll celebrations at Columbia University, New York. Mrs. Hargreaves is shown at the left as she appeared when a girl; and at right as she is today.

Vancouver's Shipping Growth

Booth Exports and Imports Show Increased Volume and Outlook Is Encouraging

Flour grain canned salmon, lead, logs, lumber and newsprint comprising the basic industries of the west, had all increased export volume through the port of Vancouver during the first three months of the current year F. C. Brown chairman, said in presenting his annual report to the British Columbia division of the Canadian Manufacturers' Association. All-weather exports through Vancouver, compared with the same period last year, increased eleven per cent., while imports had increased six per cent. In the case of grain exports, the increase amounted to more than three million bushels.

The neighboring port of New Westminster showed an even more remarkable advance. Its exports increased thirty-six per cent. accounted for mainly by lumber, while its imports had almost doubled.

"I do believe that the bottom of commodity price has at last been reached, and it is reasonable to look for an improvement from now on," Mr Brown said. "I would even go so far as to say that this improvement is already in evidence in some instances."

Referring to Vancouver as a grain port, he said: "We are justifiably proud of our record of having in twelve years from a very small beginning achieved the position of being the leading grain shipping port to the ports of the Seven Seas.

"We are the less proud of the fact that in carrying on this development, we have thereby created another community of interest with prairie provinces."

Tooth Of Baby Mammoth

Interesting Discovery Is Made in Saskatchewan Vegetable Garden

A baby mammoth shed one of its milk teeth and probably shed baby mammoth tears some 8,000 to 10,000 years ago, where W. A. Wilson of Indian Head now has his vegetable garden.

The tooth, wonderfully preserved with the enamel still of the best ivory quality, was taken by Mr. Wilson to the geology department of the University of Saskatchewan and was referred for identification to C. M. Sternberg of the geological survey at Ottawa, who is an authority on mammoth teeth. He identifies it as the second lower milk molar from the left side of the jaw of a baby "Elephas Ima."

It is not a great tooth like that of the mammoth whose skeleton was found in the frozen mud conservation gang at Winston last year. The chewing, or perhaps one should say the smacking, surface of the tooth is about 2¼ by 1¼ inches.

Mr. Sternberg says that finds of first and second molars are rather rare.

Colorado's sand dunes, unique waterfalls of nature in a land that knows more rock than sand, are attracting many tourists. The hills are so smooth that skiis can be used on the sand.

Government scientists say that the slow pressure of crushes has changed the surface of the earth more than all the earthquakes, volcanoes, tidal waves, tornadoes and excavations in history.

Residential rents in Hawaii are gradually dropping.

"My husband talks all night long in his sleep."

"Well, you should let him get in a word in the daytime."—Montreal, Witness.

Your Children

will thrive on Christie's pure Arrowroots

For the tiniest babies . . . for older children . . . for growing boys and girls . . . there is nothing more delicious and nourishing than Christie's Arrowroots. No substitute is good enough.

Christie's Arrowroots

"THE HOUSE OF DREAMS-COME-TRUE"

— BY —

MARGARET PEDLER

Author Of "The Splendid Folly," "The Hermit Of Far End," "The Bedder & Breakfast Lot," Etc. Etc. London.

(CHAPTER XX" Continued

She paused, and the liquid in the black pot over the fire seethed up suddenly and filled the silence with its chuckling and gurgling so that Jean it seemed to be the sound of some hidden malevolence chortling defiance at her.

The old woman clutched her hand in little tighter, turning the palm so that the light from the tiny window fell more directly upon it.

"There's a castle waitin' for 'ee, me dear," she resumed in the same sing-song voice as before "I can see it so plain as plain. But ye won't never live there wi' the one ye have though you're hopin to. I see ruin and devastation all around it, and the sky as red as bild above it."

She released Jean's hand slowly and her curiously bright eyes fastened upon Jean's face.

"Shall I tell the gentleman's hand" she asked stretching out her withered claw to take it.

But he drew it away hurriedly

"No, no," he said, attempting to speak lightly "This lady's fortune isn't sufficiently encouraging for me to venture"

The gipsy's eyes never left his face She nodded slowly.

"That's as may be. For tes the main luck and asian ill-luck will come to ye as comes to all, she said. There's a ne ring given or taken, but you're bound together so fast and firm as wedain'-ring could bind 'em"

Jean felt her face flame scarlet in the dusk of the tiny room, and she turned and made her way hastily out into the sunshine once more, thankful for the anger queries of Nick and Claire, which served to bring back to normal the rather constrained atmosphere induced by the gipsy's final comment

As they climbed to the side of the tar once more Jean relapsed into silence More than once, since she had come to England, she had been vaguely conscious of some hidden menace to her happiness, and now the gipsy had suddenly given words to her own indefinite premonition of evil.

"For there's darkness comin' . . . black darkness."

It was a relief to join the rest of the picnic party, who were clamouring loudly for their lunch, good-humouredly indignant with the two deserters for keeping them waiting.

"Another five minutes," announced Burke, "and we should have begun without you. Not even Lady Alice could have kept us under restraint a moment longer."

The party was quite a large one, augmented by a good many friends from round about the neighborhood, and amid the riotous fun and ridicule in the crowd almost invariably accompany an alfresco meal, Jean contrived to throw off the feeling of oppression generated by Kaurah's prophecy.

Burke, having handed her plate with lobster mayonnaise, established himself beside her, and proceeded to catechise her about her recent experience.

"Did the lady what's her name, Keturah?" tell you when you were going to marry me?" he demanded in an undertone, his dare-devil eyes laughing down at her impudently.

"No, she did not. She only foresees things that are really going to happen," retorted Jean.

"Well, that is" composedly. "She can't be much good at her job if she missed seeing it."

"Well" Jean effected to consider— "the nearest she got to it was that she saw darkness coming . . . . . black darkness."

Under cover of the general preoccupation as lunch and conversation, Burke's hand closed suddenly over hers.

"You little devil!" he said, half amused, half sulky, "I'll make you pay for that"

But out here, in the wind swept, open spaces of the Moor Jean felt no fear of him.

"First catch your hare" she retaliated defiantly

He regarded her lovely for a moment

"I'll take your advice," he said broadly Then he added "Did you know that I am driving you back in my cart this afternoon?"

Various cars and traps and saddle horses had brought the party together at the appointed rendezvous a little village on the outskirts of the Moor and Jean had driven up with Blaise in one of the staple cars Sir Isaac Burke in Automobile.

"You certainly are bold," she replied quickly "I shall go back in a state—in the car."

"Quite impossible It's broken down They rashly brought on the lunch hampers in it" added Hal Godfrey with a bit of mischief with disastrous consequences to the car's internals So that's and Tormarin have got to go with other conveyances And I've undertaken to get you home

Jean's face fell a little. Throughout the drive up to the Moor Blaise had seemed less remote and more like his old self than at any other time since their quarrel and she could guess that this arrangement of Burke's was hardly likely to contribute towards the continuance of the new peace

"How will Blaise get home?" she asked.

"They can squeeze him into her car, Judy says it'll be a tight fit, but he can cling on by his eyelashes somehow"

"I think it would be a better arrangement if you drove Blaise and I"

"There's certainly not room for two extra in the car. There isn't really room for one."

"There wouldn't be two. You would drive Blaise"

"Pardon me I should do nothing of the sort"

"Do you mean"—incredulously "that you would refuse?"

"Oh, I should unveil an armour-plated reason A broken spring in the dog-cart or something But I do mean that if I don't drive you, I drive no one."

Jean looked at him vexedly

"Well," she said uncertainly, "we can't have a fuss at a picnic."

"No," agreed Burke. "So I'm afraid you'll have to give in."

Jean rather resented the tone There didn't seem any way out of it. She knew that Burke own perfectly capable, under cover of some supposed mishap to his trap, of throwing the whole party into confusion and disorder, rather than relinquish his intention.

"Oh, very well," she yielded at last. "Only I'm very much annoyed at being compelled to act"

"I intend to," he replied coolly. "Now and always."

CHAPTER XXI.

Divers Happenings

"I don't think I want any champagne," said Claire, smilingly, as Nick filled a glass and handed it to her "Being utterly free like this produces much the same effect as I call drunk, Nick drunk with happiness Oh, why can't I be always free ——"

She broke abruptly in her speech, her face whitening, and stared past Nick with dilated eyes. Her lips remained parted, just as when she had ceased speaking, and the breath came between them unevenly.

Nick followed the direction of her glance But he could see nothing to account for her suddenly stricken expression of dismay. A man in chauffeur's livery, vaguely familiar to him, was approaching, and it was upon him that Claire's eyes were fixed in a sick pang of apprehension. It resembled that of the look of a wounded bird, incapable of flight, as it watches the approach of a hungry cat.

"What is it?" he asked quickly. "What's the matter? For God's sake don't look like that, Claire"

Slowly, with difficulty, she wrenched her eyes away from that sinister, conventional figure in the dark green livery.

"Don't you see who it is?" she asked in a harsh, dry whisper

Before Nick could answer, the man had made his way to Claire's side and paused respectfully.

(To Be Continued)

Mothers Value This Oil Mothers who know how suddenly croup may come their children and how distressing may prompt action is in applying relief, always keep at hand a supply of Dr Thomas' Eclectric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

Archaeologists excavating the market place of Athens hope this year to bring to light the Senate House and the Temple of the Mother of the Gods.

Douglas' Egyptian Liniment should be in every household. Stops bleeding at once, cauterizes wounds and prevents blood poisoning Keeps away inflammation. Removes proud flesh.

New York state contains 49,204 square miles.

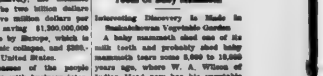
HEAD ACHE

THE woman who lets headaches upset her plans must have her eyes and ears closed to certain facts about Aspirin. There is always swift comfort, and never any harm, in Aspirin tablets. Doctors have said so; men and women everywhere have found it so. Any headache—from any cause—is always relieved by one or two tablets. And lots of other aches and pains. Neuralgia. Neuritis. Rheumatism. Nagging pains. The pain from colds which make you "ache all over." Sore throat. Systemic or "muscular" pain. Aspirin can spare you lots of needless suffering! Be sure you get Aspirin—not a substitute!

ASPIRIN

MADE IN CANADA—TRADE-MARK REG'D

There is **NO ODOR** *from* **FISH**



or from Vegetables cooked in **CANAPAR**

Boiled, or steamed, fish comes out firm and solid, re-assuring in its own juice, when you seal it up in Canapar Cookery Parchment. No baby odor. No spoiled dinner or concoction to chew out afterwards.

And vegetables are simply delicious. Using Canapar you can cook three at once in the same pot over one burner saved fuel. Canapar gets on them as it does on fish. Retains all the natural color and flavor.

Fat and juices from meat won't burn if you line your roasting pan with Canapar. No pan-scraping afterwards.

Canapar only costs 25 cents for a large envelope. You can use each sheet repeatedly because it won't absorb odors. Makes a perfect dish cloth because it is silky, strong, and doesn't spread lint.

Special Offer

CANAPAR is made by the makers of the famous PARKHAM Hemp and Paper in the Green Box. Most grocers, druggists and department stores have Canapar on sale, but if yours hasn't send coupon direct to the makers and we'll give you a new and unique book entitled "Leftovers", containing our limited supply as a bonus for your trouble.

Canadian Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25c for which please send me one full size package of *CANAPAR COOKERY PARCHMENT* and your 100 recipes for "Leftovers".

SOUR STOMACH

JUST a tasteless dose of Phillips' Milk of Magnesia in water. That is an ideal, effective yet harmless, it has been the standard antacid for 50 years the scientific all neutralize at once many times its volume in acid. It's the right way the quick, pleasant and efficient way to kill all the excess acid The stomach becomes sweet, the pain departs. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching That is Phillips' Milk of Magnesia. Be sure to get the genuine

The blood corrosives for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior tooth paste that safeguards against acid mouth. (Adv. in Can. Med.)

Little Helps For This Week

"And now I exhort you to be of good cheer."—Acts xxvii. 22.

Make me as one that careth not by day

A dewy shadow, but reflecting aye One little beam, loved, warmed, and guided through

From the bright sun that lights our daily way.

You find yourself refreshed by the presence of cheerful people; why not make earnest efforts to confer that pleasure on others? You will find half the battle is gained if you will never allow yourself to say anything gloomy Lydia M. Child.

ACID STOMACH IS DANGEROUS

Sufferers From Indigestion CUT THIS OUT

"Stomach trouble, sleepless indigestion, sourness, gas, heartburn, food fermentation, etc., are caused nine times in ten by excessive acid stomach. Apply the proper antidote and relief comes instantly. Get a tablespoonful of Bisurated Magnesia, the antacid at an alarming rate. This acid irritates and inflames the delicate stomach lining and often leads to gastritis or stomach ulcers. Don't dose an acid stomach with pepsin or artificial digestants that only stimulate digestion from food and irritating the sour fermenting mass out of the stomach into the intestines.

Instead neutralize or prevent your acid stomach after meals with a little Bisurated Magnesia and eat only what you please. Don't be afraid to eat what you like. There is nothing better than Bisurated Magnesia to prevent and settle an acid stomach. Your grandmother's aunts and feels fine in just a few minutes. Bisurated Magnesia may be obtained from any reliable druggist in powder or tablet form. Ask for a teaspoonful or tablets and please do not use a laxative and to not at all expect.

Idle Money Earns Nothing

When Waterloo Bridge in London, England was built 120 years ago several sovereigns were buried in a block of granite forming part of it. When this bridge is pulled down each of these sovereigns will be worth 27s. 9d when recovered but had they been invested each of them would now be worth about 100 pounds.

The last session of U.S congress saw the introduction of 6,041 bills.

WEDNESDAY, MAY 18th, 1932

FARM YOUNG PEOPLE'S WEEK, JUNE 2nd to 9th.

Between 150 and 200 farm boys and girls have been spending a week at the University in June every year since 1915. Many of these boys and girls who visited the University for the first time at a Farm Young People's Conference, have returned to take the regular degree courses later on. Others have established a contact with the University which has proven very valuable to them in their farming occupation.

Into one short week is crowded a wealth of new experiences, inspiration, education and good fellowship. It will be well worth while to spend the week of June 2nd. to 9th at the University.

Miss Dora Moore of Edmonton is spending a week's vacation at the home of her mother here.

oooooo

Owing to very few cases coming into the nursing home, Miss LePage has decided to close the home to nursing cases, but will be open as a private home for Ladies or Gentlemen boarders and roomers.

Be Fit. Rest a quiet home with every comfort it will pay you to see Miss LePage.

oooooo

The Rose Church at Andrassan (6 miles east of East Clover Bar school) had its first celebration of the Holy Communion on Sunday last. A very good congregation was in attendance with thirteen communicants and perhaps twice that number attending.

The organ was played by Dr. Mason who had kindly brought the Parson down, and the new Altar and its Cross and Lights transformed the old school house into the semblance of a house of God. When the pedaling is done, and the rest of the furniture put in, it will be quite an asset to the Church in that district.

ST. GEORGE'S CHURCH
Whitsunday

Holy Communion	8 a.m.
Choral Eucharist	11 a.m.
Evensong	7:30 p.m.
Sunday School	11 a.m.

Whitsunday is now generally admitted to be a continuation of White Sunday, an allusion to the fact that it was one of the three great Baptismal days, when all candidates were clothed in White. The derivation from the Saxon "Pfingsten" Spring is too far-fetched. The day celebrates the descent of the Holy Spirit on the Infant Church, thus completing the work of the Incarnation.

Mr. Dave Roberts returned to work after having been ill for the past two weeks.

A sitting of the district court was held in the Court House on Friday, May 6th, the Honor Judge Crawford presiding.

Col. A. G. Blythe, Regina, has been appointed superintendent of Canada's 1932 Sister team, which sails for the Old Country from Montreal on June 11.

Born to Mr. and Mrs. Raymond Sloane of Andrassan on May 9th at Mrs. Sunday's Nursing Home. A son.

When in search of an unusual filling for the lunch-box sandwich, try combining one part orange juice with two parts cream cheese. Beat to consistency of thick cream.

oooooo

Try spreading one slice of sandwich with orange marmalade, and the other with cream cheese, cottage cheese or peanut butter. Toast sandwich if desired.

FIVE CENT BONUS WILL BE LIFTED ON JUNE 15

Limousine issuing the Dominion five per cent bonus on wheat have been notified that the said bonus will expire on June 15, according to word received Tuesday. Notification was sent forward by the Board of Grain Commissioners as a result of the following order-in-council:—

"Any grower claiming a bonus on wheat under the terms of the above mentioned act to which he is legally entitled, will require to deliver such wheat on or before June 15, 1932, to a licensed elevator in the western inspection division, commission merchant, track buyer or grain dealer, as defined by the Canada Grain act, authorized to pay such bonus."

The bonus has meant approximately $930,000 to Alberta farmers.

VOL. 11 ? — FORT SASKATCHEWAN, ALBERTA WEDNESDAY, MAY 18th 1932 — $1.00 PER YEAR IN ADVANCE

Fort Public School Wins Many Prizes at Festival

Once more the musical Festival of the Lamont Inspectorate has come and gone. Although gone, it's not forgotten. For who can forget such an event with talent and trophies starring one in the face every day?

The Festival, which is by this time, recognized as an annual affair was a huge success when viewed from any angle.

Actually it was the best festival held to date. This is probably due to experience and better accommodation. The various buildings in which the programs of the festival were held were, this year, very much more centred and helped to overcome the tiring effect of trudging from one place to another. The buildings, too, were more numerous and although small, were suitable.

One feature of the festival, this season, was the double program of each night. This was an experiment. Last year, it will be remembered, the whole program was held in one hall. To this, there were two objections. The first was accommodation and secondly the program, naturally, was too long. However, the experiment of this year, too, has its drawbacks.

In the one hall the rural program was to take place and in the other, the town. Although this overcame the difficulty of accommodation it did not altogether overcome the question of the length of the program. However, if the former plan of strictly adhering to the original idea of two separate and distinct programs had been followed, this difficulty, too, would have been over come. Then, too, the children after a day's work, and the teacher also, find it very hard to travel from one hall to another and at the same time find where they fit into the program. Surely a challenge Fort Saskatchewan. Aren't our halls and accommodations better than at either Lamont or Bruderheim? Haven't we more of them and aren't they more centrally-set? Wouldn't the Festival at Fort Saskatchewan work for Fort Saskatchewan? Why not have it in the Fort? Why not? 1933 is coming up

Besides a superiority in every necessary accommodation the Fort showed a superiority in talent. When considering the loss of time due to mumps and flu is given and considering the time spent in actual training for the festival, too Fort did remarkably well. Out of a total possible 80 marks the Fort earned 61. Isn't that a record worth checking at next year? It's hard to beat.

Nearly every item the Fort entered they carried off a prize. The question arises: Why didn't we bring home the grand aggregate? It is very possible but not probable when you review the entries. A first prize for a Chorus, Action Song, Folk Dance, or Dramatization earns 10 points and counts accordingly. Duets earn 6 and down. Solos and Recitations 3 and down. Most of our entries were in the lower marked ones and therein lies the story.

Following are listed the entries, winners and prizes according to the individual rooms.

Room IV
1. School Chorus 2nd.
2 Solos: Zella Lamoureux 1st. medal. Margaret Clover 2nd. book.

(continued on back page)

PARTRIDGE HILL NEWS

Mrs. H. Rye spent last week-end in Edmonton the guest of her parents Mr. and Mrs. Smellie.

oooooo

Mr. and Mrs. Harold Howard of Edmonton spent the week-end with Mr. and Mrs. B. Smith here. We are glad to see Mrs. Howard around again after her recent lengthy illness.

oooooo

On Tuesday night Ypres Valley ballroom and Norman Lansbly's Bearcats went into a huddle. Score: Ypres Valley 32, Partridge Hill 4, Umpire Frank Smith. Maybe this accounts for it.

oooooo

Mr. A. Lunan has returned from his homestead at Spirit River, and expects to remain home for the summer.

oooooo

Saturday evening Ypres Valley Juniors came out and played a game of soft ball with Partridge Hill. Score Partridge Hill youngsters 23, Ypres Valley 15.

oooooo

The Junior U. F. A. are holding frid for their weiner roast on the recreation grounds on Friday night. Ice cream and candy will be served. Softball game between the Ypres Valley and Partridge Hill Ladies and a horse show tournament are amongst the attractions. Miss E. McGowan, Entertainment Director will be present.

While here Miss McGowan will be the guest of Mrs. R. Warring and Mrs. C. H. Plisnoff.

oooooo

Mrs. Violet Lawrence and Miss Cobaldstone entertained the U. F. W. A. last Tuesday at a fine Mother's Day meeting. A paper by Mrs. W. Pearce on "Mothers" was much enjoyed. Also tributes to mothers was a note worthy feature of the program.

Mrs. Mac Naughton of Renfrew, Local Community Director was present and during the afternoon was presented with a bouquet of pink Carnations in token of the esteem which she is held. Mrs. W. Pearce past President of the U.F.W.A. made the presentation. While here Mrs. Mac Naughton was the guest of Mrs. J. Smith.

Castle School News

In the recent Festival held in Bruderheim last Friday, Mrs. Clink of Castle School won cups and several medals.

The following students took part in the festival.

For best public school solo.
Allen Clink, Cup.
Solos
Doris Krebs (Gr. 5 & 4) medals.
Allen Clink (Gr. 5 & 6) medal.
Recitations
Elmer Morris (Gr. 5 & 6) medal.
Doris Krebs (Gr. 5 & 4) medal.
Rural school highest aggregate, the Lamont Citizens Cup was won by Castle School.

Mrs. Clink, teacher of the school is to be congratulated on the splendid showing her school made.

A number of pds and other material had to be left from this issue on account of the large Festival report.

TOWN OF FORT SASKATCHEWAN

Notice is hereby given, that under the provisions of The Tax Recovery Act, 1929, the Town of Fort Saskatchewan will offer for sale, by public auction, at the Town Hall, Fort Saskatchewan, on Thursday, June 23rd, 1932, at 2 o'clock in the afternoon, the following lands:

Lots	Block	Plan
Most northerly 25 ft. of the northerly 80 ft. of 13 and 14	3	O
S. ½ of 11	3	O
7 and 9	3	O
10	3	O
16	13	O
20	21	O

Lots	Block	Plan
2	17	O
4		O
5	28	O
13 and 15	25	O

Redemption may be effected by the payment of all arrears of taxes and costs at any time prior to the date of the sale.

Dated at Fort Saskatchewan, Alberta, this 21st day of April, 1932.

Jas. Ritchie,
Town Clerk-Treasurer.

Josephburg News

The pupils, teachers, and friends of Josephburg School enjoyed their very full and very busy day at Bruderheim last Friday, and returned to their homes well if not fully satisfied with their conquests, which are as follows:—

Recitations
Harvey Mohr (Gr. 1) 1st medal.
Nora Ashton (Gr. 5) 1st. medal.
Ellen Krebs (Gr. 1) 2nd. place.

Solos
Jean Kuzana (Gr. 1) 2nd. prize
Marvin Mann (Gr. 1) 3rd. place
Stella Dane (Gr. 6) 2nd. prize
Ruth Griffin (Gr. 5) 1st. Medal
Lloyd Wilkie (Gr. 5) 3rd. place
Action Song (Gr. 1-4) 2nd. place.
Chorus (Two Room Rural) 1st. (F. A. Minhaw Cup).

We keenly regret leaving in other hands, worthy though they are, two of the three cups to which we have grown fondly attached during the past year; and we warn those who hold them that we shall do all we know to recover them next May.

We are grateful for the very fine support and encouragement given to us throughout by parents and friends. Especially do we thank Mrs. J. W. Dane, Mrs. R. Mann and Mrs. Wilkie.

The success of the day during the weeks of training and on the day of the Festival, To these good friends our successes are very largely due.

oooooo

Born to Mr. and Mrs. Albert Mohr of Josephburg on May 16th. A daughter.

oooooo

Rev. and Mrs. Stevens of Sylvan Lake are staying a week with their son-in-law Walter Cranston.

oooooo

Mrs. M. Mohr returned home from the Lamont Hospital after having undergone a serious operation.

Fort Ready For Big Sports Day on May 24th.

The 24th of May Sports to be held in the Fort promises to be very successful. Baseball will be the greatest attraction as usual and this year the sports committee have lined up the best teams East and North of Edmonton, Vegreville, Morinville, Lamont, Willingdon, Stony Plain, Bruderheim and Fort Saskatchewan.

The first game will likely be in the morning at 10 o'clock, the second as soon as the first is finished and so on. The last game is scheduled to take place at 6:30. All games will be 7 inning games with the exception of the final which will be nine innings.

The baseball diamond will be in the best shape it has ever been, thanks to the kind assistance of the President, Warden McLean who has had a gang of men busy levelling off the infield and filling in the holes.

Rev. Ramsay has consented to umpire several of the games and another capable umpire will handle the rest.

There will be a men's basketball tournament and teams from Lamont and Fort Saskatchewan have entered, entries are expected from Bruderheim and Shandro also. The winning team receives a lovely new official basketball.

Another attraction will be the Horse Pulling competition. All farmers should drive in their best team of horses and endeavour to cop this event. The prize will be all the entry fee, not to be less than $-00 however.

Horse shoe contest will be in play during the day and a very good cash prize has been put up.

There will be races for children of all ages. These races will be run off after dinner as it will enable the country children to attend. Announcements will be made at the grounds and information will be tendered by or from anyone wearing badge. Anyone desiring to receive further information may phone or see the following: Jack. Geof, Fred Collins, Jos. Lalonay, The Record Office, Russell Carroll at Royal Bank or Ralph Prescot at the Fort Hardware.

There is an opening for a hot dog stand at the grounds and as yet no concessions have been granted for the serving of dinner and supper. Any cookey or club either in town or country who wish to do so please get in touch with anyone of the men mentioned in the above paragraph.

To top off this fine day's entertainment the baseball club are having a dance in the evening with the Rhythm Boys Combination in attendance.

Admission to the grounds will be 25c for adults and 10c for children.

"SALADA" TEA

"Fresh from the Gardens"

The Past, The Present and The Future.

Poets have written of "The past I leave behind"; men of affairs have chided the same thing; conjuring youth pessimism to refrain here made such emphatic declarations; all of us have been converted to "let the dead past bury its dead."

But can the past ever be left wholly behind? Does it not always introduce into the present and even project itself into the future? Is not the present made up largely of the accumulated experiences of the past, and will not the future be modeled in the experience of today? All history proves that this is so.

Furthermore even if it were possible to leave the past behind, to wipe the whole slate clean and begin all over again as if what has gone before had never been, would it be a wise course of action? In some respects, perhaps, yes; in other respects most decidedly, no.

The past, it is true, is now only of value for the experiences it has provided, for the lessons it has taught, for the accumulations of wisdom it has thus stored up for our guidance, for the advances that have been made, and are now ours, in the onward and upward march of the race since prehistoric days. And it is because of these gains that it would be most unwise to completely blot out the past, even if we could.

Even the mistakes, the errors, the foolishness, the sins of the past should not be forgotten, they, too, have their value. They are the signposts along the road of the present, stretching on into the future, to warn us of dangers, to point out what to avoid.

But the past and its experiences, insofar as they resulted in discouragement and disappointment, weakening our will, breaking our courage, lessening our initiative and energies, should be relegated to the limbo of the forgotten. They have no value, and constitute nothing but hampering drags now and throughout the days and years to come. They may well be wholly erased from our memories; left to the past to be forever buried up and lost.

And the present? It is our only opportunity. We may have a future, and we may not; no one can tell. But we have the present; it is now ours to use or abuse. And we have the past to guide us in the manner and method of its use. And the future, if we are accorded one, will largely be what we make it by the use, or abuse, we make of the present.

Down through the ages our customs of life, our daily habits, our modes of thought and action, our institutions of government, our whole community existence, even our physical beings, have been developing and moulded to the forms of today. Man has profited by the lessons and experiences of the past, and he must continue in the present to profit by them, to add to the capital his learning to the problems of the present if his own future, and the future of his children and of the race, is to be better and brighter than in the past.

From the dark ages to the present, mankind and the world in which we live has progressed. At different stages progress has been achieved by great upheavals, by revolution, but it has been through the less spectacular peaceful processes of evolution that the greatest upward strides have been made, those having the most far-reaching, most beneficial and lasting results for the betterment of all. This very fact, these experiences out of the past, have a lesson for the world of troubled today.

We have been suffering from a so-called business and economic depression. Times have been difficult and discouraging. Men and women in all countries and all walks of life have been, and still are, discouraged. Some are desperate, and talk revolution. But the past, if we will heed its warnings, teaches us that by revolution they suffered the most, whatever may have been the ultimately beneficial reforms that were made in them, been by and through evolution that the greatest gains and blessings to the masses of the world's inhabitants have been secured.

In times like the present, man's views become distorted and their thinking unsound. This is but natural; it is, indeed, human nature. They are prepared to go to extremes in the present without counting the cost of what the future will call upon them and their descendants to pay for the mistakes they may thereby make.

The present, therefore, is not a time for man to say: "The past I leave behind," except in the sense that they leave the errors and follies and unsound thinking of the past out of their reckoning and plans for the present and future. Rather it is a time to remember and closely study the past, the experiences of the past, and the results showed from those experiences, with a view and a determination to profit thereby, to apply what the past experience has proven to be had, and incorporating, extending, strengthening those ideas and principles which have revealed their soundness into the warp and woof of the future.

Growing Their Own

Gardeners in Iceland are using the hot springs for horticultural purposes a hen that was buried under a long with small good results that they hope will soon be able to export to more foreign vegetables—they can grow nothing to supply the whole island. The islanders are starting a campaign with the slogan: "Buy Icelandic."

Showed Great Vitality

Remarkable vitality was shown by a hen that was buried under a heap of garden and path cleanings at Palmerston North, New Zealand, for twenty-four days. A neighbor heard it cackling and found it still in a lively condition. It was fresh and emaciated, but made a good recovery.

Physicians people not only refuse to give credit where credit is due, but they won't give credit where credit is due either.

Psychologists find, in tests, that stimulating effects of caffeine in coffee and other beverages become less as the user grows accustomed to the drink.

Her Heart Was So Bad Couldn't Be Discovered

Mrs. D. Simpson, R.R. 1, Midland, Ont., writes: "I had been troubled with heart trouble for many years.

My heart would beat so fast I could hardly breathe, and I had headaches and dizzy and fainting spells.

I couldn't get my housework done I was so weak. I took three bottles of Milburn's Heart and Nerve Pills and felt much better, and now I would not be without them in the house."

Price 50c a box

Milburn's Heart and Nerve Pills are sold by dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

How Thieving Pen

Scotland Yard Looking For Gang Robbing Letter Boxes

A gang specializing in a combination of thieving and forging are occupying the attention of Scotland Yard. In search or letters containing checks, they fish in public and private letter-boxes, using flypaper as bait. Much of this work could prove futile, unless they have inside information or work at suspicious times, such as the first of the month.

Forgery of the purloined checks is a specialized job, which can be detected only by the use of ultra-violet rays and the aid of a handwriting expert. The gang's methods are so characteristically clever that they offer to Scotland Yard a ready means of identifying their handiwork.

If Major Wallace were still alive, it is now his play featuring these most capable might be expected in a few weeks—or even days.

Acids In Stomach Cause Indigestion

Counts Discourage, Gas and Pain. Here To Prove.

Medical authorities state that nearly all forms of indigestion, sour stomach, gas, heartburn, nausea, etc., are due to acid in the stomach. The delicate stomach lining is irritated, inflamed, ulcerated and even covered, causing the disagreeable symptoms which every sufferer knows only too well.

Artificial digestants are not needed but rather something to relieve the acidity. Try laying aside all digestive aids and instead get from any druggist a few ounces of Bisurated Magnesia (powder or tablets if preferred) and take a teaspoonful in a little water after meals. This removes the formation of acids and the sour stomach disappears. It is safe and harmless. It is used by thousands of people who have found new relief in this way.

Icebella Houses Are Source

Spotted Breed Can Be Obtained Only In Germany

Icebella horses are being sought in Germany by Scotch and Canadian breeders, as one of the best judges of horses in India, at the behest of a Maharajah, has declared that the Icebella with brownish yellow coats and white manes and tails. They are wanted to draw the Maharajah's state coach, because of this horse itself to be bred throughout Europe by various princes, the stable of the Kings of Hanover in Herrenhausen, being especially noted for them, but now so far as is known they are only bred by one private dealer in Germany.

Persian Balm the one toilet requisite that is guaranteed to remove fat to use. Leaves no stickiness. Quickly absorbed by the skin. Delicately fragrant. Imparts a velvety loveliness to the complexion. Soothes the skin. Soothes and banishes all unpleasant roughness or irritation caused by wind and other weather conditions. Makes hands soft as velvet. Prevents sunburn. Sold only by Rexall druggists. Persian Balm is a definite aid to women of refinement.

Origin Of the Sandwich

It seems that the spirit of the age is against tea. "I wouldn't dream of taking up time and space with all the commercials of a talk," says a very modern hostess; "We usually play bridge and a stop for tea would be a nuisance." So we are back again at the days when my Lord Sandwich, too busy with gambling to bother about lunch, invented the snack which bears his name.

Asthma Is Torture. No one who hasn't gasped for breath in the paroxysm of asthma knows what such suffering is. Thousands do know, however, from experience how immediately relief is afforded by that marvellous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

Longer Greenhouse Area

Glass used in the greenhouses and hotbeds on Vancouver Island and the Lower Mainland, British Columbia, covers an area of approximately four million square feet, an increase of almost 100 per cent. in the past eight years.

The North Pole is not by any means "the coldest thing in the universe." Liquid hydrogen has a temperature of 422 degrees below zero.

Eno keeps you Clean Inwardly

It's far more important to clean the inside than the outside of a milk bottle. For the same reason, clean intestines are far more important than clean face and hands. Nothing will cleanse your intestines better than ENO'S "Fruit Salt." Take it regularly, morning or night. Be ENO conscious!

ENO'S "FRUIT SALT"

A Promising Sign

Many New Manufacturing Industries Are Starting In Britain

Students of the British industrial situation are pointing out that the returns from the Patent Office indicate an increased tendency to protect in Great Britain the production of commodities which heretofore have been largely supplied from foreign countries.

It is of great interest to note, in this connection, that there have been applications for patents for silk manufacture, hitherto largely controlled by France; for laundry machines, up to now regarded as an exclusive American monopoly; and for dye and alloy manufacturer, of which Germany has been the principal originator in the past.

In all these varying fields, new industries have sprung up in the Old Country, and as far as dyes and alloys are concerned, the manufacture is now predominatingly British, while silk and other products are being manufactured in Britain in ever-increasing volume. At a time when business is supposed to be dull in the how-worn, surely this is a promising sign.

Miller's Worm Powders not only make the infantile system inhospitable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms cause. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

Radio in Dummy Funnel

This Innovation Will Be Seen On New British Liner

A dummy funnel will be used to house the wireless equipment of the White Star liner "Georgic," which is rapidly nearing completion at Belfast. The aerial and direction finder loop will be inside the giant funnel, and thus screened effectively from local electrical disturbances. The top of the funnel will be open, and with the aerial fitted on the roof of a cabin inside, it will be possible to obtain uninterrupted wireless signals for direction finding. The screening will be so complete, in fact, that the usual work of eliminating electrical interference from the ship's motors will be unnecessary.

Like her sister ship the "Britannic," the "Georgic" will have two huge elliptical funnels, but as she is a motor vessel, only one is needed as an exhaust and ventilator.

Fewer Bursts Freight Train

Kenora Eight Freight Cars Off the Track at Level Crossing

They tell of a mouse falling into a rum barrel and crawling out crying for Bons to fight.

Recently at a level crossing near Greenwood, Ont., a "Divvy" eight-wheeled a Canadian National Railway freight train and derailed eight cars. It charged screaching and then screeching, a total wreck, but in its death agonies it guarded its owner-driver, T. E. Cullen, Orillia, and another passenger, William Middleton, both of whom escaped with minor bruises. None of the train crew was injured.

Why suffer needlessly? Dauphine Liniment brings quick, sure relief to mind feet, stiff corns and bunions. Recommended. Sold at most good stores.

Trapper Meets Tragic End

Perishes From Cold In Shack In Northern Woods As Result Of Accident

Solution of a five-month mystery and the end of a Royal Canadian Mounted Police search came recently with the arrival at The Pas of a Mounte patrol under Constable W. Barret, bringing the body of Corp. Morrell missing trapper, from one of his trapline shacks 84 miles east of Mile 374 on the Hudson Bay Railway lines

Morrell left Mile 374 on Christmas Eve last, planning to be gone two weeks on a hunting trip. It to be-lieved while covering his trapline he accidentally discharged his rifle and the bullet struck him behind. During the lapse of days, he staggered through the snow to one of his trap-line shacks, where he made a rude and futile effort to stop the flow of blood from his injured arm. As he weakened rapidly he built up the fire in the shack to keep out the freezing winds, using chairs, part of his bed, and even his snow-shoes in his effort to keep warm.

When friends here became alarmed at his long absence, a detachment of Mounties set out in search for him, and broke into his shack to find his body in the grim setting of his long struggle against death. His body was brought to The Pas for identification and burial. He is believed to have lived in Winnipeg and Saskatoon before coming north to trap.

No Wood in Solid

The soldier and wounded kind of wood is not really solid at all. It is full of air - twenty to forty per cent. of its total bulk consists of gases, trapped in the minute tubes and cell cavities that all wood is made of. This appears from the researches of Dr. D. T. MacDougal, of the Carnegie Institution of Washington, who reported them.

Economic Organization Within The British Empire Is Urged For Boosting Inter-Empire Trade

Formation of a permanent economic organization within the British Empire and elimination of party politics from imperial trade conference were urged by Hon. Frank Carrel, prominent Quebec publisher, as steps toward restoring inter-empire trade. The proposed permanent economic organization should be similar to the League of Nations, Mr. Carrel said in his address to the Canadian Club and Calgary Board of Trade members.

The speaker believed one important result of the coming Ottawa Imperial conference would be the organization of such an economic body as he suggested. This body would "technically, scientifically, and confidentially find the solution to many problems now engrossing all the peoples of the empire." Empire trade, Mr. Carrel said, is rapidly becoming converted to the U.S.S.R., he continued, and sympathy was growing stronger throughout the empire.

Mr. Carrel's plan also included an empire educational campaign through the press, radio and cable, through the founding of an empire commercial university, assistance in the promotion of British Empire exhibitions, coordination of trade agencies, and consular services; construction of empire warehouses in leading industrial centres; possibly by creation of free ports; interchange of business data throughout the empire, uniform trade laws, standardized, and favorable treaties with world trading stations.

Great Bear Lake Minerals

Many Claims Have Already Been Staked and Great Activity

Shown

According to reports reaching Ottawa, a great many mineral claims have already been staked in the area adjacent to Great Bear Lake, North West Territories, and there is every likelihood that many more will be staked this year. Some prospectors have already gone in by aeroplane and others are planning to go in by winter transport as soon as the ice goes out. In view of this great activity the Topographical Survey, Department of the Interior, Ottawa, has reprinted the manual respecting the survey of mineral claims in Dominion Lands for the use of Dominion land surveyors who may be called upon to make official surveys of these claims.

U.S. Wheat Exports

Made International Gain In March Over Recent Months

Wheat exports of the United States made a substantial gain in March over recent months. The index was 79, as compared with 72 in February and 74 in January. A year ago it was 85. All other import groups, however, fell off sharply.

All principal European countries except Italy took more wheat in March than a year ago. Total exports thus for this season amounted to 104,992,000 bushels against 182,-269,000 a year ago.

"Are you going to take this lying down?" boomed the candidate.

"Of course not," said a voice from the rear of the hall, the shortened sequel being done.

"When is high tide, captain?"

"At 5.55 p.m. But I have told you twice already."

"But your chin couldn't be considered by when you say it."—Stanford, Hemlong.

Boss Are Preparing For Season's Work

Abundant Food and Protection From Cold Essential To Strong Colonies

During the winter months there is little or no activity within a bee colony, for during the cold weather the only matter of concern is the bees is to secure enough food and to keep warm.

Sometime last fall the queen ceased her egg-laying, and as the combs became empty of brood they were filled with food for the winter. As the weather became cool the bees gradually clustered closer and closer around their queen until finally a fairly compact cluster was formed, and, except during an occasional spell of warm weather, this cluster may remain unbroken for a period of five or six months

During the winter, the cluster moves about within the hive, at all times keeping in contact with the food supply. Towards spring as unknown something will inform the bees that summertime is again on its way and the cluster will gradually loosen and expand and in the centre of the cluster the queen will again resume her work of egg laying. Only a few eggs are laid at the start, but as the days lengthen and the sun becomes stronger, the number gradually increases until as high as 2,000 may be deposited daily.

In northern wintered colonies, egg-laying usually commences some time during the month of March, depending greatly upon the weather. In some localities such activity may be resumed even earlier. Colder wintered bees do not usually start as early as outdoor wintered bees, except under abnormal conditions. The early egg-laying is of great importance to the beekeeper, for it is the eggs laid during the spring and early summer that will produce the bees to gather the honey crop of July. Bees require 21 days, from egg to adult. Hence the number of field bees at the commencement of the harvest, the greater will be the honey crop, it follows that the greater the number of eggs laid during the early part of the season, the longer will be the land force. To get the maximum number of eggs laid, three things are necessary. A vigorous and prolific queen; an adequate food supply, and adequate protection from cold and changeable weather. Neglect to supply any one of the three will result either in starvation and death of the colonies or in colonies that are too weak in bees to gather a surplus of nectar when the honey flow is on.

Telegraph wires in East Africa have to be carved on conspicuously high poles owing to the liability of giraffes breaking the cables.

Report Of Committee Favors A Nationally-Owned Radio Broadcasting System For Canada

Schools Need Freedom

England Taking Advantage Of New Idea, Sir Richard Says

English education is very much alive. There are still dull patches in it, of course, but, go where you will, you are never far from a school which is showing strong power of adaptation to the new needs of the community. There comes before in history English education has finished with renewed energy. first under Alfred, next at the time of the Reformation, and last in the early days of Queen Victoria. But never till now has it been free from the cramping influences of poverty. Today it is well furnished and free in its choice of methods of work. The teachers are full liberty to try new ways of teaching; to get into the open air; to use other tools than the pen. A school needs space, and land and room of it is rightly to train those who a few years hence will make or mar the tone and temper of town and village, of farming, shop and farm. Not all the schools have yet made full use of their new opportunities. But England is now dotted over with good examples of the new education.

Seed Oats From Alberta

Further Supply Has Been Ordered For Saskatchewan Farmers

Further shipments of seed oats will be made from Alberta to the drought-stricken areas of Saskatchewan, according to G. H. Stewart, district inspector of the Dominion seed branch in Calgary.

Some time ago one million bushels of seed oats were shipped from the Peace River area to Saskatchewan. The further shipments will be made from other parts of Alberta only as the surplus supply of seed oats in the Peace River country has been used.

Mr. Stewart said a request has been received from Saskatchewan authorities for additional supplies of seed oats. The previous shipments having been unsatisfactory.

Will Not Read Fine

Confessions Of Future Will No Doubt Have Antidotes

The prediction that fire, which has played so straight and friendly a role in man's progress, will be needless to future civilization was made by Dr. Walter Hough, chief curator of anthropology of the U.S. National Museum. Dr. Hough based his prophecy that we shall become independent of fire upon the ground that natural heat is free will be utilized. The guess of the future phase of civilization is already developing in modern invention, Dr. Hough said.

"Good, let us go south immediately."—Stanford, Hemlong.

RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

— With Castoria's regulation

When your child tosses and cries and is not sleep it means he is not comfortable. Very often the trouble is that poisonous waste matter is not being carried off as it should be. Sometimes baby milk, gentle baby aid — but effective. Just the kind Castoria gives. Castoria is a pure vegetable preparation made especially for children's stomachs. It contains no harsh harmful drugs no narcotics. Don't let your child's rest and your own be interrupted. A prompt dose of Castoria will urge stubborn little bowels to act. Then refined comfort and restful sleep! Genuine Castoria always has the name:

Chas. H. Fletcher

CASTORIA

WORLD HAPPENINGS BRIEFLY TOLD

Lord Irwin, former viceroy of India, said he was encouraged with the spirit of optimism in western Canada.

Prince Peter of Montenegro, brother of Queen Elena of Italy, died recently at Bolzano, Italy.

Green peas, the seed of which are said to have come from King Tutankhamen's tomb, are being grown by M. Pujstrup at Pass Lake, Ontario.

The United States senate rejected a proposal for a year's suspension of military and naval armament construction.

There has been an increase of 500 head of cattle shipped to Great Britain through Montreal port over the same period last year

Manitoba, Saskatchewan, and Alberta government representatives will meet early in June to prepare statements for the forthcoming Imperial Economic Conference.

Captain Hilton H. Bailey, who with Simon Lake, the inventor of the submarine, hopes to raise the "Lusitania," states actual work on the project will begin early this fall.

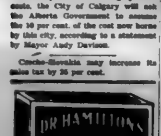
Commander F. W. Nesbig has been appointed commander in charge of Halifax naval port. Commander V. C. Brendour at Halifax now will go to Esquimalt.

It is proposed to form a pool for carrying on export business from Canada to Latin-America, to prevent Canadian goods losing their identity on passing through United States hands.

Winston Churchill, former Chancellor of the Exchequer, in an address recently, asked the United States and Great Britain to join forces in leading the world "out of these gloomy caverns into the broad sunlight of activity and progress."

If the Canadian Government assumes 75 per cent. of old age pension costs, the City of Calgary will ask the Alberta Government to decrease the 50 per cent. of the cost now borne by this city, according to a statement by Mayor Andy Davison.

Czecho-Slovakia may increase its sales tax by 25 per cent.



Collected Queer Articles

Man's Head Cold Sticky

Investigators in Hamilt on, Ontario, probing the strange case of Absolom Markle the so-called pauper who died leaving a bank account of $16,000 found themselves faced with the most baffling collection of articles ever seen outside of a museum lobby

Markle died over a month ago, apparently in penury and was buried at the city's expense Later it was discovered he had $16,000 in the bank. Large packing cases were located in a storage warehouse in Markle's name, and were opened in the presence of witnesses

Among the things found were three Notepaper of the Royal Hotel many years defunct 200 rubber heels, old fashioned handlebars rubber shirt fronts, a collection of 200 hats, corsetmens hats plaid caps, derbies which revealed every fashion from the 80's onward a large assortment of keys for opening suitcase cans, huge stocks of bedding, coat buttons hairpins, powder puffs of yesteryear soap spoons, patent eye testers, many old books of greeting cards, paper ice cream spoons and many other peculiar articles.

Words of MOTHERS ARE GRATEFUL

EAGLE BRAND CONDENSED MILK

Great Canadian Hero

Colonel Medley Set High Example For Loyalty To the Empire

Colonel Lorne Winfield Mainly D.C.M., R.A., a prominent figure at the banks of greeting cards, paper ice cream spoons and many other peculiar articles.

home on the St Lawrence River frontquota, Ontario, at 11 p.m. Sunday February 21st, 1932 from heart attack, aged 52 years. This with little dramatic suddenness, there was removed from Canadian public life one of its most brilliant intellects and inspiring figures.

Blinded in the South African War Colonel Medley mastered every obstacle imposed by his wounds, cheerfully created fresh ones to be courageously healed his pathe. Every resistance was supremely successful in all tasks he undertook, and his death came at a time when his powers of intellect and his public service were at their zenith poised destined to still further achievements.

Born in a Canadian farm, blinded in his early twentie- he continued his education with the aid of a secretary graduated with honors from Toronto university, became one of the most outstanding speakers of our day on subjects of political economy, was offered seats in the Senate and the British House of Commons, was on the staff of the Royal Military College, became a successful practising lawyer, and his services to Canada during, and immediately after the war, were sufficiently conspicuous to deserve ennoblization.

He has been referred to as the father of Union Government in Canada. His fight and arguments for compulsory military service are believed to have been the deciding factor in rousing the United States to declare against the inefficiency of voluntary enlistment.

As early as 1916 he was one of the leaders in Great Britain in the fight for tariff reform and Empire preferences, such as we have being negotiated by the several governments at Ottawa.

Medley's physical handicap was not perceptible to his friends, and he refused to recognize his lack of sight as either a misfortune or a handicap. His fighting spirit was indomitable. He could swim, ride, row, fish, or drive a golf ball with any man. Alone he rowed a row boat across the St Lawrence River in a gale.

He could untangle a fishing line more quickly than any companion. He never walked except at a stride. He has ever been an incessant traveller, and he never had an accident.

His humour was scintillating, clean and infectious. Invariably he looked through and beyond the dark side of life. He was the soul of sincerity, generous and integrity.

Medley's life should be printed in every school book, told from every pulpit and repeated at every Canadian fireside. As a practical and thrilling inspiration to the boys and girls of this country, this epic of courage and triumph and high ideals will perhaps never be excelled.

Fashion

IT CATCHES FOR A SCARF EFFECT THAT WILL "STAY PUT"

Delightfully young and smart is this new slim-line model.

Since crepe silk both plain and print is so fashionable now, it should be for this fascinating model.

It is perfect when spotted in navy. The soft crushed scarf collar gives it much distinction in plain white crepe.

Another total suggestion is plain crepe in soft beige shade suitably trimmed.

For summer wear, linen prints, batiste prints and linen suits are new mediums.

You'll find it very simple to fashion, and the cost unbelievably small.

Style No. 2929 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. To the boys and girls of this country, this epic of courage and triumph and high ideals will perhaps never be exceeded.

Acidity Overcome

Wonderful Results From Famous Vegetable Pills

Instead of having an acid stomach and being constipated, Mr. Frank C. Is sold, 17 Cecil Street, Toronto, writes: "Dr. Morse's Little Liver Pills," he says, "are what they are PURELL VEGETABLE, a gentle, effective tonic to both liver and bowels. Dr. Morse's Little Liver Pills are a wonderful aid for constipation, Biliousness, Indigestion, Sick Headache and Sallow Skin. Ask for Dr. Morse's PILLS.

SUNDAY SCHOOL LESSON

MAY 22

JACOB AND ESAU RECONCILED

Golden Text: "Be ye kind one to another tenderhearted, forgiving each other even as God also in Christ forgave you." Ephesians 4:32.

Lesson Genesis 32, 33.

Devotional Reading Matthew 6 9-15.

Explanations and Comments

Jacob's Precautions, verses 1, 2 Looking up Jacob saw Esau approaching with four hundred men The presence of so many men with Esau may be accounted for by his having just made his expedition to Mount Seir where he conquered the land in which he afterwards settled (Genesis 36:6, 7 Edersheim suggests that he may have wished at the same time to make his brother ashamed and to show him the contrast between their respective positions. Jacob evidently feared the worst. He was keenly aware of the undeserved injury he had done. He arranged his little company and put the handmaids and their children first, Leah and her children next and in the safest place of the rear his best-loved ones Rachel and Joseph

Though courts of law neglect to curb their transgressions,
The court of conscience always is to censure.

The Meeting Of the Brothers, verses 3-11 Jacob passed over the Ford first and showed Esau the greatest reverence by bowing himself to the ground seven times. Esau ran to meet and embrace Jacob, falling on his neck and kissing him as was the custom among friends. Had Jacob's present and his flattering attitude disarmed him? Dr Skinner thinks that Jacob's generous gift and submissive manner gained a diplomatic victory over him Rather does it seem that God has brought vengeance he had disclaimed the affair of the birthright with a string, as it were, and now whistled softly "Don't mention our trouble I have got along famously without the birthright and without you." Whatever the actuating motive of Esau

"If thou must have thy revenge on thine enemy heap coals of fire on his head." Forgive him, and enjoy it." — Henry Ward Beecher.

Recipes For This Week

(By Betty Barclay)

LEMON SPONGE PIE

(Makes 1 pie)

3 egg yolks, beaten thick.
3 tablespoons lemon juice.
1 teaspoon grated lemon rind.
1 cup sugar.
3 tablespoons flour.
¼ teaspoon salt.
1 tablespoon melted butter.
¾ cups milk.
3 egg whites.

Uncooked pastry.

Combine all ingredients, folding in last egg whites and egg whites. Turn into pie tin lined with uncooked pastry and put into hot oven (400 degrees Fahrenheit). After 10 minutes reduce heat to moderate (350 degrees Fahrenheit) and bake 30 minutes longer, or until filling is firm.

ALL-BRAN QUICK BREAD

3 cups flour.
2 cups all-bran.
1 teaspoon salt.
½ teaspoon soda.
2 teaspoons baking powder.
1 tablespoon sugar.
½ cup molasses.
2 cups milk.
2 eggs.
2 tablespoons melted butter.
1 cup chopped nuts.

Sift dry ingredients. Add bran. Then add molasses, egg slightly beaten to milk. Stir into dry ingredients mixing well. Add nuts and melted shortening Pour into a well greased loaf pan. Let stand 15 minutes. Bake in a moderate oven, (325 degrees Fahrenheit) from one to one and one-half hours.

Largest Welded Bridge

What is considered the largest welded bridge in the world has just been completed in Pilsen, Czecho-Slovakia. It crosses two railroad tracks, has a span of 161.4 feet, and a width of 37.4 feet. The total weight is 146 metric tons, which is said to be 21 per cent. less than that of a riveted structure designed for the same purpose. Another unusual feature is the equal lamp at one end, manufactured by Siemens.

Old Postal System in Yellowstone

restored park stands to a budget of $600 to $50 feet.

Russia Arranges Credit With Turkey

Board On Goods Exchange Without Actual Money Payments

A new economic alliance between Soviet Russia and Turkey, under which this country is extending an $18,000,000 long term credit to its Islamic neighbor, has been announced by Foreign Minister Tewfik Rushdi Bey of Turkey.

The credit is the first ever granted by the Soviet Government, which until now has been a creditor instead of a giver of credit in the world market It is based on an exchange of goods in kind without actual monetary payments.

Under the agreement Soviet Russia will sell industrial tools, agricultural machines and foodstuffs to Turkey, receiving on payments its choice of Turkey's natural resources, such as tobacco, wool, fruits and minerals.

Some Amazing Facts

Many Objects Which Seem Small Are Very Wonderful

A drop of blood contains three million red globules, and there are more germs in the mill of a single cod than men in the world. So small is the germ that one grain of sand is 7,000 million times larger than it. A hundred threads of the silkworm are just one-twenty-fifth of an inch thick when placed side by side, but there are some metals that can be drawn out to such a fineness that two-hundred wires are only an inch as a hundred silkworm threads.

Egypt's great river, the Nile, has its origin in tiny springs in the Mountains of the Moon. These are a range near the equator in the Belgian Congo between Lake Edward and Lake Albert.

BABY'S OWN TABLETS

FORT SASKATCHEWAN RECORD

NEW POLITICAL PARTY ADVANCED FOR ALBERTA

Drumheller, Alberta An independent political organization for Alberta, drawing its support from all spheres of life and from all old political units was announced by F C Moyer Independent M L A for Drumheller, in an attack on the Farmer Government of Alberta Mr Moyer was giving an account of the past session of the Alberta legislature to his constituents

"This new party, to be called the Provincial Party is a development and enlargement of the independent bodies in Alberta politics uniting all forces in opposition to the present government and enlisting all who are prepared to contribute their abilities and efforts toward the betterment of the province" Mr Moyer declared

"It is not a Conservative movement, it is not a Liberal movement, it is not the Farmer or Labor Party in a new guise It is the welcome all who seek not the success of a party but of a people No one person or group has a monopoly of wisdom, so we seek all classes that we may have a cross-section of the life of the province"

In launching the plans for organization of the Provincial Party Mr. Moyer emphasized that it would be based on the independent principle No candidate who was elected under the auspices of the new party would be forced to follow the direction of the party's cabinet if it were elected to power in Alberta

"We want the elected members to go on the floor of the legislature and speak as their judgment dictates This of course," he said, "involves the abolition of the old rule that the defeat of a government bill means the resignation of the ministry But why should the government resign except on a vote of confidence motion? The mayor does not resign if some idea of his is overruled.

"We believe this system will result in better legislation and better legislators. If you hoop a child in swaddling clothes it will never develop to much of a man, and if you stuff the intelligence and expression of a private member of the government side, by making him a ply a vassal, you may lose the aid of one who might have developed into a real councillor Why should not your legislation be the thought of the majority of the whole legislature instead of the majority of the government group?"

On the proposition of votes cast at the general elections in Alberta in 1926, said Mr. Moyer, the Independents should have nine representatives in the legislature. Instead, they had only three.

Referring to organization, Mr. Moyer said that because he was the present leader of the group of three Independents, it did not necessarily follow that he would be the leader of the Provincial Party. "Many strong men will be found in our ranks after the next election, and it is for them to elect a leader," he declared.

Tax Boost In Ireland

Steep Increases In Tariffs Proposed In De Valera Budget

Dublin, Irish Free State. Steep increases in tariffs and income taxes were proposed in the first budget of the De Valera government, which was announced in the dail chamber

The budget provided for a duty on tea of four pence a pound and a package tax of two pence on each container holding any article of food or drink, or cosmetics or medical preparations packed for sale.

The income tax rate would be raised from three shillings six pence to five shillings in the pound.

Drastic action was necessary to make t ith ends meet in the nation's finances because President De Valera's government faced a budgetary deficit of £8,500,000.

The budget provided for extending the entertainment tax to cover dancing, outdoor sports, horse racing and dog racing it also set forth an increase of one shilling two pence a pound in the duty on tobacco.

Drama Of the Skies

Two Men Of Meeting Free Less Lives When Dirigible Attempts To Land

Camp Kearny Calif A tragic drama of the skies was written in an unsuccessful attempt of the world's largest airship, the "U.S.S. Akron," to land here

Two men of the ill-fating crew were killed to death and a third, Bird Cowart, was carried in a hours dang ing on a 300 foot rope from the navy airship

Ten thousand spectators saw the two fall as the dirigible surged upward Cowart swung precariously half a mile over their heads Women screamed men wept.

Then he was rescued Bird met with a hatch on the big ship A message dropped from the big bag

Cowart OK—Bird

A short signal read another

The climax to the weekend meeting of the Akron, which left Lakehurst, N.J. on the first transcontinental flight in efforts to make an overnight journey at Camp Kearny after an anxious wait for the arrival

Several attempts to land the great skyliner down had been made by a determined crew, when suddenly a wind current suddenly caught the great ship

Robert Pollard and Nigel Henlon, riggers on the San Diego naval training station and Cowart clung to the landing line, to the horror of the watching throng The ship veered and surged upward, Pollard and Henlon lost their grip and fell to death but Cowart clung on

Upward the great ship swept with Cowart dangling on the line 200 feet below the dirigible A height of 2,000 feet was reached but Cowart maintained his precarious grip Through bungay ne the Akron sailed but Cowart clung on.

Minutes that seemed like hours to the gasping crowd below passed as the Akron sailed through the sunny air, rocking up and down, with the plucky Cowart dragging along. Then it was noted the distance between Cowart and the Akron began slowly to diminish.

There was no winch on the rope. It was slow work hoisting Cowart up by hand. At last he was dragged through a cockpit.

Creation Of Federal Farm Board Considered

Announcement Made At Ottawa By Hon. Robert Weir

Ottawa, Ont - A commission of experts will inquire into the feasibility of creating a farm products marketing board.

Hon. Robert Weir, Minister of Agriculture, announced in the House of Commons that in view of the Imperial Economic Conference the government did not consider the board should be established at the present time.

A marketing board, to deal with the sale of agricultural products has received considerable study in the past few months. Members from all parties in the House have contributed to the discussion.

It was understood the board's activities would apply not only to butter but to such products in which the exportable surplus is relatively small in comparison with the domestic consumption.

One of the board's functions would be to handle the export surplus in such a way that Canadian prices would not fluctuate widely, due to the domestic price being affected by the world figure.

Allowed To Sell Cattle

Moscow, Russia. Russian farmers have been given the right to sell their cattle in the retail markets for the remainder of 1932. This marked another step in the liberalization of the Soviet farm code, to encourage individual farmers—whether collective or independent to seek the open market.

Delegates Sail For Home

Hamilton, Bermuda. — Carrying with them to their home parliaments new information on Imperial trade, British and Canadian delegations to the tri-partite conference here sailed from Bermuda May 11. Work of the conference was concluded May 9.

RED IN SLATING

Facing a number of charges against Captain W. N. Kennedy, British aviator and parachute Miss Jessie Keith Miller Australian flier, escaped a tuesday investigation into the death of Haslem Essex, auditor at Manila Pictured is Miss Miller as she left the police barge this side which is said to be the largest ever used

Delegates Will Come From All Dominions

Full Representation Assured For Imperial Conference At Ottawa

Ottawa Ont Motion advantage to every section of the far flung Empire will be the subject of the Imperial Conference, which opens in Ottawa July 21 said Premier R. B Bennett during an hour's chat considering problems to be faced at the conference wealth gathering.

Preparations were well advanced he said Committees were gathering information on the three broad subjects to be discussed trade, commodities and currencies.

The Prime Minister will head the Canadian delegation and ministers will be called in, depending upon the subjects under review Every Dominion has accepted the invitation to be represented, and with the exception of New Zealand and the Irish Free State have named their delegation, Mr. Bennett said.

Should Be Well Achieved

Ottawa, Ont. The necessity of forming an informed and understanding Canadian public opinion in the work of the League of Nations, especially now with critical days ahead, was stressed by Dr H. M. Tory, president of the League of Nations Society in Canada, when he welcomed delegates to the tenth annual meeting here

Chino is one of the few great countries where optimism have come into use for commercial transportation before adequate railway systems were developed.

No Wheat Bonus

Both Bunded and Anti-Bonus Plans Are Rejected

Ottawa, Ont A bonus scheme for wheat on both a bushel and acreage basis was turned down definitely by the House of Commons Without a recorded vote two motions moot defeated, the first from No Bert Gardiner (endorsed the farm labor suggesting reimbursement of the five cent bounty on export wheat and the second from Dr Thomas Donnelly, Liberal, Willow Bunch proposing a five cent bonus on a seed acreage basis

In discussing the question of wheat in its relation to the welfare of Canada and its importance to Canadian export trade it must be remembered that the greatest proportion of wheat was produced in the prairie provinces Mr Gardiner declared During the early part of the present century many people had been induced to go to western Canada by the great opportunities which were said to be there in wheat growing

Progressive members had been long in favor of the declaration of policy from the government with regard to the wheat growers Mr Gardiner said that the members of the government were bearing tremendous responsibilities and felt sympathy with them in the burden they were called upon to bear But that fact did not relieve him from the responsibility of inquiring from the government what the policy was.

We produce the best wheat in the world, and we are proud of it," Mr Gardiner continued. But it cost about 76 cents a bushel to produce No 1 wheat on the basis of twenty bushels to the acre. The price paid for No. 1 wheat at the head of the lakes was approximately 30 cents a bushel Consequently every bushel grown meant a loss of seventeen cents The wheat farmer could not keep on very long with such prices

Price of commodities which the farmer used were somewhere lower than in the past, he declared. On the other hand, they had not fallen to the extent which wheat prices had dropped.

Preserve Historic Spot

Wellington, New Zealand. — Lord Bledisloe, Governor-General of New Zealand, and Lady Bledisloe, have purchased "Maitaagi," the most historic spot in New Zealand and the place where the treaty establishing British sovereignty was signed in 1840, and will present it to the nation.

The action prevents it falling into the hands of a citizen of the United States who had been making offers.

Russia gave the largest group of new citizens to Canada in 1861

Airmen flew from Margate, England, to see a fire at Sandwich.

MILLIONS VESTED IN DOUKHOBOR HOLDINGS IN WEST

Victoria, B.C. The extraordinary situation by which an enterprise valued at nearly six and one-half million dollars has been vested in the hands of Peter Veregin and 12 directors by the 5,000 Doukhobors of British Columbia, Alberta and Saskatchewan, is revealed in a study of the articles of incorporation

With Veregin sentenced to three years in penitentiary following a perjury conviction in Yorkton Bank British Columbia authorities are watching carefully the future of the colonies in this province It is stated that according to the constitution of the colonies it would be in the power of the 11 directors to expel the entire 5,000 members, under certain circumstances, and retain the property Should intervened Such an action by the directors is very unlikely as the directorate has a copious surplus of funds as increasing bank account Veregin recently stated under oath that he had accumulated some $700,000 during the past few years.

Incorporated as a Dominion corporation in April, 1917, with extensive territorial rights in the Canadian Canada, the Christian Community of Universal Brotherhood, Limited, of Veregin is capitalized at $5,000,000. Of this capitalization, $700,000 is paid up. But the issued shares are held in the names of Peter Veregin and 12 directors.

The colonists enjoy all belongings while members of the community, but have no right of ownership having dispossessed themselves of such rights some two years ago at a meeting in Brilliant, B.C Members having or expelled forfeit their rights to property but may petition the supreme council of community economists which can admit them a share from the community's properties.

This latter provision, it is believed, has caused much of the disaffection among the expelled Some of Freedom are said to be destitute and have objected to the action, the chief objection being that they have grown much a loss of seventeen cents The wheat farmer could not keep on very long with such prices

Price of commodities which the farmer used were somewhere lower than in the past, he declared. On the other hand, they had not fallen to the extent which wheat prices had dropped.

Preserve Historic Spot

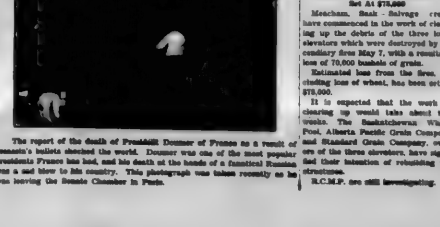
FRENCH PRESIDENT VICTIM OF ASSASSIN'S BULLETS



The report of the death of President Doumer of France as a result of assassin's bullets shocked the world. Doumer was one of the most popular presidents France has had, and his death at the hands of a fanatical Russian was a sad blow to his country. This photograph was taken recently on his way leaving the Russian Chamber in Paris.

New Fortunes In Making

Now is the Time To Buy Securities At Sharply Prices

It is told of Baron Rothschild that at the time of the French Revolution, when the streets of Paris were running in blood he was mostly income French Government bonds at ridiculously low figures. His Rothschild bought these bonds not because he knew they were very cheap if France were saved. He bought because he had faith in France. Five or six years ago many bankers back and wondered why they did not have enough sense and courage to buy sound securities in 1931 at bargain prices. They said if they ever had a similar chance they would seize it by take advantage of it. They have such a chance now One that has occurred only thrice before in this century, in 1907, 1914 and 1921. Human nature always strikes ill have a second chance That second chance is now here Why not take advantage of it?

One trouble on this continent, eage an American, is that we have not the world viewpoint like the English people. What is more, few on this side of the water appreciate the tremendous strides made by the Old Country in the past six months. "Last Fall, just before England went off the gold standard a man went to the Bank of England to get two gold sovereigns to pay the minister at his approaching marriage, and was blandly refused. Within the last few weeks the same bank has repaid, in advance of maturity, £50,000,000 in gold to members in the United States. These contrasting figures—$10, in round numbers, and nearly $150,000,000—are significant. Three years ago the public was lined to all dangers when countries said at dusty heights, unwarranted by experience or history. The same public is utterly blind to current opportunities. Look at the screen your chart. Was money made by buying in 1921 when business was temporarily bad, and the outlook dubious, or paid prices much higher later, with a clear sky and industry at top speed? Then the public was speculating mad. Now it is sane and obvious reasons. Most people think like sheep. This is not the time for sheep, but for independent thinking. The patient is really better, but he does not know it; in fact, he has been looking so long on the dark side, he would hate to admit any improvement."

We certainly do not think of doubting any trend, whether financial or otherwise, but on the other hand the present is the time for courage instead of fear; for work instead of for whining; for hope instead of despair. Our fortunes are in the making. A few years can know it and the blessings of fine citizenship.

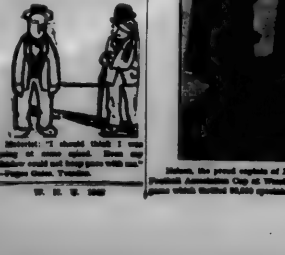
—Toronto Mail and Empire.

New London Tower

Building Has Been Opened By Prince Minister

One of the most imposing new buildings in London has been opened by the Prime Minister, Ramsay MacDonald. It is the headquarters of the Abbey House Building Society, Abbey House, Baker Street, W.W., where St. Ingh originally cloth tower houses in this part of hotels. Securities valued at more than £40,000,000 are housed in the opening rooms. In the basement, garage accommodation capable of by a hydraulic lift with the street is ready for the convenience of visitors.

Miles, Ruby, will spend $6,000,000 on public works within the next 12 months.



Motorist: "I should think I was going at some speed. Even my chauffeur could not keep pace with me."—Virgin Guide, Trenton.

Developing Bay Beds

Canadian Merchant Marine Might Be Used For Demonstration Purposes

Perhaps the most encouraging thing that the Government could do would be to instruct the Canadian Merchant Marine management to put on one of the boats at present laid up, on the route this summer and fall. The Star-Phoenix believes and with reason that import cargoes can and will come into the West this year if adequate rates and transportation are available from Churchill for that reason.

The Government would not in all probability and itself greatly out of pocket if one ship of the merchant marine were put on this summer and fail equipped to carry grain in the holds, cattle between decks and package freight in the remainder of the space. As soon as adequate transportation was forthcoming the ship could be withdrawn easily. It is likely, by possible, it would found that it was profitable to maintain the service.

The point of putting on a ship from the merchant marine is that in this way the Government could quote its own insurance rates on cargoes, if necessary, through to the Old Land. Ordinary rates, at least within hailing distance of them, and time offered to the underwriters the opportunity to ship is necessary and at the same time make a gesture which we have no hesitation in saying will be hailed immediately by the West. The statement has been made that the merchant marine has been instrumental in opening trade routes unprofitable at the start which were taken over subsequently by regular steamship companies and apply the same argument to Churchill?—Saskatchewan Star-Phoenix.

Should Pay Higher Salaries

Manager Man Needed For the Reorganized Civil Service Commission

Members of the special civil service parliamentary committee are unanimous in their opinion that much higher salaries will have to be paid by the government to secure stronger men for the re-organized civil service commission.

"I don't think the government is likely to get the higher salaries now for $7,000 and $8,000 per annum as at present," J. Hal Lorman (Conn. West York), Conservative chairman, said.

The commissioners in the past have held the rank of deputy ministers, but their remuneration has been much lower than the position who are paid from $20,000 to $25,000 per annum. For the new commission it will be reported this matter should effectively be corrected.

Planning Still Wrong Colours

Farmers in the Fraser Valley and on Vancouver Island are reported to be undertaking the planting of new strawberry seeds and cuttings this spring as a part of their efforts to add to their returns, but the highly-desirable Marshall will also be needed for wholesale.

The Footpath Way

Side Paths On Royal Roads Necessary For Safety

Anyone who knows the English footpath is well aware why Britain fights to maintain its ancient heritage of glorious byways. For, in the old country, once a footpath always a footpath That is the law and none pedestrian meddles fight to maintain the rights and privileges of establishment public rights-of-way—and Britain is fussy about trespass. Most Britons like to walk for the pleasure of walking. In their self rural scenery and on time-honored paths walking is also a British tradition worthy of being upheld, is an unforgettable pastime. Their footpath rights are well worth maintaining Now that bearing speed fiends occupy the turnpikes and other smooth highways, the dear paths are more important.

In that we fail short on this one point None of the world of good roads or highways allows anything for pedestrian rights. The rubberized automobile demand and usually get the whole of the road. We do not encourage walking Legs are becoming obsolescent Scenery is something seen from a rushing by the side windows. Speed is our fetish and we miss the true realization of the wonderful ways and works of glorious nature It is because we do not rise to demand of governments footpaths and recognition of the rights of pedestrians to life, liberty and the pursuit of rural happiness. The footpath way is also protection.

There are too few side walks on rural roads for those who appreciate hiking Walking is worth while to encourage. It is magic, the best remedy. One should have the right to walk in safety and comfort if one so desires. - Brandon Sun.

The Successful Farmer

Requires Just As Thorough Training As For Any Other Business

An outstanding Canadian authority discussing farming as a vocation recently included among the essential subjects in the educational preparation for farm work, the following: A thorough training in the use of English; proficiency in mathematics; sufficient commercial training so as to successfully carry on his business; practical training, obtained on the farm; a study of agricultural science including chemistry, physics, botany, bacteriology, entomology and a thorough knowledge of the more practical subjects such as horticulture, field crops, livestock, mechanics and a practical working knowledge of economics and civics. For the young woman whose future happiness will be found on the farm he suggested practical training in cultural subjects such as the work of the home, such as cooking, sewing, management, and hygiene. Knowledge is as necessary to success in farming as it is in any other line of business.

Trouble is, in the United States, that they can't keep the underworld guiltless.

The Health Fad

Many Rules For Exercise and Diet May Be All Wrong

The subject of how to live long is always of interest, which perhaps accounts for the eagerness of the average mortal to adopt upon various methods which are recommended for promoting health and longevity, such as doing daily exercises to rude music and the like

In spite of all the propaganda on the subject, however, there are many physicians skeptical regarding the real benefits of strenuous physical activity. One of these wrote a letter to the press pointing out that Walter Camp, famed athlete and originator of the "daily dozen," died at 60, while his twin brother, had never taken any exercise to speak of and was still in excellent health, although a grandgrandfather He added that "the longest-lived people are the physically lazy but mentally alert."

Commenting on the letter, William Feather, well-known editor, declared that several years ago he adopted a vigorous health programme, including constant exercise, cold baths and the daily dozen, with his result:

Acute indigestion led to the abandonment of the programme and doctor's orders. Another doctor recommended discontinuance of cold baths. The daily dozen are still pursued, but with less vigor. Health has gradually by the untimely death of their inventor."

Still we may find many who swear by the health fads and feel that their lives have been saved thereby. As the proverb has it: "What is food for one person is poison for others." —Rosetown Eagle.

Cutworms Again Active

Increase Of Ten Now Species In Alberta Reported

Heavy hailstorms continue to cause crop damage by cutworms this year, according to Dr E. L. Seamans, Dominion Government entomologist, Palm cutworm cutworms, which caused heavy crop loss last year in southern Alberta, are hatching again, he claims.

Dr. Seamans said there was also another increase in the increase of army cutworms reported in many cutworms and the early cutworm. The rain and snow storm that swept northern Alberta some weeks ago, he said, failed to control the flood. If rain was plentiful this year the loss, he thought, might be small.

To Replace Bully-Beef

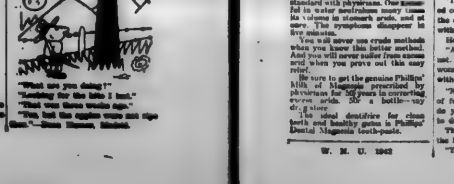
Dehydrated Pured Tabloid Will Sustain Soldier For a Day

The familiar bully-beef tin is about to make way for a scientific food tablet, which the Germans have produced. A new emergency ration is a four-inch block of pure powdered sugar, cocoa powder, pea powder, flour, lard, salt and lemon and onion butter. It will contain a ram for twenty-four hours. Besides the bully-beef tin, the food tablet will do away with the iron ration, tea and sugar in the former "iron ration."

Big Output Closed Doors

Economists and business leaders at nations endorsing the Pacific food pact have found that they can export many countries to close their doors to all foreign trade except raw materials. The survey was made by K. Sato, representative of the Japan economic federation of Tokyo, at a joint conference of the National and Pacific Foreign Trade councils.

The largest pit of the volcano Kilauea in Hawaii is almost a mile in diameter.



"What are you doing?"
"Looking for the little I lost."
"What's the reason sign."
"You bet the eighteen-carat ring on that."—Boston Herald.

Always On the Job

Old Man Leah Proves Same People Even in Hard Times

Even the hardest times cannot put Old Man Leah's nose entirely out of joint. People will go on picking up unconsidered trifles by the wayside. For instance, there's Brunt that has been in the district for years and has a few other such pieces for a long time, and nobody happy But there's a fellow down there in the state of Mickie Greene who picks up a good-size pebble, just of a convenient size to chuck at a squirrel He might have chucked it, but the same luck that caused him to pick it up perhaps inspired a thoughtfulness for animals, so instead of throwing the stone he slipped it into his pocket. Other lucky breaks followed, among these being the fact that the place where this coincidence arose is named Diamantine, showing that it is a district already blessed with the diamond harvest. For the same reason people there-about are likely to be diamond salesmen. The stone was found and was found to be a diamond weighing 874 carats, one of the largest ever found in the world It surpasses the largest Cullinan, the Kimberley on in Africa, the latter 443 carats, and the biggest De Beers product, 428 carats, and the short story of the finding of the irregular Culinan stone, that weighed originally 3,024 carats.

A Scotch Tip

"Here's a tip for you, lad," said the financier genius as he entered the barber's shop and sank into a chair.

"Thank you, sir," said the caddie as he left.

"Go home at once. You big chump can rest."

LOST 30 lbs. FAT IN 3 MONTHS

AT THE AGE OF 40

"I was very stout, and I have taken Kruschen Salts for three months, and have reduced from 218 lbs. to 182 lbs. (age 40). I am a hearty eater, and have never denied it in any way. Also I have never left any ill effects whilst I have been taking Kruschen Salts." F. H.

That is an instance of Kruschen succeeding without exertion. But if any fat person will be satisfied with a moderate diet, and will take one half teaspoon of Kruschen Salts in a glass of hot water before breakfast every morning they can lose fat in just the same way.

This is what Kruschen Salts does—It rouses out the impurities in your blood by forcing the kidneys, liver and bowel to splendid working shape, and fills you with a vigor and tireless energy you'd almost forgotten had existed. You get the youthful nerves.

As a result, instead of planting yourself in an easy chair every free moment and letting flabby fat accumulate, you feel an urge for activity that keeps you busy and around doing the things you've always wanted to do and needed to do to keep you in good condition.

THE HOUSE OF DREAMS—COME-TRUE

—BY—

MARGARET PEDLER

Author of
"The Splendid Folly," "The Heart Of Pan Ku," etc.
Hodder & Stoughton, Ltd. London.

CHAPTER XXI. Continued.

"Beg pardon, my lady," he said, touching his hat. "Sir Adrian sent me to say that he will be waiting for you at the car just along the road there." He pointed to where, on the white ribbon of road which crossed the Moor not far from the base of the tor, a stationary car was visible.

Claire, her face ashen, turned to Rich in mute appeal.

"Sir Adrian ? I thought he left for London this morning?"

Rich shot the question fiercely at the chauffeur, but the man's face remained respectfully blank.

"No, sir, Sir Adrian drove as far as Exeter and then returned. After he'd wrote we drove on here, sir, and they told us in the village we should find you at Bleaklow Tarn."

Meanwhile the other members of the party were becoming aware that some controversy had occurred. Claire's white, distressed face was evidence enough that something was amiss, and simultaneously Lady Anne and Jean hurried forward, filled with apprehension.

"What is it, Claire?" asked Lady Anne, suspecting bad news of some kind. "Claire, dear, what's wrong?" Recognizing the Charnwood livery, she turned to the chauffeur and continued quickly: "Has Sir Adrian met with an accident?" She could conceive of no other cause for the man's unexpected appearance.

"No, my lady Sir Adrian is waiting in the car for her ladyship."

"Waiting in the car!" repeated Jean and Lady Anne in chorus.

The little group of friends drew closer together

"Don't you see what it means?" broke out Claire in a low voice of intense anger. "It's been all a trick—a trick! He never meant to go to London at all. He only pretended to me that he was going, so that I should think that I was free and he could trap me." She looked at Rich and Jean significantly. "He must have overheard me that day in the shrubbery at Charnwood, you remember? They both nodded. "And then planned to humiliate me in front of half the county."

"But you won't go back with him?" exclaimed Rich, hotly He swung round and addressed the chauffeur stormily. "You can damn well tell your master that her ladyship will return this evening with the rest of the party."

The man's face twitched As far as it is possible for a well-drilled servant's face to show it, it betrayed perturbation of compassion, his did so.

"It would be no good, sir," he said in a low voice. "He means her ladyship to come. 'Go and fetch her away, Langton,' was his actual words to me. I didn't want the job, sir, but I'm given to understand—"

"Well, she's not coming, that's all," declared Rich determinedly.

"But I must, sir, I must go," cried Claire in distress. "If I daren't stay."

Lady Anne nodded.

"Yes, I think she must go, Rich dear," she said persuasively. "It would be wise."

"It will be miserable!" ejaculated Rich furiously. "It's only done to insult her to humiliate her!"

Jean looked at him wistfully.

"I ought to be used to that by now," she said a trifle shakily. "But Lady Anne is right - I must go." She turned to the chauffeur, disengaging herself from Rich's restraining hand and addressing him with a little air of dignity that, in the circumstances, was not without pathos. "Please tell Sir Adrian that I am coming, Langton, and tell Sir Adrian that I am coming."

The man touched his hat and moved away.

Rich and I will walk down to the car with you," said Lady Anne. She signaled, and at once the group of concealed servants stirring while the chauffeur, with a bow, turned to his car and began to turn it.

But Lady Anne's well-meant endeavor to throw dust in the eyes of the rest of the party was of comparatively little use. Although not many of them Claire was personally an entire stranger since Sir Adrian intervened whenever possible to prevent her from making new friendships - the story of her unhappy married life was practically public property in the neighborhood, and it was quite evident that to all intents and purposes the detestable husband had actually insisted on her returning with him, exactly as a naughty child might be swept off home by an irate parent in the middle of a jolly party.

It was impossible to stem the flood of gossip, and though most of it was kindly enough, and wholeheartedly sympathetic to Lady Latimer, Jean's cheeks burned with indignation that Claire's dignity should be thus outraged.

The [illegible] was spoilt for her, and Rich's stormy face when he, together with Lady Anne, rejoined the rest of the party did not help to lighten her heart.

"I'm so sorry, Nick," she whispered compassionately, when presently the opportunity of a few words alone with him occurred.

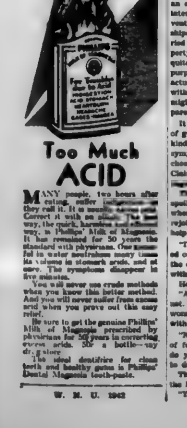
He glared at her.

"Are you?" he said shortly. "I'm not. I think I'm glad. Take care it. No woman can be expected to put up with public humiliation of that sort."

"Rich!" There was a sharp note of fear in Jean's voice. "Rich, what do you mean? What are you going to do?"

There was no ugly expression on the handsome boyish-looking face.

"I don't know yet—enough," was all



MANY people, two hours after eating, suffer indigestion they call it. It is sometimes. Correct it with an antacid. The way, the quick, handiest and efficient way, is "Phillips' Milk of Magnesia." It has remained for 50 years the standard with physicians. One teaspoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from stomach acid when you prove out this easy relief.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. 25c a bottle—any drug store.

The ideal dentifrice for clean teeth and healthy gums is Phillips' Dental Magnesia tooth-paste.

W. N. U. 1962

Best oil cheapest in home, says factory exp't.

"The last thing we'd try to economize on," says the superintendent of a large western factory "is lubricating oil By using cheap oil we could save hundreds of dollars each year . . . but it would cost us thousands of dollars for repairs, replacements and lessened efficiency of equipment."

The same is true in the home If all housewives know what factory engineers know about lubrication, they'd them would use anything but 3-in-One Oil for their expensive sewing machines, vacuum cleaners, electric fans, lawn mowers, washers and other high-speed devices. 3-in-One is blended of mineral, vegetable and animal oils, is the best oil for household use, for it cleans and protects as well as lubricates.

Ask for the old reliable 3-in-One Oil at good drug, grocery, hardware, department and general stores. For your protection, look for the trade mark "3-in-One" printed in red on every package.

FREE Sample and Dictionary of Uses Write to 3-IN-ONE OIL CO., 165 W. Broadway, New York City.

How Air Films Are Made

Handicaps Have Been Overcome By Use Of Motor Driven Camera

Film stories of aviation present more handicaps during production than almost any other type of screen fare, according to Stephen Roberts Mr Roberts is the wartime aviator and former stunt flier who went to Hollywood to direct "Sky Hawk."

"Until one recently the professional talk fo furnish thrills and interest in because of the 'plane's limit of speed," he said on his return. "In playing action against a blank, even a clouded sky, it is difficult to convey a sense of speed.

"With the camerea on the ground, the airplanes usually are so distant that the speed is lost on the screen. With the camerea in a balloon or on a high tower, the range of their activity is limited. With the camerea in another 'plane, both camera-ship and the 'plane being photographed must travel at relatively the same speed to get interesting shots, and even then more all sense of speed is lost.

"Electrically controlled camerea are now the way to overcome these effective scenes in the air. We attach these motor-driven cameras to the rear of the cockpits, pointing backward, right into the fliers face.

"We rehearse the scenes on the ground, then send the boys up alone. When the right altitude is reached, the actors press a switch and the camera starts grinding while the pilot plays the scene himself, without direction."

Little Helps For This Week

"Bear ye one another's burdens, and so fulfil the law of Christ."—Galatians vi. 2.

What is the real good?
Good in mankind.
Order, said the law-court;
Knowledge, said the school;
Truth, said the wise man;
Pleasure said the fool;
Love, said the maiden;
Beauty, said the page;
Freedom, said the dreamer;
Home, said the sage;
Fame, said the soldier;
Equity, the seer.
Grace, the mystic;
Spake my heart full sadly,
The answer is not here.
Then within my bosom,
Softly this I heard,
"Each heart holds the secret,
Kindness is the word."

John Boyle O'Reilly.

But now God has so ordained it that we should learn to bear one another's burdens, for there is no one who has not some defect, no one without some burden, no one independent of others, no one who wants nothing of himself; but we ought to bear with one another, comfort one another, help, instruct, and advise one another.

—Thomas A. Kempis.

For Sciatica or Lumbago—Dr. Thomas' Eclectric Oil is a standard remedy for the prompt treatment of weakness and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury It is also an excellent remedy for all muscular pains, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house may mean saves many a doctor's and veterinary's fee

Canada's Arctic Citizens

Over 7,000 Eskimos Living In Our Northern Hinterland

There are approximately 7,100 Eskimos in Arctic and sub-Arctic Canada, including Hudson Bay, scattered in small groups, principally in the Arctic Islands and along the northern sea-board. Canadian Eskimos are progressive. The more advanced have, in their homes, sewing machines, gramophones and radio outfits. In the Mackenzie delta and along the western Arctic coast the ambition of the head of a family is to own a schooner fitted with an auxiliary gasolene engine At Aklavik during the summer as many as twenty-five of these schooners, all owned by natives, are frequently to be seen at one time.

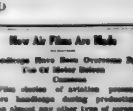
As a vermicide on excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

Hawaii has a new biscuit and bread plant which cost half a million dollars.

The Chinese government has placed an order for freight cars in Scotland.

Nervous Indigestion

Troubled for Years, Mrs. John Maslow Thinks Dr. Williams' Pink Pills for Pale People the Best



"For many years I had nervous indigestion and my nerves," writes Mrs. John Maslow, Cabinet, Que. "I suffered from pains in my

I tried many remedies, but with no good result. Then I got a box of Dr. Williams' Pink Pills to give them a trial. I soon saw a great change. Now I can go to bed and have a good night's rest, and can also do a day's work with any one. All I have to thank for it is Dr. Williams' Pink Pills. I would not be without them in the house."

Dr. Williams' Pink Pills are remarkably effective in cases like this above, because they create new rich blood which supplies to the nerves the very elements they need. Especially effective for all run-down and nervous conditions. Try them. At your druggist's. 50c. a box.

To Bring Back Prosperity

Only Way Is By Slender Work and Low Wages

If we allow ourselves to believe that some intangible, mysterious thing called "recovery" is going to improve our lot without any contribution from ourselves we will soon lose the truth-sense we have gained. The last three years have chastened the country for instance which is one of our rosiest disadvantages. The last three years has driven the well-grounded idea from us. Insecurity. The last three years has forced us to piece apart and reevaluate generally in their proper relation to the fundamentals of life. We cannot afford to abandon the stern discipline we have learned. Harder work and harder work is the only way to reach the promised land of prosperity. By the sweat of our brow shall all good things come again.—Emily Hopson, London, England.

Czecho-Slovakia may boast its beer hall.

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women rule dust cloths a nuisance to use and to wash

MUCH PREFER APPLEFORD WONDER PAPER

With so much inventive thought being given to eliminating unnecessary housework, it is surprising that a method to minimize for the many dust cloth should be sought.

Now it has been found! Appleford Wonder Paper which scraps when soiled closes—as it polishes in receiving a hearty welcome from Canadian women who detest dust cloths and all they stand for.

Wonder Paper is made from clean rags and best paper pulp, thoroughly impregnated with a high-grade furniture polish, and absorbs dirt instead of spreading it. Appleford Wonder Paper comes in handyman package, twenty-five sheets, each as large as a duster. To use—simply crumple a sheet into a soft wad, and go over the surfaces requiring attention.

You'll be amazed at the quick and lasting finish Wonder Paper gives. When one side is worn and soiled, simply turn the Wonder Paper pulp. After the furniture or woodwork has been gone over, you can still use your Wonder Paper on the floors.

And when you're through—throw it away.

No duster to shake out or wash. No bother at all. The most obnoxious part of housework cut in half the time and half the effort. Doesn't the idea appeal to you?

Special Offer

Wonder Paper is sold by the makers of the famous PARA-SANI heavy waxed paper in the Lever Box. Most grocery, hardware and department stores sell Appleford Wonder Paper. If yours doesn't, just send the coupon and we'll give you a new and unique booklet entitled "Leftovers," containing two hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd., Lakeside Avenue, Toronto.
Enclosed find 25c for which please send me one 25-sheet package of WONDER PAPER and your 100 recipes for "Left-overs."

The apparent difficulty, the day of each contest is invariably solved. However, it cannot be said that the citizens of Fort Saskatchewan were found lacking under the circumstances. The teachers acknowledge the kindness of those who contributed cars and helped in the success of the program. They, themselves, take pleasure in thanking; Mr. McLean, Mr. F. Atkinson, Mr. Watt, Mrs. F. W. Smith, Mrs. Bacon, Mrs. Ashton, Mrs. Lane, Mr. Roberts, Edmund Jacobs, Orwell Kelterborn, Edward Roberts, Dr. Mason, Dr. Calhoun, Mrs. Murray, Miss Elizabeth Jones and Bobby Adamson for their care and co-operation.

The staff also acknowledge their indebtedness to Mr. Watt and Mrs. F. W. Smith whose assistance in training proved invaluable.

The teachers wish personally to thank them for their kindness and appreciate the time and labor they lent during practices. We thank you kindly.

Municipal District Holds Busy Council Meeting

The Council of the Municipal District of Clover Bar, No. 917 held a regular meeting on Saturday last, with all members in attendance.

A committee of the Council was appointed to interview several recipients of mothers' allowance who had made application for an increase in their monthly allowance. In order to find out if their requests were justified. Dr. T. W. E. Henry was re-appointed Medical Health Officer for the District for the ensuing year.

The following mill rates for school taxation were adopted:

Clover Bar, 212, 6 mills, Partridge Hill, 280, 6¼ mills, Mansfield 716, 7½ mills and Radom 6022, 13 mills.

A grant of thirty dollars was voted to the Partridge Hill Recreation Ground Committee for the purpose of completing the booth building etc.

The claim of C. J. Hennig for the loss of a horse through having its leg broken on a bridge that was in a state of disrepair was amicably settled.

The Deputy Minister of Municipal Affairs, Mr. R. English, attended the meeting to discuss with the Council matters pertaining to municipal administration and the recent amending legislation to The Local Tax Arrears Consolidation Act in particular. At the last session of the Legislature a new section to the act was inserted which provides that the council may by-law authorize the cancellation of the whole or any part of all penalties which have been previously added to taxes in arrear on at January, 1st, 1932, upon payment in the year 1932 of such arrears of taxes and of a sum by way of penalty equal to five per centum of the taxes originally levied. By the passing of such a by-law it is provided that there shall be allowed a discount for prompt payment of taxes levied in 1932 of five per cent. If current taxes are paid before November 1st, or two and one half per cent if paid on or after the 1st of November and on or before the 15th of December, 1932. The Deputy Minister intimated that a number of municipal districts had taken advantage of this important piece of legislation by passing the by-law. The Council felt, however, that it was a matter of too great importance to deal with without giving it every consideration, as it was left in abeyance until the June meeting.

Two applications for relief were refused.

A voluminous list of accounts owing by residents of the District to the Royal Alexandra Hospital and Provincial Hospital was submitted to the Council. Each Councillor was asked to get what information he could regarding accounts owing by residents in his division in readiness for the next meeting when the matter will come up for discussion.

With the reading of correspondence and the passing of paychecks and accounts the meeting adjourned at 6:30 p.m.

The Saskatchewan river has risen quite a bit during the past day.

Bad Accident Occurs On Fort Trail

An accident occurred when a car loaded with seven passengers plunged through the railing on the Fort Trail just at the foot of the big hill on the river side, and fell to the bottom of an embankment below the road level.

Mr. Joseph Halley died as a result of the two rolling bars, one ripping through the radiator and the other smashing through the windshield catching Halley in the head.

The accident happened shortly after 2:15 a.m. while the party was returning to Morinville after having attended the sports and dance in the evening here.

Fort Saskatchewan Sports Day A Tremendous Success

The Sports held on May 24th, by the Fort Ball Club on the Fair grounds was a tremendous success from start to finish. After having had rainy weather for three previous days, Victoria Day turned out fine with only a cool breeze.

A large crowd saw Morinville, Stony Plain, Lamont Bruderheim, and Fort Saskatchewan battle away for the first prize in the baseball tournament, the big feature of the day.

The first game Morinville and Fort Saskatchewan were drawn and the local club ran wild winning the game 17 to 2. Stony Plain and Lamont were drawn for the second game which Lamont won winning out 3 to 2. In the third game Bruderheim and Lamont tangled and Lamont round out to win 4 to 3. The final game between Lament and Fort was played after supper. This game was a very much one-sided affair with the Fort team piling 11 to 1 and taking the first prize. Lamont gets second prize.

Usually Lamont always seems to trim the Fort Ball team in tournament games, but the locals were on their toes and displayed fine ball throughout the day.

In the basketball tournament only one team showed up, this coming from Lamont. They played a team of boys from the Fort. The Lamont team won by a score of 8 to 2.

During the afternoon races for children were run off and the following were the winners:—

In order as they came in:—

Girls 8 and under.
Margret Doppelt, Selma Strong, Margwy Turner.

Boys 8 and under.
Glyn Roberts, Joe Lamoureux, Barrie Lamoureux.

Girls 10 and under
Dorothy Lamb, Margary Gaul, Margery Smith.

Boys 10 and under
Del. Stegner, Carl Anderson, Paul Jacobs.

Girls 13 and under
Zelia Lamoureux, Ekty Roberts, Miriels MacPherson.

Boys 13 and under.
Hugh Watt, Amer Williston, Billie Smith.

Girls 14 and under.
Saralie Oxley, Zelia Lamoureux, Lorna Lamoureux, Lena Williston.

Boys 14 and under.
Charles Lawtow, Eddie Gaul, Lloyd Willis.

Girls 16 and under.
Saralie Oxley, Zelia Lamoureux, Lorna Lamoureux, Uuna Williston.

Boys 16 and under.
Orwell Kelterborn, C. Lemon, Eddie Gaul, Raymond Berg.

A display of wrestling was given on the grounds by pupils of Miss Berg's Edmonton wrestler.

In the tame pulling competition, Wm. Turner, Chas. Glover, and A. McEachern beat, after much having had many pulls. McEachern's team won first prize, pulling a total of 3840 lbs on a two inch rope 60 feet long.

In the evening a dance was held in the memorial hall were the crowd packed the hall to the doors.

At midnight lunch was served by members of the Sports Committee and the Girl's A.A.A. The Rhythm Boys Orchestra of Edmonton supplied the music for dancing.

The Sports committee wishes to thank the business men in town and in the memorial hall where the crowd rites during the day, Which all went to make it such a successful one.

Dr. R. R. Mason was called to attend the injured people and rushed them to the General Hospital in Edmonton.

The wrecked machine was brought into the Fort by James Grahame on Wednesday morning.

The occupants of the car, were Mrs. J. I. Houle, Josephine Halley, Mary Blanche Halley, Mr. J. I. Houle and P. W. Conklin beside Joseph Halley who died at 11 a.m. in Edmonton.

Town Council Holds Meeting

A regular meeting of the Town Council was held in the Council Chambers on Thursday the 19th.

Present Mayor Montgomery, Councillors Simmons, Gauf, LeRiche, Smith, Lalonde and Fillmore.

The minutes of the last regular meeting held were adopted as read.

The following accounts were passed for payment:— For work on streets, F. Ebbertin $8.30; J. Lapensie $1.25; C. LePage $2.50; F. Chambers $3.00. Electric Light account for April for streets and hall $152.96; Telephone account $7.50; Jones, Graham & O'Brien for relief $40.00; J. T. Lalonde for relief $15.00; Simmons Lumber Co., $18.74; Fort Hardware $3.95; W. A. Graham $2.10; F. W. Smith 55c.

The Town Constable was instructed to enforce the Dog by-law, and to report at next meeting the names of dog owners who had not yet taken out dog licenses for the current year.

The Constable was also instructed to see that these responsible removed the various ash and rubbish piles still left lying around.

The Council instructed the Secretary-Treasurer so to notice to be taken in connection with occupier of property known as on lot "F" plan 02.

The meeting adjourned.

Notice to the Public

Since I took over the theatre, three years ago, I have been trying to give the public good silent pictures. After silent pictures could no longer be procured, I tried a road show talking picture. But I could not get it for Friday and Saturday nights, and any other nights in Fort Saskatchewan do not seem to be suf-factory, especially for children going to school. I am pleased to be able to inform the public that I have made arrangements with the Fitzsimons Collegs, Edmonton, to show talking pictures here each week.

They will have the finest pictures obtainable, also two-reel comedies, and news-reels, which are alone worth the price of admission.

I have been running the show for three years at a loss. I make this appeal to you to come to your own show sometimes. I am making prices to suit the hard times. I want the public of Fort Saskatchewan and of the surrounding community, to feel that this is their show. I am doing my best to keep the theatre open, but if the attendance does not improve, it will be necessary for me to close it. Next week I will show pictures on Friday night, and watch the crowd grow.

I take this opportunity to thank the friends who have attended the theatre in the past, and to welcome the new faces for the future.

Geo. Cranston.

Liberty vs. License

The kidnapping of the Lindbergh baby, culminating in the finding of the body of the murdered infant, has served to focus public attention in the United States as no other single act has done in past years, upon the extent to which lawlessness has developed in that country. Thousands of people are aroused now who formerly regarded with indifference the daily record of murders, holdupings, bootlegging outrages, and other gangster crimes, including open warfare between these gangs in the streets of large cities, which filled the columns of their newspapers. There is now a searching for causes of this prevailing lawlessness in the United States, but which is not characteristic of other countries.

And in seeking for the underlying cause, investigators have found they had not far to go, and that it is not necessary to delve into any great depths to discover it stems less from the inner weakness of people than that American society is founded. It is for the people of the United States to apply their own remedies, but the prevailing state of affairs across the imaginary boundary line, and the causes therefore, should have a lesson for the people of this Dominion.

Mistake number one was made in the United States when they went from one extreme to another, that is, from the extreme puritanism of the early New England settlers to the almost unrestricted license of later days. From an era of unyielding rigid strictness and severity in the application of rules of personal conduct, the United States set up a fetish of personal liberty. In reaction against what had been, the public schools were made purely secular, the teaching of religion, the precepts of the Bible, and the moral law which is founded in true religion, were banned. It was argued that the churches and the home should alone concern themselves with religion and morals, and that the state should not enter such spheres, but, remaining strictly secular and neutral, let youth in its most plastic, character-forming years be taught, or not trained, in the home and on one day in the week in church or Sunday School.

The net result was that millions were not trained. Sunday became a holiday, a day of sports and amusement. The provision, of a happy, sensible medium between the austere "blue" Sunday and a day of carnival was overlooked and neglected. And the children of these millions, and their children in turn, grew up in an atmosphere almost entirely secular, pleasure hungry, taught to cater to their personal appetites and passions, rather than to look upon life and its responsibilities and opportunities as a serious thing.

But mankind must have a god to which it looks for those things destined and for which man strives. So, living a life of the pursuit of pleasure and personal gratification, tens of millions in the United States set up and worshipped the Almighty Dollar as their god. The man who could amass great wealth was a "great" man. He was the one looked up to in the community, to whom others paid deference, and who was held up to the youth of the day as a worthy example to follow. The more money a man had, and the quicker he was able to get it, the more successful he was held to be, the more to be envied and emulated.

It was natural and inevitable, therefore, that the ingenuity of men was diverted to discovering "get rich quick" means and methods. The inevitable of the means and methods were considered less important than the tangible results gained. The methods of "Big Business" of half a century ago, the treatment meted out to the Indians of the western plains when were robbed, plundered, murdered and their lands taken from them, now have their counterpart in the gangster methods of bootlegging, kidnapping, and all forms of organized vice and crime.

The United States, too, has made a god of "Bigness." "The biggest in the world" is the favorite slogan of their people. Everywhere the boast is heard that this or that is the biggest in the world. In the race to create big cities they have created breeding grounds for crime; in the race to create immense mass production industries they have created mass unemployment, hunger, and want and suffering and more crime. The very inventions and machines created for the benefit of their people are now used to resist the criminal element to defy, demand, despoil and destroy.

Finally, the United States set up another god in the name of "Liberty," but which was so freely interpreted that it quickly became license. Liberty is one thing, it is the birthright of all people, but through the ages man has wrongfully denied it to his fellow man. Possessing the power for the time being, man has denied to other men liberty of conscience as well as liberty of thought and action. But liberty is one thing, license is another and entirely different thing. Liberty can only be enjoyed where there is law and order; law impartially but strictly enforced that order may be maintained. Let law be weakened and brought into contempt and liberty is destroyed. Might not right then takes the upper hand, liberty is lost, and all become the slaves of might.

The United States today, to a greater extent than any other nation on earth, is paying the penalty for disregard of the laws of nature and of moral law which is based and founded in those religious tenets, and because it has seen fit to set up other false gods to worship. The worship of the "Golden Calf" cost an old world nation centuries in the wilderness for forty years. It paid for its departure from the truth. Other nations since then have paid. The United States is paying now in the scourge which the lawless elements it has developed are now laying upon it. And all nations will inevitably pay if they disregard moral laws and replace true liberty with license. That is the lesson for the people of Canada to take to heart.

A complete fishery exhibition will be part of this year's agricultural show at Grimsby, England.

The canoe of most young people is turning out bad today is too many good times.

Sorry To See Sight Going She Could Not Sleep

Mrs. E. Mellroy, Binbrook, Ont., writes:—"I was very nervous and run down, was afraid of losing my sight, could not sleep for pain, and had to use night compresses as I could not do them or go to sleep.

I was advised to use Milburn's Blue and Green Ointment. I took seven bottles and am now completely well, can sleep like all right, and have gained in weight."

League Of Nations

In Greatest Human Agency For Preserving Peace, Says Sir Robert Borden

Expressing the belief that the League of Nations is educating the nations to live in co-operation, Sir Robert Borden, Canada's war time premier, told the League of Nations Society in Canada at its annual meeting at Ottawa that he believed the League was the greatest human agency for preserving peace of the world.

Disappointment at the efforts of the League to reduce world armament and in the response which had been made to the world disarmament petition was expressed by Miss Agnes MacPhail, M.P., in a short address.

Dr. H. M. Tory, of Ottawa, was re-elected president of the society and three new names were added to the list of officers. Hon. Hugh Guthrie, Minister of Justice was elected honorary vice-president; W. J. McNally of Ottawa, becomes honorary treasurer, and John W. Dafoe, editor-in-chief of the Winnipeg Free Press, Winnipeg, was chosen as a vice-president.

Tells Dyspeptics What To Eat

Brief Diet Often Unnecessary

It is a well known fact that most forms of indigestion, dyspepsia, nervousness, stomach aching and consequent constipation, are caused by eating daily some things foods that cause trouble for some of the digestive organs to certain injurious acids, fermenting foods, gases, poisons, etc., which irritate the stomach and intestines. Nine times in ten, however, indigestion, etc., is due to overeating, hurried eating and the premature souring of food in the stomach. Many times a simple diet and then sufferers can eat the foods they like and eat much of them they want in reason and have no stomach trouble. Mr. Thomas Magnuson, of Regina, Sask., writes that he has suffered several years with Stomach Indigestion, Gas, Constipation and Nervousness. He says in other words, or rather forms, Magnuson's Nerve Tablets have done him wonders and he finds by eating Shredded Wheat biscuits with fruit and a glass of milk for breakfast comfort means a lot. Many others both by mailing Magnuson's Nerve Tablets free and alternating potatoes.

Valuable Medical Assistant

Mouth Of Old Doc Dobbin Is Noted In Scientific Circles

Medical history has found a valuable assistant with the death of old "Doc Dobbin," a large black work horse whose mouth is a veritable storehouse of methods for the treatment of more than 141,000 children.

Old Doc died suddenly on the farm near here, where he and his owner have lived for the making of serum. He was 21 years old and a native of the Western plains. For two years Age Old Doc was the guest at a birthday party attended by local school children.

When Antigen Comes do not despair. Turn at once to the help effective...

Dr. J. G. Kellogg's Asthmador. This wonderful remedy will give you relief, no matter how severe your case seems, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer, but have wisely turned to this famous remedy and found relief. Get it, purchase this very day.

C.N.R. Radio Broadcasting

Radio broadcasting cost the Canadian National Railways $461,092, in 1930, the House Committee on Railways and Shipping was advised, but only $114,000 is to be spent in 1932. The gross figures for 1930 were $436,000, and for 1931, $295,960. There was a certain amount of revenue from time sold to commercial radio by the Canadian National Telegraph, in addition to the advertising benefits which could not be reckoned in dollars and cents.

In Bible Pain Begone.—When neuralgia racks the head, nerves or bones, cripples the back is the time to test Nerviline, the Great Pain Subduer and Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

Telegraph Centenary

It was 100 years ago that Samuel Finley Breese Morse was born at the time that led to the invention of the telegraph. In a few days he had completed drawings of the telegraph apparatus, but the first telegraph was not publicly demonstrated until 1837.

Unbreakable Glass are being made in a new material developed in Germany.

British Buy Canadian Products

British Now Providing Excellent Market For Our Wheat, Bacon and Cheese

Canada is selling more to Great Britain, detailed figures recently tabled in the British House of Commons revealed.

British purchases of Canadian wheat in the four months ending April 30 amounted to 9,104,000 hundredweights of 112 pounds compared with 7,074,000 hundredweights in the corresponding period of 1931 Imperial-Russian wheat dropped again for the month of April, they were only 5,300 hundredweights against 1,237,000 in April, 1931.

Imports of Canadian bacon for the four months ending April 30, amounted to 27,273 hundredweights, a heavy increase compared to 6,693 for the corresponding period of 1931.

Sales of Canadian hams rose from 19,092 hundredweights in the first four months of 1931 to 30,856 hundredweights this year.

Imports of Canadian cheese had a remarkable increase in the four-month period of from 6,385 to 21,085 hundredweights.

Salmon gained from 22,864 to 32,366 hundredweights unmanufactured Canadian tobacco from 3,600,000 pounds to 6,863,000 pounds (weight).

The total British purchases of Canadian merchandise in the quarter ending March 31, it was also shown were £8,360,000 against £6,160,000 in the corresponding quarter of 1931.

United Kingdom products exported to Canada in the quarter ending March 31, totalled £3,673,000 against £4,048,000 in the corresponding quarter of last year.

Serious Blackwing Situation

British Columbia Growers Expect Surplus Of Apples This Year

A serious marketing situation faces British Columbia fruit-growers this year due to the heavy increase in the crop, according to H. J. Chambers, president of the Associated Growers of the province. Preliminary reports, he said, indicated this year's apple crop would show a gain of a million boxes over 1931.

This means, Mr. Chambers added, that a market for 1,500 carloads would have to be found outside western Canada.

Persian Balm imparts a rare charm and distinction to the woman who uses it. Fragrant as a flower, delicately cool in the skin, it always produces in complexions delightfully young and lovely. Indispensable to every dainty woman. As a powder base for oily-textured skins or as a beautifying lotion, it is unrivalled. Tones and stimulates the skin. Recommended also to soften and smooth the hands flawlessly white.

Brought a Remedy

D. C. Coleman, of Charleston, W. Va., doesn't say detectives are dumb but he isn't taking any chances. He dropped in at the police station to say some one had stolen his salt and pepper suit. With him he brought a package of salt and pepper, carefully labeled so that the sleuths couldn't go wrong.

For treatment of called bugs in town, or gurgoyl, use Dingler Spray-ine. Liberal—the quick, sure remedy. Saves time and expense. Prevents blackened stock.

Dr. Hamilton's Pills for HEADACHE INDIGESTION BILIOUSNESS CONSTIPATION

Largest and Smallest

The largest watch ever made, weighing 500 pounds and standing 43 inches high was taken on exhibition here with the smallest weighing one-quarter of an ounce and standing one-eighth of an inch high at an industrial exhibition.

Champagne made in South Africa is to be introduced into England.

NEW INVENTION DOES AWAY WITH COOKING ODORS

Even fish and cauliflower free down to Canaper Cookery Parchment

BETTER, CHEAPER AND EASIER COOKING

Delicious as cauliflower, cabbage and cutting even other vegetables are, they have imposed a heavy penalty on people who fastidiously cooked them. Not to mention those who had to suffer the odor without enjoying the foodful product. The same thing is true of fish.

Canaper Cookery Parchment, a very ingenious invention, does away with this unnecessary misery. While sealing in the odors, it also retains flavor and food value. Cooking in Canaper actually parallels the famous French method of steaming and cooking food and its flavor in the closed casserole.

You buy Canaper in a large envelope of handy-size sheets which may be rinsed out and used over and over again because they won't disintegrate. When boiling vegetables you simply wet the Canaper and make a bag similar to a pudding bag. If you steam them, you line the steamer with Canaper, arrange food and seasoning, and fold back corners of the Canaper to prevent steam from dripping back. You can actually cook three vegetables at once in the same steamer. The day — save fuel—and the flavors will not intermingle.

Steamed, or boiled, fish comes out firm, solid and swimming in its own juice. No odors. No pasty steamer or saucepan to clean up afterwards.

Line your roasting pan with Canaper, then the bits and juice can't burn. Meat is more succulent and there is no scrubbing or scouring of the pan afterwards.

Many women use Canaper for a dish cloth —it is so silky and antiseptic, and lasts long and eliminates the dish. Recommended also to soften and polish the hands flawlessly white.

Anglo-American Good Will On Firmer Footing Now Than Ever Before, Says U. S. Paper

There is reason for believing that Anglo-American good will has got its roots struck more firmly into the solid ground of mutual respect and dignity than in earlier periods—even those when the plant seemed to be flowering most effulgently. Too frequently in the past one has detected a slight truculence, a touch of artificiality, about its most brilliant petals. Before the World War the work of our own horticulturists was often tinged with a sense of inferiority and with the envy and irritation that go with it, while that of the British was not wholly free from a certain condescension. Amid the daunting prosperity of the post-War world these notes were, perhaps, reversed. British aristocracy continued to found itself upon Anglo-American unsteadiness, but the British people could not quite forgive us for being such a spectacular success in our own way.

Both moods have collapsed amid the sterner realities of the depression. A common adversity has given each people a better appreciation of the real qualities and greatnesses of the other than either enjoyed five years, or twenty-five years ago. The two nations regard each other with less sentimentality than they have sometimes felt, but with much less of ignorant irritation. Publicists who once seemed to themselves by laboring from Atlantic follies, who wanted their time in warning Americans against entanglement with perfidious Albion or Britons against engulfment in American mass production, are now dropping all that. Each nation now eagerly seeks the opposite shore of the ocean, waiting to cheer every sign of progress in the other as possibly the first step toward recovery for both. Neither power, in short, is any longer overawed by or afraid of the other, there is no atmosphere in which friendship of the starry, unsentimental but useful sort can grow and flourish.—New York Herald Tribune.

Shows That Live Stock Was the Saving Factor

Industry Weathered the Year Better Than Other Products Of Farm Industry

The Review of the Live Stock Market and Meat Trade for 1931, just issued by the Live Stock Branch Service of the Dominion Department of Agriculture, states:

"The continuity of meat animals industry weathered the year much better than any other major branch of farm industry. Indeed, saleable live stock, and with this, of course, we must include poultry, was to its possessor the saving factor in the year's business of the farm. At the opening of the new year, those producers who had included live stock in their 1931 programme, found themselves in a much more advantageous position than those who had not."

Adding Insult To Injury

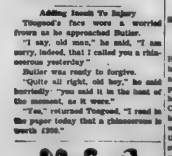
Thugood's face wore a worried frown as he approached Butler.

"I say, old man," he said, "I am sorry, indeed, that I called you a rhinoceros yesterday."

Butler was ready to forgive.

"Quite all right, old boy," he said hurriedly "you said it in the best of moments, so it seems."

"Yes," returned Thugood, "I read in the paper today that a rhinoceros is worth £200."



"Do you believe a man can love two women?"

"I'm not only till one of them finds out."—International Illusi, Vienna.

Great Booster For Canada

Prince Of Wales Advises British Business Men To "Stop Right Over"

Canada has a great booster in the Prince of Wales. His is the type of Canadian citizenship which might well be emulated to the advantage of the Dominion. Recently the magazine "Canada," published in London, quoted His Royal Highness as follows:

"Stop right over and see Canada for yourself. Remember it takes only six days across the Atlantic and only a few more to reach the Rockies and the Pacific Coast. And if your business cannot spare you, remember there are such things as business holidays."

There is a double intent in the Prince's invitation to the business men of the City of London to "stop right over" and see Canada. In it he appeals to their inclination for pleasure, but at the same time does not neglect their business instincts. With a suggestion of shyness he tells them how he has one visit on the other, and yet got to advantage of both, and in a man of affairs the possibility is arresting.

Here is, as well, a desire to promote a greater interest in the Dominion and its trade potentialities. Quite recently the Prince of Wales made such a similar proposal. He would have all the visitors to the Conference in July take a trip through the Dominion and return fascinated engulfment in American mass production, are now dropping all that. Each nation now eagerly seeks the opposite shore of the ocean, waiting to cheer every sign of progress in the other as possibly the first step toward recovery for both. Neither power, in short, is any longer overawed by or afraid of the other, there is no atmosphere in which friendship of the starry, unsentimental but useful sort can grow and flourish.—New York Herald Tribune.

Right Of Wild Geese

Bird Tagged By Jack Miner At Kingsville Found In B.C.

An idea of the vast stretches of territory covered by wild geese in their migrations flights was revealed in the finding in East Kootenay, B.C., of the clarved bones of a goose.

On the leg of the bird, which apparently had perished in a bush fire, was a tag bearing the name of Jack Miner, Essex municipality. The bird at one time had sought shelter on the great bird sanctuary at Kingsville, and was fed by Miner. The tag and information received from the incident were sent to Miner by a settler in an isolated district near where the bird was found.

Birds tagged by the naturalist have been found as far east as the Atlantic coast and Prince Edward Island, and as far west as the Rocky Mountains.

Poultry Development

Dominion Poultry Official Believes Prospects Are Still Encouraging

F. C. Elford, Dominion Poultry Husbandman, and outstanding leader in poultry development in Canada, on a recent occasion observed that two principles which play a big part in the success of the poultry industry of Canada. "There are many prosperous farmers here today who would not be where they are if it had not been for the hens on the farm at home," he states. "The poultry provided the money for shoes, and clothes and pencils, and were in fact responsible for keeping them at school. I myself do not know of any other business today which pays better dividends than poultry raising, and I believe the prospects are still encouraging."

Mistress: "Why don't you light the fire?"

Maid: "Because there's no coal."

Mistress: "Why didn't you let me know before?"

Maid: "Because we had some before."

"It was my ambition that egged me on," said the would-be robber.

"Yes; but I understand it was the evidence that egged you on."

Future Development Of Western Canada Must Be Planned On a Scientific Basis

Working On Wheat To Resist Drought

University Of Alberta Installing Equipment For This Purpose

Resistance to drought is a new wheat breeding project which has been undertaken by G. R. Ames, University of Alberta. Over a period of years, losses due to drought are probably as great as all the plant diseases combined. It has been estimated that during each of the last two years, the crop has been reduced by drought by 75 to 100 million bushels. Owing to the failure of crops to become established there to also the enormous loss in fertility due to soil drifting and the free growth of weeds. The National Research Council has given assistance in carrying out this project which will be under the direction of the associated committee in grain research. Except for some studies made at the University of Alberta on the fundamental nature of drought resistance in plants, little has been accomplished in Canada, but Russia has been intensively studying the problem for some time.

In this work artificial rainstorms are created by a machine. This machine has been described by Dr. T. A. Tutor, of Russia, and similar equipment is being built at the University of Alberta. In this way everything including moisture, is controlled.

Cheese Is a Body Builder

Supplies a Muscle Building Food in Concentrated Form

Here is an interesting item prepared by the Milk Utilization Services of the Dominion Dairy and Cold Storage Branch. "In cheese exists for its flavour, or for its food value?" The low per capita consumption of cheese in Canada clearly indicates that the majority of people do not recognize it as a muscle-building food in concentrated form, but consider it merely as a condiment or garnish. It is interesting to note that one pound of cheese supplies almost as much protein and fat as one gallon of milk and, in addition, has a high calcium, phosphorous and vitamine content. Nevertheless, milk foods are limited in number, and, since it is necessary that the diet contain a percentage of this type of food, cheese should be more extensively used, particularly at a time when health and strength must be maintained on a lowered food budget.

More than 1,000 new companies were registered in Sweden last year.

WORLD HAPPENINGS BRIEFLY TOLD

Practically all the pool elevators in the Prince Albert division of the C.N.R. will contribute towards the 2,000,000 bushels of wheat to be quickened soon for shipment via Churchill.

Veterans of the Riel Rebellion resident on the coast have organized a provincial society to be known as the Northwest Field Force of 1885 Volunteers' Association.

Paying homage to the memory of his old comrades, Lord Byng, former commander of the Canadian Corps, deposited a wreath on the Altar of Sacrifice in the Memorial Chamber in the Parliament Buildings at Ottawa.

Al Cheesman, native of Saint Jean, who received an pilot from Sir Robert Witting' south pole flight three years ago, has been invited by Sir Hubert to take the controls again in a new expedition to the south pole.

Going into a side slip at an altitude of about 1,000 feet on the pilot was preparing to land, a small plane of the United States crashed and burned at Burbank, California, causing death to its two passengers and pilot.

Lieut.-Gen. Lord Robert Baden-Powell, defender of Mafeking in the South African war, held a private luncheon in London, England, May 17, to commemorate the 32nd anniversary of the relief of that little town by Field Marshal Lord Plumer, then a major.

Following one hour of personal contact was search six months of letter writing and bans of personal matter, the Scottish Trade Mission had come to Canada to talk business, the Duke of Montrose, hon. president of the mission, told the Canadian Club at Montreal.

Canadian Banking System

Praised

U.S. Senator Praises System Here In Comparison With That Of United States

The happy position of Canada's banking system as compared with that of the United States was due constitutionally placed before the United States senate by Carter Glass, of Virginia, former secretary of the treasury.

Glass was pressing his revision of the banking laws to permit branch banking in the United States.

Canada, he said, had not had one single bank failure "during the frightful depression" while in the United States 5,000 banks had gone under with losses during the past two years to depositors of $9,500,000,000.

For years bi-nancy and currency experts have been attempting to get measures to permit branch banking. Other efforts have been on the commercial approval by representatives of senior communities and forming groups who believe in individual and personal banking.

The Karakul sheep of Asia are noted for their hardiness and their ability to thrive under adverse conditions.

You should know this about oil, says mechanic

The proper oiling of household devices presents a problem different from any other form of lubrication. Sewing machines, vacuum cleaners, lawn mowers, fine electric motors of washers, fans, refrigerators and similar devices have a tendency to collect dirt and rust when in service. Consequently an ordinary household machine oil is not always reliable and gentle enough to be entirely satisfactory.

3-in-One Oil was made for these three things. For, as the ordinary oil, it is really three high quality oils in one—mineral, animal and vegetable. It penetrates quickly, loosens the metal surfaces, stops rust, reduces wear and saves repairs. It also prevents rust and tarnish.

Don't make the mistake of thinking "any kind of oil will do." Play safe, insist on a 3-in-One Oil. Sold everywhere in good grocery, hardware, drug and general stores. For your protection and profit, the trade mark "3-in-One" is printed in Red on every package.

Flax Trade Drive

Ontario To Place Sales Representative Over In Winnipeg, Montreal and Maritime Provinces

As part of an aggressive drive to secure a greater share of the Canadian market, the Ontario Department of Agriculture is placing sales representatives in Winnipeg, Montreal and Maritime Provinces, it was announced by Hon. T. L. Kennedy, Minister of Agriculture. The duties of these representatives, who will work through the agricultural council, will be to keep the department informed as to conditions in the various provinces, the volume of sales of Ontario agricultural products and the best means of increasing those sales.

Col. Kennedy declared that the government was launching a drive for more markets and that up till now much of the effort had been directed toward securing a better foothold in the British market. Special effort is also being made for Ontario products in the other provinces of Canada, the minister believed. As to the United States, the Ontario Government recently had a representative in London and at the present time W. B. Somerset, chairman of the agricultural board, was in the Old Country in the interests of Ontario trade.

JOSEPH THE DREAMER

Golden Text: Take thought for things honorable in the sight of all men.—Romans 12.17.

Lesson: Genesis 37:1-11.

Devotional Reading: Proverbs 3, 1-8.

Explanations and Comments

Joseph's Troubles With His Half-Brothers, verses 1-4. The phrase "These are the generations of Jacob, Joseph," they begins the history of Jacob's descendants especially of Joseph. Jacob was living quietly at Hebron. Joseph, the eldest son of Jacob and Rachel, is a lad of seventeen when he comes into the picture. Joseph was "a lad with the sons of Bilhah and with the sons of Zilpah" an expression which Leitzmann understands as meaning that he was their attendant. Their subordinate OT station caused trouble would arise, for Bilhah and Zilpah were bondswomen and naturally jealous of Rachel, and their sons would, just as naturally, be jealous of Rachel's son. Joseph's task was to help these half-brothers feed the flock, for whose pasturage they were obliged to wander far and wide.

Joseph brought his father an evil report of these men. "We are led reluctantly to suppose that Joseph was a gratuitous tale-bearer, or that when he carried their evil report to his father he was actuated by an unworthy spirit. That he very well knew how to hold his tongue he must ever grave more opposite proof. But we best understands that there is a time to keep silence necessarily seen also that there is a time to speak. And no one can tell what tortures that brave young soul may have endured in the remote pastures, when left alone to withstand, day after day, the outrage of these coarse and unscrupulous men."—Marcus Dods.

Another cause of trouble was the father's favoritism. Jacob had good reason to prefer Joseph to his brothers. Joseph was "a goodly person and well-favored," he was affectionate, bright and quick, ever ready to do his father's bidding. His brothers were fierce, stern, morbid men. Jacob could not help loving Joseph the most, but he could have kept from showing his preference. All children have equal claim upon a parent's love. Duty, common sense, reason should have guided Jacob in the treatment of his children; instead he was guided by his heart alone.

Jacob showed his partiality by giving Joseph a coat of many colors, thought to have been a sort of magisterial robe, such as was worn by those in authority, or by the rich who did no manual work, and in that case a virtual sign that Joseph, the next to the youngest of twelve sons, was given the birthright, the position belonging to the eldest. This lordly attire was always in evidence, and the brothers hated him and could not speak peaceably unto him.

"From bitterness preserve me, Lord; From jealous thoughts protect my heart;
Against the stroke of envy's sword Help me to hold my way.

And grant my soul sufficient grace To gladden at another's prize,
And look upon his anger face With love in my eyes."
—Henry Robinson Palmer.

Thousands of startings have been occurring in English waters this year.

For Baby's Bath

More than that of any other member of the family, baby's tender delicate skin needs the greatest care and attention. The soft soothing oils in Baby's Own Soap make it especially suitable for baby's bath, the clinging fragrance reminding one of the freshness of Dame Violet itself.

Diet Announced As Cure

Coeliac, a Childhood Disease, Requires Only Good Food As Treatment

A cure for coeliac disease without a drop of medicine was reported to the American Medical Association's New York Session. Diet alone does it.

This disease is one of the pitiful ills of childhood, causing retarded growth, serious stomach disorders, growing weakness and, when too long neglected, almost certain death.

Predisposition to relapse had made it difficult to cope with. Dr. Sidney V. Haas of New York City, who has used this cure all but unknown, has not been one recurrence.

The treatment consists in an example of the rapidly-developing science of finding in two or three common foods the vitamins or food elements that enables the body to convert the entire diet into its natural "medicine."

One common coeliac disease is a peculiar form of sugar starvation. No matter how much sugar a child eats the system cannot assimilate it. The cause only makes them worse. Dr. Haas found the sugar in ripe banana can be eaten freely and that in the children's bodies it converts ordinary sugars into an agreeable form.

Discovery Relieves Boss

A teacher gave the following problem to her pupils: If a woman gathered five eggs a day, how many eggs would she gather in a week? After studying a few minutes, William, with a pained look finally asked:

"How do hens lay eggs on Sunday?"

"YEARS CAN BRING YOU ADDED CHARM!"

says JACK HOLT

JACK HOLT Famous Film Star

"Some women seem to grow old before every year," says Jack Holt. "Birthdays only add to their charm!

"Here in Hollywood you see them every day—actresses still every bit as youthful as they were years ago, more poised, more irresistible than ever. Still the idols of fan-adoring public!

"The matter often isn't age, a woman who has the fresh, glowing charm of youth is always attractive.

"I should think that every woman would learn the complexion secret the screen and stage stars know!"

You will want to know how the lovely stars keep youthful charm right through the years! "Chief complexion beauty aid is Lux Toilet Soap!" they will tell you, "with Lux Toilet Soap!"

BARBARA STANWYCK Columbia Star

Important actresses the world over—in Hollywood (16 of the 694 there!)—on Broadway in Europe—depend on this fragrant, creamy white soap for every type of beauty. The cream of doctor-choice French soap for you.

MANITOBA IS NOT IN FAVOR OF A WHEAT QUOTA

Winnipeg, Man.—Establishment of a wheat quota at the Ottawa Imperial Economic Conference would not be in the best interests of wheat producers although sale of western wheat is of the utmost importance. This was the chief of a resolute agreed upon at a conference of Manitoba agricultural interests called by Premier John Bracken to formulate Manitoba's views for submission to the Dominion Government prior to the conference.

Other points agreed upon were Stabilization of exchange to improve trade.

Wider markets are necessary for all varieties of Canadian farm produce.

An Empire intelligence marketing board is necessary.

Wider facilities should be provided for the distribution of British films throughout Canada.

Canadian delegates at the Imperial Conference should be asked to give preference to British goods most needed by Canadian consumers and to American goods, household articles, textiles, tools and other metal and plastics.

A special committee was appointed to draft the suggestions and instructed to sit in with a conference to be held of representatives of boards of trade and industries other than agriculture. Findings of both Manitoba conferences will be laid before a conference of the four western provinces at Regina, June 20, when a submission embodying the viewpoint of western Canada generally will be prepared.

Low Rates On Grain

Transportation Of Goods From Port William To Montreal Changed Here

Montreal, Que.—The Gazette published the following:

New record low rates of 2½ cents a bushel for the transportation of grain from Port William to Montreal have been accepted during the last two days. It was announced 10 days ago that five cents a bushel was being offered and accepted, and there was a report that a rate of 4½ cents was even offered. Since then the situation has dropped from 'bad to worse' and several shipowners have decided to lay-up their vessels rather than operate them at a loss.

"Though small steamers are carrying grain at the abnormally low figure, it is maintained that no mathematical computations or calculations will enable their owners to produce a profit from the operation. It is even said grain cannot be carried profitably at seven cents a bushel, though several firms decided to continue accepting the lower rate in the hope that the situation would improve during the season."

Donkey Kicks

Hindus and Moslems Continue To Engage In Street Battles

Bombay, India.—Fresh sporadic rioting between Hindus and Moslems broke out in Bombay, despite the presence of short British soldiers, and before it was checked 11 more persons had been killed and 96 injured.

Thus the toll of the communal fighting, which has flared intermittently for some days, rose to 90 dead and half wounded.

British troops frequently opened fire to check communal disturbances. There was still some looting, but the authorities expressed confidence that they were gaining control of the city through the energetic action of the troops.

Verdict Of Accidental Death

Southampton, England.—A verdict of accidental death was entered by a coroner's jury inquiring into circumstances surrounding the death of Earl of Egmont, former Freddie, Alberta, rancher, who died from injuries suffered in an automobile accident. Viscount Perceval, the earl's 17-year-old son and heir, was not present at the inquest.

Doukhobors Protest

Write Letter To Press and Send Message To The Hague

Vancouver B.C.—Doukhobors facing imprisonment for nude parading have written to the press and various public organizations, including the anti-militarist bureau of The Hague, protesting against their treatment.

In a letter to a local newspaper the Doukhobors state:

"It is a tragedy when one man persecutes another. And this is just what is happening today with us, even whatever inherent people are being scattered to three years imprisonment.

"We know that truth is bought on Golgotha, and will ever remain there. We forgive everybody who has maltreated us. But when we come to our children and their mothers this is where we stop and say, 'There is no more patience!' The people in force others into conditions that they are not able to bear. The whole world is now aroused by the [illegible] raw flat what is going on in Nelson this is worse than kidnapping a drama full of man's inhumanity to man."

Representatives of the Doukhobors have sent a cablegram to the "anti-militarist bureau at The Hague" protesting against their treatment.

We Doukhobors, Sons of Freedom of God, send you the following message. "Please raise your voice in the name of trampled truth. Seven hundred in jail. More than half already in the shipping of 2,000,000 bushels of grain via Hudson Bay, the cattle cargo is ready to leave early in August, before the wheat shipments start.

It is stated here a stockyard will be constructed near the dock. Hay will be brought here from The Pas.

Saskatoon, Sask.—The possibility of huge shipments of wheat through Churchill to the Spillers Ltd. Mills, at Cardiff and London, England, was disclosed in a statement issued by James M. Stevenson, K.C., president of the Board of Trade. Mr. Stevenson said that negotiations had been opened with the British milling firm through the trade through Churchill committee of the Board of Trade.

Tariff's Hurt Trade

No Inclination On Canada's Part To Enlarge Trade With U.S.

Ban Fergusson, K.C., Montreal, president of the Canadian Chamber of Commerce, told the annual meeting of the United States Chamber of Commerce in the face of existing American tariff laws there is no inclination on Canada's part to enlarge the trade with the United States.

Mr. McGregor said he was not entirely satisfied in his own mind that the commercial treaty between Canada had been accorded at Washington was in conformity with enlightened business opinion in the United States. If United States business interest were not satisfied with the present economic relationships between their country and Canada, he suggested, they might make themselves a little more articulate on the subject.

An International Park

Waterton Lakes Park In Alberta, To Be Enlarged

Ottawa, Ont.—A bill designed to make the Waterton Lakes National Park, in Alberta, a portion of the Waterton-Glacier International Park, was given first reading in the House of Commons. Hon. T. G. Murphy, Minister of the Interior, sponsoring the bill, said the Waterton Lakes Park adjoined the Glacier Park, a United States property in Montana. Some time ago the United States government had suggested that the two parks be regarded as an international park and had passed legislation to that effect.

Reds Executed

Hamburg, Germany.—Eight hundred Young Communists were arrested here for displaying Communist flags and signs at a picnic. They were released after they had been booked at police headquarters. The police had granted permission for the picnic on conditions there be no Communist banners or signs.

Thinks Judges Underpaid

Ottawa, Ont.—Canadian judges are too numerous and underpaid, Premier R. B. Bennett told the House of Commons. The judiciary as a whole does not reflect the genius of the legal profession from which it is recruited, and in too many instances political patronage, rather than individual merit, has elevated a man to the bench.

Churchill Cattle Shipment

Expected Cattle Cargo To Leave Early In August

Churchill, Man.—The first boat to arrive here this summer will return with a shipment of cattle to Europe. While arrangements have been made for the shipping of 2,000,000 bushels of grain via Hudson Bay, the cattle cargo is likely to leave early in August, before the wheat shipments start.

It is stated here a stockyard will be constructed near the dock. Hay will be brought here from The Pas.

Saskatoon, Sask.—The possibility of huge shipments of wheat through Churchill to the Spillers Ltd. Mills, at Cardiff and London, England, was disclosed in a statement issued by James M. Stevenson, K.C., president of the Board of Trade. Mr. Stevenson said that negotiations had been opened with the British milling firm through the trade through Churchill committee of the Board of Trade.

Irish Free State Will Be Represented

Eamon De Valera To Attend Ottawa Conference

Dublin, Irish Free State.—President Eamon de Valera of the Irish Free State said he would personally attend the Ottawa Imperial Economic Conference in July if government business did not interfere.

The president did not name other members of the Free State representation, although he said it was likely three ministers of his government would accompany him.

Spain Requires Wheat

Government Carrying On Negotiations For Large Purchases

Madrid, Spain.—Financial circles said the Spanish Government had approached local members of foreign banks in an attempt to arrange payment for the contemplated importation of 160,000 tons (about 5,333,000 bushels) of wheat.

The result of the negotiations was not known, but the government wants to spread the payment over periods of three, six and nine months it was understood, the wheat to be bought from Canada, the United States and Argentina.

Banking circles said a government decree ordering the purchase of the wheat, expected soon, would bring Spain's total importations to 300,000 tons (about 7,666,000 bushels), but that it probably would be necessary to import another 200,000 tons before the new crop is available in July, since the domestic supply is exhausted.

U.S. Senate Refuses To Legalize Beer

First Senate Roll Call Brings Overwhelming Defeat

Washington.—The United States senate has refused to legalize beer.

The first senate roll call for beer since prohibition brought overwhelming defeat. The mass vote was on an amendment by Senator Tydings, Democrat, Missouri, to the revenue bill to legalize 2.75 beer and tax it 34 cents a gallon to help finance a $1,500,000,000 public construction program.

Just previously the senate had turned down—60 to 25—a proposal by Senator Bingham, Republican, Connecticut, to alter the Tydings amendment to make it allow four per cent. alcohol content.

Eleven Democrats voted with 12 Republicans for the Bingham four per cent. amendment.

Liberian Atrocities Reported To League

Natives Have Been Burned Alive By Frontier Military Force

Geneva, Switzerland.—The burning alive of many men, women and children by the Liberian frontier military force was reported to the League of Nations in a communication signed on behalf of the British, United States and French governments.

These atrocities, the report asserted, were committed against tribesmen of the Kru coast.

The Liberian delegate submitted a memorandum to the League Liberian commission confirming the burning of 44 villages and the killing of 81 men, 69 women and 29 children.

ENGLAND'S NEW AMATEUR (CLOSE) CHAMPION DRIVING

Here is Eric Fiddian, the winner of the English Amateur (Close) Golf Championship at St. George's Sandwich, Kent, driving from the fifteenth tee in the final round of the series. He defeated A. Stuart Bundabury by one hole.

OUR NATIONAL RADIO TO BE BEST IN WORLD

Ottawa, Ont.—Harmony reigned in the House of Commons when the radio control bill was under review. Party lines were forgotten, suggestions and advice flew back and forth across the Chamber and in complete unanimity the measure was given second reading and all but one or two clauses passed through committee.

The bill would establish a Canadian radio broadcasting commission to control a nationalized system of radio. With headquarters in Ottawa and branch offices throughout the Dominion, the commission of three would regulate broadcasting through its own chain of stations from coast to coast.

Premier R. B. Bennett, sponsor of the bill, said it was designed to give Canadians a broadcasting system "not excelled elsewhere in the world." It would assure Canadian control of Canadian broadcasting, free from foreign interference or influence.

Tentative salaries of $12,000 a year for the chairman and $10,000 each for the commissioners, were suggested by the Prime Minister. One commissioner will be French-speaking and one will be a radio engineer, possessing the necessary technical training. The commission, said Mr. Bennett, would be composed of men with an excellent appreciation and understanding of the value of broadcasting to the nation and should have some knowledge of what is required to be the major part of the people of this country in the form of programmes."

Indicating the harmony and co-operation that reigned throughout the discussion, the Prime Minister, interrupting that politics will play no part in selecting the personnel of the commission, suggested to the Liberals they present a list of men acceptable to them. A list of men acceptable to the unusual spirit came when the Prime Minister asked for suggested penalties for infractions of broadcasting regulations and adopted the proposals of Major C. G. Power, Lib., Quebec South.

The provinces, the Prime Minister announced, will have something to say over programme selections.

Members of the commission must devote their full time to the work. They will be barred from having any private business interest, especially relating to radio or broadcasting. Upon retirement, they will receive pensions.

The chairman will hold office for 10 years, the vice-chairman for nine years and the commissioner for eight.

With an eye to the future, it was incorporated in the bill that control of television and other scientific developments, also would be placed under the commission.

Hunting For "Baychimo"

Another Airplane May Enter Search For Deserted Fur Ship

Point Barrow, Alaska.—A double aerial search for the "Baychimo," fur trading vessel anchored off the Arctic Coast, is in prospect here.

Pilot William R. Graham and Mrs. Eden Christofferson, Portland, Ore., scientists, surveyed 1,500 square miles of the rough ice pack without glimpsing the missing ship, which they believe carries a valuable cargo of furs.

Pilot Joe Crosson, noted northern airman here with a motion picture cameraman on a scouting expedition, also said he might make exploratory flights in search of the "Baychimo."

Seattle, Wash. To replace the steamship "Baychimo," lost along the Alaska coast in the ice floes of the seas of the north, the Danish Motorship "Karine" will sail from here in June for the Canadian Arctic via Vancouver, B.C.

The "Karine" was chartered by the Hudson's Bay Company from the Svenson Fur Trading Company for a voyage to Herschel Island and other Canadian Arctic ports. She will be manned by Canadian officers and crew.

Bank President Shot

Ipswich, S.D.—Three robbers held up the Bank of Ipswich, shot the president, Pliz Beebe, perhaps fatally, kidnapped the cashier and fled with an undetermined amount of money.

Mistaya Map Sheet

Alberta-British Columbia Region Rich in Lore Of Early Explorers

"Do you know the world's wide renown?" asks Kipling in one of his famous poems. In this he is referring to the Mississippian but might have used the same question in regard to portions of our own Canadian Rockies. The height-of-land separating western Canada from the Pacific slope, those which eventually find their outlet in the Atlantic and Arctic oceans, in the boundary between Alberta and British Columbia, and this dividing line might be taken as Canada's great white reaches. It is in this region that several of our most extensive National Parks are situated—Banff, Jasper, Yoho, and Kootenay.

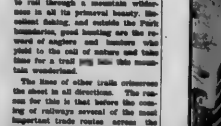
An important part, 1,680 square miles, of this roof of the Dominion is pictured in the Mistaya Map Sheet, recently issued by the Topographical Survey of the Department of the Interior. The sheet covers the area from identical peaks of Banff and Jasper eastward through Yoho Park to the Simon and Freshwater Glaciers, and from Vermilion Pass northward to the North Saskatchewan River.

Through this region the Alberta-British Columbia boundary winds like a serpent among the ridges joining mass to mass, link to mountain top. Clustered along the boundary in the great border—Compass, Mons, Freshfield, Wapta, and Wapatik. Glaciers abound everywhere. Here are the sources of great rivers having long courses divided by the continent. Howse Pass, which is cropped on the left centre of the sheet, is another by only a narrow ridge the water flowing into the North Saskatchewan and on through the Prairie Provinces to Hudson Bay, from the headwaters of Blaeberry River, a stream emptying into the Columbia, which latter, after a course of many hundred miles, pours its flood into the Pacific.

There are no railways shown on the map sheet but for many thousands of the territory is a great tourist region. Thirteen Pass in Yoho National Park, is shown on the lower edge of the sheet and about an inch south of that point runs the main line of the Canadian Pacific bringing its hosts of visitors to Banff and Yoho parks. The Canadian National line is located considerably further north of the area shown on the sheet, serving the more northerly Jasper Park. The great crest lying between these two railway lines is the paradise of the trail rider. Shown on the map by a thin red line is the celebrated Banff-Lake Louise-Jasper trail which carries the adventurous visitor by pack train from rail to rail through a mountain wilderness in all its primeval beauty. Immediately north and outside the Park boundaries, good hunting are the reward of anglers and hunters who yield to the call of nature and take time for a trail trip into the mountain wonderland.

The lines of other trails crisscross the sheet in all directions. The reason for this is that before the coming of railways several of the most important trails routes across the mountains led through this territory. The names of the passes shown here indicate this—Bulkley, Boss, Clearwater, Dolomite, Howse, Pipestone, and others—passes discovered and used by explorers and fur traders like David Thompson, Joseph Howse, the Hart of Southeast, and Sir James Hector. Many Indian trails also traverse the area. Over three ranges high mountain peaks dot the map, and these with the great bodies, fields of glaciers, and the dark green coniferous forests on the lower slopes, cause this district to attract a constantly increasing throng of tourists.

It is interesting to note that this sheet is the product of the art of photo-topographic mapping developed to a high degree of excellence by the late Dr. E. Deville, Surveyor-General of Canada, and used with great success in outlining the features of the sea of mountains which supersede our Prairie Provinces from the Pacific Coast. The map may be had at a nominal price upon application to the Director of the Topographical Survey, Department of the Interior, Ottawa.



"What are you suffering from?"

"Vanity. I spend hours before the mirror admiring my beauty."

"That's not vanity.—that's imagination."—Cadenvos, Madrid.

Canada's War Memorial

Will Be Exhibited In London Before Being Shipped To Ottawa.

The King has given permission for the exhibition in Hyde Park in the autumn of Canada's great national war memorial to be set up in Ottawa. It is probable that the site chosen will be between the Marble Arch and the Serpentine, on which the Wellington war memorial carillon was temporarily housed in 1926. The memorial, which will cost almost £50,000, is the work of seven brothers, all experts in a branch of sculpture. The youngest, Mr. Vernon Marsh, who died two years ago, was the designer. Every part of the memorial has been carried out at the Marsh's family home in Hampstead, N.W.8. It was begun in 1927, the oldest brother, Mr. Sydney Marsh, heading the family team. At Canada House, on the 15 figures of heroic size, representing all the Canadian forces that served in the Great War. They will be placed in a canopy capable under a 60-foot high Arch of Invention.

Banana Rapid Growth

Sensation Used By Governor Gardiner on His Product Perhaps

In Germany, scientists are providing specially made sawdusts for the production of sugdings. They are made of closely woven netting on a wooden framework. The shades are placed on the south side of a group of young plants. The plants grow through the nourishing rays of the mended sun. The trees are said to have grown to a height much greater than the new device has been put into use.

Germans in Short Pounds have taken a leaf from Hollerd's book, and at the estuary of the Nagat, where 4,000 acres were under water, they have constructed dams and dykes which dried the entire tract of arable land.

Motion picture theatres in Zaria, Burma and Ceylon, now number 676.

For the first time in history, buggies will be tax free in Nebraska.

Rust Resistant Wheat

Milling and Baking Qualities Are Found To Be Good By Investigators

At a recent meeting of the committee on field crop diseases, held in Winnipeg, considerable time was devoted to a discussion on the quality for baking purposes of the varieties of rust resistant wheat, so far developed, says a statement issued by the Department of Agriculture.

The statement continues, "Data from milling and baking tests carried on that occasion clearly indicate that most of the new varieties at present under investigation, possess a high degree of quality, both from the milling and baking standpoints, comparing, in fact, very favorably with our best Marquis. Unfortunately, a press despatch, issued during the conference, stated that these rust resistant wheats so far developed have usually proven poor for milling and baking purposes, while, as a matter of fact, exactly the reverse is the case."

Almost Unlimited Market

Britons Could Absorb 100,000 Head Of Canadian Cattle

Belief that Britain could absorb 100,000 head of Canadian cattle if a regular supply was assured, was voiced by John Horton, of Winnipeg, who has had practical experience with cattle shipments to Britain. He believed an almost unlimited market existed there for the right type of cattle, ranging from 800 to 1,200 pounds.

Mr. Horton said the British were favorable to Canadian cattle and a recent shipment he took to Stirlingshead, showed remarkable returns, he said. He is hopeful of shipping the first boat load of cattle to England via the Hudson Bay route, of which he is a keen supporter.

Britain Will Pay

Great Britain, it is announced, will pay her debts to the United States if the United States requires her to do so. Therefore, we have no hesitation in announcing that Great Britain will pay her debts to the United States.

In giving off its heat the sun loses 360,000 million tons of matter a day.

Gardening Notes

Some Thought Should Be Given To Best Method To Be Followed In Planting

In planning our garden, we find that vegetables divide themselves into certain definite groups. Thus we have corn, cucumbers, parsnips, potatoes, beans, carrots and onions from seed, which occupy a space for the entire season. If our space is limited, we can make the best use of our garden by planting these in rows fairly far apart and in between grow early crops like onion sets, peas, radish, spinach and lettuce. Or we can put the early group in one part of the garden and follow it by a second crop in that, very favorably with our best Marquis. Unfortunately, a press despatch, issued during the conference, stated that these rust resistant wheats so far developed have usually proven poor for milling and baking purposes, while, as a matter of fact, exactly the reverse is the case."

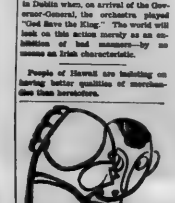
PARIS LANE'S OLD ARISTOCRATIC HOUSES A THING OF THE PAST

Three three photographs show the striking contrast of Park Lane, England, of 1932, to Park Lane, the old aristocratic street of the eighties. The lower picture shows Dudley House, as it looked in 1912. This fine old mansion, along with many others, has disappeared to make way for the new structures of modern design shown Arch, in the two top photographs. Top, left, is the new Alfred Mosse, while, right, looking towards the Marble Arch, is the Dorchester House Hotel, with the Grosvenor House Hotel in the distance.



"Is you want to be my son-in-law?"

"I—I don't—but I want to marry your daughter."—Sondagsnisse-Strix, Stockholm.

IN BED WITH BACKACHE

"Two years ago I suffered with severe pains in the small of my back, and would wake regularly half myself nightly. At times I had to go to bed for a week at a time. I went to and from hospital for 3 months, and they certainly did me good, but they told me they could not keep giving me medicine, but that I needed complete rest for 6 months, away from the children. I could not bring myself to be parted from the children, so I did not go to hospital any more. I started on a reducing bile pills, and have had no trouble with my back since."—Mrs. W. Kruchen (name and address given if required), Kruchen Corner, Saskatchewan.

Kruchen contains vital salts that are right down to the most cases of backache. Soon after you start on Kruchen, the sharpest pains of backache cease. As you persevere with the "little daily dose" the twinges become less and less frequent, until finally you hardly know what an ache or pain is. Then, if you're wise, you'll prevent the possibility of a relapse by continuing the tiny, tasteless pinch of Kruchen every morning.

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of
"The Splendid Path," "The Hermit Of Far End," "The Herriot Hodder & Stoughton, Ltd., London.

CHAPTER XXI.—(Continued)

She did not tell him why. But within herself she knew that no woman would ever be afraid with God-fray Burke. Afraid of him, possibly, but never afraid that he would not be entire master of any situation where-in physical strength and courage were the paramount necessities.

She reflected a little grimly to herself that it was this very forceful-ness which gave the man his unquestionable power of attraction. There is always a certain fascination in the sheer, animal strength—a savour of magnificence about it, something tentatively heroic, which appeals irresistibly to that primitive instinct somewhere hidden in the temperamental make-up of even the most ultra-twentieth-century feminine product.

And Jean was quite aware that she herself was not altogether proof against the attraction of Burke's dynamic virility.

There was another kind of strength which appealed to her far more. She knew this, too. The still, quiet force that was Tormarin's—deep, and unfathomable, and silent, of the spirit as well as of the body. Contrasted with the savage power she recognized in Burke, it was like the Sea, tempered stead of a rapier compared with a heavy bludgeon.

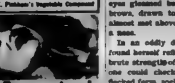
The many wounding cuts now on the market will save a lot of stooping. At this time, too, a heavy roller is used to good effect, levelling down high spots and firming soil about the roots of the grass. Loosen up here spots with a rake and re-seed with a good lawn mixture—cheap mixtures are never permanent and sometimes are dangerous. Protect this new seeding with some poultry netting or brush so that sparrows will not get at the seed. Top dressing with well-rotted manure or an application of a good commercial fertiliser, high in nitrogen, is advisable. If manure is used, be careful that it is well-rotted and free from weed seeds. The lawn should be cut every four or five days, after grass has well started, with a sharp lawn mower. A dull machine will pull out much of the grass. Later on, when the grass turns hot, less frequent cutting is advisable.

Just Had Manners

Some of De Valera's followers ostentatiously marched out from a social function at the French Legation in Dublin when, on arrival of the Governor-General, the orchestra played "God Save the King." The world will look on this action merely as an exhibition of bad manners—by no means an Irish characteristic.

People of Hawaii are insisting on having better qualities of merchandise than heretofore.

By Lydia E. Pinkham's Vegetable Compound



She's all worn out again

Poor girl . . . she has the same old headache . . . backache . . . and blues. She ought to try Lydia E. Pinkham's Vegetable Compound in tablet form.

I should think much better of you."

"Then I'm afraid you'll have to think worse," he retorted.

Just at that moment they encountered a flock of sheep, ambling leisurely along towards them and block-ing up the narrow roadway, and Jean was spared the necessity of replying by the fact that Burke immediately found his hands full, manoeuvring a path for the mare between the broad, curly backs of the blustering animals.

The drover of the flock was, of course, a hundred yards or more behind his charges, negligently occupied in relighting his pipe, so that no assistance was to be looked for in that direction, and as the sheep bunged against the mare's legs and crowded up against the wheels of the trap in their characteristically bumbleing fashion, it required all Burke's skill and dexterity to make a way through the four-footed crowd.

The chestnut's own idea of dealing with the difficulty was to charge full speed ahead, an idea which by no means facilitated matters, and she fought her bit and fairly danced with fury as Burke checked her at almost every yard.

They had nearly reached the open road again, and Jean, looking down on the sea of woolly backs with the hovering cloud of hoof-driven dust above them, thought she could fully appreciate the probable feelings of the Israelites as they approached the further shore of the Red Sea. And it was just at this inauspicious moment that the drover, having lit his pipe to his satisfaction, looked up and grasped the situation.

Guilty conscience not only makes cowards, but is also prolific in the power of flight, and the drover, stung into belated action by the consciousness of previous remissness, promptly did the most foolish thing he could.

He let off a yell that tore its way through every quivering nerve in the mare's body, and with a shout of "Round 'em, lad!" sent his dog — a half-trained youngster—barking like a maniac past the animals, full tilt in pursuit of the sheep.

That settled it as far as the chestnut was concerned. With a snort that leapt forward, scattering the two or three remaining sheep that still blocked her path, and the next moment the light, high cart was rocking like a cockle-shell in a choppy sea, as she tore along, utterly out of hand.

Luckily, for a couple of miles the road ran straight as a dart, and after the first grasp of alarm Jean found herself curiously collected and able to calculate chances. At the end of the two miles, she knew, there came a steep declivity—a typical Devonshire hill, like the side of a house, which the British workman had repaired in his usual crude and inefficient manner, so that loose stones and inequities of surface added to the dangers of negotiation. At the foot of this descent was a sharp double turn—a veritable death-trap. Could Burke possibly get the mare in hand before they reached the brow of the hill? Jean doubted it.

There was no sound now in all the world except the battering of the mare's hoofs upon the road and the screaming rush of the wind in their ears. The hedges flew past, a green, distorted blur. The strip of road fled away beneath them as though coiled up by some swift revolving cylinder, ahead, it ended sheer against a sky blue as a periwinkle, and into that blue they were rushing at thirty miles an hour. When they reached it, it would be the end. Jean could almost hear the crash that must follow, sense the sickening feeling of being flung headlong, hurled into space . . . hurtling down into black nothingness . . .

Her glance sought Burke's face. His jaw was outthrust, and she could see the clenched teeth behind the lips that shut like a rat-trap. His eyes gleamed beneath the penthouse brows, drawn together so that they almost met above his fighting hook of a nose.

In an oddly detached manner she found herself reflecting on the degree brute strength—of his set face. If anyone could check that dying, frantic-fished farm, nowhering along between the shafts like a red-brown streak, he could.

She wondered how long he would be able to hold the beast—to keep on.' She remembered having heard that, after a time, the human of pulling against a runaway horse was much for human nerves and muscles, and that a man's hands grew numb . . . and helpless! What's the good pull on the bit equally numbs the mouth of the horse, so that he, too, has no sense any feeling to be piqued upon by the pressure of the bit.

Her eyes dropped to Burke's hands. With a little inward start of astonishment she realised that he was not attempting to pull against the chestnut. His wrists were locked . . . holding . . . steadying her, ever so little, to her mad gallop. Jean felt the mare swerve, then swing level again, still answering faintly to the reins.

Burke's hands were very still. She wondered vaguely why—how—he didn't pit his strength against that of the runaway. They must have covered a mile or more. A bare half-mile was all that still lay between them and disaster.

And then, as she watched Burke's hands, she saw them move. first one and then the other, sawing the mare against the tender corners of the mare's mouth . . . Jean was conscious of a faint dizziness, a sudden loss of her . . . Not enough to be accounted a check . . . but still something, some appreciable slackening of the mare's wind rush towards that blue blur of sky ahead.

It seemed as though Burke, too, sensed that infinitesimal yielding in the nave of the bit. For the first time, he gave a definite pull at the reins. Then he relaxed the pressure, and again there followed the same moving motion and the fret of the steel bar against sensitive, velvet lips. Then another pull—the man's sheer strength against the mare's . . . Jean watched, fascinated.

And gradually, almost imperceptibly at first, the frenzied beat of the iron-shod hoofs became more measured as the chestnut shortened her stride. It was no longer merely the thudding, thunderous devil's tattoo of sheer, panic-driven speed.

Now and again Jean could hear Burke's voice, speaking to the frightened beast, chiding and reassuring in even, unhurried tones.

She was conscious of no fear, only of an absorbing interest and excitement as to whether Burke would be able to impose his will upon the animal before they reached that precipitous hill the descent of which must inevitably spell destruction.

She sat still, her hands locked together, watching . . . watching . . . .

(To Be Continued).

Free Time Table

Should the Canadian railways make a charge to the public for time-tables? This point was raised in the Commons Railway Committee. In Great Britain a small charge is made, but Sir Henry Thornton doubted if it would be possible to do so in Canada. The universal custom on the North American continent is to provide time tables free. The result is that very often they are taken by people who do not require them.

Growing Girls!

Profit by the Experience of Others at This Vital Time

Able to Go to All the Dances

"When I was 16 I was so ill my people thought I was going to die," writes Mrs. Annie Wilson, Bushell Ave., Toronto. "I had scarcely any blood, and my head would hardly walk. [illegible] and I had ground away day by day. I was until a friend recommended Dr. Williams' Pink Pills. I got them, and before I had finished the first box I was feeling much better. I continued taking the Pills until I was completely well. I went to all the dances and had the time of my life again. I certainly recommend Dr. Williams' Pink Pills to any one who is anaemic or run-down in any way, for they certainly result my health."

Don't let anaemia rob your growing daughter of health and joy. Give her Dr. Williams' Pink Pills. They banish the condition by increasing new blood which imparts health, vigor and vitality. Sold by dealers in all run-down or anaemic conditions. All your druggist's. Sold by druggists.

Perrvish, pain, restless, sick sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

Rebecca (in fractured German night). —Isaac, get up, dere is someone moving under de bed, I think it's a burglar.

Isaac—Don't bodder me Sarah and ven he takes up I'll charge him for lodgings.

The house had been rapidly built and occupied.

"Do you find the plans comfortable and substantially built?" asked the landlord when he called.

"Well," said the tenant, "I always get cattle to manage."

Little Helps For This Week

"Therefore for Thy name's sake lead me and guide me."—Psalm xxxi. 3.

My Father, God, lead on!
Calmly I follow where Thy guiding Hand
Directs my steps; I would not trembling stand.
Though all before the way is dark as night; I stay My soul on Thee, and say,
Father, I trust Thee, lead on!

—Fanny J. Palmer.

All virtue consists in having a willing heart; God will lead you as if by the hand, if only you do not doubt, and are filled with love for Him rather than fear for yourself.—Fenelon.

Miller's Worm Powders are the medicine for children who are found suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms subsist and drive them from the system, and, at the same time, they are tonical in their effect upon the digestive organs, restoring them to healthful operation and ensuring immunity from further disorders from such a cause.

Baltimore Repeals Old Laws

Made When Stake Was Founded Two Hundred Years Ago

Baltimore, by the largest vote ever given a question or a candidate, has repealed its 200-year-old Sunday observance laws, which even precluded a man's kissing his wife on the Sabbath.

By a majority of more than 83,000, the city wiped off its books the Sunday laws which were born with the Maryland legal code when the Colonists founded the state, and for the first time, can go to moving picture shows, sport events, and make certain retail purchases legally next Sunday.

VOL. 11 No. 11 — FORT SASKATCHEWAN, ALBERTA WEDNESDAY, JUNE 1st, 1932 — $1.50 PER YEAR IN ADVANCE

Bruderheim Nine Win Over Fort 8-7

Joe Berg pitched the Bruderheim nine to an 8-7 win over their Fort Saskatchewan rivals in an even and hard fought struggle at Bruderheim.

Jacobs commenced the game for the Fort, but was pulled for Pocock, who hurled good ball, in the two last innings.

Play was evenly divided and both pitchers had good support from their team mates.

Lineup—Fort: D. Turner, Jacobs, Pocock, P., Turner, Diamond, H. Turner, Goat, and A. Mann.

Bruderheim: L. Frederking, Berg, Mascherpere, Miller, Schultz, Gobert, and B. Frederking.

U. F. A. SUNDAY AT PARTRIDGE HILL

The annual U.F.A. service will be held at Partridge Hill United Church next Sunday, June 5th, at 7:30 p.m. Mr. N. F. Priestley, B. A. Vice-President of the Provincial U.F.A. will speak.

It is expected that a large number of people will take advantage of hearing Mr. Priestley on this occasion.

Please remember the hour 7:30 p.m. The regular service at Partridge Hill at 3 p.m. will not be held in favor of the evening service.

A prompt attendance is asked so that the service may be by daylight.

Guard Against Fires

The Fort Saskatchewan district has been pretty well soaked by the storm and by recent rains, so that we start afresh so far as fires are concerned.

The 1931 fire season had the most serious loss in Alberta of any season for years, and the Publicity Commissioner is very much concerned over the matter of carelessness of campers etc., in starting fires in the various resorts and forest areas. Tourist campers and campers setting out fires in grass, bush and hand must take special care to see that fires are extinguished, and are properly put out when they are left. We cannot afford to have our country of trees and timber sacrificed and swept by fires carelessly handled and carelessly left, and the government officers and the police officers need the assistance of all farmers and citizens to protect the wooded wealth of our territory and province.

It's up to you.

UNITED CHURCH OF CANADA

11 a.m. Morning Worship.
12:15 p.m. Sunday School and Bible Class.
7:30 p.m. Evening Worship. Rev. W. J. Haggith B.A.B.D., of Highlands United Church Edmonton will preach at the evening service.

Why He Was Promoted: Guest—"This room looks to me like a cell." Bellboy (politely)—"Well, it's all a matter of what a person's used to".

Borne Kicks Murray Behind; Fractures Skull

A serious accident happened on Saturday last at the farm of Mr. and Mrs. Peter Bolnic of Sturgeonville, when their native little son, Murray, aged seven years, was kicked on the forehead by a horse which has always been very gentle. He was rushed to the Misericordia Hospital in Edmonton, where he was found to be suffering from a fracture of the skull. At last report he was doing well.

Murray's many friends wish him a speedy recovery.

PARTRIDGE HILL NEWS

Sunday, June 3rd will be a red letter day for the U.F.A. in Partridge Hill when U.F.A. Sunday will be observed and Mr. Norman Priestley, Provincial Vice.-Pres. will be present and will give the address. Special music will be provided.

The hour of the service has been changed from 3 p.m. to 7:30 p.m. Do not forget the hour. A big attendance is expected.

COMING EVENTS

Rev. W. J. Haggith of Highlands United Church, Edmonton, will preach at the evening service of the United Church here next Sunday.

******

The regular monthly meeting of the Fort Saskatchewan Women's Institute will be held on Thursday, June 9th, at the home of Mrs. Rogers.

The next meeting will take the form of a bridge party.

Everybody welcome.

TENNIS CLUB NEWS

The Fort Saskatchewan Community Tennis Club at their last meeting voted to enter the Inter-Club Tournament held this month.

On Tuesday evening of this week the Tennis Club Secretary sent the entries with a list of players to the Secretary of Chas. B. Intermediate Tennis Tournament Association, Edmonton. The draws will be made today and the first round is to be played on Saturday, June 4th.

As the Fort Saskatchewan Tennis Club is not a large club and the majority of players are young people with just a few years of tennis, we do not look for any great results this year, especially when there is a possibility of playing against seasoned players. But within the next few years we should have a formidable array of talent to pick for tournament teams.

Castle School News

The following is a report of the recent Festival held at Bruderheim or Castle School, as this report was a couple of days late for the issue containing reports from Josephburg and Fort Saskatchewan, and last week all space in the "Record" was filled we left it over until this week, as report is quite lengthy.

Castle School is out 1 win the common rural school class, at the Musical Festival next year. There we have come second in this event, but next year we hope to have a different tale to tell. This event has been keenly contested both years.

As some items were omitted from the first summary report, we might say that our total aggregate was 33 points.

Thanks to Josephburg for your sportsmanlike spirit, and we accept your challenge on behalf of one of the cups, although we think it takes a lot to satisfy Josephburg by the looks of their report this year.

We thank the families who so generously allowed us the use of their pianos during training; also the two ladies, who assisted kindly in the training, Mrs. J. W. Dose of Josephburg, and Mrs. R. J. Hodgins of Beaverhills Church. To these good friends our successes are largely due.

As Castle lost a month's practice, April 1st to April 30, on account of an epidemic of mumps in the district we feel that the children did wonderfully well.

Black Bear Shot Within 5 Miles Of Town

Mrs. Tom Mosey got the scare of her life when looking outside Wednesday morning to see a big black bear near the farm yard. She immediately told the Thorne Bros who live on the next farm.

By that time the bear had crossed over to the Thorne farm.

One of the Thorne boys put three of their coyote hounds after the bear making him take to the top of a shed, while the other brother went to get permission to shoot the animal.

The bear not staying long on the shed went across fields to some bush where the dogs again put it up a small tree, not before the bear had slightly injured two of the hounds.

Pictures were taken of the animal and then it was shot.

The Thorne Bros. intend having the hide tanned, as it was in excellent condition.

Thorne—Garrett

A quiet wedding was solemnized at the Fort Saskatchewan on Monday, May 16th., when Ada Amelia youngest daughter of Mrs. F. Bellamy was united in marriage to Robert Ernest, son of Mr. A. Thorne. The bride was attended by Miss Ruth Meers and Mr. Eric Thorne attended the bridegroom.

The wedding music was beautifully rendered by Mrs. F. Bellamy. Rev. D. C. Ramsay officiated. Mr. and Mrs. Thorne will reside on the greene farm in this district.

"CHARLIE CHANG CARRIES ON"

Young romance and gripping detective mystery are combined in the Fox drama "Charlie Chang Carries on" to thrill and amuse you at the Empress Theatre. Lovely of this picture is the entire world with Scotland Yard starting the trail in London where the first murder is committed. Charlie Chang Carries on at Honolulu and manages to trap the killer just before the end of the trail.

There is comedy in it too; a lot of smart funny bits contributed by Warner Hyman, as a Chicago gunman off on a vacation and Majorie White, Warner Oland, unequalled for depicting Chinese characters in Charlie Chang while Marguerite Churchill and John Garrick have the romantic leads.

The production comes with the advance reputation of being one of the oldest features of its sort made this year.

The 40th Anniversary of "SALADA TEA"

For 40 years SALADA has given the finest quality in tea. Present prices are the lowest in 15 years.

Cellophane.

Notwithstanding the present state of financial and economic uncertainty prevailing throughout the world, resulting, as it does, in huge business losses, unemployment, and much suffering, which in turn, leads in general to crime, argument, the fact remains that the world continues to progress, and when we overcome our present difficulties and proceed to profit by the lessons of this experience through which we are now passing, the world will be a better place than ever before.

The work of the scientists proceeds apace, important discoveries which will have a far-reaching effect throughout the years to come are being made, new inventions are developed, and brought to a high state of efficiency, all of which will add to the sum total of human comfort, convenience and prosperity in future years.

Let us take just one example, and it is one in which Canada should be especially interested and from which it will unquestionably largely benefit.

Canada enjoys vast forest wealth. It is one of the richest countries in the world in this respect. For many years the forests of Canada were looked upon as yield ng wealth in only one form, namely, lumber. And even in this crude form billions of wealth were produced. Later, the value of our forests as a source of supply for the making of pulp, out of which paper is manufactured, came to be realized, and inasmuch as there is any great demand, and waterfalls adjacent to many of our great forest areas, Canada in a few short years became one of the largest manufacturers of newsprint paper in the world, and to today the largest exporter of that everyday article of use.

Scientific men kept on working, and now the spruce trees of Canada are not only supply us with lumber, and the resources of the world with paper, but from these same trees comes rayon silk, now manufactured in such quantities that silk hosiery, silk underwear, silk blouses, and many other articles of wearing apparel are worn by the masses of the people, instead of being a luxury only for the rich.

Nowadays when you buy a cigar you find it wrapped up in a little bandage all its own, in a smooth, glossy, transparent, but tough kind of material, which is both moisture and dust proof. Candies, cakes, razor blades, cosmetics, articles of clothing fruits and spices, in a word, almost everything where it is vitally important that the article should be kept clean, fresh and sanitary, comes to you wrapped in this substance, called cellophane.

And cellophane, which has almost over night come int - such general use? It is the old spruce tree in a new form, in fact, cellophane and rayon silk is one and the same thing, the only difference resulting from the methods of manufacture The magazine of Canadian Industries Limited, manufacturers of both rayon and cellophane, explains, as follows:

Basically, cellophane is the same as artificial silk differing from it only in the form it takes when it reaches the casting stage, where cellophane is cast in a sheet while the silk takes the shape of fine threads.

Not only is cellophane light in weight, sanitary in that it is dust proof and moisture proof, but because of its transparency it shows off the goods so wrapped, and thus becomes a sales agent. Tests have demonstrated that articles and products cellophaned-wrapped command a much larger sale than the same articles when not so wrapped.

The use of cellophane is still in its infancy, but Canadian Industries Limited have such faith in it that they have just erected a million and a quarter dollar cellophane plant in the Province of Quebec. Women's hats are now made of braided, colored cellophane as one new use of the article, but what does the future hold? Will heavier, tougher grades ultimately replace glass in our windows? Will it be developed so that we can write on it with indelible inks and thus enable us to preserve for posterity the bills of ordinary paper? Who can tell, but without a doubt it will be used for many purposes at present unknown to us.

Thus does the world progress, even during times when seemingly things are slipping backward. There are always reasons for encouragement and confidence if we take the trouble to look for them. Cellophane is but an illustration, but in itself it means an entirely new industry, putting to more profitable use one of Canada's great natural resources.

Alter Pur St. Patrick

On a high hill within a mile of the spot where St. Patrick handed from fifteen hundred years ago, Ireland is to erect a great open-air altar. The other will cost £50,000. The money is being raised among villages. The first sod was turned on St. Patrick's day during the celebrations of the 1500th centenary.

Mountain Pilgrimage

Yearly Pilgrimage To Shrine Of St. Patrick On Road Coast Of Ireland

Perhaps the most unusual of all pilgrimages is that made annually to the mountain-top shrine of St Patrick on the high bare cone-shaped mountain which bears his name and which overlooks Clew Bay, County Mayo, on the west coast of Ireland.

Additional interest is lent to the pilgrimage this year because the event, as it is held on Sunday, July 31st, will celebrate in honor of the 1500th anniversary of the arrival of St. Patrick in Ireland.

The pilgrimage is made yearly by many Canadians and Americans as many in fact that the Cunard Line for several seasons has devoted a special sailing to this purpose, the ship sailing at Galway, a favorite port from Westward, the starting point for the grueling, rocky climb up the mountain long known to pilgrims. Patrick, whose peak stands 2,510 feet above the level of the sea.

According to tradition it was from this mountain that St. Patrick cast all the serpents from Ireland into the sea, never to return.

The pilgrimage up the side of the holy mountain, where St. Patrick spent the forty days of Lent in penance, fasting and prayer, 1,500 years ago, on Saturday evening any time between six o'clock and midnight, daylight lasting clear up in this time, Yearly people make the ascent in three hours or less, while the older people take much longer, resting frequently during the journey. Torchlights are carried by many to light the way and guard against precipitous falls. Often the crowd breaks into a hymn to make the walking easier or to help them to forget the difficulty of trudging over the stony path. For the climb up the last two hundred yards before reaching the summit the pilgrims remove their shoes and finish the journey barefooted. Many of the more religious make the entire climb without foot protection.

St. Patrick was seventy years old when he first climbed the mountain. Now many a pilgrim of the same age makes the journey, taking a keen pride in this imitation of a part of the rigid Lenten penance of the patron saint of Ireland. There is still a thrill for them in kneeling where St. Patrick knelt fifteen centuries ago.

Not all of those about the pilgrimage is that rarely does any one turn back. Men and women using crutches finish the climb, the maimed, taking five or more hours to make the ascent. Old folks go hand-in-hand, one helping the other. Children, too, are found to start the climb with old shoes to guard against the thousands of pieces of chipped stones, which cover hundreds of acres of the mountain side. These shoes are worn to shreds long before the summit is reached. Yet no one ever fails. Everybody goes on, just as if there was to be no returning back.

By six o'clock in the morning the half-acre summit of the mountain is crowded and so are the slopes, especially the yonderest side, though the chill wind be moving. The masses begin at 6 a.m. and continue to be repeated until late in the evening. Thirty priests celebrate the services in the oratory or little church, that tips the summit of the mountain. A many as ten thousand persons have been in the mountain.

Although the climb up Croagh Patrick is considered the most strenuous pilgrimage in the world, it is generally agreed that the views from the top are so superb that the visitor, as well as the pilgrim, feels that the journey is well worth the effort.

Might Be Murder

The job of being wife to a genius is not all lavender, as witness the rejoinder of a notable victim to a gush ing young thing who gushed:

"I would be a wonderful to be the wife of a genius."

"Well," said the wife, "he's just as darned fool!"

Granular carbon made from coal gives to the telephone its voice. The granules change air pressure waves to electrical waves in the transmitter.

Cultivation of begonias is traced back to 1777, when some of these flowers were introduced into England from Jamaica.

Keep Well with Eno's Help

If you are healthy, take ENO . . . When you are not well, take ENO for in most cases the beginnings of all ailments is in the intestinal tract. ENO'S "Fruit Salt" rids the intestinal tract of all the accumulated poisonous waste matter. Be ENO conscious. Start taking ENO'S "Fruit Salt" to-day

ENO'S FRUIT SALT

Service Is Swift

Efficient Operators In Charge Of London's Overseas Telephone Exchange

London's overseas telephone exchange, which is the terrible confusion of "Tower of Babel" in a modern setting, for here telephone conversations are routed for the United States, Latin America, India, Japan, South Africa Australasia, New Zealand, Europe and ships at sea all hours of the day or night. There are one hundred and fifty girl operators, speaking French, German, Spanish and Italian, in addition to their native tongue, as the calls come through the boards. The service is so swift that it is possible for one in London to speak, within an hour, with persons as far away as Honolulu, Cape Town, Sydney, Buenos Aires, New York or Tokyo.

The Many-Purpose Oil.—Both in the home and stable there are several uses for Dr Thomas' Eclectric Oil. Use it for cuts, bruises, burns scalds, pains of rheumatism and sciatica. Rub more throat and chest. Horses are liable very largely to similar ailments and mishaps so alliet mankind, and equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years

New Industry For Canada

Plant For Production Of Cellophane Operating In Quebec

Canadian materials and Canadian labor are employed in an industry new to Canada at the Canadian Industries cellophane plant which was recently commenced production at Shawinigan Falls, Quebec

Sulphite pulp from Canadian forests form the basic raw material for the manufacture of the transparent wrapping substance now being made for the first time in Canada. Hitherto all the cellophane used in the Dominion has been imported.

The new plant, built by Canadian workmen through Canadian capital and enterprise, is the newest addition in Canada and the latest addition to the industrial life of this little manufacturing town.

The Nine With Asthma, almost

Effective Combination Relieves Most Severe Attacks

longs for death to end his suffering. Asthma abused many years of endless torment with intervals of rest which only themselves fraught with overcoming fear of renewed attacks. Let him turn to Dr J. D. Kellogg's Asthma Remedy and know what complete relief it can give. Let him but use it faithfully and he will find his asthma a thing of the past.

Arctic Islands Preserve

The area of wild life preserves set aside for the benefit of natives by the Government of the Interior, in the North West Territories, Canada, has been extended by taking in all islands in the Canadian jurisdiction north of the districts of Mackenzie and Keewatin, with the exception of a part of Baffin Island. This large area is now known as the Arctic Islands Preserve. It embraces a land area of 680,160 square miles.

Banff Park Set Aside in 1885

Banff National Park in the province of Alberta is the oldest of the Dominion's playgrounds, the original reservation having been set aside in 1885. It comprises an area of 5,732 square miles of territory. Reserved for the enjoyment of all who visit it, it is also a wild life sanctuary, evidence of which is manifest in the large number of mountain sheep, deer, and bear to be seen in the areas adjacent to the highways of the park.

To Meet In Edmburgh

Sixteen Canadian University Women Will Attend Conference

Sixteen Canadian university women will journey to Edinburgh Scotland, for the sixth biennial conference of the International Federation of University Women to be held from July 27 to August 4 it was announced at headquarters of the Canadian Federation of University Women

They are Mrs. Douglas J. Thomson, Regina, Sask president of the Canadian Federation Miss Laits C. Scott, Toronto, convener of the Canadian committee on international relations; Miss Helen F McEwen, Miss W. G. Barnstead, Miss A. W. Patterson, Miss Caroline Boyle, Miss Jessie Dyhes and Miss Bertha Hamilton, all of Toronto, Miss Lois Sutter and Miss Dorothy Tingley, Regina, Sask.; Miss M. Winnifred Kydd and Miss Hazel Murchinson, Montreal, Miss M. L. Bolert, Vancouver; Dr Donalda Dickie, Niagara Falls, Ont., and Miss Cunover, Weston, Ont.

A suitable programme of addresses, group meetings and social engagements has been arranged. The meetings will be presided over by Miss Winnifred Cullis, head of the department of physiology at the London School of Medicine for Women, and president of the International Federation Representatives of 36 national federations are expected to attend.

The International Federation comprises about 50,000 individual members and is pledged to promote international goodwill through study of national and international problems and advancing the opportunities of university women.

Substitute For Human Voice

Instrument Invented By Man Who Lost Speaking Allow Operation

Left speechless as the result of an operation some years ago, Dr. J. B. Bogart of New York, addressed the Annapolis Valley Medical Association through an instrument which provides a substitute for the human voice. He spoke for twenty minutes.

The instrument is a curved tube like appliance, one of which is held against the throat, the other held tightly in the mouth. A small tube leads to a bon held in the hand. It is from the box that the sound issues. He told the association he had invented it because other like vocal cords had been removed in an operation for cancer. Dr. Bogart, who is a native of Nova Scotia, practises surgery in New York.

DR HAMILTON'S PILLS

Story Price in 6th Heart Leaves in Bad Condition

Mr. Paul J. Chan, Thames Valley, N.B., writes: "I have been troubled for about two years with treacherous stomach.

My heart would beat so fast I could hear to do chores when at work elsewhere in the woods. I had always pains in my head when I would lie down at night.

By reading your ads in a local newspaper I was induced to try Milburn's Heart and Nerve Pills. They did me more good than I have been for years."

Price 50c a box

Royal Society Of Canada Records Many Achievements In Fifty Years Of Existence

In the spacious new National Research Building at Ottawa, the Royal Society of Canada recently held its 50th anniversary meeting

Founded upon similar lines to the Royal Society of London, the Canadian society in fifty years of existence has achieved much. As such organizations go, it is one of the oldest, and certainly one of the most distinguished in Canada. Through its parent society at London, it may claim to be the oldest society for the advancement of science in Britian, one of the oldest in Europe, for the Royal Society dates back to 1645, four years prior to the execution of Charles I.

The Marquis of Lorne, in 1882, when Governor-General of Canada, founded the Royal Society in Canada, and looking backward over fifty years, may well view with pride its record of achievement. The society was instrumental in founding the Dominion archives, the National Gallery, the National Museum, the ethnological survey, the geodetic and tidal surveys. And last, but not lastst, the society was in the forefront of the drive for the National Research Council which will shortly be housed in a fully equipped building at Ottawa—built with funds raised in the last years of the King administration.

Briefly, the Royal Society is an association of the foremost chemists, mathematicians, geologists, biologists and other scientists as well as the leading literary men of the country. Its purpose is to stimulate scientific advancement, to encourage literature, to give national recognition to those whose work merits it, to hear papers from its members and, when desirable, publish them in permanent form. The Canadian Society numbers about 250 members.

The society is divided into five sections. There are French and English sections, devoted to literature, History, economics and so on. A third section covers the chemical, geological and biological sciences. A fourth deals with the geological sciences, and a fifth with the biological sciences. Membership is restricted to between 40 and 50 in each section. The first is limited to 40 members, the second 50, the third 50, the fourth sometimes elect three new fellows — nine in all—each year. The society elects executive officers for each of the five sections. The president this year is Sir Robert Falconer, retiring president of Toronto university. The secretary is Fred Burpee, secretary of the International Joint Commission; the treasurer, Dr. G. J. Young, of the Geological Survey. The society is supported by fees of members, but permanent votes a small grant also to help defray cost of publishing the meritorious papers.

The fellows of the royal society in the three prairie provinces are:

Judge L. A. Prudhomme, St. Boniface; President Walter Murray, of Saskatchewan University; Dr. R. H. Oliver, head of the United Church's Theological College; Professor Frank Allen, of Manitoba University; J. W. Dafoe, editor-in-chief of the Free Press; Dr. J. Lang, of Alberta University; Professor R. K. MacClang, of Manitoba University; Professor M. S. Parker, of Saskatchewan University; Professor J. W. Shipley, of Alberta University; Professor Stanley Smith, of Alberta University; Professor T. Thorvaldson, of Saskatchewan University; Professor N. R. Wilson, of Manitoba University; Professor J. A. Allen, of Alberta University; Professor Justin C. DeLory, of Manitoba University; Dr. R. C. Wallace, president of Alberta University; Professor William Boyd, of Manitoba University; Professor A. H. R. Buller, of Manitoba University; Professor A. T. Cameron, of Manitoba University; Professor Francis J. Lewis, of Alberta University; Professor Robert Newton, of Alberta University; and Professor W. P. Thompson, of Saskatchewan University.

"Tell fellow is a thief! He stole my umbrella!"

"Why don't you have him arrested?"

"I can't it; I can't. I stole it from the judge!"

A Museum Of Sound

German Professor Collecting Records Of Voices Of Famous Persons

The modern world has been so busy enjoying the entertainment afforded by such scientific toys as the talkie and the gramophone, that it has perhaps not yet properly appreciated their value as records of the age. Now, however, a "museum of sound" is to be opened in Berlin.

For the past twenty years, the organiser of this museum, Professor Dongen, has been collecting records of the voices of famous personages of all countries Great Britain's representatives include Mr Ramsay MacDonald and Miss Pankhurst, while the former German Kaiser is among the royalty represented.

Much of Professor Dongen's material was collected during the War, when he visited the prison camps collecting records of foreign languages and dialects as he went.

Using Stainless Steel

Items Of Cheese As Accessories To Have Five Girdles

Boating records into nonphabarce has an apt application to Sheffield. With its great iron and steel works Sheffield during the war became one of the greatest arsenals ever organized in Britian Now one of the great steel firms is constructing five girdles of stainless steel to encircle the dome of the Church of the Holy Sepulchre at Jerusalem.

From time to time during the last eight centuries the church has been shaken by earthquakes and there is a great possibility of its final collapse In any building of the dome form here is always an inherent weakness at the base When Christopher Wren built St Paul's he thought he had overcome this difficulty by banding the base of the dome with chains of iron The device served for 200 years but iron is naturally perishable itself but destroys the surrounding stonework Now the dome of St Paul's has been invested with a material stainless steel of which the smiths in the days of the Stuarts knew nothing.

It is curious to recall the great invention of stainless steel following the war years was the outcome of earlier experiments by metallurgists to discover a steel for rifle barrels which would not corrode Truly the links are chained. Messrs. Mappin & Works are now forging with the Holy Sepulchre have some curious associations.

Guide For Public Speakers

Variety Of Places Where Hands Can Be Parked

"I have checked up almost '37 varieties of places for a public speaker to park his hands," writes Dr. John A. Cowan "In his pockets trousers, coat vest, upper pockets lower, rear, behind his back, clasped across tummy, ditto back, wadding handkerchief, and unwadding; clenching knuckles to cool; pressing desk, brushing hair, clapping camouflaged) at fans; full-arm gestures, half-arm, finger, pointing at audience, twisting finger, fingers together split, ood; fumbling paper; pulling down vest; snapping, and when not otherwise employed, with the truth, moving imaginary wool in the air."

One of the first things a person should learn to do is to mind his own business, but it is a sad comment on our educational system, that we are compelled to learn also on human nature that so few acquire this quality.

Fluctuations In Sun Spots Believed To Have Effect On Life And Economic Conditions

Gathering Data For Book On Dominion

Irish Author Amazed At Good Treatment Canada's Women Receive

"Canadian women are far too well treated by their men. They are pampered and spoiled. They would be better off if their husbands and sweethearts paid them less attention." This is the verdict of Lady Rosa Tarrington, a daughter of Erin with the genuine smile and rosee complexion and auburn hair of the true daughter of Ireland, in the course of a tour across Canada gathering material for a book on the Dominion

Daughter of the late Capt William Shapland-Swiney, and a Fleet Street journalist for five years before leaving newspaper work for magazine and publisher assignments, Lady Tarrington stated her opinions of Canadian women in no uncertain terms.

"It's amazing how well your men treat your women," she exclaimed with a smile. "Much too well, really It's too sad for them."

"But they appreciate it, don't they?" "Not as much as they should I have observed all too many instances since my arrival here where the woman takes for granted things her husband does in other countries would not pass over."

"How do Canadian women measure up with their sisters in other particulars?" "Well, they're better dressed for one thing Your Canadian women, particularly, are well groomed their hands and feet are." It is the little things like that that count.

"In the way you Canadians make friendships appeals to me so much," Lady Tarrington continued. "It's made me long all desire to go home And in Canada you seem so eager to help each other I may yet come to live here.

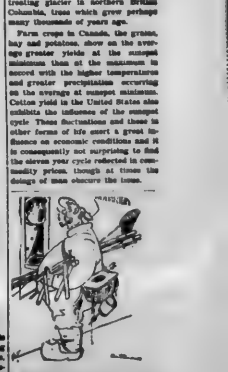
In a race between a horse and a locomotive, in 1830, Tomlinson, driving with the engine and while it struggled along the horse won the race.

Teacher: "Your little girl seems backward in her reading."

Father: "Shucks, ma! I suppose she takes after her mother; she always read the last chapter first."

THE WORLD'S FASTEST AUTOMOBILE RACE

Above are two snapshots of competitors speeding round the Brooklands (England) track during the British Empire Trophy race, the fastest long distance race on record. The top picture shows John Cobb, in his Delage, taking the banking on the last lap. He actually finished first, but was disqualified through driving infinitesimally, and given second place. Below is G. E. T. Eyston, in Thunderbolt, taking the banking with three wheels off the ground. Eyston was given first place with the remarkable average speed for a distance of 500 miles of 138.864 miles per hour.



Optometrist Fisherman (at spectacle): "Now I have the fishing rights here for a year?"—Dr Notenbraker, Amsterdam.

BABY'S OWN SOAP

WORLD HAPPENINGS BRIEFLY TOLD

To economize in League of Nations expenses a measure proposed by Great Britain has been sent to the supervisory committee.

A bill amending and consolidating the fisheries act was put through the committee stage and given third reading in the House of Commons. There was little discussion.

Millers of north and central Italy have promised to use 75 per cent of import grain, south Italy 65 per cent, while in Sardinia and Sicily restrictions have been entirely lifted.

To take possession of a fortune of about $190,000,000, a white-haired Armenian woman, Marianne Djanikian, 80, has gone to India with her two sons.

Hope that 1932 would prove historic in drawing together all citizens of the British Empire was expressed by J. M. Thomas, Dominions Secretary, in an Empire Day address.

Shanghai was completely isolated from the rest of the world as far as mail is concerned, when the indoor postal workers joined the outdoor workers in a strike.

Attempts to find the abandoned Hudson's Bay Company fur ship "Nascopie," and the salvaging of a rich fur cargo believed to be aboard, have been given up by William R. Crisham and Mrs. Edna Christoffersen.

Several thousand feet above the city of Chicago a youth lifted himself in an aeroplane recently, because his means of becoming an aviator had come to naught. He shot himself to death.

In the first case of its kind ever brought in district courts Angus D. Grisham paid $6.35 in county police court at Caledon, Ontario, because he is said to have forgotten to put a stamp on a cheque.

New Kind Of Enamel

Has Inherited All His Father's Troubles In Connection With Business

The new Lord Egmont is a pitiable figure. He needs friends with no one but his father, and now there can be hardly any healthier boy in the world than this 13-year-old earl. He avoids all society, and has a terror of publicity.

He will have all his father's troubles and more, for death duties must again be paid on the Egmont estates. His father was staggered to find the estates reduced in apparent value from £8,000 to £1,500,000, due to death duties and settlements on two younger successors.

Father and son shot rabbits and pheasants on the castle estate and sold them to neighboring villages to help meet expenses. The boy, who never had a mother's influence, had practically no education or experience of the world, and who has been sheltered by the cruel disappointments encountered since reaching England, is left to cope with the problems of a large though impoverished estate.

Elephants have been known to live 200 years.

Skin Loveliness

Easy to Have. Famous Vegetable Pills Better than Creams

Miss E. T. has proved it. She says "Carter's Little Liver Pills will do more to keep the complexion clear than all the face creams I have used."

PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels. Dr. Carter's Little Liver Pills are without equal for correcting Constipation, Acidity, Biliousness, Headaches and Indigestion. Sic., 6 (3c. and 25c., Carter's Little Liver Pills. Ask for Carter's by NAME.

W. N. U. 1944

Canada's Newest Hotel

Latest Addition To Many Hotels Features In Bathrooms

Bathroom is the latest addition to the numerous refined metal products now being produced in Canada. It is obtained as a by-product in copper refining and was produced for the first time in Canada early in 1931 at Copper Cliff, Ontario.

Canada is now in a position to produce asbestos in large quantities but the market for any output is at present restricted, according to Mr. Arthur Bannon of the Dominion Department of Mines, Ottawa. Further researches to develop new uses will undoubtedly create a wider market for this relatively new commercial product.

Selenium is not very abundant in nature, although fairly widely distributed. It is found associated with sulphur compounds and often accompanies the sulphides of heavy metals in the form of selenides. In the electrolytic refining of copper it remains in the slime or residue from which it is afterwards extracted. In its metallic form it is characterized by a unique action toward electricity, which has led to the development of the photo-electric cell or "electric eye."

Selenium finds its present chief market in the glass industry where it is used as a colorizer and for neutralizing other colors, it is also used in the pottery industry for the same purpose. In the manufacture of rubber products it serves as a vulcanizing and accelerating agent, and for some of its compounds properties of increasing the resistance to abrasion of rubber up to as much as eighty per cent. It may have a large potential market in that industry. One of the most important potential uses is in the manufacture of selenium cells for television transmission and reception.

Disastrous Economy

Drowned For Pennies Canoe Whose Overturning Is Blamed

The most advertised manufacturers are often the ones most asked for. Stores which advertise the most get the most consistent and prosperous trade. Their prices are no higher than at the other stores. Often they are lower. The fact for the proper reason that their advertisements bring them a bigger business and, as their sales are therefore far more, they are in a position to be content with a smaller profit on each sale. It was never so important to make sure that we do not become discouraged, and to go ahead with confidence and keep money in circulation. How can we expect to succeed if we cut down on our advertisements which create the demand for the products of industry and thereby create work? This would be a false economy, an economy which would be disastrous.—Le Droit, Ottawa.

Fugitive Spitzbergen

War Office Publishes Over-Limited Name Decided Upon For Special Duty

There must have been more than one case similar to the story told by Mr. Cedric Rhodes before us his recently-published autobiography, of the two British soldiers who, detailed to look after a rifle range at Hawes in 1914, remained there forgotten until the end of the war, when they reported themselves and claimed five years' back pay, stating—both in the Sunday Pictorial, who himself came across one case in a similar position at Dunkerque, the chief town of the Austrian Tyrol, three years after the war had ended. Dining in a hotel there, he was surprised to see at a neighboring table a British captain in uniform. They got into conversation, and he said that he had been sent there in 1918 and was convinced he had been forgotten by the War Office "Why don't you get in touch with London?" asked the stranger. "Why should I?" was his answer. "This is a cheap place in which to live."

Recipes For This Week

By Betty Bentley

COLD COOKIES

2 cups granulated sugar, sifted
1 teaspoon baking powder
½ cup butter or other shorten ng
1 cup sugar
2 eggs, unbeaten.
Half flour once, measure and mix baking powder, salt. Add eggs, unbeaten. Cream sugar and butter until light and fluffy. Add egg yolks, one at a time, beating thoroughly after each one. Add flour. Chill. Roll into balls ¾ inch in diameter Roll some balls in mixture of chopped nuts and cinnamon and remaining ones in fine cocoanut candies. Bake in moderate oven (350 degrees Fahrenheit) about 15 minutes, using lower grating first half of baking period and upper grate during last half. Makes 2½ to 3 dozen cookies.

COCOANUT SOUFFLE

2 tablespoons butter, melted.
2 tablespoons flour.
4 tablespoons sugar.
¾ cup milk.
4 egg yolks, well beaten.
4 egg whites, stiffly beaten.
1 cup cocoanut, southern style, chopped.
Dash of salt.
1 teaspoon vanilla.

Blend butter and flour, add sugar and milk, and cook in double boiler until thick and smooth, stirring constantly. Cool slightly and add egg yolks. Fold into egg whites; then fold in cocoanut, salt, and vanilla. Turn into greased casserole, place in pan of hot water, and bake in moderate oven (375 degrees Fahrenheit) 50 minutes, or until firm. Serve with lemon sauce. Serves 6.

SUNDAY SCHOOL LESSON

JUNE 5

JOSEPH THE WORSTE

Golden Text: "Resist them: a man delighted in his business." he shall stand before kings." Proverbs 22:29.

Lesson: Genesis 39 to 41

Devotional Reading: Luke 10:11-25

Explanations and Comments

Joseph's Work During the Years Of Famine, verses 16-48.

"What a position for a man to attain at thirty years of age! Sold as a slave when seventeen, grand vizier of Egypt when thirty! God took thirteen years to make this man; and this man was the saviour of the nation."

Joseph was Pharaoh's vizier. What that position meant Professor Breasted explains. "The supreme position occupied by Pharaoh meant a very active participation in the affairs of government. He was accustomed every morning to meet the vizier, to confer with him on all the interests of the country and the current business which necessarily came under his eye. The chief treasurer, through the local officials, collected all taxes for the treasury, under the authority of the vizier, to whom he made a report every morning. In the administration of justice the vizier was supreme. He was the motive power behind the organization. In his office we discern the complete centralization of all the governmental in all its functions.

"As grass grew under the feet of Joseph during the seven years of plenty as he went throughout all the land of Egypt travelling from city to city, personally overseeing the construction of grain Royal granaries and to be built and stored with one fifth of the harvest, so marvellously plentiful that they were 'as the sands of the sea.' In the beginning all was carefully registered but at the end Joseph had to 'leave off numbering' for he scribe could not keep up with the work.

"Take no thought for the morrow." Jesus counseled, but he meant take no anxious thought, have such trust in God's help that you will not be over-anxious about what the morrow may bring forth. Anxiety, worry about the future, is unchristian; prudent preparation for the possible, probable, or inevitable, is Christian. "Free-service is very foolish, but forethought is very wise

A Hundred Point Man

Is True To Every Trust and Safe Person To Deal With

"A Hundred Point Man" is one who is true to every trust; who keeps his word; who is loyal to friends and to those who employ him; who does not listen for insults nor look for slights, who carries a civil tongue in his head; who is polite to strangers and to "trash"; who is considerate to his wards employes; moderate in eating and drinking; who is always willing to help others; who is cautious and yet courageous.

Hundred-point men are safe men to deal with, whether they be chauffeurs or men, clerks, cashiers, engineers, teachers or presidents of this and that.

"YES, I AM 40 YEARS OLD!" says Irene Rich

"YES, I am 40 years old. I don't mind admitting it a bit," says Irene Rich, "and I have two grown daughters of whom I am very proud. A man star never worries about their ages, you know.

But, in Hollywood, they guard complexion beauty? Just as so many other Hollywood stars, 9 out of the 10 important ones! *"I have used Lux Toilet Soap regularly for years. And now, "and" am very grateful for it."*

Surely you will want to try this luxury soap. Get a cake today. Across at dealer e-cake French soap for 10c. !

Repair Vessels At Esquimalt

Summer Overhaul Of C.P.R. Pacific Steamers To Be Made In Canada

Summer overhaul of the Canadian Pacific Railway's Empress liners which ply out of Vancouver, will be done at Esquimalt instead of at Hongkong in future, it is announced by Capt. E. Aikman, general superintendent of the Canadian Pacific Steamships, Ltd.

The general overhaul, which takes place every winter, will still be done in the Orient.

The decision, which will bring additional employment for British Columbia workmen, has been reached by agreement with the Dominion Government.

The government has made concessions regarding dock dues and the Canadian Pacific Railway has undertaken to pay the additional costs of labor, which is nearly five times as expensive as that in the Orient.

The new policy will become effective with H.M. Empress of Russia which will go into drydock on July 15. She will be followed in turn by H.M. Empress of Japan, H.M. Empress of Asia and H.M. Empress of Canada.

One Of Canada's Largest Lakes

Great Bear Lake, the fourth largest on the North American Continent, has an area, according to the best information available, of 11,662 square miles. The Topographical Survey Department of the Interior, Ottawa has recently issued a map on the scale of eight miles to an inch including the whole lake.

The city of Bahia, in Brazil, has a 900 foot elevator tower which carries pedestrians from the streets by the bay up to the streets on the hill.

"James, have you a pocket knife?" "Yes, sir."

"Then carve two hearts scarred by an arrow on that tree."—Weave Journal.

WHERE TO SPEND AN ENJOYABLE VACATION

Canada-Pacific

SINCE the annual vacation has become a definite part of modern life, the decision as to where it will be spent is a considerable Importance. Canada has a particular appeal to the vacationist, for it has an unusual variety of attractions, which may be enjoyed at reasonable cost.

For most people, the summer vacation is limited to a few weeks and is usually shortened by the time used in journeying to and from the locality selected. Canada has an extensive system of good roads and excellent railway services, which greatly facilitate travel between provinces.

Canada presents a striking diversity of natural features—the rugged and picturesque Atlantic Coast; the St. Lawrence River and Great Lakes, the world's greatest inland waterway; the Laurentian Mountains, land of forest and stream; the prairies, the majestic Rockies; and the beautiful Pacific Coast. Each of these areas has the unique attractions of scenic beauty and opportunities for enjoyable recreation. Fishing, hunting, camping, canoeing, golf and tennis may all be enjoyed under ideal conditions, while everywhere. Accommodation includes everything from camp site to luxurious hotel. Those to whom economy is a matter of concern may spend a pleasant vacation close to nature, at surprisingly small cost.

The National Development Bureau, Department of the Interior, at Ottawa, has prepared a series of automobile travel maps, showing the main routes from one province to another, also a number of interesting booklets, including "Vacations in Canada," which describe the tourist attractions of each province. These will be sent to any of our readers planning a vacation. Application should state the areas in which they are interested.

FARM MARKETING PROBLEMS TO BE INVESTIGATED

Ottawa, Ont. Agricultural marketing problems will be investigated by a federal commission. This announcement was made in the House of Commons by Hon. Robert Weir, a few minutes before the collapse of an attack led by the only woman in the House, Miss Agnes MacPhail, against the agrarian record of the government.

In one of the smallest divisions of the session, the House turned down, 47 to 17, a non-confidence motion against the government, which criticized it for lack of an active farm policy, and enumerated several proposed remedies, including currency inflation.

Two of the major questions to be considered by the commission will be price spreads and the creation of an export marketing board, said the agricultural minister. The latter will approach the Imperial Economic Conference, the government felt the necessity of approaching other British countries before setting up a marketing board with its attendant labouring system

West More Hopeful

Faring Present Summer With Greater Optimism

Winnipeg, Man. The farmers of western Canada are facing the present summer with cheerfulness and optimism with moisture conditions more favorable than for several years." This was the observation of Grant Hall, senior vice-president of the Canadian Pacific Railway who returned from an inspection tour of the prairies.

"Practically ideal conditions prevail in the northern parts of Alberta and Saskatchewan," Mr. Hall stated. "Present indications are that the drouth areas will show great improvement over last year. Grain has shown good germination and crop prospects in the lower prairie provinces.

"This year's crop probably is the cheapest sown since the war," Mr. Hall declared. "The farmer realized that he must cut his expenses to the bone to make profits. He has replaced much of his mechanical machinery with horses and has worked harder himself.

"The western farmer has the right spirit," Mr. Hall thought. "He is no fool optimist, and he takes nothing for granted. However, he has the confidence to recover quickly from hard knocks and the determination to keep his hand to the plow. He may be termed the he's the backbone of the country."

The Real Reason

Amelia Earhart Wanted To Demonstrate Capability Of Women Pilots

London, England. The real reason Mrs. Amelia Earhart Putnam flew the Atlantic alone was to stop all those nasty things men say about women aeroplane pilots and women automobile drivers.

She herself revealed this while enjoying to the utmost an enthusiastic reception accorded by London to her as the first woman ever to make a solo flight across the Atlantic.

"When there is a traffic jam on Fifth Avenue, men always comment, 'Oh, it's a woman driving.'" Mrs. Putnam said.

"And I have gone up in the air with a mechanic who didn't know the controls from an altimeter, and when I came down I heard people say he did most of the flying

"So I determined to show them Outside of demonstrating that a woman can fly the Atlantic alone, I don't see that I have added anything to the science of aviation or anything else."

Longsby Search Ended

New York Capt. Frits Joubert Duquesne, former Boer rebel, wanted by British authorities for the sinking of a British ship by explosion off the Brazil coast during the war, has been re-arrested. He escaped in 1919. The charge against him is murder.

W. N. U. 1944

Trade Restrictions

All Countries Should Unite in Resistance To Undue Isolation

Vancouver, B.C. People of all countries should unite in resistance to undue isolation and the restriction of international trade, James A Farrell former president of United States Steel Corporation and now a member of its directorate, said in an address to the Vancouver Board of Trade He has just returned from the orient

By resisting further national movements tending toward isolation "trade will not be jeopardized and the standard of living which we have learned to enjoy will not diminish" he said.

"Canada and the United States must look across the Pacific for development.

Across, around and through this area there flow already vast currents of international trade, in the Antipodes, the Far East, the Indies Progress in the means of transportation and communication has lessened the distance between the countries with the result of this area, at the same time it has fostered and expanded their acquaintance with one another Each has gained in the knowledge of the products of each other and consumer demand has resulted.

"This demand is now temporarily suspended by causes beyond the power of the producer and consumer to remove in the most part political. Commerce is not so much suffering from over-production as it is from under-consumption.

"With world trade free of unnecessary restrictions, these potential markets are open to the industrial nations of the world, and the possible rise in living standards and the resulting power of consuming them must be the best cure the present economic ills. Only by the removal of one-half of the world suffering from a surplus of goods will the Canadian Pacific Railway who returned from an inspection tour of the prairies.

"Practically ideal conditions prevail in the northern parts of Alberta and Saskatchewan," Mr. Hall stated. "Present indications are that the drouth areas will show great improvement over last year. Grain has shown good germination and crop prospects in the lower prairie provinces.

"This year's crop probably is the cheapest sown since the war," Mr. Hall declared. "The farmer realized that he must cut his expenses to the bone to make profits. He has replaced much of his mechanical machinery with horses and has worked harder himself.

"The western farmer has the right spirit," Mr. Hall thought. "He is no fool optimist, and he takes nothing for granted. However, he has the confidence to recover quickly from hard knocks and the determination to keep his hand to the plow. He may be termed he's the backbone of the country."

B.C. Vegetables

Expect Sales To Be Doubled With Two Hundred This Year

Victoria, B.C. British Columbia's sales of vegetables to the prairies will be doubled this year, it was anticipated in advices at the Department of Agriculture here.

At Armstrong, four packing houses have installed the most modern machinery for packing and washing their vegetables for prairie shipment. All cars will be government-inspected, and an all-round general improvement in preparation, packing and shipping facilities as well as sales organization is noted.

Radio Commission

Chairman To Receive Salary Of $10,000 Per Year

Ottawa, Ont. The chairman of the Canadian radio broadcasting commission will receive a salary of $10,000 per year, and the two commissioners $8,000 each, according to the provisions of the act respecting radio broadcasting which passed final stages in the House of Commons. The act, based on the report of a special committee on radio, provides the machinery for the nationalization of radio broadcasting in Canada which will be operated under a system of public ownership.

Railway Report Delayed

Ottawa, Ont. The report of the royal commission on transportation will not be completed for several months yet, the Prime Minister told the House of Commons in answer to a question by Mackenzie King. Whether it will be made public before being submitted to parliament was a matter that would still have to be decided, Mr. Bennett added.

Artificial wool can now be manufactured from jute at low cost.

Trade Restrictions

All Countries Should Unite in Resistance To Undue Isolation

Vancouver, B.C. People of all countries should unite in resistance to undue isolation and the restriction of international trade, James A Farrell former president of United States Steel Corporation and now a member of its directorate, said in an address to the Vancouver Board of Trade He has just returned from the orient

By resisting further national movements tending toward isolation "trade will not be jeopardized and the standard of living which we have learned to enjoy will not diminish" he said.

"Canada and the United States must look across the Pacific for development.

Across, around and through this area there flow already vast currents of international trade, in the Antipodes, the Far East, the Indies Progress in the means of transportation and communication has lessened the distance between the countries with the result of this area, at the same time it has fostered and expanded their acquaintance with one another Each has gained in the knowledge of the products of each other and consumer demand has resulted.

"This demand is now temporarily suspended by causes beyond the power of the producer and consumer to remove in the most part political. Commerce is not so much suffering from over-production as it is from under-consumption.

"With world trade free of unnecessary restrictions, these potential markets are open to the industrial nations of the world, and the possible rise in living standards and the resulting power of consuming them must be the best cure the present economic ills. Only by the removal of one-half of the world suffering from a surplus of goods will the Canadian Pacific Railway who returned from an inspection tour of the prairies.

"This is indeed a heavy price to pay for nationalistic desire for self-sufficiency.

"It is apt to be forgotten," he continued, "when viewing the current indications of trade, that the Dominion is perhaps the most rapidly developing market in the world. Even during the decade of the past two years the interchange of goods between the countries bordering on the Pacific has continued to increase in amount, though declining in value. All other trade areas have declined in both volume and value."

B.C. Vegetables

Expect Sales To Be Doubled With Two Hundred This Year

Victoria, B.C. British Columbia's sales of vegetables to the prairies will be doubled this year, it was anticipated in advices at the Department of Agriculture here.

At Armstrong, four packing houses have installed the most modern machinery for packing and washing their vegetables for prairie shipment. All cars will be government-inspected, and an all-round general improvement in preparation, packing and shipping facilities as well as sales organization is noted.

Radio Commission

Chairman To Receive Salary Of $10,000 Per Year

Ottawa, Ont. The chairman of the Canadian radio broadcasting commission will receive a salary of $10,000 per year, and the two commissioners $8,000 each, according to the provisions of the act respecting radio broadcasting which passed final stages in the House of Commons. The act, based on the report of a special committee on radio, provides the machinery for the nationalization of radio broadcasting in Canada which will be operated under a system of public ownership.

Railway Report Delayed

Ottawa, Ont. The report of the royal commission on transportation will not be completed for several months yet, the Prime Minister told the House of Commons in answer to a question by Mackenzie King. Whether it will be made public before being submitted to parliament was a matter that would still have to be decided, Mr. Bennett added.

Artificial wool can now be manufactured from jute at low cost.

WANTED—A THRONE!

Known as the most persistent kingdom hunter on record, Aimee Hilliot Pratts, former Khedive of Egypt has indicated from his exile near Paris France, that he is willing to take on any job in the kingdom line He is 55 years old and he has not job until Great Britain exposed him in 1914. He is negotiating to be named ruler of Syria when the French Government relinquishes it.

To Aid Agriculture

Preference For Western Agricultural Products Is Necessary

Calgary, Alberta Necessity for preference being given western agricultural products through changes to be decided at the Ottawa Imperial Economic Conference at Ottawa in July, was emphasized in a memorandum issued by the Calgary Board of Trade. The memorandum was prepared by the board at the request of the Canadian Chamber of Commerce and will be forwarded to the Dominion executive and Premier J Brownlee of Alberta

Through all discussions at the conference, the Calgary board suggested, the welfare of Canadian agriculture should be the uppermost thought As exports to be considered, the memorandum suggested wheat and other grains, livestock and similar farm products.

Woman Aviator Honored

Mrs. Putnam Receives Congratulations From British Royalty

Washington The U.S. senate passed a bill to authorize President Hoover to award the distinguished flying cross to Amelia Earhart Putnam, for her trans-Atlantic solo flight.

London, England.—The king and queen sent a message of congratulation to Mrs. Amelia Earhart Putnam on her trans-Atlantic flight from Harbor Grace, Nfld., to Ireland.

Miss Earhart said the real reason she crossed the Atlantic alone was to "show the men" women could do things as well as they.

Fight In Prussian Diet

Political Freedom Break Loose and Rough House Ensues

Berlin, Germany Smouldering political passions in the new Prussian diet broke out in hand-to-hand fighting between National Socialists and Communists with a violence unprecedented in the parliamentary history of Germany.

The legislative hall was crowded and at least half a dozen members, including neutrals, were injured. Ingati Jungermann, a leader of the Social Democrats, who took no part in the fray, was carried unconscious to a hospital with one side of his face ripped open.

With fists, inkwells, chair legs and water bottles, the legislators fought their battle to the letter and without police interference General Karl Litzmann, senior member of Adolf Hitler's National Socialist party, having declined the services of the police several days ago.

The trouble started after Hans Kerri, a National Socialist, had been elected president of the diet and Fred Wittmack, a Social Democrat, had been elected first vice-president

Wilhelm Pieck, a Communist deputy, rose to a point of order and at the top of his voice shouted there were murderers on the Nazi benche. The Nazis jumped up and made a mass attack on the Communist members, whom they outnumbered 162 to 57.

Tops were broken off desks, drawers were pulled out and upholstering was ripped. Piles of books, card indexes and fragments of furniture blocked the entrances from the lobbies after the air cleared over the Communist sector where most of the damage was done.

The Communists were forced out of the hall during the battle, at the conclusion of which numerous deputies on each side were lying on the floor, bleeding profusely.

Three Communist deputies, Kraemer, Kuntz, Anigoblke, were seriously hurt.

Thousands Greet Airliner

DO-X Reaches Germany Safely After Trans-Atlantic Journey

Berlin, Germany.—The German flying boat, "DO-X," largest heavier-than-air craft, completed its trans-Atlantic travels with a mad spurt through storm areas over northern Germany, alighting at Munggel Lake, on the outskirts of Berlin, without incident.

Thousands gathered along the wooded lake shores in the southeastern environs of Berlin cheered wildly when the airliner appeared against the evening sky to complete a voyage of approximately 10,000 miles, in which it visited both South and North America, as well as Africa.

The huge seaplane described a circle around the lake and alighted as gracefully as a feather, while roars of greeting came from surrounding motor craft of all descriptions.

DOMINIONS' SECRETARY ATTENDS OLYMPIC TRIALS

The Right Hon. J. H. Thomas, Secretary of State for the Dominions, seems to have picked the winners at the National Cyclists' Union Olympic trials at Herne Hill. Standing beside him are the members of the Derby team, his constituency (left to right): J. Tarpy, F. H. Wyld and P. Wyld. All are considered possible representatives for England in the Olympic Games at Los Angeles this summer.

NO SEVERANCE WITH THE EMPIRE SAYS DE VALERA

Dublin, Irish Free State President Frances de Valera told the Irish Free State senate the object of his government's bill abolishing the parliamentary oath of allegiance to the British Crown was no severance of this country from the British Commonwealth of Nations.

Mr. de Valera, pleading that the senate give the bill consideration on its merits, declared its purpose was to prevent the Anglo-Irish treaty of 1921 from being a fundamental document law, and to put it in its proper place as an international instrument

From a vehement beginning in which he told the Upper House only a threat of war with Great Britain induced the Free State people to accept terms of the treaty, the president got down to an earnest and detailed exposition of what the bill was intended to mean.

Not a seat in the senate was vacant as he began to defend the measure which has already been subject to verbal attacks by senators whose political attitudes are more conservative than those of the Republican administration.

Duty Has Been Raised

New Tariff Affects Strawberries and Tomatoes From Outside Empire

Ottawa, Ont.—In two important tariff bulletins, the Canadian customs when entered from the United States or other countries outside the Empire, shall be three cents a pound above the rates of which Canadian funds.

As the dumping duty is imposed on the difference between the invoice price and the fixed value for duty purposes, the effect will be that the dumping duty will be three cents a pound regardless of the invoice price in regard to strawberries it will be two cents a pound.

The new regulations stay in effect in the case of tomatoes until October 31, and in the case of strawberries until July 31. The regulations for tomatoes from June 1 to Oct. 31 under the general tariff is 2 cents a pound as a minimum and the rule on strawberries from June 1 to July 31 not less than three cents a pound. The dumping duty will be in addition to these rates.

To Visit British Columbia

Party Of British Bowlers Here Will Meet Vancouver Athletes At Coast

Vancouver, B.C.—Interest in the resources and opportunities of British Columbia is responsible for a large and diversified party of British business and professional men which sailed from Liverpool recently on the "Duchess of Bedford," it was learned here today in connection with the visit under the direction of W. A. McAdam, secretary of the London office of the British Columbia Government.

It is a government experiment to make the province better known, and members of the group are coming from all parts of the British Isles, with one from South Africa

Will Be Candidate

Former Premier Lang To Seek Re-Election In New South Wales

Sydney, New South Wales. Undeterred by his dismissal from office about two weeks ago by executive authority of Governor-General Sir Philip Game, former Premier J. T. Lang will seek re-election to the New South Wales House of Assembly in the general elections which take place June 11.

Along with 201 other candidates, Mr Lang was nominated for one of the legislature's 87 seats.

Mr Lang is contesting the constituency of Auburn, which he has represented in the House for 12 years.

New Planet Discovered

Heidelberg, Germany The Heidelberg observatory announces the discovery of a new planet, which it tentatively named "Nineteen Thirty-Two," and which can attain a proximity of seven million kilometers to the earth. (This is approximately 4,200,000 miles).

Great Bear Lake Pitchblende

[illegible] of Radium Now Is Assumed by Treasury

[illegible] of radium was in the Great Bear Lake district was announced in the House of Commons recently. Members of the Progressive group turned to the west as Premier King, though professing to reply to them to the entire world and avoid the enticing Belgian monopoly.

The government is fully aware of the value of the deposits to suffering humanity and Hon T G Murphy, Minister of the Interior. But he added, as to what method will be adopted to secure for Canada the benefit which is justly her due, I am not in a position to say. The matter is actively engaging the attention of the government and we are prepared to take all necessary steps to make radium available to the common[illegible] favors of Canada at the lowest possible prices."

The pitchblende deposits are in the hands of private individuals, promoters of the mineral, and the extent and richness of the district has not been determined. It must be remembered, however, that prospectors had discovered the deposits, and under the laws of Canada they acquired certain rights. "Those rights," he added, "must be respected."

In introducing the question, H. H. Campbell (Pro. Mackenzie) quoted the Ontario cancer commission as reporting the radium supply of Canada to be totally inadequate. World production stood the $70,000 a gram but it had been estimated the Canadian field could be worked at a profit at $6,500 a gram.

Canada owes it as a moral duty not only to our own people but to suffering humanity throughout the world to prevent these valuable resources falling into private hands," said Mr. Campbell, "or at all events to see that if they do fall into private hands, they be properly controlled by the government.

William Irvine, United Farmer member for Wetaskiwin, remarked that a few pounds of radium would pay off Canada's national debt.

Back To the Land

C.P.R. Land Colonel To Retrace On Many Trails

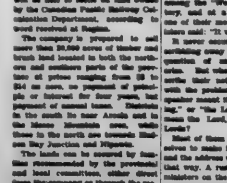
Participants in the "back to the land scheme" of unemployed families will be able to settle on land owned by the Canadian Pacific Railway Colonization Department, according to word received at Regina.

The company is prepared to sell more than 20,000 acres of timber and brush land located in both the northern and southern parts of the province at prices ranging from $3 to $24 an acre, on payment of principle or interest for four years, but the settlement must be located in the south in near Arcola and in the Moose Mountain area, while those in the north are towards Shellbrook, Jerrichon and Nipawin.

The lands can be secured by farmers recommended by the provincial land commissioner either direct from the company or through the machinery provided by the government and commissioners under the land settlement scheme.

German scientists have succeeded in drawing electric currents of more than 10,000,000 volts from clouds covering over their plant during a thunderstorm. The laboratory is located in the Swiss Mountains.

Switzerland imported $1,000,000 worth of coffee substitutes last year.



"Three Louis XV. chairs are valued highly, above one more Louis XVI." — D. Thomas, Sussex.

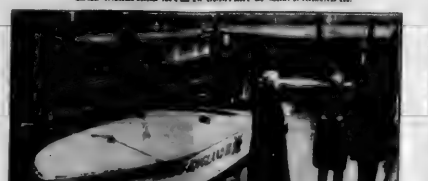
LORD WAKEFIELD ACCEPTS DELIVERY OF MISS ENGLAND III.



The new wonder speedboat, Miss England III, is shown during the ceremony of being delivered to her owner, Lord Wakefield, at Hampton-on-Thame. Kaye Don, the famous British speedboat driver, will attempt to break the existing world's record of 111 miles an hour sometime this month. Lord Wakefield can be seen reading a short address during the ceremony while Kaye Don listens but [illegible] Simms.

The Mighty Apostrophe

Placing Of It Makes Vast Difference In Meaning Of Word

There seems to be lack of understanding as to whether the second Sunday in May is "Mother's Day," or "Mothers' Day." Advertising matter had it both ways, and newspapers do not seem to agree on the point. It doesn't matter much anyway.

The rightful placing of comma, full stop and apostrophe sometimes have tremendous results, and there was a time when the good people of the Free Kirk of Scotland were pinched to a tune all over the use of an apostrophe.

It was shortly after the objecting element of the Free Church of Scotland, better known as the "Wee Frees," having refused to join with the United Presbyterian Church of Scotland to form the United Free Church, took legal steps to obtain a decision of the entire property of the original Free Church. The Scottish Court of Session decided against the Wee Frees, and appeal to the House of Lords, which reversed the judgment and decided that the "Wee Frees" were entitled to keep, for themselves, one entitled to church funds and property worth $160,000,000.

There was much rejoicing among the "Wee Frees" at this victory, and at a celebration meeting many of their most distinguished orators said: "It was the Lords doing."

It never occurred to the reporters attending many for days into that the word "Lords" should have had an apostrophe after the "s" and that, therefore, they were crediting their action to the Lord instead of to the Lords of Session.

The blunder was discovered by the same man responsible for the prevention of the Lord's Day Alliance offices from the company or through the machinery provided by the government and commissioners under the land settlement scheme.

Empire Tribunal

For Settlement Of Disputes Between Member Units Of Empire

Call of establishment of a tribunal for settlement of justiciable and non-political disputes between member units of the British Commonwealth of Nations, was sounded by Prof. R. A. MacKay, of Dalhousie University, before the Canadian Political Science Association at Toronto.

Another speaker, Hon. N. W. Rowell, K.C., recognized authority on constitutional matters, took issue with Professor MacKay's view that establishment of such a permanent empire tribunal was hindered by lack of sufficient precedent, as suggested by the Dominion.

Prof. MacKay contended that under the [illegible] of international law the Dominions did not have separate sovereign entities as between themselves, though they might be conceded such a status as between one of them and a foreign country outside the Empire. Under existing conditions, he said, Canada could halt Germany before the United States could declare war, or refuse to settle a dispute, but in a controversy with Ireland or Australia would be driven to appeal to the "ultimate authority" of the privy council, or indefinitely defied powers of an organized state.

Mr. Rowell argued that various inter-Empire conferences and the statute of Westminster had demonstrated the power of the crown over the Empire and could be delegated to ministerial members of the British Commonwealth.

Farmer: "Hey I marry your daughter?"

Miss Fisher: "What is your occupation?"

Farmer: "I'm an editor."

Miss Fisher (naughty): "Then get out before the fun lights."

The Red Cross band of Luton, England, has been dressed by the British war office to change its name to Queen, under the Queen convention, the words "Red Cross" are restricted to army medical services.

On the Road Back

Some Signs Which Prove Things Starting To Improve

Though a few pessimists and debunkers insist that things aren't getting better, the weight of evidence against them becomes daily stronger. This week-end, for example, the Dominion Bureau of Statistics was able to show that manufacturing in Canada was at a higher level in March than in any of the preceding six months And the Bureau was able to show, also, that retail sales are on the increase.

These things simply must mean something. We can't be having more manufacturing, and better retail business, and more car loadings, and more deposits in savings banks, plus more of some other things, without improvement. If the factories are turning out more products, and the merchants are doing a little more business, and the railways are moving more freight, then business must be better, and a lot of people will be getting the benefit.

Depression can't exist on psychology alone.—Ottawa Journal.

Known Was Original

Farmer Spended To Keep Pigs From Leaving Weight

Warren Axtell, Ohio farmer, was spending to keep his pigs from losing weight he told Traffic Judge Joseph Sabath, when he was fined $10 and costs.

"If I hadn't reached Cleveland contraband before they closed," he said, "the pigs would have lost a pound each day and my pigs would shrink in weight overnight."

Now he's wondering if the shrinkage would have amounted to more than his $10 fine.

Taxpayers of Great Torrington, England, are being exhorted by the town crier to pay up so that the borough may meet a debt due to the country.

Civil Service Act

Private Secretaries Of Cabinet Ministers Will Be Absorbed Into Service

[illegible] secretaries to cabinet ministers who are not their personal employees will be absorbed in the civil service provided they have served three years with a minister. The Civil Service Act, as at present stood, did enabling a secretary to obtain a position in the service in a class not lower than clerk at any time after [illegible]

The question of absorbing private [illegible] was raised last session and [illegible] Mackenzie King, [illegible] Minister of the Interior, undertook to [illegible] the matter. It was found that it is useful for private secretaries who have never passed a competitive examination to be placed over the heads of old employees in the departments thereby preventing them from being promoted.

The question was considered by the civil service committee of the House. It was decided to recommend that the practice of absorbing private secretaries into the service without an examination be discontinued. When Hon. Mackenzie King came before the House of Commons on Friday, he raised a storm of protest. It came up when the bill to implement the recommendations of the committee was before the House.

Members on both sides of the chamber seemed agreed on the principle that a permanent service was entitled to a security of his own claims in view of the confidential relations that many secretaries enjoyed. For this reason there must be many dismissals of private secretaries and the Government, by their amendments supporting the secretaries was that it would be unfair to put them out of their offices when a government changed.

Not Looking For War

Madame Of Europe Are No More Aggressive

William Hard, of New York, political commentator, who is now broadcasting Company, returned from Italy on the "Rome." He was present at the disarmament conferences in Geneva and said the present conference means the high mark has been reached in prevention and henceforth there will be reductions.

"There is no prospect of a war in Europe," he said. "Instead we find a formidable situation, where everyone then anticipates invasion, with no one ready to invade. Everywhere there is talk of peace. No one is looking for war. Everywhere there is fear but no disposition to fight. Everywhere there is fear but no disposition to fight. Everywhere there is fear but no disposition to fight

The Greatest Legacy
of the Canadian people to the next generation
...is life insurance
When the Sun Life began business in 1871 life insurance in Canada was $13 per capita.
TODAY it is $635 per capita. With one exception, Canadians are now the highest insured people in the world.
The Sun Life has played a leading part in fostering this thrift in the Canadian people and in protecting Canadian homes.
The rapid growth of the Sun Life is shown in the following table:
ASSURANCE IN FORCE
1871 $ 5,000,000
1881 $ 24,000,000
1891 $ 70,000,000
1901 $ 168,000,000
1911 $ 344,000,000
1921 $ 988,000,000
1931 $2,021,277,000

LETTER TO THE EDITOR

To the Editor, Fort Record.

Dear Sir:—

In it not a pity, when England and the United States are both trying hard to get rid of the nuisance and hideousness of signs, and especially tobacco advertisements, that the Fort should allow the thin end of a wedge of such inartistic display, at both ends of the town. Perhaps protest is no use, but surely a protest should be made.

Yours Truly,
A Townsman.

VOL. 11 [illegible] FORT SASKATCHEWAN, ALBERTA WEDNESDAY, JUNE 8th, 1932 $2.00 PER YEAR IN ADVANCE

School Board Held Regular Meeting on Monday

The Minutes of a regular meeting of the Fort Saskatchewan School Board was held in the Council Chamber on Monday, June 6th.

Present:— Mr. F. Atkinson, Chairman, Trustees:—R. Todd, R. A. Brown, and Dr. Grunert.

The minutes of the last meeting were read and adopted on the motion of Mr. Brown.

It was decided to consider Mr. R. Todd's motion regarding High School pupils at a later meeting.

Letter from Alma Wright re piano class work was read and filed.

Letter received from the Department of Education re examinations. It was moved by Mr. Brown and adopted, that the Secretary be appointed to hand out Departmental examination papers as directed by the Department.

Two applications for teachers positions, should there be any vacancies, were read and filed.

The question of the expiration of the teachers' contracts was taken up by the Board. It was moved by Mr. Brown that teachers be notified that their contract expires on the 30th, instant; That if they desire to remain at the same salary, they will notify the Secretary-treasurer, and sign contracts, before the 15th. Instant. An amendment was made to this motion by Mr. Todd—that Miss West's salary be increased to $1000. per annum. Mr. Todd was the only supporter of the amendment, and the motion of Mr. Brown was declared carried.

It was moved by Mr. Todd and adopted that any non-residents who wish to send their children to the Fort Saskatchewan School shall make application on forms to be secured from the Secretary, before the 17th. of August. That fees for such term must be paid in advance. The Secretary was authorized to have 100 application forms printed.

The Chairman and Secretary were delegated to arrange with the caretaker for the cleaning of the school during the holidays.

The Secretary was instructed to purchase $2.00 worth of cheese cloth, and the necessary oil for the floors.

Mr. Anderson, the Principal was present, and submitted attendance reports for May, and submitted particulars concerning the School to the Board.

The Secretary was instructed to send an account to Pleasant View School District for certain pupils attending high school.

The following accounts were passed for payment on the motion of Mr. Brown:—F. W. Smith $6.35; J. T. Lalonde $6.85, A. M. Carscadden $3.75, F. Etherton 30c, Calgary Power Co., $2.16, L. O'Brien $6.80 for wood.

The following is to be paid from the Casket fund:—A. M. Carscadden 15c, F. W. Smith $1.00, L. D. Van Ilfland $2.25.

The meeting adjourned on the motion of Mr. Todd.

B. C. TO SHIP SMALL FRUITS TO EASTERN CANADA

The formation of an export organization to take advantage of the British Preference of 25 percent offered Empire Berry Pulp imports processed in sulphur dioxide, by British Columbia berry growers, seems imminent. The present plans of the promoters call for the production of between 500 and 1,000 tons of the fruit pulp this year, and it is expected that markets will be secured in Eastern Canada as well as in Great Britain.

Strawberries, raspberries, loganz, apricots, plums, blackberries and other kinds of small fruits, all of which are grown in profusion in British Columbia, can be successfully preserved by the sulphur dioxide process, which not only retains the essential qualities of colour of the fruit, but preserves it over a long period.

Read the advertisements and take advantage of the bargains offered by the different merchants.

The Josephburg and Pleasant View baseball teams tangled in a game on the Josephburg grounds on Monday night. The former team winning by a close score of 9-8.

SET TRUCK SPEED ON ALBERTA ROADS AT 25 MILES PER HOUR

Fixing a maximum road speed of 25 miles per hour in any part of the province, new regulations affecting all motor truck drivers and carriers have been issued by the Department of public works. These constitute an amendment to the public highways act, 1929, and take effect immediately.

The new regulations are as follows:

1. No truck shall travel at more than 25 miles per hour on any Alberta road.

2. The maximum gross weight of any truck having two axles shall not exceed 24,000 pounds, and the maximum load to be carried on any one axle shall not exceed 16,000 pounds.

3. The gross weight of a truck and trailer, or semi-trailer, must not exceed 36,000, the load per axle remaining at 16,000 pounds.

4. The width of any truck must not exceed 96 inches, or eight feet, and the length of a truck or unit must not be more than 33 feet with trailer, and 50 feet for combination of truck and trailer.

5. No truck having a flange, rib clamp or other device attached which will injure the road, shall be operated on Alberta highways with out a special permit in accordance with special provisions.

6. Any vehicle or any other object or contrivance is operated or moved in contravention to these regulations, the report continues, the owner and person operating them shall be liable upon summary conviction to a penalty of not more than $50 and costs, and not less than $10 and costs.

COMING EVENTS

The regular monthly meeting of the Fort Saskatchewan Women's Institute will be held on Thursday, June 9th, at the home of Mrs. Rogers.

This meeting will take the form of a bridge party.

Everybody welcome.

The Ladies aid of United Church will hold a tea on Wednesday, June 15th, at the home of Mrs. O. S. Jones from 3 till 6 o'clock.

When, with the help of the store ads, women are able to buy wearables and household things at the right time, the right place, at real savings, the puzzle of "how to manage on too little" does not baffle them so much.

Fort Tennis Club Defeated In Tournament Games

The Fort Saskatchewan Community Clubs suffered defeat at the hands of the Highlands Tennis Club on the intermediate class B. tournament held here on Thursday evening and again at the Highlands Club on Sunday afternoon.

The Fort Club was the only outside club to enter and was drawn against Highlands Tennis Club, Edmonton.

The tournament, consisted of nine events, four to be played down here and the same were at Edmonton.

On Thursday after considerable rain had fallen four matches were run off, two on the Provincial Gaol courts through the kind permission of Mr. J. D. McLean, the other two on the Fort Community Club's courts.

However out of the four events played that evening, Mary Daley was the only one to win her match.

After the games the visitors and club members went to the home of Mrs. F. Murray's where the ladies had prepared a tasty luncheon.

The second part of the tournament was supposed to have played off on Friday night, but due to a heavy shower of rain in the late part of the afternoon the games were postponed until Sunday.

Sunday afternoon turned out fine and the games were run off with the local club losing every event, but the winners had to work for everything they won.

After the games the Highland Club served refreshments to the players and the large crowd of tennis fans who motored up to Edmonton to see the games.

WHEAT BONUS EXTENSION IS THOUGHT MADE

While no official announcement was made, it is understood that cabinet today passed an order-in-council extending the date of expiration of the five-cent-a-bushel bonus on wheat from June 15 to June 30. It has already been intimated that the extension would be made. Formal announcement will, it is understood, follow approval of the order-in-council.

Meeting in Connection With Parry Sound Colony Picnic Called

A meeting of all interested in the Parry Sound Picnic will be held in the Town Hall, Fort Saskatchewan, on Wednesday the 15th of June at 8 p.m. The Picnic is in commemoration of the arrival, forty years ago in the Edmonton District, of a colony of settlers from Parry Sound in Northern Ontario, and will be held at Elk Island National Park on the afternoon of July the 6th. The Hon. Frank Oliver has signified his intention to be present and address the gathering, and other distinguished gentlemen are expected, full particulars of which will be published later.

A Message From The Prince

In January of this year, the Prince of Wales addressed a message to the youth of Great Britain at a large meeting held in the Royal Albert Hall, London, England. That message is just as applicable to the youth of Canada as it is to the youth of the Old Land, and we, therefore, reproduce the speech, in part, as follows:

Youth cannot long remain a spectator of life. It will only be a short time before the work of the world will be placed on your shoulders to carry through to the finish. What kind of a job you make of it depends, of course, upon the way you prepare yourselves for your task. Knowledge must be acquired, natural resources to be developed, skill has to be conquered, and strength to be applied. With these high aspects before you, you will realize that the mere acquisition of material things for the benefit of the individual or of a national purpose, and is so little, compared with the satisfaction derived from your own effort, especially when that effort influences human welfare and happiness.

I want you to understand that even we are not just facing a few months of "grin and bear it," but that we must get into training for a long period of work based upon and effort, sustained despite possible disappointments. Nothing must be prepared, no efforts have been broken, be called "for the duration," without asking how much way in the long run be required of you.

You cannot hope to influence directly the trend of international affairs, but since at hand is a domestic problem, vast and baffling if looked at in the mass, though easier to help when broken up into individual pieces. It is made up of men and women, boys and girls. I am, no you will have guessed, thinking of unemployment. I am thinking how saddest in these years of recession and of politics but of each member of the unemployed population as a single, separate personality, beset by depression, labouring under a sense of frustration and futility: a blank void in front of him which he can see nothing either clear over nor somehow round. My appeal here is not to statesmen, nor even to philanthropists, but to all those who are in work to play the part of neighbour and friend to the man out of work. That is the open road of duty and a short cut to happiness all round. There is an enlarged machinery here in London that can provide a substitute for the good neighbour.

The enemy today is depression and apathy. Let us attack them with two of our old-fashioned of characteristics—good sense and good humour!" I believe there are groups of the unemployed here and there, dead sick of prolonged idleness, who are themselves feeling out tentard ways of giving their unhired labour in co-operative effort for the help of others in need. It is up to us to back such attempts with every possible support. Get together wherever this burden lies heaviest, face up to the most urgent local need, and see if the community on the spot cannot make its own self-directed contribution toward that vast problem. So far as is humanly possible let us break it up into little pieces and refuse to be browbeaten into paralysis by its size. I am talking, I repeat, neither on the economic nor on the political plane, but on the humane plane of simple friendship in those places where the clouds are darkest, where the pits are closed or the furnaces damped down. What matter if some trifling blunder is committed here or some project fails there. The very attempt of the community to achieve some real betterment for the sake of the workless in their midst will lift the general level of hope and banish certain every national solution by lessening men and comrade.

The world passed into a new age with the end of the Great War. Never was a new age born in greater agony, nor in a more difficult environment for healthy and normal growth. What we make of it as a democracy is of vital moment not only to ourselves but to the whole world.

The message that I have tried to give you in a twofold one: —First, for a fresh response to national service, for a greater spirit of sacrifice and adventurous helpfulness in the midst of problems which our fathers seem find difficult to unravel.

The second point is that the opportunity for service is at our door—in our own village, in our own town.

Canadian Tobacco Exports

Dominion Largest Exporter In Empire Of Tobacco To Great Britain

Canada in the first four months of 1932 has definitely established herself as the largest exporter among countries of the Empire of unmanufactured tobacco to Great Britain.

From January to April, a report of the Dominion Bureau of Statistics shows, Canada exported 6,882,315 pounds of tobacco compared with 3,-000,702 pounds for the same period of 1930. The total imports into Great Britain aggregated 64,336,621 pounds for the four months, with British Empire countries supplying 30,070,888 pounds.

The man who becomes a critic by trade seems in reality to be one of us.

Animal diseases cost farmers of England $100,000,000 last year.

Will Use Bay Route

Toronto Transit Grain Firm Will Ship Shipment Of Wheat

Dreyfus, Sumner Transit grain firm, has purchased a quarter of a million bushels of wheat in western Canada, that will be shipped this season over the Hudson Bay route to France. It was definitely learned from official sources. Through a New York agency the French firm has completed the purchase of the grain and gave the first sign of completion between Imperial and Regina over the use of the new Bay route in shipping grain to European ports. Already nearly two million bushels have been shipped to Churchill for the Continental Grain Company. This group will export at least one million bushels this summer. Hudson Bay route is a cinch," he declared in an interview.

"We figure that under the insurance rates will be cut this summer, and we expect the people of western Canada to support the new project in the matter of obtaining incoming cargoes," he said.

Trains On Rubber Tires

Forerunner Of a New Era In Rail Travel

The pneumatic-tired railroad coach which made a trial trip from Cleveland to Akron and return this week-end may prove a forerunner of a new era in rail comfort. Trunk lines are spending up their schedules. Passengers are getting weary from stereotyped interiors. The pounding of steel wheels on steel rails may ultimately be outlawed as useless.

Railroads in general have been slow to adopt anything and often have their competitors advantages in the race for business. Be the reasons what they may, and many of them are obvious enough—rail has been suffered by the motor industry's avid improvement in comfort and in such things as rubber tires, lighter engines, less rigid schedules, better coach construction and other factors. A similar public attitude toward the use of highways as part of the story.

Silence of steamer and particularly silent-motored gasoline, and a large part in a transportation evolution. If railroads can make use of them, as recent experimentation indicates they hope to, some check may be put on the trek of passengers from rail to highways. Cleveland Plain Dealer.

Possibility Of Oil In Northern Alberta

Geologists Believe Ancient Rock Formations Are An Indication

Rock formations in the northern portion of Alberta are considered indicative of oil in commercial quantities. This opinion was expressed at Ottawa by the Royal Society of Canada when a number of geologists describing the districts of Mountain Park, Peace River, Wainwright and Viking, as containing marine sediments. This would indicate, they say, that the district once formed a part of the vast ocean covered what now forms the three prairie provinces. The rocky formations are about 150,000,000 years old.

Miller's Worm Powders are considered a thorough remedy. They not only drive worms from the system, but repair the damage that worms cause and so invigorate the constitution that it speedily recovers from the disorder of the digestion that are the result of the work of these parasitic intruders. They do their work thoroughly and strength and soundness follow their use.

Big Cheese Tested

A "Big Cheese" invented by a German engineer, Dr. Mendelsohn, has been successfully tested over Berlin. It projects moving pictures on the clouds.

Both ends of a long-term conversation can be recorded with a new machine for future reference.

A safe and sure medicine for a child troubled with worms is Miller's Canary Worm Exterminator.

Heroes A Complete Wreck Set Up Still The Right

Mrs. John Hess, Rush Lake, Sask., writes:—"I was troubled so much with my nerves I was a complete wreck.

I could not do my work, and would have to sit up half the night instead of not being able to sleep.

One day a friend recommended Milburn's Heart and Nerve Pills. I tried one box and got relief, and by the time I had taken six boxes I was as well as ever.

Price 50c a box

Contract Bridge

By Sandra B. Hirsch, Cheverolle Club, Toronto

Systems In Contract

The average contract bridge player, at the present time is agog with the controversy raging around the different systems of playing. There are four principal systems now being exported by their different sponsors in order of importance they are as follows:—

1st. The Approach-Forcing System (Sponsored by Culbertson).

2nd. The Official System (Sponsored by Lone et Al.

3rd. The One Over One (Sponsored by Geo Reith and The Kansas teacher Whist Club)

4th. The Vanderbilt Club (Sponsored by Harold Vanderbilt).

A system in contract may be defined as an attempt to put into a form easy to learn, the methods the good card player have always used. This being so, it is certain that, as most card players use the same methods with slight variations, any system can differ from any other system only slightly. And this is so. The exception to all four systems are rigid the good contract player is on a rule, familiar with all the systems, and, if asked to do so, play any system his partner desires to play.

1st. The Approach-Forcing System.

The salient points of the Approach Forcing System are as follows:

(a) The opening bid of one club must have a minimum of 2½ honor tricks for playing tricks, and may have a maximum of six honor tricks and seven or eight playing tricks.

2nd. The weak no trump takeout by the partner of the original bidder. This is made on a maximum of one and one-half honor tricks and a minimum of one honor trick, or in exceptional cases of less than one honor trick. The takeout denies normal support in suit originally bid and is distributional in character. In that particular deal, the partnership must be satisfied with partial score. Further it declares the fact that an original bid of one club based in the manner i.e., contains no void suit or singleton.

3rd. The Jump-Shift Response. This is a jump bid in a suit other than the suit originally bid and is a demand bid requiring the partnership to keep the bidding open until the contract is arrived at. It is made by the responding hand usually on a minimum of two and one-half honor tricks, or sometimes less when the hand distributional in character.

4th. The Original Two Bid. Based on a 2 and one-half honor trick and a minimum and demands that bidding be kept open by partnership until game contract is arrived at. This tendency lately, by users of this system, is to limit the two bid to hands which will make game with even less than one honor trick in partner's hand.

5th. The Jump Overcall. A jump bid made by opponents of original bidder and is a strong invitation to partner of the overcaller to keep the bidding open provided partner has the requirements of one honor trick. If however the overcaller's partner has less than one honor trick he may pass.

6th. The Informative Double. A bid made as an overcall and demands a response from partner of denoter provided there is no intervening bid. It is usually made with strength in the major suits and is a lightening of the load bid. With the balance of strength in the hand of the doubler's partner, game is likely in the hand.

7th. The Overcall by the opponents of the suit bid originally by two of the same suit. If the opening bid is a heart the opponents overcall with two hearts, such an overcall means control of the heart suit i.e. either a void in hearts, the ace-ten ace, the ace small, or the ace king or ace queen. This bid is the most powerful bid in the approach forcing system, is used definitely as a sign signal and practically guarantees game in any four card suit that the partner of the overcaller has.

The synopsis given above contains practically all the salient features of the Approach-Forcing System. Generally it may be said that in this system whenever there is a four card biddable suit in the hand, this suit is bid in preference to no-trumps. A biddable four card suit may be defined as one which contains two high honors, one of which must be the ace or king, and the other queen or jack. The no trump opening bid is made only when the hand contains two and one-half honor tricks, no four card biddable suit, and has a balanced pattern.

In the next article the main features of the other systems will be outlined.

Precious Balm

Precious Balm is a sheer delight to use. Cools and relieves irritations caused by weather conditions. Imparts a rare charm and beauty to the complexion. Fragrant and velvety smooth. Never leaves a shadow of stickiness. Swiftly absorbed by the tissues and stimulates the skin. Precious Balm is the peerless toilet requisite. Every woman will appreciate the subtly distinctive charm achieved by the use of this magical potion.

DEFINITE HELP FOR DWELLERS IN APARTMENTS

Odorless way found to cook fish, cauliflower and cabbage

CANAPAR IS A PRODUCT OF HAMILTON FIRM

Lives there a woman who cannot cook fish, cabbage, or boiled onions without filling the whole house with odors? Even other people in the house who cooked them bemoaned regardless!

Canapar entirely does away with this nuisance. More than this, it actually improves flavor and food value. Cooking in Canapar parchment the famous French method of steaming and conserving food and its flavours to the closed casserole. Canapar comes in large sheets, in a handy size package. When baking vegetables you need not put the food in water and make a big mess for a pudding bag. If you are housewife, you will find your manner with Canapar, arrange food and seasonings, and bake! Simply put it in Canapar to prevent steam from dropping back.

Boiled or steamed fish is particularly delicious done this way. Put fish right in the kitchen, no greasy hands to clean. When roasting meat, it has the pan with it. Canapar prevents the fats and juices from burning, and eliminates smearing of the pan afterwards.

Canapar saves fuel. You can cook three vegetables simultaneously in the same saucepan with it, without intermingling of flavors. And it is very economical. Just rinse the sheet after using it, hang it on the towel rack to dry. Use it over and over.

Lots of women use Canapar for a dish cloth. It's made of cellulose and fabric and does not spread fat. It is a pattern dark brown in color and has been put on the market after testing the load during the long period. Canapar is made by the makers of PARASAN the famous heavy waxed paper in the Green box.

Hospital Offer

Most grocers, druggists and department stores sell Canapar. If yours doesn't, send the coupon direct and we'll give you a new and improved Canapar Cookbook containing one hundred recipes as a bonus for your trouble.

Applied Paper Products, Ltd., Hamilton.

Enclosed find 25c for which please send me one full-size package of CANAPAR Cooking Parchment and your 100 recipes for "Left-overs."

DR HAMILTON'S PILLS

Scientists At Ottawa Suggest That There Be Two Major Divisions Of Geological Time

Standard time consisting of eons, eras, suberas and periods is the aim of the national committee on stratigraphical nomenclature, Dr. F. J. Alcock, of the geological survey of Canada, chairman, told Section 4 of the Royal Society of Canada meeting at Ottawa.

It is the opinion of the committee that geological time previous to the development and consequent rise on the earth's surface is at least as great as geological time from that development until the present moment. The suggestion is that, therefore, there should be two major divisions, and that since is eozoic or "dawn-

Seven hundred million years was the estimate of some members of the section of the length of the latter eon, and they thought the former to be much longer. Granite rocks in Manitoba have been stated to have an age of 2,000,000,000 years.

At the same session a paper by Prof J S Dobny, of the University of Manitoba, speculated on the earth's development and composition. The belief expressed was that the centre of the earth consists of heavy, dense metallic substance. Its crust mainly consisted of lighter rocks and that in between lies the great zone of flowage and adjustment. The earth, Prof Dobny stated, is losing heat to exceptionally large amounts from certain more or less restricted belts of the earth's surface. Once, millions of years ago, the escape of heat in this way occurred in Canada. Now, it is chiefly in the vicinity of the Hawaiian Islands in the Pacific Ocean. Supporting his thesis, Prof. Dobny reported that the temperature rises one degree every 600 feet down in the Frood mine of Northern Ontario. In Hawaii the temperature rises one degree in every 50 feet.

How aerial photography has achieved results for geologists which on food they were in years years in securing was shown by D. A. Nichols of the geological survey, who exhibited an unusual series of photographs taken by the Royal Canadian Air Force. In these pictures, taken chiefly in the Lake of the Great Bear and Great Slave Lake and Arctic areas of Canada, land forms such as fault, dykes, folds, floods, eskers and beaches (formed years ago) were clearly defined and some were shown to extend for many miles. Some of these were recognized from detailed items given by members of the geological survey as many as 40 years ago.

Further light, of value to miners and prospectors, of British Columbia, was thrown on the body of granite rocks known as the Coast Batholith, which extends 1,300 miles from a point near the international boundary northward and westward into Alaska. The survey work of the geological survey, which began in this area at the time of the Alaska boundary award, has provided additional information year by year. Once it was thought the possibilities of finding valuable ore deposits were as good in part of the area as another. The geological survey is indicating where the prospects are good and where they are not. Detailed studies, for instance, have shown that mineral deposits occur associated with certain types of rock and the mapping of these areas provides valuable guides.

Authors of papers given were Dr. Forrest Kerr, of the geological survey; Dr. S. J. Schofield, of the University of British Columbia, and Dr. H. C. Cumming, also of the geological survey.

Lessons For Street Singers

Paris is demanding that street singers be placed under control, for they are becoming too numerous and too noisy. It is proposed to have them licensed, and to permit them to sing only at certain hours and only in districts specified by the police.

"Did that suit really cost $6?"

"Yes, I can show you 15 demands for payment."—Kasper, Stockholm.

W. N. U. 1945

Lessons By Radio

Use Of Broadcasting To Further Education In the West

The use of radio broadcasting to extend the benefits of university training was urged upon the 134th National Convention of University Extension at Ottawa by Professor E. A. Corbett, director of extra mural relations at the University of Alberta, and conductor of the university's radio station, CKUA. This university has been a pioneer in the use of the radio for educational purposes in Canada and has developed a considerable volume of educational broadcasting which covers practically the whole province.

Professor Corbett recently appointed as head of the parliamentary committee on radio broadcasting with a brief prepared in the interest of educational broadcasting and had made a study of the work in those sections of the United States in which this work has been carried on to a considerable extent.

Since if the work of Universities is to advertise, aimed at making Canada a truly bilingual country, was described.

The subject of the first session was "Modern Language Teaching" and dealt almost entirely with the teaching of French in English universities, and the teaching of English in French universities.

Abbe Alexander Vachon, Laval University, observed that practically every Quebec member of the House of Commons could express himself adequately in the English language, and that many could speak with equal facility in either language At Laval an attempt was made to give every graduate a complete mastery of the English language, even though he might enter the college with no English.

The British Way

Right Of Free Speech Not Challenged In Hyde Park

While the great American people—followed by the great Canadian people in their wake—are making over themselves to put down the right of free speech when it is even faintly challenged, the British people—and it is a part of red in it, it is refreshing to read that in the land of true liberty they do things differently.

Down in the English press of the Communistic celebrations in London on May Day. Hyde Park was filled with demonstrators. 30 speeches were made simultaneously, and great resolutions passed. Then they went home. No one was injured and the police merely looked on.—Vancouver Province.

Damascus, Syria, is said to be the oldest city in the world.

Quebec's maple sugar crop for 1932, which is roughly estimated at 24,000 000 pounds, is double that of last year, though 6,000,000 pounds is under average.

Canadian Radio League Officials Regret That Salaried Commission Will Conduct Broadcast System

Noise May Accompany Annual Display

Possibility Being Studied By Royal Society Of Canada

The question of whether sounds sometimes accompany auroral displays in the sky comes in for discussion before section three of the Royal Society of Canada at Ottawa.

Just because the currently held belief as to the cause and nature of auroras does not provide for any sound to be heard, Dr. J. S. Plaskett, director of the astrophysical observatory on Vancouver Island and the holder of the Flavelle medal of the Royal Society of Canada for 1932, thinks that the great body of evidence that sounds have been heard should not be discarded.

He read a paper before the section, prepared by Dr. C. S. Beals, of the observatory staff, in which it was stated that the only interpretation of the observations which seems to fit all the facts in that both the sounds and low level apparitions sometimes reported are real and that they constitute normal though perhaps unusual accompaniments of other normal phenomena.

"If this is so," it is stated further, "there must be some definite physical process taking place close to the earth's surface which is able to produce the effects that have been observed. The sounds, if they have been ordered to be electrical in origin and the hypothesis that the auroral sounds and low level displays are due to some sort of electrical discharge near the surface of the earth seems a very reasonable one."

Amid Poultrymen

Hon. Robert Weir, Minister Of Agriculture, Favors Continuation Of Government Aid

Continuation of the assistance given by the dominion government to poultry breeders desirous of securing registered cockerels for their flocks, was endorsed by Hon. Robert Weir, Minister of Agriculture. The assistance amounts to transportation charges and a rebate of 25 per bird toward the purchase price providing the cockerels pass the inspection tests and are shipped to help tone up stock.

The increases must be made from bona fide breeders entered under the federal policies of registration or record of performance. There is no restriction to the sale price.

Wheat Handed In Exam

Money estimated to amount to $1,-200,000,000 is being hoarded by Americans in the United States President Hoover, in a recent appeal for the release of this money, stated that every dollar thus hoarded was equal to "the destruction of from five to ten dollars in credit."

HISTORICAL GROUP OF OFFICERS REHEARSE FOR ALEXANDRA PAGEANT

The brilliant display which will be witnessed this month, when the Aldershot Tattoo takes place in England, can be judged from the frequent photographs of the elaborate preparations which are made. Above is an historical group of officers: Left to right: Sumner officer; Lord Nelson; Sir Francis Drake, and the Duke of Marlborough.

Boys May Accompany Auroral Display

Possibility Being Studied By Royal Society Of Canada

The question of whether sounds sometimes accompany auroral displays in the sky comes in for discussion before section three of the Royal Society of Canada at Ottawa.

Just because the currently held belief as to the cause and nature of auroras does not provide for any sound to be heard, Dr. J. S. Plaskett, director of the astrophysical observatory on Vancouver Island and the holder of the Flavelle medal of the Royal Society of Canada for 1932, thinks that the great body of evidence that sounds have been heard should not be discarded.

He read a paper before the section, prepared by Dr. C. S. Beals, of the observatory staff, in which it was stated that the only interpretation of the observations which seems to fit all the fact in that both the sounds and low level apparitions sometimes reported are real and that they constitute normal though perhaps unusual accompaniments of other normal phenomena.

"If this is so," it is stated further, "there must be some definite physical process taking place close to the earth's surface which is able to produce the effects that have been observed. The sounds, if they have been ordered to be electrical in origin and the hypothesis that the auroral sounds and low level displays are due to some sort of electrical discharge near the surface of the earth seems a very reasonable one."

Amid Poultrymen

Hon. Robert Weir, Minister Of Agriculture, Favors Continuation Of Government Aid

Continuation of the assistance given by the dominion government to poultry breeders desirous of securing registered cockerels for their flocks, was endorsed by Hon. Robert Weir, Minister of Agriculture. The assistance amounts to transportation charges and a rebate of 25 per bird toward the purchase price providing the cockerels pass the inspection tests and are shipped to help tone up stock.

The increases must be made from bona fide breeders entered under the federal policies of registration or record of performance. There is no restriction to the sale price.

Wheat Handed In Exam

Money estimated to amount to $1,-200,000,000 is being hoarded by Americans in the United States President Hoover, in a recent appeal for the release of this money, stated that every dollar thus hoarded was equal to "the destruction of from five to ten dollars in credit."

Indian Athlete

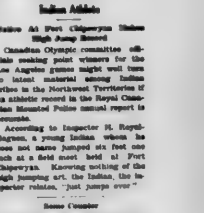
Names At Fort Chipewyan Makes High Jump Record

Canadian Olympic committee officials seeking point winners for the Los Angeles games might well turn to latent material among Indian tribes in the Northwest Territories if an athletic record in the Royal Canadian Mounted Police annual report is accurate.

According to Inspector H. Royal-Dupont, a young Indian whom he does not name jumped six feet one inch at a field meet held at Fort Chipewyan. Another member of the high jumping art, the Indian, the inspector relates, "just jumps over."

Some Counter

"My husband is a real prize to the bank," said the bountiful wife of a bank clerk. "The way he works his bank-note notes is truly wonderful counts them like lightning. Without ever making a mistake." "Really," said the friend to whom the statement was made. "Never a mistake at all?" "No well, at least he is never out more than a few coppers."



"I can't understand medicine," the doctor has ordered my wife to take a bath every day, and it is not because she is dirty."—Pogue Chien, Yvedun.

Regret that a salaried commission was to be appointed to conduct Canada's proposed new radio broadcasting system was expressed by officials of the Canadian Radio League, which organization was largely instrumental in the presentation to the parliamentary committee of the basis for the radio policy adopted at the session just concluded. It had been felt by the league that the commission should be composed of voluntary workers, "thus ensuring greater freedom from political interference, and constituting a buffer between the government and the operating organization."

A statement was issued by Allan Plaunt, honorary secretary, following a meeting at Ottawa at which it was shown that the proposed budget had been financed, since its inception 18 months ago, at a total cost of $5,000, more than half of which, Mr Plaunt stated, was contributed by members of the executive.

The league will remain in existence as a "watching and friendly critic" of the proposed "Canadian Radio Broadcasting Commission," it was stated, and will branch out with a view to securing more members and a wider organization.

Big influence was expressed at the successful conclusion of the campaign directed by the league and of the terms of the Radio bill adopted by the parliamentary committee. If salaries were to be paid the commissioners, they should be larger than those suggested in the committee's report, which suggested a salary of $10,000 for the chairman and $8,000 for the two commissioners.

Graham Spry, chairman of the league, said that the salary of the chairman did not equal that of either president of business positions or leading university professors. The commissioners would have to devote "at least $4,000,000 a year he said and would be controlling programmes that would be listened to by the whole of Canada for a number of hours a day. Such responsibility should be vested only in the hands of men of the highest standards, "but the commission, as proposed, cut off the possibility of voluntary services and does not seem adequate to ensure that at least the chairman will be an experienced and responsible man," he said.

HER FAT HAD TO GO

Activity Behind It

Exercise is the enemy of fat. If you overburdened with adipose tissue, call up exercise of energy to fight it. Do as this lady did:

"During the past six months, I have made steady improvement whilst taking Kruschen Salts. I have reduced 18 lbs. in weight during that period, and have breathed greatly from greater agility and liveliness undoubtedly attributable to that famous preparation." Mrs. W. F.

You can take all fat with Kruschen Salts if you will take one half teaspoonful in hot water every morning before breakfast, modify your diet and exercise regularly.

While you are losing fat you will be gaining in energy—in endurance—in ambition. Your skin will grow clearer, and your eyes will sparkle with the good health that Kruschen brings. The old arm chair won't hold you any more—you'll want to be up and doing—you'll enjoy work and other recreation and you'll sleep like a top. You'll love life, and probably live years longer.

WORLD HAPPENINGS BRIEFLY TOLD

The Alberta Liberal convention, scheduled for June 14 to 16, has been postponed until October.

In a new effort to fill in the gaps between commercial income and outgo, the U.S. Senate voted another increase in income taxes.

The United States senate has voted to put a 3½ per cent. tax on incomes earned through violations of state or federal laws.

Calgary, Alberta, was selected as the 1925 convention city of the United Commercial Travellers, jurisdiction of Washington, Oregon, and British Columbia.

Figures tabled in the House of Commons, London, England, show migration between Great Britain and the Dominion was reversed for 1921. Australia sending most back.

Creation of a national library and museum was urged by Sir Robert Falconer, retired president of the University of Toronto, speaking at Ottawa before the Royal Society of Canada.

Vincount Haldane, secretary of state for war in the British National Government, will represent the British bar at the annual meeting of the Canadian Bar Association at Calgary, in August.

Argentina, although eager to protect its meat, grain and wool markets in Great Britain, is unlikely to send an observer to the Imperial Economic Conference at Ottawa in July.

A warning that only immediate aid to Austria would avert a transfer moratorium on its foreign obligations was delivered to a financial commission of the League of Nations meeting in Paris, France.

Total Chinese casualties of 4,376 troops killed in the Shanghai warfare with Japanese were announced by the Nanking military headquarters. The government said 214 officers, and 4,000 men were killed, 677 officers and 1,180 men were wounded.

Dr. R. C. Wallace, president of the University of Alberta, was elected president of the National Conference of Canadian Universities. The term will be for two years. Dr. Wallace is also president of the Association of Canadian Clubs.

Dr. Jacob Grimm of Germany says there is no language so well suited for the world-language as the English. It having the marvellous capacity of adopting itself to the beauties of other languages.

Canadian production of tobacco in 1921 totalled 51,300,000 pounds valued at $7,177,540.

Information To Farmers Re Credit Extension

Saskatchewan Government Provides For Temporary Curtailment Of Remedies in View Of Conditions

The following information is published by the authority of the Hon. W. C. Buchanan, minister of agriculture of the Government of the Province of Saskatchewan.

Taxes: Title to land sold for taxes will not be issued until June 19th, 1924, unless the owner guilty of conviction of fraud, or the application very pale and with no satisfaction of the Court, or the Public, and I was in a terribly nervous and run-down condition

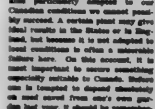
Gardening Notes

Treatment Of the Lawn, Spring Weeds, and Other Useful Information

Lime is not the cure-all for a lawn which many are inclined to believe. As a matter of fact it should be used either sparingly, as often on acid soil, which the lime tends to correct, untimely discourages the growth of dandelions and plantain, two weeds which are a very common pest in most parts of the country. A rich soil, however, is necessary to promote heavy growth and the dark green, fine sward we are after. Good drainage is also important and sweet fine sweet types of grass though if our location is shaded we can secure special grass which will do well under these conditions. Fertilizer of the commercial variety, routinely high in nitrogen, gives good results. One should be careful in applying the fertilizer to prevent burning. Dissolving in water first or applying just before a heavy shower or watering in the safest way. An annual application of pulverized sheep manure will supply both nourishment and humus and, unlike ordinary manure, this will not fill the grass with a lot of weed seeds as the sheep manure has been steamed during the pulverizing process to kill anything of this kind.

There is no object to be gained and often much damage done, when one may across the carelessly for plants, shrubs and trees. Pruning from the nearest reliable source is best as then we are sure of getting something adapted to our section of the country. When the stock arrives if we are not ready to plant immediately, open the parcel, spread out the roots in a shallow trench and cover firmly with damp soil. Above all things do not let the roots be exposed to sun or wind and if the plants are very dry on arrival, bury stems and all for a day or two.

While only major lime, as far as cost is concerned, need, like the foundation of a building, is all important, in fact carrying the comparison still further need is the support upon which the whole of gardening depends. But, insect, disease and cultivation may be perfect, but without the right quality of seed and of a kind particularly adapted to our Canadian climate we cannot possibly succeed. A certain plant may give ideal results in the States or in Europe, but however it is not adapted to local conditions is often a miserable failure here. On this account, it is important indeed to secure something especially suitable to Canada. Before one is tempted to discard absolutely all seed from one's own garden last year, it should be remembered that much of this is probably a collection of crossed shades, varieties and different qualities of plants, the best which into the pollen are no respecters of color, and when they get through with sweet peas, for instance, they have probably mixed things up so much that evenly colored blooms are rare to reward. Then, again, the seed saved is usually from the later and inferior flowers, or, in the case of vegetables, from late maturing plants, and in consequence is quite liable to give late and disappointing results. On commercial seed farms, varieties are grown in large solid blocks so that there is no chance of mixing and, in the case of high-class flowers, blooms are removed regularly and the pollen mixed by hand. There is no attempt to produce flow-



"Do you know where I live?"

"No."

"Then do I, but I am going to find out."—Saskatchewan Oats.

Chequers, the British Prime Minister's official country residence, is closed. Police guard the house night and day. Churchill, and at night a Great Dane has the run of the interior. During the next few months this beautiful old Buckinghamshire residence will be given over entirely to the British Office of Works for serious essential repairs. Experts discovered that the bulk of the timber in the house has been dangerously ravaged by the death watch beetle and dry rot. The top photograph shows Ramsay MacDonald and his daughter beside the famous old fireplace in the great hall. The bottom picture shows part of the exterior.

are for banquet purposes or early vegetables for the table, but used only, and that is selected from the earliest and most vigorous plants.

Most of us are fond of mushrooms but most of us, too, are afraid to indulge our appetite in these things for fear we will be the unlucky ones who get one of the very few poisonous kinds. Before risking them gathered in the woods or pastures we should make ourselves thoroughly familiar with the different species which are now fully described in various Government bulletins. To ensure an adequate supply, regardless of the season, and to be positive regarding the safety of our supply, however, we can grow them ourselves. Practically any seed store lists mushroom spawn and will supply same along with the simple directions for growing in an old root cellar or other dark corner.

The Various Methods

By Many Canadian Farmers in Demonstration Plots

The following are a few mentioned whether, though be varies in methods and appearance in so many kinds, to be plain: his trade in Canada is driven a spotless wagon propelled either by horse or gasoline. In many parts of Scotland he delivers his merchandise from wheelbarrow or cart drawn by dogs. In southern Europe he operates in goat's milk and drives his goats from door to door, stopping and milking them in view of his customers. In Costa Rica, the ox is the favorite, while in Japan he astride a horse with milk cans strapped to the animal. Many of the hawkers milk their own cows and carry waterskins to shield the milk from the scorching rays of the tropical sun.

Poor But Honest

Children Allowed To Gamp in Bakery Shop of Choice

Poor but honest was the modest pass, name unknown, who could not find work in Boston City. He established a shop in front of the cellar of a bakery to sleep inside his shop to keep warm. The other morning he was found dead in front of the shop. Doctors testified that the man died of exposure. When the police of the Back Bay district, where the shop is, sleep, learned that never had he found a roof, a bed of bread the owner a basic milk morning.

Tests of the United States Bureau of Standards have shown that cold weather cod from over the bologna of a other opinions of their own.

Views On Weapons

Of Various Differ

Nations Hold Variety Of Opinions Regarding "Offensive" Machines

A report containing many diverging views on the question of what weapons are of the offensive type was adopted by the Naval Commission of Disarmament conference.

The report showed not only that the great powers differed among themselves but also held views on the most important points contrary to those of the small powers.

Great Britain held battleships and aircraft carriers belonged in the defensive category; she was supported by the United States and by Japan in respect to battleships. Nearly all the other powers held that they belonged then as offensive arms.

Japan defended submarines and declared cruisers defensive. Argentina regarded battleships as offensive but in general endorsed the positions of Great Britain and France on the question of aircraft carriers.

For building purposes of average shape on a composite, rammed sand or elastic clay has been invented that lies flat against the side of the one when not in use.

A girl used to marry a man for better or for worse. Now she marries him for more or less.

VOL. 11 No. 1[illegible] FORT SASKATCHEWAN, ALBERTA WEDNESDAY, JUNE 15, 1932 $1.50 PER YEAR IN ADVANCE

Important By-Law Passed At Municipal Council Meeting on Saturday

The regular monthly meeting of the Council of the Municipal District of Clover Bar, 317, was held on the 11, instant, with all members in attendance.

The contract of supplying the District with gas and oil for the use in the grading outfit was given to the British American Oil Company.

The request of Mrs. McEwen for an increase in her mother's allowance was left entirely to the discretion of the Supt. of Child Welfare.

By-Law No. 87 providing for the cancellation of certain percentages of taxes in arrears as at the 1st of January, 1932, was given its first, second and third reading and finally passed. Under the provisions of this By-Law, "Arrears of Taxes" shall mean and include the original levy together with any penalties that may have been or may be added thereto. Ten per centum of municipal taxes that were levied prior to the year 1931 will be cancelled, provided such arrears are paid before the 15th of December, 1932. Five per centum of municipal taxes, supplementary revenue taxes, wild land taxes and such school taxes as were levied by the Council in 1931, will be cancelled, provided such arrears are paid before the 15th of December, 1932. The By-Law also provides for a discount of five per centum on current taxes levied by the Council if paid before the 1st of November, 1932, and two and one half per centum discount if paid on the 1st of November, and before the 15th of December, 1932. The By-Law will apply to all school taxes not levied by the Council only on the sanction in writing of the councerned school district. The provisions of the By-Law make it retroactive to the 1st January, 1932. It was decided to hold a meeting of school trustees in the Josephburg school house on the evening of the 14th and a meeting in the Brenner Hall on the evening of the 16th, so that the Secretary could explain the By-Law to the school trustees and any zealous that may be interested.

The Secretary was instructed to prepare a By-law bringing Township 53, Range 23 and 24, under the provisions of The Domestic Animals Act (Municipalities).

At the request of Mayor Montgomery it was decided to open that portion of the road allowance immediately East of Fort Saskatchewan Cemetery.

The vexatious question of hospital accounts received the usual debate.

With the passing of payments and accounts and the reading of correspondence the meeting adjourned at six o'clock to meet again on the 9th of July.

CEMETERY FUND

The Fort Saskatchewan Cemetery Committee of the Women's Institute wish to acknowledge the following donations for the 1932 season.

Previously acknowledged	
(H. Theme)	$10.00
Mrs. Wilmot Allen	1.00
Mr. A. Shackleton	5.00
Mr. H. D. Strong (Bruderheim)	1.00
Mr. R. E. Staples (Edmonton)	5.00
Net proceeds of W. I. card party	10.00
Canadian Legion	5.00
Total to date	$37.50

It is with grateful appreciation that the committee reports that Mr. J. D. McLean sent a gang of men for a half day to rake up decayed grass and generally tidy up the whole place.

The Caretaker, Mr. W. Masters is hard at work and already his efforts are showing results.

M.M.S. Regrets.

"Look, papa, Abie's cold is cured and we got left just a half box of cough-drops." "Oh, vot extravagance! Tell Herman to go out and get his fine vot."

LAMONT WINS FROM FORT IN TIGHT GAME

The tensest souls of Monsieur Harbin' journeyed to Fort Saskatchewan on Wednesday evening for an exhibition game of the great summer pastimes, and returned with the long end of a 3-2 score. The boys all had their clanking clothes on and the tall, lean and lanky Pocock was not so effective on the mound, as he has been on various other occasions against the locals. Mysteriously, part elder extraordinary, on the other hand, did a fine job of juggling for his team mates.

YPRES VALLEY

The Social held last Wednesday evening by the Ypres Valley Ladies Aid was a great success.

A big feature was the baseball game between Josephburg and Ypres Valley on the diary. A hard fought battle Josephburg took the low end of the score, 7-22.

After the boys game the Partridge Hill Ladies and Ypres Valley Ladies struggled through to finish with three points different and again Ypres Valley was victorious with a score of 32 to 29.

The next meeting of the Ladies Aid will be held on Wednesday, June 15, at the home of Mrs. Jos. Brandy.

The meeting will take the form of a "Quilting" all members are requested to be present.

Mrs. Normans Latimer is home with her baby girl.

Mrs F. Dittrich of Chicago, and Mr. and Mrs. J. Dittrich of Edmonton is visiting at the home of Mrs. C. Dittrich.

The Ladies Aid of Ypres Valley wishes to thank The Fort Hardware Co., who donated the prize for the horseshoe competition, also George Cyranton who gave passes to the winning men's team.

Will Rogers in "Young As You Feel" To Be Shown

Will Rogers and the Canadian star Fifty Million Frenchmen, in person will be shown at the Empress Friday and Saturday of this week.

Evening clothes, tapper, boutonniere, nose etc., met the Prince of Wales but the Prince of Rumour Will Rogers, and that's just what he wears in his new Fox picture, which opens at the Empress Theatre.

But don't laugh now. Save your giggles, because you are going to need every one of them when you see Rogers change overnight from an old desk of the stock yards to a modern playboy.

"Young as you Feel" is for Roger's Comfort. It was adapted from George Ade's stage play "Father and the Boys". Don't forget the date Friday and Saturday, June 17th and 18th.

PATRIOTIC I. F. A. SUNDAY TO BE HELD NEXT SUNDAY

The Annual "I. F. A. Sunday" service of the Patriotic congregation of the United Church will be held in Horse Hills Community Hall next Sunday afternoon at 3 o'clock. Short addresses on the life work of young people in the country will be given by Messrs Jack McIntee, Norman Martyn, Ross Beecie and James Bentley. Special music by the Fort Saskatchewan United Church Choir.

GOING FISHING IN AEROPLANES IS THE LATEST

Clipping the clouds along the snow-clad ridges of the Athabaska Valley, a Puss-Moth bagged a noisy and impertinent celebration of the opening, June 1st, of fishing for the first time in the upper lakes of Jasper National Park. Mountain barnstorming threatens to develop into a new mode of sight-seeing in this mountain resort, and the old timers with their packs and saddles gaze in distrust. Instead of hitting the trail to fish the leaping, lunging dynamites, all the indolent need do now is stroll down their nearest lake. That is their order anyway.

An ex-air mail pilot roplaned down near town two weeks ago and has now a thriving business over the green mantled peaks ever since. With fishing developing into a big attraction, he now plans on bringing in an amphibian machine and having his passengers in and out with their legal limit of fish by the space of a morning. Aeroplanes or no Aeroplanes, the outfitters aren't worrying. They are taking canoes in daily to the waters that have nurtured fish for three years now before the public opening. Maybe there are still enough old fashioned people to keep them busy.

AMOS AND ANDY IN PERSON PAYS A VISIT TO CANADA

Amos and Andy of the famous Fresh Air Taxicab Corp'ation have done been fishin' on the northwest Miramichi near the mouth of the Renous and Dungarvon rivers in New Brunswick and have returned to New York, according to local officials.

Andy caught two salmon, the largest not weighing eighteen pounds, and Amos caught one; Andy also caught some trout, which they are bringing home to exhibit to Madame Queen. So well did they keep their identity a secret that it was only when they were leaving that the news leaked out. In ordinary life the famous pair are just plain Leslie Calliou and Andy Brown and they were the guests of Dr. MacDonald at his camp. Dr. MacDonald first met them last winter in New York and he invited them to New Brunswick to enjoy some fishing. The week before their arrival their heart wired them that the fishing was good and they immediately wired back saying they would come. It was their first trip in that Province but they assured the Doctor they would be back again.

—Good grade of Men's wide web Garters in assorted fancy elastic. Per pair **25c**

Men's Snmmer Combinations
— Men's Buttonless summerweight Combination Underwear. Per garment **95c**

Girls Broadcloth Bloomers
—Girls black Broadcloth Bloomers. All sizes. Price per pair 49c

Girls Gingham Dresses
Small Girls fancy Gingham Dresses. Sizes from 2 to 5 years. Price **$1.00**

Johnstons Glo-Coat
A new finish for floors, woodwork and furniture that dries quickly, and shines as it dries.
A great time and labor saver.
— Needs no polishing — No buffing —
Special Price one pint tin 70c
Jones, Graham & O'Brien

The 40th Anniversary of "SALADA" TEA

For 40 years SALADA has given the finest quality in tea. Present prices are the lowest in 15 years.

Nationalism. Good And Bad

If nationalism is destroyed, mankind will be reduced to a helplessly dead level, declared Dr A N. Whitehead, of Harvard, representing the British Academy at the Royal Society of Canada meeting in Ottawa. Dr. H. M. Tory, president of the National Research Council of Canada, and former president of the University of Alberta, supplemented this declaration by saying "No nation has qualified to take its place in the international arena until it has firmly established itself on national grounds. Canada has men of capacity to do this. It is up to us to provide them with the opportunity."

They are quite right, comments the Border Cities Star. If they are speaking of nationalism in the sense of a strong but sensible national pride, which impels scientists and statesmen to achieve greater things than their colleagues in other countries, so that mankind as a whole may benefit, and glory redound to the nation which originates the discoveries or the methods of progress. And it is to such a type of nationalism that one may readily believe men like Dr. Whitehead and Dr Tory refer.

But there is another sort of nationalism. It is raising sublime. It is stifling mankind. It has brought about the present depression. It is causing unemployment, ruin and suffering. It is heading this war-covered old world inevitably toward a grimmer conflict than any in history; a conflict which, unless it is avoided, may witness the destruction of civilization as we know it.

It is that kind of nationalism which is based in a false conception of racial superiority, where one people lords down upon other peoples, where racial color lines are drawn, where differences in language and religion are emphasized to the supposed advantage of one group of people over other groups. It is nationalism founded in false pride and pretension, based upon purely selfish commercialism and an utter disregard of all other peoples and nations. nationalism which would seek glory and aggrandizement for itself at the expense of all others, does not qualify any nation for a place in the international arena, does not lift a nation above other nations, does not raise mankind to a higher level, but reduces all to a lower level and takes the glory that should be in life out of it.

When, following the Great War, the League of Nations was brought into being, it had for its object the uplifting of all nations, the development to action of a brotherhood of mankind. In keeping with that aspiration the Peace Treaty made provision for the self-determination of races and nations. It provided for a large liberty for oppressed minorities, and for the world as a whole. But, unfortunately, these newly created smaller nations, as well as many of the other nations, became imbued with the notion that they must first and foremost establish and develop a strong national spirit and consciousness, and this found expression in that narrow form of nationalism to which reference has been made.

This narrow nationalism fostered suspicions of other nations, one built and thrived upon fear of others. It impeded nations, not to remove existing barriers to international intercourse, but to erect new and even more insurmountable barriers. It resulted in a mad race of still greater armaments and the spending of untold billions in preparation for future wars. It led governments the world over to spend and spend madly without due regard to the financial resources or even of the economic and financial capacities of all nations combined.

Then narrow nationalism developed at the outset at such a rate and to such an extent that it largely destroyed the League of Nations ideal of a true international brotherhood founded upon a case nationalism which only desired such glory and power for itself as grew out of the fact that it was making a larger and finer contribution to mankind at large than other nations were making.

Until this narrow nationalistic spirit is destroyed there can be no permanent peace, progress and prosperity in the world. In its destruction lies the only hope for mankind.

Bird's-Eye Maple In Demand

Used Extensively On Account Of Strength and Wearing Qualities

All kinds of furniture are manufactured from Canada's sugar maple, from solid to veneer with the figured veneer of bird's-eye maple is particularly in demand, according to the forest service, Department of the Interior.

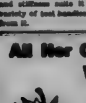
The strength and wearing qualities of the wood seems to place it in the veneer industry, where it is used for heavy sales, frames, sleigh runners, factory trucks, bicycle wheel rims, etc. Because of its toughness it is made into basball bats, hockey sticks, billiard cues, pulleys, croquet balls, mallets, etc. The sugar maple is a leading tree for flooring, and its strength and stiffness suits it for the great variety of hot handles that are made from it.

Chivalry On the Road

Something More Than "Reasonable Care" Required From Drivers

Legislation works no charm on the roads or elsewhere. It can only create the conditions in which safety can thrive. Ultimately we must protect ourselves. But when that is said, we can only return to and repeat frequently made in this column. As drivers of motor vehicles it is our duty to exercise the utmost care consistent with crowded conditions of today with what is called "reasonable care." Pedestrians are not all so prepared they were. The Highway Code has not cured the short-sighted or the hard of hearing. It has not given good sight to the blind. There is a call at every crossing. Nothing short of slavery is demanded, and from our variety of hot handles that are made from it.

All Her Children Were Troubled With Diarrhoea



Mr. J. J. Birbot, B.B. 1, Bisbrig, B.C., writes:—"Last Summer all my children were troubled with diarrhoea, and even as bad I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry, so I got a bottle, and after a couple of doses you should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."

A Grand Old Scot

Late "Sandy" McIntosh Of Aberdeenshire Was Great Athlete

The late Alexander McIntosh, of Cruthie, Aberdeenshire, may not be written into the annals of Scotland, but he was a great all-round sport the same.

"Sandy" McIntosh has just died at the age of 81. For nearly five years he was an annual competitor at the field of sports at the Braemar gathering, near Balmoral Castle. A son of the place he was a fine specimen of manhood, standing over six feet in height. Grey-headed and somewhat of a massive frame, the veteran Highlander donned the Fergusonson clan in the annual parades bearing the standard, and his appearance on the arena invariably aroused the admiration of the gatherings round the ring.

The Braemar gathering was the result of the late "Sandy" awakening as it did memories of the "auld times of last century when first he took to pleas among the rocks and caves in the glen. At the age of 14 he was beginning to make a name for himself as a heavyweight athlete, and several of the principal awards at Braemar

At 72, fifty-one years later, he took third place in the rather lowing competition, although his opponents this time included some of the best-known heavyweights in Scotland.

A tall man in strapping piece of a tree about twenty feet long and weighing enough to be a strenuous lift off the ground for the average man. The turner has to hold it up to the palms of his hands, take a short run and then throw the log so that it will turn over its own length in the air before falling. "Sandy" McIntosh thought nothing of this sport at the age of 72.

Most of the young men of today would be hauled to left the thing on the ground at all.

Mysterious Cities Of Southern Arabia

German Explorer Found Skyscrapers Built Entirely Of Clay

Stories of skyscrapers in the region of Hadhramaut, Arabia, are told by Herr Hans Helfritz, a young German explorer. He claims to have visited places which no other white man has ever seen. He found cities there which are not shown on any map. Tribes of Bimatic, Indian, and Mongolian origin populated them, and the civilization he describes as being "a remnant of the Middle Ages." Yet he found skyscrapers there, the highest buildings ten storeys high built of clay, without even a framework of wood to hold them together. Impassable encounters with some of the wild tribes of the desert," Herr Helfritz declares, "had I been armed." He has a splendid collection of photographs and gramophone records."

Its Quality Tells It—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Eclectric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its merits and usefulness in relieving and healing sickness. As a specific for cuts, burns, colds, and sores its elementary power for sound is beyond reproach.

Radium Rx Ambition

Swiss Watchmaker Has Brought Its Perfection An Electric Watch

A retired watchmaker of Geneva, Switzerland, has perfected and put on the market a twelve-year ambition to perfect an electric watch. Driven by a fly-power motor, it needs no connection with the electric light system, and all no power they were. The Highway Code has not cured the short-sighted or the hard of hearing. It has not given good sight to the blind. There is a call at every crossing. Nothing short of slavery is demanded, and from our variety of hot handles that are made from it.

Barber's Itch and Ringworm are relieved by the use of Dingler Egyptian Liniment, quick, certain results. Relieves the most obstinate cases.

Northern Wireless Station

There is a Dominion Government wireless station at the east end of Great Bear Lake in the Mackenzie Territories of Canada. Its location is shown on the recently issued map sheet published by the Topographical Survey, Department of the Interior, Ottawa.

Here's Health!

Christie's Graham Wafers, with milk, make a light and nourishing hot weather meal. In a new package . . . (containing a delicious recipe) . . . . crisper and fresher than ever.

Christie's Graham Wafers

British Scientists Go North

Will Endeavour To Probe the Mystery Of the Northern Lights

Equipped to send up sounding balloons to an altitude of 10 miles to test weather conditions and also to probe the mystery of northern lights members of the British Polar Expedition are on their way to their base at Port Rae, on Great Slave Lake.

The head of scientists is headed by Dr. J. M. Stagg, of the British Meteorological office.

Plans provide for the party remaining at Port Rae until September, 1933, for the purpose of studying weather conditions in the far north.

The work is part of an international arrangement which is also being participated in by Canada, United States, Denmark, Russia and a number of other countries.

To carry on its investigations in the north, the British party brought six tons of instruments from the Old Country. It also has brought here 10 tons of foodstuffs donated by British and Canadian manufacturers.

Canadian Film

First Canadian Drama-Talkie Is Produced In Toronto

Films Canadian Grants talkie, "The Bells," has been produced in Toronto by George Thorne Booth, with Dickson Kinnerly, Canadian actor, in the title role. The two-reel film was based on a script used long ago by Sir Henry Irving.

To produce this all-Canadian product many difficulties had to be overcome. It was made in the main gallery of the Fine Arts Building and the cast were all Torontonians. Lack of sound-proof equipment made recording impossible during the actual shooting scenes. As a specific for cuts, burns, colds, and sores its elementary power for sound is beyond reproach.

Sun Spots and Rain

Plenty Of Moisture For Western Grain Fields is Prediction

Western Canada may expect fairly generous rains for some time to come if sun-spot data collected by the Dominion Observatory runs true to form. According to observatory officials, Canada is now approaching a sun-spot period," which should produce plenty of moisture for the western grain fields.

The effect of sun-spots, it was explained, is to increase the rainfall over a long period.

A sun-spot period lasts for 11 to 11½ years. This does not mean that tremendous quantities of rain will fall for a short period, but rather that over a long period the precipitation will be higher than when the sun-spots are not in evidence.

Heavy rains in different parts of the world at present were hardly attributed to sun-spots.

To begin with, in the absence of accurate world data, scientists were unwilling to agree that the rainfall over the world has been exceptionally heavy.

While precipitation has been great in certain countries, it was not so in others.

Certain parts of Canada, for instance, had been exceptionally dry during May, while others had experienced excessive rains.

Officials made it clear that a few weeks' heavy rain cannot be explained by sun-spots. Their effect is over a much longer period.

Women and Asthma

Women are numbered among the sufferers from asthma by the countless thousands to whom every day will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. J. D. Kellogg's Asthma Remedy has brought new hope and life to many such. Testimonials, sent entirely without solicitation, show the enormous benefit it has wrought among women everywhere.

Phones For Hoboes

The tents of the nomadic Lapps who take their reindeer herds to graze in Sweden will in future be provided with telephones. The Lapps say then "phone each other regarding grazing conditions and the state of the herds generally.

New Emergency Station

The new emergency or "iron" ration to be issued to the troops is just a hard cake weighing only 6 ozs. It consists of cocoa, sugar, pea powder, beef powder, oil of lemon and cocoa butter. It is supposed to sustain a man for twenty-four hours.

Mine Long Extension

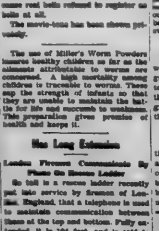
London Firearms Commissioner By Phone, But He Becomes Ladder

So tall is a rescue ladder recently put into service by firemen of London, England, that a telephone is used to maintain communication between them at the top and bottom. Fully extended, it is 104 feet, and is said to reach twenty feet higher than the types now in use. The men at the base may follow the progress of the rescue work by phone.

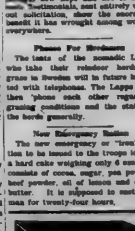
"The pests perform a great service in this world."

"They certainly do."

"If it wasn't for them the magazine editors would have no novel time fillers in small spaces at the bottom of pages."



Dancing on Skis—Swedish Girls, Stockholm.



Standard Time And Time Zones Established Throughout Canada From Atlantic To Pacific Coast

The faster means of transportation and communication made possible in recent years by the aeroplane, the motor car, the radio, and wireless telegraphy, together with the greater interest thus developed in affairs in distant places, have made necessary a much more developed knowledge of corresponding times and related matters. Many questions relating to standard time are referred to the Dominion Observatory of the Department of the Interior in order to meet this popular demand for time information the Department has had prepared and printed a small pamphlet entitled "Standard Time and Time Zones in Canada."

Everyone knows the meaning of the expression "standard time" but few in the present generation are aware that the adoption of standard time zones was due in the efforts of that eminent Canadian, Sir Sandord Fleming. From 1876 he had been advocating the use, throughout the world, of standard time zones. At a world conference held at Washington in 1884 his suggestions were adopted and it was agreed to urge all countries to use standard time zones. Almost all large countries have adopted standard times differing by some integral number of hours from the local time at the Greenwich meridian.

Since Canada extends east and west almost one-quarter of a complete circuit of the globe, and nearly all the Atlantic may be still midnight at the Pacific, there are six different standard times. Six o'clock a.m. in Halifax is five a.m. in Ottawa, four a.m. in Winnipeg, three a.m. in Calgary, two a.m. in Vancouver, and one a.m. in Dawson, while any locality is using daylight saving time it is simply adopting the standard time of the zone to the east of it.

With the exception of Quebec, Ontario, and the Southern Territories, each province has adopted a single standard time. Atlantic standard time, which is the local time at the 60th meridian (running near Sydney, Cape Breton), is four hours less than Greenwich and is used throughout Nova Scotia, Prince Edward Island, New Brunswick, and those parts of Quebec and the Northwest Territories east of the 65th meridian. Eastern standard time, which is the local time at the 75th meridian (running near Cornwall, Ontario), is five hours less than Greenwich and is used in Quebec west of the 65th meridian, in Ontario east of the 90th meridian, and in the Northwest Territories between the 65th and 85th meridians. Central standard time, which is the local time at the 90th meridian, is six hours less than Greenwich and is used in Ontario west of the 90th meridian, in Manitoba, in the Northwest Territories between the 85th and 102nd meridians, and in the southeasterly part of Saskatchewan. Mountain standard time, which is the local time at the 105th meridian (running near Regina, Saskatchewan), is seven hours less than Greenwich and is used throughout Saskatchewan, excepting the southeasterly part, throughout Alberta, and in that part of the Territories between the 102nd and the 120th meridians. Pacific standard time, which is the local time at the 120th meridian (running near Quesnel, British Columbia), is eight hours less than Greenwich and is used throughout British Columbia and in that part of the Northwest Territories lying west of the 120th meridian. Yukon standard time, which is the time at the 135th meridian (running near Whitehorse, Yukon Territory), is nine hours less than Greenwich and is used throughout Yukon Territory.

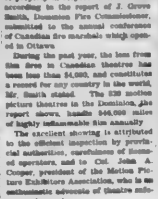
Enforce Safety Measures

Motion Picture Theatres In Canada Rank High In Respect To Fire Control

Motion picture theatres in Canada now rank the highest of any class of property in respect to fire control, according to the report of J. Green Smith, Dominion Fire Commissioner, submitted to the annual conference of Canadian fire marshals which opened in Ottawa.

During the past year, the loss from film fires in Canadian theatres has been less than $4,000, and constitutes a record for any country in the world, Mr. Smith stated. The 839 motion picture theatres in the Dominion, his report shows, handle $46,000 miles of highly inflammable film annually.

The excellent showing is attributed to the efficient inspection by provincial authorities, curtailment of licenses of operators, and the Chi. John A. Cooper, president of the Motion Picture Exhibitors Association, who is an enthusiastic advocate of theatre safety requirements.



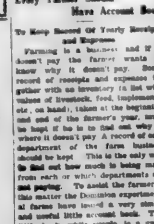
Lionel Hitchman, of the Boston Bruins, is still a top hand salesman at home. He has just proved it at Hartt's Island Post on the St John River near Fredericton, N B. The 20-lb silver salmon, the goal of all fighting fish, that Hitchman is proudly holding, failed to get past him. Sportsmen are finding fishing better than ever this year, according to A O Seymour, general tourist agent Canadian Pacific Railways.

Every Farmer Should Have Account Book

To Keep Record Of Yearly Receipts and Expenses

Farming is a business and if it doesn't pay the farmer wants to know why it doesn't pay. Some record of receipts and expenses together with an inventory is list with the assessor's book. The beginning of each year, on hand; taken at the beginning and end of the farmer's year, must be kept if he is to find out why or where it doesn't pay. A record of each department of the farm business should be kept. This is the only way to find out how much is being made from each or which departments are not paying. To assist the farmer in this matter the Dominion experimental farms have issued a very simple and useful little account book. This little book, while simple, is a great step in advance of keeping no accounts whatever it may be procured from the Publications Branch, Department of Agriculture, Ottawa, for the sum of ten cents.

Cook Islands, in the South Pacific, have issued new postage stamps.



THERE'S LOTS OF STYLE AND CHIC ABOUT THIS SIMPLE DRESS

It's a lovely model that you can fashion of tub silk, cotton novelty or linen. Sizes 16 requires 3¼ yards of 36-inch material.

The original is marine blue crepe silk, used navy blue bone button trim. The belt also fastens with a navy blue buckle.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

When Books Were Bricks

Writing Done On Clay In Old Babylonian Days

Nearly every city born and village in Canada has its public library, which gives great joy to many people, but it is strange to note that in the days before paper was made, there were public libraries in every town in Babylonia. In one there were 23,000 volumes arranged on shelves but each book was a brick for writing them was done by inscribing letters on clay and baking the clay in an oven. One authority tells us that it is likely that ancient Babylonia had more books than our country had a few generations ago.

In those days it was a great honor to be a librarian, and sometimes this honor was sought by the king's son himself, who was proud to be in charge of those precious brick shelves and literature.

On one brick discovered in our time is the beginning of a story about a small boy who was rescued by the king from "dogs and rascals," and was handed to a priest. The priest bounded his feet with his seal, and the seal impression was then given in a curse, the king promising to provide food and clothing for him for three years. The story ends abruptly, for the brick was broken!

Children went to school then as now but they wrote their lessons on the baked clay tablet on which numbers and other things had been traced in strange wedge-shaped letters.

Brick Houses To Please

Collisions Which Prove Mighty Dangerous Have Been Reported

Now that aeroplanes have become the fastest of man's conveyances, there have been numerous cases in recent "fresh" accidents have been reported as the result of collisions in the air with hawks, crows, humming birds or kites. One of these was caused at an altitude of only thirty feet when a kite struck the plane, tearing off the propeller blade and turning the plane over in a field. Another, and even more thrilling, encounter was reported by a British army officer in India. He was flying at about fifteen hundred feet, when a sudden vibration through the plane decided him to make a rapid but careful landing. The leading edge of one of the lower portions of the plane had been completely found a hole-large that had fallen near by with every bone broken.

A Miss That Never Misses

Those who consider that the vaunted performance of William Tell was something to write home about should see Wah-Nelahe Red-Rock, full-blooded Algonquin Indian, from Hudson Bay. The 23-year-old Indian maid is shown as she demonstrated her skill with bow and arrow, using a human target, at New York. The visitor astounded archery experts with her unerring accuracy with the ancient weapon.

A Miss That Never Misses

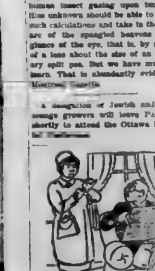
Those who consider that the vaunted performance of William Tell was something to write home about should see Wah-Nelahe Red-Rock, full-blooded Algonquin Indian, from Hudson Bay. The 23-year-old Indian maid is shown as she demonstrated her skill with bow and arrow, using a human target, at New York. The visitor astounded archery experts with her unerring accuracy with the ancient weapon.

We need not fear any recording in the realms of space, because if all the stars could be counted the reckoning put over against the spatial area would be as if we thought of adding a dozen fish being the habitants of the Atlantic Ocean. One modern expert tells us that the stellar cameras would reconnoitre about seven summer nights having the whole atmosphere of Europe for their bailiwick. But this is only the beginning of infinities. An announcement is made from the astrophysical observatory at Victoria, B.C., that a 2-feet star discovered in the constellation of Cassiopeia has recently been glimpsed, which is made up of matter more than a half-inch or "two suns." These being 150,000,000 miles from each other and from our earth a distance of 3,180 light years, which means that if the flash, say, of a bolt for match could travel to this new star from earth, going at the rate of 186,000 miles per second, it would take three thousand years and more for the signal to reach the desired edge, unless had been speeded up.

Furthermore, if we reckon by weight and take our own sun as the unit, then the two giant constellation parts of this new star are, respectively, 124 and 50 times the weight of the sun, which is itself a pretty little mercury day. Put the numeral "2" and add twenty-seven ciphers and you have the combined weight of the sun. Try to think of a ball of platinum with a temperature of 25,000 degrees Fahrenheit and that recently 1,000 times brighter than the sun, and if we take in this reckoning, some notion may be formed of this stellar weight-lifter. Astronomers add that to be 20,000,000,000,000,000 miles or more from the earth on which we live. Maybe we ought to feel thankful that Providence is so far away and keeps a respectful distance from our own insignificant ball. Yet at that we are informed that the gravitational influence of it hence the imprint indicate that it is to be listed amongst the senior stars of the universe. And that the distraction of being the constant star to which calculus lines have been directed.

These calculations are relative, we are assured. We hope so. Continued by them, at our times about the physical universe, we are plunged in perpetuum into the St. Lawrence. Chesterton somewhere says that when the author of the Book of Job wrote "Thou hast laid the world upon nothing" he wrote in one sentence the whole appalling poetry of modern astronomy. Job's conception, like its true Long ago a wonderful shepherd exclaimed "When I consider Thy heavens, the moon and the stars which Thou hast ordained, what is man that Thou art mindful of him?" Who amongst us has not some time asked the self-same question? Will supreme marvel of it all is that the human insect gazing upon immensities and answers should be able to make such calculations and take to the vast arc of the spangled heavens by a glimpse of the eye, that is, by means of a lens about the size of an ordinary spit pan. But we have much to learn. That is abundantly evident.—Montreal Gazette.

A congress of Jewish and Arab women graziers will meet in Palestine shortly to attend the Ottawa Imperial Conference.



"I got two maids at the registry office today and engraved both."

"But we only keep one maid."

"Yes, one comes on the first and the other on the fifteenth." Humorist, Hamburg.

For Better Health Be Careful In Choosing

MILK

THOUSANDS of mothers, following the advice of their doctors, have chosen St. Charles Milk for their babies. Let us send you a copy of "Baby's Welfare" by Dr. Charles Gilt Saddle.

Do you wish to Dr. Gilt Saddle's booklet? If so, we will gladly send a copy to you.

ST CHARLES MILK

WORLD HAPPENINGS BRIEFLY TOLD

British Columbia will submit briefs on import and export opportunities at the Ottawa Imperial Conference.

Japan's Bureau of Public Works is spending nearly $9,000,000 in road construction and improvement during the 1931-32 fiscal year.

Sir Hubert Wilkins arrived at Oslo, Norway, recently and talked over arrangements for his Nautilus U. S. S. the Norwegian polar expert.

The Exchange Telegraph reports that a United States gunboat has fired on Chinese soldiers who were attempting two British steamers.

The Chinese will be made responsible kidnapping a federal crime punishable by death was approved by the United States House of Representatives judiciary committee.

The college of Puget Sound, state college of Washington, conferred an honorary degree of Doctor of Laws on Premier R. F. Tolmie, of British Columbia.

France officially recognized the first of Amelia Earhart Putnam at a reception, when she was presented with the a gold medal commemorating her flight from Harbor Grace to Ireland.

Five flying boats from Detroit, Michigan, are now somewhere in northern British Columbia gold fields where their crews will take part in a prospecting survey.

Mrs. C. R. Crowe, Guelph, Ont., was re-elected president of the Dominion Branch, Women's Missionary Society of the United Church at sessions of the society in Toronto. Heads of departments were appointed in succession of the society in home and mission fields.

Empire Shopping Week

Proposal Is Made To Set Aside Week For This Purpose This Fall

An "Empire Shopping Week" for Canada will be arranged during the autumn, probably while the economic conference is underway in Ottawa, if the hopes of the Canadian Manufacturers' Association are realized. This was intimated in the report of the provincial intelligence committee presented at the 61st annual general meeting of the association at Ottawa. Empire shopping weeks were held in 1928 and 1929 and its revival has been urged upon the minister of trade and commerce.

Can Replace Canada

The conquering of the desert by automobile has had a disastrous effect on the camel market. In the annual camel sale at Marrakech, good animals were sold at from $50 to 1,000 francs. Automobiles now carry the freight loads that were once trubbed across the desert by camels.

PERSONAL

SCOTTISH LADY AT PRESENT IN Canada, would like to take in charge one or more young ladies. Has experience in travel abroad, and with Canadian girls. Could act as companion to lady, in any part of Canada, or as travel companion. Has excellent testimonials both in Canada and in Britain. Would willingly give more information to interested party.—Apply Box 50, Winnipeg Newspaper Union, 179 McDermot Ave., East, Winnipeg, Man.

Contract Bridge

By Sheila B. Shiels, Winnipeg Champion, Canadian Club, Toronto.

In my last article the salient features of the Approach-Forcing System were given. Today I will review the Official System. This system was devised by the united efforts of several bridge experts to remedy what they considered some defects in the Approach-Forcing System. Added to this was the idea that the conventional part of the game could be made easier for the average player.

The Official System differs from the Approach-Forcing System only slightly. The chief differences are noted below:

1st. The Opening Bid of One.

In the Official System the opening bid of one is made on a hand containing from two to three and one-half quick tricks, and guarantees that all the declarer out the bidding hand will take from four to five tricks. This is practically the same as the minimum opening bid of one in the Approach-Forcing System.

2nd. The Opening Bid of Two.

The opening bid of two is made on a hand containing from three and one-half to six honor tricks and guarantees that the declarer and the hand will take at least six tricks. The bid is called the intermediate two bid and this declaration constitutes the chief difference between the Approach-Forcing and Official Systems. This two bid does not demand a response if partner's hand contains one honor trick or strong distributional values. It is true that on certain types of hands the two bid response should be but opponents of this bid maintain that it gives too much information to the opposing side and therefore tends to nullify the chance of making penalty declare. It is generally believed by players that the disadvantages outweigh its advantages. On the other hand it gives precision of information to each partner and experienced bridge players this precision of information is a very valuable asset. But if it is conceded that the opening bid is a matter of contract is a battle of wits, with the main battle being fought before the cards go on the table. Each bid is made with the view of not only bidding method which gives too much information to the opposing side is bid strategy if not bid for contract. Personally I am of the opinion that applied to certain types of hands, the bid is quite valuable but I do not think this certain type of hand comes often enough to warrant the inclusion of this bid in any system. For the average it may be said that in the Official System over eighty per cent. of the opening bids are bids of one.

The playing bid of three in the Official System is similar in its application to the opening bid of two in the Approach-Forcing System. It is a demand bid and guarantees game for the particular deal in which it is made.

Except then for the variations in the opening bid convention, the Official and the Approach-Forcing Systems are practically aligned. The Jump-Shift bids are forcing in both systems and methods of overcoming the used are alike. The weak no trump response by partner to an opening bid of one is identical in both systems. The no trump original bid is used more frequently in the Official System than in the Approach-Forcing simply because the bids made on four card suits in the Official System must have a stronger honor trick four card suit than is required by the Approach Forcing.

However, both systems are easy to play and it is not a hard matter for players to familiarize themselves thoroughly with the salient differences between them, so that he can play whichever system his partner desires him to play.

In the next article the One Over One and the Vanderbilt Club will be discussed.

Tokens in Lead Of Flowers

Tokens Territory, Canada, is a land of flowers. Hundreds of types of flowers, plants and shrubs grow wild throughout the country and are recognized generally where flowers are cultivated and one of the leading impressions left with the visitor is the variety and beauty of the flowers which decorate the homes and beautify the grounds of Dawson, the capital.

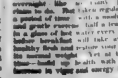
LOST 20 LBS. FAT

Without Missing Diet

To reduce weight without any exercise to diet is rather more than anyone should expect! That the Kruschen method should have accomplished as this case is a great tribute to its efficiency.

Mrs. A. Hall started taking Kruschen for reducing weight. I weighed 196 lbs. and was seven stone ago. I decided I was too heavy and read about Kruschen in the local newspaper. Every morning I sip the salts at 7.30 bfs. I have found that weight for weight I am much lighter than I was before. I also find myself in any way whatever.

Kruschen Salts do not reduce you unreasonably like so many products claim to do. But they regularly over a period of months, until a modified and gentle exercise that is responsible for a glow of health every morning before breakfast will take away the healthy flesh and reduce your figure to its normal weight. Yet at the same time you will be in such a good health to enjoy vigor and energy for you!



JUDY THE MERRIEST BENT OF FEMININITY MARKS THESE DELIGHTFULLY YOUNG PAJAMAS

It's a darling. The bodice is given a bumpy effect. A wide sash caught in at either side and tied at the back, draws it snugly to the figure. The shorts are fastened below outer hips. However, if you wish to omit the sleeves then the pretty neckline will set just turn the shoulder and form quite a delightful band.

And as for the trouser legs, they are shaped so as to affect a skirt, when full length.

Pale blue crepe satin is dainty for brocading.

Style No. 911 is designed for sizes 14, 16, 18, 20 years, 36 and 40 bust. Size 16 requires 3¼ yards of 39-inch material with ⅝ yard of 39-inch contrasting.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

SUNDAY SCHOOL LESSON

JUNE 19

JACOB THE AGED FATHER

Golden Text: "Honor thy father and thy mother." Exodus 20:12

Lesson: Genesis 46:1 - 29, 5 - 47:7

Devotional Reading: Luke 2:41-52

Explanations and Comments

Jacob and Joseph Reunited.

Genesis 46:1-27.—The moving scene in our last week's lesson closed with all brothers except Joseph and his brothers were united in peace and love and Joseph pleased with them for their speedy settlement in Egypt.

Laden with presents rained and silver and all the good things of Egypt the eleven brothers returned to Jacob. Joseph is yet alive and is ruler over all the land of Egypt! What the outstanding news they brought to their father who had so long mourned for Joseph as dead! No wonder he could not believe them at first! When he saw the wagons which Joseph had sent to transport his household he cried: "It is enough; Joseph my son is yet alive: I will go and see him before I die."

At last all were ready for the journey to Egypt. Jacob and his sons and their households, their cattle and goods. At Beersheba, on the border of the land wastes which lay between Canaan and Egypt, the caravan halted and offered sacrifice. Every thing remembered of God's dealings in the vision that night Jacob received God's assurance that the journey to Egypt was for the best and the promises that his descendants should become a great nation were repeated. The prospect of any greatness still seemed remote at this time. Those wandering clans needed just such a place as Goshen in which to increase in numbers undisturbed by hostile neighbors, a place, too, where they could learn from the Egyptians something of the arts of life. There for it was God's plan for them to find in Egypt an asylum where they could live a settled life. The bringing of Jacob and his sons into Egypt brought about that consummation.

Jacob Presented to Joseph.

Genesis 46:28-34.—On the confines of Egypt they were met by Joseph. Like a king Joseph had sent for his father and like a king he came to meet him in his imperial chariot drawn by Egyptian horses, but like a son he fell on his father's neck and wept.

"It may be a grand thing to sit on a high stool and wait till the old maid comes upstairs. But it is an infinitely grander thing a border chivalry to come off the stool and go away to meet him a mile or two on the road. Your home will be a better home if do not care how poor the rest of you have a little memory of that meeting of tenderness and nice feeling. These are things that sweeten life." Joseph Parker

Britain and Europe

Belonging Alliances Have Caused Nothing But Trouble in the Past

Great Britain's troubles lie in and proceed from Europe which has drained her through the centuries of how many millions of lives and unaccountable wealth. The British people mean to be free of this incubus. They mean to regain their liberty of action and to conduct themselves with friendship towards all nations, and to engage in friendships alliances and agreements with none. And they mean to take their own measure of their liabilities and of their rights, against them as they think fit. The first step to the recovery of our political freedom must be to get to the end of this farce of conference after conference at Geneva and Lausanne—futile political tea parties that can do nothing but strife. Extract our statesmen from the Empire, and are proving the dearest investment we ever made. London Express.

To Make Navigation Safe

Pioneer Spots On Bay Route To Be Marked

In preparation for the 1933 season of navigation through Hudson Straits to the port of Churchill, the Canadian Government steamer "N. B. McLean" will spend the summer in those waters.

New lights will be installed by the "N. B. McLean" crew at Button Island, Resolution Island, Whales Island (east end), Nottingham Island, and Coats Island. A light will also be installed at Richard's Point by the staff at Churchill.

First Lady: "Sam in the vaguial, eh? Was yer surgical or medical?" Second Lady: "Watcher mean?"

First Lady: "Well, was yer in when yer went in and they made yer out, or was yer well when yer went in and they made yer ill?"

Queen Victoria's Letters Published In London

Name Of Former Governess Rather Disappointing, Is Pronounced Flop

The final volume of Queen Victoria's letters, covering the last five years of her life, has been published in London and Berlin, announcing that she bore wrote "It wouldn't do" to give former Kaiser Wilhelm of Germany a good snub."

The letters revealed that the last years of the octogenarian sovereign were marked among other things by less caustic criticism of national and international events.

The name of the former kaiser occupies a prominent place in the letters, in which the late queen is revealed as an advocate of forbearance when his doings aroused hostility.

This was particularly noticeable at the time of the Boer War when the Kaiser sent a telegram to President Kruger of the Transvaal in South Africa, which excited indignation on the part of the British nation. Queen Victoria shared in the indignation, but kept her restraint.

"It wouldn't do," she wrote. "Go give him a good snub. Sharp, cutting answers and remarks only irritate and do harm, and in sovereigns and statesmen should most carefully be guarded against.

William's faults come from impetuousness, as well as conceit, and calmness and firmness are the most powerful weapons in such cases."

The latest letters furnish evidence of a sweetness and longing for rest but a sense of duty prevailed over that weariness, and up to within a few days of her death she signed documents and attended to business.

New Type Of Cement

Alkali In Western Soils Will Not Destroy It

A short address by Dr. T. Thorvaldson, chemical professor, University of Saskatchewan, marked the closing session of the fifteenth annual convention of the Canadian Chemical Association which was held in Hamilton, Ontario. A distinct Canadian achievement, the invention of a new type of cement which would resist the destruction wrought by the alkali present in western soils, was discussed by Dr. Thorvaldson.

The new invention is expected to save millions of dollars a year, the western government and its builders, roadmakers and waterworks systems.

Where It Belonged

The visiting director of education was complaining that the school was not properly cleaned. Rubbing his finger on a big globe, representing the world, he said: "Look at this. It's covered with dust."

"But, after all," protested the school-keeper, "that part you've touched is the Sahara Desert."

COLIC

"Really, I think BABY'S OWN TABLETS are wonderful," writes Mrs. Albert P. MacDonald, Nantucket, Ont. "My baby has so many colic pains." Don't let your baby suffer—give BABY'S OWN TABLETS. For colds, fever, upset stomach, constipation. Absolutely harmless. 25c. 75c

BABY'S OWN TABLETS

SHOULD AVOID THE DUPLICATION OF TAXATION

Ottawa, Ont.—Recommending that the Dominion, provinces and municipalities should get together in order to reach an understanding respecting fields of taxation, and thus avoid duplication, the Canadian Manufacturers' Association passed resolutions dealing with taxation and also unemployment.

The resolution dealing with taxation called upon the association to co-operate by asking members and employees as well as the public throughout Canada, to refrain from asking for public expenditures except those immediately necessary.

It urged members to assist their provincial and municipal governments in curtailing expenditures, thereby lessening the burden of taxpayers. This would release large sums for use in agriculture and other basic industries.

The resolution was moved by F. C. Brown, Vancouver.

Mr. Brown also moved a resolution on unemployment, urging co-operation in reducing unemployment by favored land settlement and support and needed direct relief for those who cannot get work.

The election of officers at the concluding session of the association resulted as follows: President, W. J. Coulter, Toronto; first vice-president, George C. Cockshutt, Brantford; second vice-president, T. F. Montpenny, Toronto; treasurer, [illegible].

The executive council includes:

Major E. G. Rogers, J. W. Ark land, H. B. Lyall, K. C. Ryan, W. J. Balmain, Winnipeg; J. D. Rosebery, The Pas, Man.; George Leach, Regina, Howard Jones, Saskatoon; T. George Wood, Raymond, Alberta; C. A. Graham, Edmonton, H. Hutchings, Calgary; W. G. Armstrong, Medicine Hat, Alberta; R. Bell-Irving, J. B. Thompson, J. H. Rolphe, T. R. Dickson, H. MacLaren, G. E. Herman, J. C. McFarlane, Vancouver; A. M. McDonald, New Westminster.

Chairmen of standing committees include: Sir J. O. Thorn, Toronto, transportation, W. S. Campbell, Toronto, commercial intelligence, W. R. Dryman, Hamilton, and publishing, A. Ross Robertson, Toronto.

Death Of Joynson-Hicks

First Lord Brentford Dies At Age Of 69 Years

London, Eng.—Sir William Joynson-Hicks, first Lord Brentford, died at the age of 69 years. Congestion of the lungs complicated by heart weakness, which developed from a severe chill he sustained during a visit to the West Indies in February, brought an end to a noted political career. Lord Brentford was also one of the leading laymen in the Church of England and took a prominent part in the parliamentary battle over the revised book of common prayer.

Centenary Of Great Reform Bill Celebrated

Viscount Halifax Who Attended Personally Knew the Reformer

Newcastle, England.—Celebrations opened here June 7, to commemorate the centenary of the great reform bill, attended by Viscount Halifax and his son, Lord Irwin, former viceroy of India. Viscount Halifax, now 86 years of age, is probably the only living person who personally knew the reformer, the second Earl Grey, Prime Minister, who secured passage of the bill, and whose family is still actively associated with this area.

May Attend Conference

Victoria, B.C.—While no official statement has been made, it is probable that Premier S. F. Tolmie will attend the conference of the four western provinces at Regina June 30, as the representative of British Columbia. The government has already accepted the invitation of Premier J. T. M. Anderson, of Saskatchewan, to attend the meeting, which is to discuss the viewpoint of the west on empire trade.

Quebec Forest Fires

Fears Expressed That Prospectors May Be Trapped In Burning Bush

Amos, Que.—Fierce forest fires in land force fires are blazing across a wide area from Lake Abitibi eastward to the Ontario boundary, and in districts where there is little water to offer them safety are prevalent. Four big things fell in flames as the fire spread in the little settlement of Val Paradis. Many refugees from the district are telling a tragic story. The fire started several days ago near the Ibbone and Hislop mines after settlers had been warned against. Fanned by a strong wind the blaze had assumed huge proportions in a few minutes. It spread on a front of [illegible].

Scorched lands and burned shacks were displayed as the settlers rushed down water courses and dipped into creeks to avoid the flames. The Alaska Lake and Bell Rapids provided sanctuary for many after a harrowing scramble through slash and [illegible].

Miles inland far from safety areas prospectors have been working. There are fears that the fire may have overtaken many of them. Whether they managed to outdistance the flames is problematical. No search has been conducted until the fire moderates.

Epoch In History

Imperial Conference To Mark Period Of Great Movement To Empire

Ottawa, Ont.—While the coming Imperial Conference may not produce any startling results it will take place in an epoch in history. The Canadian Manufacturers' Association in doing every thing in its power to contribute to the success of the conference.

Thus W. C. Coulter, president of the Association, outlined the attitude of his organization to the coming meeting of empire statesmen in Ottawa next month.

"It is sometimes said that there will be a great diversity of interests at the conference" declared Mr. Coulter "but I do not think so, and it is always the case when great issues are at stake, but compromise and consolidation are familiar British traits of character, and solutions can be found for most problems."

The president's reference to the conference was made in the course of an address to the association at the final dinner closing the 61st annual convention here.

Gold Receipts Heavy

Value Of Shipments To Mint In May Over Five Million

Ottawa, Ont.—Gold receipts at the Royal Canadian Mint during May were in excess of $5,000,000 for the third time in history, the Dominion Bureau of Statistics reports.

The gold content of the six pounds received at Ottawa was 942.426 fine ounce, the value of this quantity at $20.67 per ounce, the fixed price of gold, being $5,011,425.

Relief Takes Will Fund

Toronto, Ont.—While J. J. McQuade and his wife were obtaining food and coal from relief officials here, Mr. Quade had a bank account of $5,000. He charges on a local house and was able to purchase a farm at Maite, it was alleged by police who arrested Mr. McQuade on their farm. They face charges of obtaining food by false pretences.

Northern Air Mail

Prince Albert.—With 40,000 letters aboard the new regular monthly air service between here and northern Saskatchewan points was inaugurated recently. Two planes were engaged to carry mail from Emma Lake, the air base here to Lac La Ronge, and Montreal Lake, points of which most of it was prepared by stamp collectors.

Saved From Hanging

Kamloops, B.C.—Saved from hanging when the British Columbia court of appeal granted him a new trial on appeal against his conviction of murdering two companions in the Tremieuer Lake district in northern British Columbia, in June, 1930, Karl Fredericks, 22-year-old trapper and prospector, was acquitted by an assize court jury here at his third trial.

The fire department of Leyton, England, recently had to fight a blaze at the waterworks.

WOMAN DELEGATE RETURNS

Miss Winnifred Kydd, Canada's woman delegate to the Assembly of Canadian Clubs, is returning to Canada after conferences at Geneva. She intended to confer with the secretary-general of the League of Nations, Sir Eric Drummond, on the results of the conference and its prospects today as a final solution.

James Bay Railway

Official Opening To Take Place On July 15th

Toronto, Ont.—Official opening of the railway line from Cochrane to Moosonee on James Bay will take place July 15, it was definitely announced following a conference between Premier George S. Henry and W. Lee, chairman of the Temiskaming and Northern Ontario Railway. Premier Henry is to drive the last spike on the line amid an elaborate ceremony.

Premier R. B. Bennett and Chief Justice F. H. Latchford who drove the first spike in the Temiskaming and Northern Ontario line in 1902, are to be invited to attend.

Ruling Favors Indians

Alberta Game Act Allows Them Certain Privileges

Calgary, Alberta.—Indians have an unrestricted right to hunt for food on unoccupied lands regardless of the Alberta Game Act, the Alberta Court of Appeals ruled.

Mr. Justice McGillivray, who handed down the court's decision, said this ruling in no way implied that the provincial game act was ultra vires, but merely that it did not apply to Indians hunting for food on unoccupied government or other lands.

To Discuss Wheat Boom

Regina, Sask.—Discussion of asking for an extension of the five cent per bushel bonus on wheat for export, paid by the Federal Government this year, will come up at the interprovincial conference of the western premiers in Regina on June 20. The primary purpose of the conference will be to draft a memorandum setting forth the west's interest in the ensuing Imperial Conference.

New Stamp Issue

Postage Stamps To Commemorate Imperial Conference

Ottawa, Ont.—Commemorative postage stamps will be issued in connection with the Imperial Conference. Announcement to this effect was made from the office of Prime Minister R. B. Bennett.

The statement reads:

Authority has been given for the issue of three commemorative postage stamps in connection with the Imperial Conference to be held in Ottawa next month.

"These stamps will be in the denominations of three, five and 13 cents.

The three-cent stamp will bear a portrait of the king the five-cent stamp of the Prince of Wales and the 13-cent will be a double-sized postage stamp.

These stamps are now in course of preparation and will be issued on a date to be set after manufacture has been completed.

There will also be an issue of overprinted air mail stamps for the conference. These stamps being the current five-cent issue of Canada overprinted six cents, together with other printed stamps relating to the Imperial Conference.

The denominations in which these stamps will be issued will ensure their use on mail matter going to all parts of the Empire, as well as to many other countries."

Memorial To Queen Alexandra Unveiled

King George Officiates At Ceremony Outside Marlborough House

London, England.—In the presence of the Queen the Prince of Wales and most other members of the royal family the King unveiled the memorial to Queen Alexandra, erected by public subscription outside Marlborough House where Alexandra as Princess of Wales spent her married life prior to the accession of Edward VII, and where she returned after his death.

The ceremony coincided with the annual Alexandra rose day instituted under the late queen's auspices 31 years ago. She died in 1925.

New Governing System

Something Is Needed To Take the Place Of Party Politics

Winnipeg, Man.—Government partisanship breaks down in the face of economic difficulties and some new system must be devised, J. W. Dafoe, editor-in-chief of the Winnipeg Free Press, told delegates to the Canadian Clubs conference on social work here.

A new conception of the state in relation to the individual was taking possession of the mind of the people, Mr. Dafoe said. It was not generally appreciated how revolutionary this conception was, nor were its ultimate consequences known.

SEE PLOT TO WRECK OTTAWA CONFERENCE

London, England.—The Daily Empress says there is a "world plot against the Ottawa conference.

The newspaper, chief organ of Lord Beaverbrook Canadian-born peer and Empire free-trade crusader, declared evidence was accumulating on all sides that there was a definite world plot to wreck the conference, to which all nations of the British Commonwealth look to help solve their joint economic problems.

Foreign nations, the Express said, are using every means of direct and indirect propaganda to sow seeds of discord between the Mother Country and the Dominions.

The Express quoted an article in a Canadian magazine by Lord Cecil of Chelwood, in which he said:

"Attempts to create discord between Canada and Great Britain . . . It said while the Dominions were being told Great Britain will go to the conference ready to give nothing and ask everything an attempt is being made to create a discord between the Dominions themselves on the suggestion each ought to profit at the expense of the others.

No United Ireland

North Would Never Be a Party To Separation From England

London, England.—Reports in London that present negotiations between the Free State and Britain would be widened on the basis of a pact, to attempts to re-open the question of union between the Free State and Northern Ireland, met with prompt denial from Viscount Craigavon, Premier of Northern Ireland.

Lord Craigavon said: "A united Ireland is quite out of the question. "A long time ago," he declared, "we in Ulster made up our minds that we have no desire to make Ireland a united country separation from Great Britain or severance of the Imperial connection.

"We are loyal to the Constitution, Government and I see eye to eye."

Opinion here is that President de Valera proposes, if he has not indeed already done so, reference of the whole dispute to either an Imperial or international tribunal. His bill for abolition of the oath, repugnant by the British Government as the root of the present differences, is deadlocked in the Irish senate, short of most of six tests by an opposition majority.

Favor Empire Trade

B.C. Industries Would Give Limited Support To Policy

Victoria, B.C.—Co-operation of Empire trade for the benefit of British countries, and development of an Empire currency as a medium through which this trade could be carried on, would have the united support of British Columbia industries if considered at the Imperial Economic Conference opening next month in Ottawa, according to information received by the British Columbia Government.

Brutal Murder

Lothiniere, Que.—Aroused over the most brutal murder here in years, residents of Lothiniere are aiding provincial police in seeking two men who caused the death of Simeon Herard, well known and popular citizen. His head been beaten over the head when he resisted efforts of the intruders to make him give up the robbing a branch of La Banque Provinciale.

Object To New System

Shanghai, China.—Chinese telephone workers employed by the Shanghai Telephone Company, which serves in international settlement and the French concession, went out on strike in opposition to the installation of an automatic system which resulted in the dismissal of hundreds of operators.

Health Plan Rejected

Saskatoon, Sask.—Intended for submission to the convention of the Saskatchewan Union of Urban Municipalities, a resolution suggested by Dr. Arthur Wilson, health officer, proposing immunization against communicable disease of all persons applying for relief was turned down by the city council by an unanimous vote.

IT ISN'T WISE TO ARGUE WITH A CRICKET BALL

Lieutenant Wazir Ali, member of the All India Cricket Team, at present touring the British Isles, is shown being assisted off the field after he got hit on the head by a rising ball in the match at Lord's Cricket Ground, London, England. The injured player was taken to a nursing home, where he stayed for four days.

Statesmen Needed

Dr. Benes Believes England Will Lead the World Back To Sanity

Strong conviction that England will lead the world back to sanity and freedom, was expressed at Prince Albert by Dr W W Swanson, professor of economics, University of Saskatchewan in his address to the Saskatchewan merchants attending the annual convention of the Retail Merchants' Association.

The speaker said he had no doubt the Empire possessed statesmen with the quality of leadership to give the world the impetus toward better times.

He believes the day for self-adjustment is past and that the people should be given a constructive program to help them adjust things. "What we require in this province and in the Dominion is constructive leadership from men in positions of responsibility," said Dr Swanson "The people," he declared, "have a right to expect leadership from those in power in all places of responsibility. We can't wait, either, for we must restore the confidence of the people."

The speaker warned against the type of philosophy emanating from Russia.

Train Has Moved Down

Speed Of Scottish Express Greater In Queen Victoria's Day

It is somewhat of a paradox that in this age of speed, when the drivers of motor-cars, motor-boats and aeroplanes are for ever establishing fresh records, our leading railways should seem to be poised for accelerating their Scottish expresses by half an hour. For on the railways speeds have been reduced since the War, and reasons can their unwearying children of the faster trains of thirty or forty years ago. The "Flying Scotsman" ran to Edinburgh recently in 7 hours 20 minutes, but the Scottish express of Queen Victoria's latter years required Edinburgh in 6 hours 15 minutes. —London Spectator. . .

Old Hut Town Tents

But Same Could Not Be Said Of Automobile

While driving in the Bay Bridge Road, crossing the Bay of Quinte, near Belleville, Ontario, Asa Bunnow struck a large turtle in the road, upsetting his automobile into the ditch. Motion station that he noticed the turtle for a large rock in the road, and was driving by it when the turtle moved and the front wheel struck it with deflected into the fence. The turtle was apparently little hurt, as it moved slowly off into the Bay of Quinte.

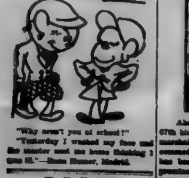
Our Weak Day Life

Has Most To Do With Building Of Character

The week-day side of our life has a great deal more to do with our spiritual life, the building of our character, with our growth in grace, than many of us think. Some people seem to imagine that there is no moral or spiritual quality whatever in life's common task-work. On the other hand, no day can be made beautiful whose secular side is not in full and complete as its religious side.

Longest Mural Painting

What is said to be the largest mural painting in the world has just been completed by two artists for a Massachusetts theatre. The painting, an area of more than 9,000 square feet.



"Why aren't you at school?"
"Yesterday I washed my face and the master said me home thinking I was ill."—Sons Homer, Madrid.

Sweet and Confidential

His British Women Keep Queen Secrets Of State

Six women who arrive at Buckingham Palace at 9 a.m. every weekday, know more of the secrets of politics and diplomacy than any other women in Britain.

They never talk about their secrets, not even to each other.

They are the secretaries to the king's advisers, and high officials of the court.

They type documents that begin with such words as:

"Secret and confidential: For cabinet use only."

"Personal and private For the use of the Prime Minister only."

But they don't talk about them. They forget them as soon as they have written them.

The business of the day begins soon after 9 a.m., when a half commander from their little offices, cheerful with white paint and red carpets, to the presence of Sir Clive Wigram, the king's private secretary. Seven or 8 p.m often still finds them busy.

They work hard, but there are compensations. They travel with the court when it goes to Windsor, or Sandringham, or Balmoral. There they find time to relax among beautiful surroundings.

Their names are secret. In fact, few know who these mysterious women are.

This year, in the honors list, one of their names appeared against an O.B.E. (Order of the British Empire), with the simple explanation, "for services," but only rarely does recognition like this name their type.

All of them are unmarried, one or two saw war service with the women's organizations, but most of them stay in links with the court. One quality they all possess in the supreme degree —tact.

Geological Mapping

Large Area in Southern Saskatchewan To Be Studied

Further geological mapping of surface deposits in the Cypress Hills region of southwestern Saskatchewan will be undertaken this year by the Federal Government, it was learned according to an announcement. R. T. Wickenden will continue this work.

He will investigate the underground water supply on an area extending from near the Manitoba boundary on the east to the Cypress Hills on the west, and north to Saskatchewan. Results of the research of deep wells will be made and special attention will be given to locating supplies suitable for road materials and clays suitable for use in the clay-working industry.

Gold From Sunken Ship

Member Lord Beaverbrook Is Engaged To Open Chests Containing Treasure

A master locksmith embarked for Europe recently on an adventure that may take him to the bottom of the sea to release treasure buried beneath the waves since the ship containing it was sunk during the war.

To the romance of participating in salvaging this sunken treasure, worth $3,000,000 in gold bullion are added the spice of mystery that brought an ordered thrill.

For when Charles Courtney, the master locksmith and president of the American Master Locksmiths' Association, called in his old tool house at what part in Europe he would need. The salvaging concern which engaged him gave instructions that he was to have his passport viased to permit him to land in England, France, or Germany. He was told an agent would meet him at Southampton, Cherbourg or Bremen to give him further orders.

The secrecy even extended to the name and location of the sunken ship. All Courtney knows definitely is that three steel chests have been taken out of the hulk and landed in Europe.

His first job at the secret rendezvous will be to try to open two of the chests. Acetylene torches were used on one and in the process valuable papers were so badly damaged the salvagers gave up that method.

For the job that has defied the experts of Europe, Courtney carried a very modest set of tools.

Courtney's option in his agreement that provides he may descend to the sunken hulk and attempt to open the larger vault. He is to use his judgment whether to undertake that part of the job.

Canada's Navy

Fourth Sea Lord Of the Admiralty Has Praise For Efficiency

Canada's naval establishment at Esquimalt, on Vancouver Island, is "a very important unit in the British Dominion, said Rear-Admiral Geoffrey Blake, recently appointed fourth sea lord of the admiralty and former commodore of New Zealand's naval forces. Admiral Blake was in Montreal, in the course of a trip from Ottawa to Halifax, en route to his station in London this fall.

The royal Canadian navy's new dockyard at Esquimalt, Admiral Blake described as "one of the best vessels of its class on the seas."

Temperature of the Gulf Stream ranges from about 68 in winter to 80 in summer.

Cellophane Is Seen As Artificial Silk

Just Cost In Short Instead Of Fine Threads

Although you may not know it cellophane is lingerie in another form. The glossy transparent paper in which manufacturers are now wrapping their products. From shirts to cigarettes, is simply rayon or artificial silk, in flat clear layers instead of thin colored threads.

We are indebted to the "C-I-L Oval," the magazine of Canadian Industries, Limited, for this rather surprising bit of information Cellophane is our old friend the spruce tree, for we read

"Basically, cellophane is the same as artificial silk, differing from it only in the form it takes when it reaches the casting stage where cellophane is cast in a sheet while the silk takes the shape of fine threads."

The use of cellophane has increased enormously in recent years There may be some who think it merely a device to prettify things on the store counters, but that is only partly true, for cellophane is a moisture and dust-proof wrapper that has stood severe tests.

But the prettifying process has had remarkable results as well. A test recently carried out demonstrated that the increase in sales of certain cellophane-wrapped articles has been as high as 300 per cent. with 30 per cent. gains quite frequent One tobacconist firm recalled some brands of cheaper cigars, but later dressed in cellophane jackets and speeded their sale 100 per cent.

There is a cellophane age. More and more uses are being found for it. At the present moment some of the headdressest of women's hats are made of braided, colored cellophane. We haven't a doubt but that some day it will be used for other strong purposes, even windows, which will require the old proverb to read, "Those live in cellophane houses should never throw stones." So great is the belief of Canadian Industries, Limited, in cellophane that it has just erected a million and a quarter dollar plant at Shawinigan Falls.—Ottawa Citizen.

Cultivating Discontent

Women of Turkey have finally taken up their recent sisters' idea of reducing. Plumpness is no longer a feminine attraction there, and the campaign to retain "that girlish figure" and to reduce the waist line is growing. Dancing, tennis and walking are very popular, and once languid ladies who spent their days reclining on pillows are taking brisk walks along the streets of Stamboul.

PRINCESS MENTIONED IN HIS MAJESTY'S BIRTHDAY HONORS LIST

Above are seven of the recipients of honors at the hands of His Majesty King George on the occasion of his 67th birthday. Top, left and right: The Duke of York, represented near-admiral and also major-general and vice-commodore-in-chief of the Royal Navy, Army and Air Forces respectively, while the Prince of Wales is appointed honorary vice-admiral of the Royal Navy, air commodore of the Royal Air Force and honorary colonel of the Welsh Guards. Princess Elizabeth has been elevated to the Peerage; Charles Hapgood-Smith, Montreal, has been knighted; Donald Duncan, Ottawa, and Wilfrid Bolsterstone, Toronto, have been made Companions of the Order of the Bath; Wilfrid Bolsterstone, is made a Peer; Lord Inchcape, elevated to a Viscountcy; and the Hon. Mrs. Justice Avery, who becomes a Privy Councillor.

Gardening Notes

So Many Flowers To Choose From To Suit the Individual Needs

Even if our flower garden is small we should not contain our soil, we should not be discouraged After all, there is something that will fit in and do well and if it this adopting of our garden to meet our own individual conditions that adds so much pleasure to the hobby in permanently planting matters that is where there is shade from some building or fence the your round, tuberous rooted Begonias, paraise and wild flowers will do well In fact, they prefer this location to any other In partial shade, Clarkia, Annual Larkspur, Lupins, Nicotine, Phlox and Verbena should be grown. On poor soil, Portulaca is a favorite, as well as Alyssum, Sweet-scented Stocks Linum, Chinadolls, Calliopsis, Sunflowers, Schizanthus, Salpiglossis, Marigolds, Petunias, and many others These will also more successfully resist dry weather than most others For cutting purposes, we have a very long list to choose from, but should include Gypsophila, (Baby's Breath), useful for making up bouquets, Salpiglossis, Sweet Peas, Zinnias, Cosmos, Asters, Marigolds and Scabious. If we prize Fragrance, we should include Stocks, Nicotine, Mignonette, Alyssum, Sweet Suttan and Verbena In the evenings, particularly, a few of these will fill the whole garden with a delightful odour There are several hardy annuals which can be picked with long stems just before the blooms open and dried for winter bouquets. These include the Straw Flower, Statice, Acroclinium, Rhodanthe and many others.

Dahlias and Gladiolus should not be planted until danger from frost is past, but we have already planted fairly deep and it will be a week at least before the first shoots appear. Dahlias need a little frost when first set out, but not after they really begin to grow There is nothing to be gained anyway from too early planting, as then the bloom opens and dried for winter bouquets. These include the Straw Flower, Statice, Acroclinium, Rhodanthe and many others.

CHAPTER XXIII.—Continued

"No," he said slowly. "No. The boiling over part is done with—finished—over. . . . I'm going to take her away from him."

He spoke with a curious precision. It frightened Jean far more than any impetuous outburst of anger could have done. She made no answer for a moment, but her mind worked busily. She did not doubt the absolute sincerity of his intention. This was no mere overflow of mood of an angry lover, but the sane, considered aim and object of a man who has coldly by way of some long agony of thought, to a set determination.

"Do you mean that, Nick?" she asked at last, to gain time.

"Do I mean it?" he laughed. Then his hands gripped the arms of the chair and he leaned forward. I saw her—last evening after dinner. . . . Her shoulder was black."

A sharp cry broke from Jean's lips "Not—not—he hadn't——"

Nick nodded.

"He had struck her. There was one of the usual scenes when they got back from the Moor and he struck her. . . . I'm not sure that he has ever actually laid hands her. It's going to be the last" grimly.

Jean was silent. Her whole soul was in revolt against the half-cruel, drug-ridden creature who was making of Claire's life a daily martyrdom; the instinct to protect her, to succour her in some way, asserting itself with almost passionate force. And yet——She knew that Nick's way was not the right way.

"You mean to take her away?" she said at last.

"I'm taking my brother to see the doctor."

"Yes, he can fix—he is clever."—From Globe, Toronto.

"You, it must be the last time," she agreed But but, Nick your plan won't do, you know—"

Nick stiffened

"Think not," he said curtly "Can you suggest a better? Then, no Jean remained miserably silent Nor can I And one thing I swear I won't leave the woman I love in the hands of a man who is precisely a maniac to be tortured day after day mentally and physically just whenever he feels like it."

It struck Jean as curious that Nick had been able more or less to keep himself in hand when Sir Adrian in flicted upon Claire whatever of mental and spiritual torture seemed good to him, and she realized then that what he had hurt her physically laid his hand upon her in natural violence, which had apparently been the only outlet to the four winds of heaven. To Jean herself, it seemed conceivable that the mental anguish of Claire's married life had probably far outstripped any mere bodily pain Half tentatively she gave expression to her thoughts.

"God God" he exclaimed "If you were a man you could understand! I see you don't. I can't explain. But the striking the woman I love It it was sacrilege"

"I won't it be another kind of sacrilege if you take her away with you Nick?" was asked Jean very quietly

He flushed dully

"I'll answer for her, and then we shall marry" he answered

Even so steadily "It would be doing evil that good may come."

"Then we'll do it savagely "It's easy enough for you to sit there moralizing, perfectly placid and comfortable Claire and I have borne all we can. It has been bad enough to care as we care for each other and not to live apart But when it means that Claire is to suffer unspeakable misery and humiliation while I stand by and look on idly, it's beyond human endurance You're not tempted. You've no conception what you're talking about."

Jean sat very still and silent while Nick stormed out the bitterness of soul, recognizing the truth of every word he uttered — even the gibes which, in the headiness of his own pain, he flung at herself

Presently she got up and moved rather slowly across to his side.

"Nick," she said, and her eyes, looking into his, were very bright and clear and steady. Somehow for Nick they held the semblance of two flames, torches of pure light, burning unchangingly in the darkness. "Nick, every word you say is true. I'm not tempted as you and Claire have been, but I do understand and I am suffering But I'm only asking you to do what I pray I'd be strong enough to do myself in like circumstances. I don't believe any true happiness can ever come of running away from duty. And if ever I'm up against such a thing—a choice like this—I hope to God I'd be able to hang on to run straight, even if it half killed me to do it."

The quick, impassioned utterance ceased, and half shrinkingly Jean realized that she had spoken out of the very depths of her soul, crystallizing in so many words the utterance of mind and heart that had been in some strange, indefinable fashion it was borne in on her that she had reached an epoch of her life. It was as when a musician, artist-soul at end of a musical period, strikes a chord which holds the keynote of the remaining passages.

She faltered and looked at Nick bewilderingly, suddenly self-conscious, as we most of us are when we find we have laid bare a bit of our innermost soul to the possibly mocking eyes of a fellow human being.

But Nick's eyes were not in the least mocking.

Instead of that, some of the hardness seemed to have gone out of them, and his voice was very gentle, as taking Jean's two hands in his, he answered:

"I believe you would run straight, little Jean—even if it meant tearing your heart out of your body to do it. But, you know, you're always on the side of the angels—instinctively. I'm only a man—just an average earthy man"—smiling ruefully—"and my ideals all tumble down and sit on the ground in a heap when I think of what my life's enduring as Latimer's wife. I believe I might stick my part of the business—but I can't stick it for her."

"And yet," urged Jean, "if you go away together, Nick, it's she who'll pay, you know. The woman always does Supposing supposing Sir Adrian doesn't divorce her and refuses to? It would be just like him to punish her that way What about Claire then?"

He would divorce her protested Nick harshly.

Jean shook her head

"I don't think so Honestly I believe he would get embittered satisfaction out of the fact that as long as he lived he would stand between Claire and everything that a normal woman wants here and a sheltered life and the knowledge that no one can say things about her On Nick, Nick! Between you and Sir Adrian you'd make Claire's life or Claire make her's a worse hell with you than it is without you." She paused, then went on more quietly "Have you said anything to her about this told her what you want her to do?"

"No, not yet not definitely"

Jean breathed a quick sigh of relief

"Then don't Promise me you won't, Nick?"

"She might refuse after all," he suggested evading a direct answer.

Refuse' You don't see her better than that If you want Claire to make a huge sacrifice of herself for your benefit tomorrow, you know she'd do it! And and" laughing a little hysterically protested too, that she enjoyed the process—"you wouldn't. No, Nick, it's up to you to to just go on helping to make her life bearable, as you have done for the last two years "

"It's asking too much of me, Jean."

Nick spoke a little shrilly He was up against one of man's most primitive instincts—the instinct to protect the comfort and cherish the woman he loved.

"I know It's asking everything of you"

Jean waited. She felt that she had gained a certain amount of ground—that Nick's resolution had weakened a little in response to her pleading. But she feared to drive him too far She fancied she could hear steps crossing the hall below. If someone should come upstairs and disturb them now, while things were still trembling in the balance

"See, Nick." she began to speak again hurriedly "You know I'm your pal your and Claire's?"

"I know it," he replied quietly.

"And and you do care a bit about me?" smiling a little.

"You're the only woman in my world, Jean. After Claire and my mother."

(To Be Continued.)

Rug Mineral Acres

Progression Of Mapping and Exploring To Be Carried On This Year

An extensive programme for mapping and exploration of mining areas in Canada is being carried out this summer by the Department of Mines, Ottawa. Some of the most promising mineral areas in Yukon territory, the North West Territories, British Columbia, northern Saskatchewan and Manitoba, and in the Rouyn mineral belt of Quebec, were to be explored and mapped. Intensive investigation in several of the older areas will also be carried out.

A Queer Tragedy

One of the queer tragedies of life was enacted in the city of Paris when the first engineer who designed and built the Cunard pier was the only man to meet death there when it was destroyed by fire a few weeks ago.

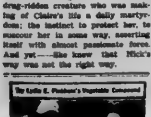
One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Exterminator.

An international exposition of decorative and modern industrial arts will be held at Milan, Italy, from April to August next year.

Sluggish Liver And Rheumatism

Both Corrected By Famous Vegetable Pills

"I received immediate relief from Carter's Little Liver Pills," declares Mr. Arthur P.* "I recommend them to sufferers from Rheumatism and Indigestion." Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels, Dr. Carter's Little Liver Pills are also beneficial for correcting Constipation, Acidity, Biliousness, Headaches and Poor Complexion. Nos. & 2 fic. not chgd. Sold everywhere.



"These she loves . . . are first so suffer when monthly pains shatter her nerves and tone. Colin E. Poulson's Vegetable Compound would ease that awful agony.

Eno Cleanliness Means Good Health

Water alone will not remove grime from your hands . . . you need soap, too. It's the same with inward cleaning . . . it takes more than a mere laxative to remove poisonous matter. That's why ENO'S "Fruit Salt" is so good for you. It helps to make and keep you healthy by thoroughly cleansing the intestinal tract. Take it daily, morning or night. But be sure it's ENO'S!

CaWa

ENO'S FRUIT SALT

Little Helps For This Week

"And there shall be no more death, neither sorrow nor crying, neither shall there be any more pain. For the former things are passed away" — Revelations xxi. 4.

Can the bonds that make us here

Know ourselves immortal,
Keep away, the fabric rupture,
At life's inner portal?
What is Death?
Must forever live and grow.

He who on our earthly path
His help and love doth show,
Who His Well-Beloved hath
Made our Elder Brother,
Will clasp the chain of love
Closer, when we meet above.

— Lucy Larcom.

God did not create spirits, and endow them with a knowledge of Himself, to allow them to forget Him after a brief space. He did not unite souls by the spiritual bonds of love only to sever them again forever — Eschokke.

In heaven hands clasp forever. — Greek Proverb.

Vocabulary Of the Crow

Birds Belonging To Tribe Are Very Versatile

H. W. Henely, writing in London Nineteenth Century, says: "One would expect the crow tribe, whose members are so full of brains and wickedness, to have a large vocabulary. The raven, who is perhaps the wisest and most mischievous of them all, is, indeed, very versatile in his language. I have written more fully elsewhere of some of his notes, so eloquent of his many-changing moods: it will suffice here to say that he can proclaim anger, alarm, humor, pleasure, inquiry, and even, by a kind of snort, disdain. Rooks are almost equally loquacious; they are credited with from thirty to forty different notes, and are even said to have evolved several "words." That they have a large and heterogeneous glossary anyone can testify who has listened to the extraordinary babel of sound which accompanies their going to roost and their nesting operations."

Professor Bahn appeals instantly to the dainty woman. Stimulating the skin, making it velvety soft in texture, it creates and preserves complexions of exquisite charm. Delicately fragrant. Cool and delightful to use. Especially recommended to soothe and dispel roughness or chafing. Stimulating and invigorating imparts a youthful loveliness and protects and enhances the most delicately-textured skin. Freeman Bahn is the unrivaled toilet requisite.

Times Have Changed

World Goes Far In Sanitation During Last Twenty Years

A rutabaga vessel by a school for the nobility of Saint Cyr, France, 20 years ago, was discovered recently. It shows how far we have come in the matter of personal cleanliness and sanitation since that time. Pupils at this school were entitled to one outfit of underwear, one pair of stockings and two handkerchiefs a month. The towel had to last a week without laundering. One foot bath monthly and three complete baths yearly, one each in May, June and July, were permitted.

Green Bay, Wis., has appointed its mayor, John V. Diener, official taster of foods sold by the city's welfare stores.

Left Large Estate

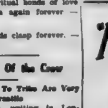
Heir Of Egmont Estate Valued At Two Hundred Thousand Pounds

The London Daily Telegraph says the Earl of Egmont, former Prideaux, Abs., rancher who was killed trying to jump from a runaway horse near Southampton, left an estate of £202,823.

The newspaper estimated the net value of the estate, after deduction of succession and other state levies, at £211,000.

The earl, who lived with his son in the kitchen of Avon Castle, left no will, and letters of administration, until further representation shall be granted, are in the name of the Royal Bank of Scotland at Edinburgh.

The earl's direct heir is his son, Viscount Perceval, a young man of 17 who could rope and break a colt with the best of the hands on his father's ranch at Priddis.



"I've just thrown out all my dust cloths

—because I've found how to do the work better, easier and quicker.

"I use Johnson's Wonder Paper now. You buy it in a neat package that holds very handily in a table drawer. There are large sheets for a quarter. When you use it, you simply crumple a sheet into a ball and go over whatever needs cleaning.

"I've never seen anything like Wonder Paper. It really cleans, cleans and polishes at the same time. It takes up dirt like magic, and so easily. And you can use both sides.

"What I used to loathe about dusting was the bother of keeping the dusters clean. I always used cloths and rolls of old clothes, and then—I'd be amazed to see I was eternally washing them. It worried me. But I never have to wash a bag or cupboard. They seemed so unnecessary.

"The beauty of Wonder Paper is that you throw it away when you've through with it.

"I can promise that you'll like Wonder Paper. It gives you time for things you'd much more entertaining than cleaning."

Special Offer

WONDER PAPER is made by the makers of the famous PARA-SANI Heavy Waxed Paper for the Green Box. Most grocery, hardware and department stores have *Applejord Wonder Paper* in stock. If yours hasn't, send us the coupon below and we'll give you a booklet entitled "Leftovers", containing one hundred recipes, as a bonus for your trouble.

ECONOMIZE . . . . . But ADVERTISE

A Great War!
A Great Pestilence!
A Great Depression!

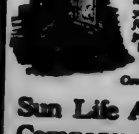
¶ ALL within twenty years. Could there be a more grueling test?

¶ Yet life insurance stands invincible. During that whole period it paid every obligation promptly and fully — as it has ever since the Dominion was formed.

¶ The Sun Life Assurance Company of Canada itself paid to policyholders and beneficiaries in cash during those periods—

The War (1914-1918)
The Flu (1919)
The Depression (1930-1931)

— over $226,000,000. It has paid to its policyholders and beneficiaries since formation nearly $600,000,000.



In prosperous life insurance is noticeable; in adversity it is indispensable. The protection of your home, the security of your business, the comfort of your old age, depend first on adequate life insurance.

Have you enough?

Edmonton Lunch Held At Josephburg Church Last Week Successful

* * * * *

The Edmonton Classis of the Reformed Church assembled on Wednesday the 14th of June 1932 at 8 p.m. in the Josephburg Reformed Church.

The opening sermon was preached by Rev. C. Reppert. After the sermon the session was formally opened by the President Rev. H. Wiersbrauch.

Rev. A. Wiersbrauch was re-elected as president.

The following morning the classis assembled at 9 a.m. The following officers were elected:— Vic. Pres. Rev. W. Korn. Standing Secretary Rev. C. Reppert. Treasurer A. Unterschutz.

Various committees were appointed and the work began in earnest.

Two days were spent in discussion on the following subjects:— Sermons, Education, Home and Foreign Missions, Mission Homes, Orphans Home, Sunday School, Finances, Social Services and Rural work.

At the sessions were present:— Rev. Wiesbrauch, Josephburg; Rev. C. Reppert, Stony Plain; and Rev. Korn, of Vegreville. The elders were Mr. J. Troedl, Mr. P. Gotha, Vegreville, Mr. Gerhard, Stony Plain and Mr. A. Unterschutz, Fort Saskatchewan.

Student E. Hennig also present after studying for ten years at the Mission House. He was examined by Rev. Korn and Rev. Reppert.

The Ordination and Installation of student Hennig took place Sunday, June 19th, the church being filled to capacity at the morning service. Rev. Wiesbrauch and Rev. Reppert performed the ordination and installation at the morning service.

At the afternoon service the church again was filled to capacity. The ministers who spoke were, Rev. Reppert, Rev. Hennig, Rev. Korn, Rev. Stanton, and Rev. Hauer.

A choir of about seventy-five which consisted of the choirs of the Edmonton Moravian Church, Bruderheim Moravian Church and the Josephburg Reformed Church favored the congregation with two songs. The choir being led by Rev. Hauer.

After the service a lunch was served in the basement to all the guests.

Town Council Holds Regular Meeting

* * * * *

A regular meeting of the Town Council was held in the Council Chambers last Thursday night. Present Mayor Montgomery, Councillors Simmons, Graf, Smith and Lalonde. The minutes of the last meeting were read and approved.

The following accounts were passed for payment:—Calgary Power Co., $132.75; light for streets and hall. Government Telephones $7.65; W. A. Graham $4.50; Jones, Graham and O'Brien $8.00 relief; Inland District Council for June $800.00; Record advertising $11.25; $20 Sexton Tex notices $8.35; 1000 Tax Notices $12.60; J. Lapenske work on streets $1.20; A. Jacobs 5lb repair. Meat for indigent 40c.

A By-Law was passed appointing Dr. R. H. Mason, Medical Officer of Health for the Town of Fort Saskatchewan.

Statement from Fort Saskatchewan School District submitted that approximately $6000.00 would be required for the current year.

* * * * *

More than 100 families from Saskatchewan cities have been sent out under the government land settlement scheme, to crown lands at Big River, Meadow Lake and Loon Lake districts in the north, and seven south of Battleford.

Mr. and Mrs. Tony Hemlich and sixth daughter of Vegreville are domiciled in the old Alton house for the summer months. We extend a welcome to the newcomers.

* * * * *

The home of Mr. and Mrs. Wm. Goldsbrough was the scene of a happy gathering on Sunday evening, June 12th, when members of the family and a large number of friends gathered to wish "Grandma" Goldsbrough "Many Happy Returns of the Day", on the occasion of her 79th birthday. Rev. Mr. Hodgins, Mr. W. Gillions, C. H. Fischer and Mrs. E. Warring on behalf of the U.F.W.A. brought greetings and good wishes, followed by friendly chats and singing of old hymns.

Mesdames A. and G. and Miss E. Goldsbrough served ice cream and cake. A beautiful three tier birthday cake graced the centre table on the lawn.

* * * * *

The ladies Aid are holding a lawn social on the recreation grounds on Friday, June 24th. Baseball and soft ball games will be played. Hot dogs and ice cream will be offered for sale.

* * * * *

Mesdames G. and B. Lawrence entertained the U.F.W.A. last Tuesday when plans were completed for the U. F. A. picnic to be held on July 12th.

A beautiful wool Afghan the work of Mrs. A. J. Whitson which will be drawn for at the picnic was shown and duly admired. This will be on display in the window of the Fort Hardware Co.

* * * * *

We note an item in Ymes Valley news last week which in the Record's opinion of your correspondent needs correcting. Possibly the Ymes Valley sceph was mis-informed as to the facts of the ball game between Partridge Hill and Ymes Valley Ladies, the score was Partridge Hill 27, Ymes Valley 29, and to clinch the matter we brought home the bacon. (Chocolates).

* * * * *

The sympathy of all in the district is extended to Mrs. F. Simmons and family in their recent bereavement.

* * * * *

A large number from here attended the funeral on Sunday and paid their last respects to an old neighbor and friend Fred Simmons.

* * * * *

Any store advertisement will pay, if it makes a visit to the store immediately worth while to the readers of this paper.

Town To Close Stores Wednesday, July 6th.

* * * * *

A largely attended meeting, with representatives from all over the district, in connection with the Fort Record monster basket picnic, was held in the Town Hall on Wednesday afternoon with Mr. G. T. Montgomery in the chair, when final arrangements were made, and the various committees appointed.

Everyone is welcome, and everything will be done for the comfort of the large number that is expected as Elk Island Park on the afternoon of the 6th of July. It is expected that Premier Brownlee, Hon Frank Oliver, Mr. Duggan the President of the Old Timers Association and a representative from the C.P.R., will be present and address the gathering An effort will be made to have the Mayors and Councils of the Towns of Fort Saskatchewan, Bruderheim, Lamont and Chipman declare a half holiday on the occasion.

There is a live committee in charge of the sports and good prizes will be offered for baseball, basketball, and other sports. A large committee was appointed to handle the parking arrangements, and this department is in capable hands. Up to date refreshment booths will be on the grounds, and there will be a plentiful supply of hot water ready for those who wish to make their own tea, etc.

Josephburg News

Rev. and Mrs. Korn from Brush Hill, and Mr. and Mrs. Long from Edmonton are visiting with Rev. and Mrs. Weisbrecht this week.

* * * * *

Mrs. Philip Mohr and children of Brush Hill are visiting here with relatives for a few days.

* * * * *

A very large crowd attended the ordination of Edmund L. Hennig on Sunday morning. The Junior and Senior choirs both rendered suitable songs.

* * * * *

Miss Emilie Dose, B.M. of Sedgewick, Alberta, has been holidaying for the past few days with Miss Mary Hennig of Josephburg. Both Miss Dose and Miss Hennig left on Tuesday evening on an extended trip which will take them to Banff, Vancouver, Victoria and then they will sail on the S.S. Princess Louise for Alaska, stopping off at the Wrangel Lake; Skagway; and other places of interest.

* * * * *

The home of Mr. and Mrs. Jacob Hennig of Josephburg was the scene of a large and happy gathering on Monday evening. The occasion was a surprise party sponsored by the Ladies Aid of the Josephburg Reformed Church, in honor of Rev. and Mrs. Edmund L. Hennig of Lowell, Wisconsin, U.S.A. who are holidaying at the Jacob Hennig home. The evening was a combined post-nuptial and farewell party for the newlyweds.

The evening was spent in a social way, during which time Rev. Wiesbrauch, in a few well chosen words presented the young couple, on behalf of the Ladies Aid with a handsome purse of money to be used for the purchase of a book-case in remembrance of their many friends in Josephburg.

Rev. Hennig responded with a few well chosen words, expressing their appreciation thanks to the donors. After this lunch was served to some 150 guests. The assembly then joined in singing "God Be With You Till We Meet Again", and then after bidding the young couple a safe and happy journey through life and joy and success in their life's work, the vast gathering broke up just before midnight.

* * * * *

The young couple were married at Plymouth, Wisconsin on Monday, June 6th, and spent part of their honeymoon at St. Paul, Minn. and at Banff and Lake Louise, arriving here on Saturday, June 11. They will leave for their home this evening Monday evening, and will stop off at Saskatoon, and Winnipeg enroute. Mrs. Hennig, before her marriage was Miss Ida M. Reinecking of Fly-mouth, Wis. She is a graduate of the Sheboygan High School, Sheboygan, Wis. and of the Manitou Bible Training College, Manitou, Man. For the past few years she had been employed in the office of the Wisconsin Telephone Co. at Sheboygan, Wis. Rev. Hennig is a native son of this district. He graduated from the Mission House Seminary at Plymouth, Wis. this spring with the degree of Bachelor of Divinity. Last Sunday morning he was ordained into the ministry in his home church at Josephburg. He will now take over the pastorate of the First Reformed Church at Lowell, Wis., which he has been serving as acting pastor for the last two years. He preached in past few years she had been employed in the office of the Wisconsin Telephone Co. at Sheboygan, Wis. in English. This coming Sunday he will preach in the Beaver Hills United Church in the morning.

Prices Are Low

Now, when your home needs so much, the time is ripe to improve and repair all the little things about the home you have been needing so long.

The veranda is a welcome addition to any home, or pothaps to screen, or glass in the open one you now have.

How convenient it would be to have that closet in back porch, to take care of so many things that now are always in the way.

Could you afford to have any of these? Let us tell you the cost, you may be surprised.

Finest quality for 40 years has built the largest sales in North America.

The Imperial Economic Conference

The Imperial Economic Conference, shortly to be convened at Ottawa, is unquestionably one of the most important gatherings ever called in the history of the British Empire. In fact it may easily prove to be one of the most important in the economic history of the whole world, because, whatever decisions it may reach will affect not only the British Commonwealth of Nations, but all nations.

There will be assembled together all the leading governing statesmen of the Empire, supported by the strongest possible groups of financial, economic, commercial and other experts that the Old Country and each of the Dominions can gather together For months past these statesmen and experts, assisted by small armies of lesser experts and advisers, have been compiling and studying trade and monetary statistics, weighing the effect of this and that, probing as never before into the productive capacities, primary and industrial, of their countries, the natural resources, the state of employment, the requirements of their respective populations, the probable and possible trend of future developments and the extent thereof, and the effect of existing policies and possible future policies upon all these matters which center into national and Empire growth, prosperity and strength.

And the object of it all is to evolve, if possible, new policies acceptable to all parts of the Empire, and which will prove of mutual advantage to all, and having as their objective the encouragement and development of the ultimate volume of Inter-Empire trade. This means that the possibilities and the requirements of each part of the Empire must be ascertained, must be appreciated by all the other parts, and the whole down-dated together to the advantage and unity of each component part, and of the whole.

It becomes at once self-evident, therefore, that one of the major tasks confronting the Conference will be to find ways and means of removing existing barriers to the free exchange of commodities between one part of the Empire and other parts, to the mutual advantage of both, and without, in the process, working injury to any part. While the Old Country representatives, and the representatives of each of the Dominions must, of necessity, give paramount heed to the interests of their respective nations, it is an essential to the success of the Conference that this be done in no narrow, selfish spirit, but in such a way that while benefitting their own country they likewise consider as far as possible the interests of the whole Empire.

This does not mean that the spirit of approach to the intricate problems calling for solution should be one of making sacrifices; rather it should be in the direction of striving for mutual advantages. In fact the word "sacrifice" should be entirely absent from the Conference, while the term "mutual advantage" should be very much to the fore in a word, the dominating ideal should not be that engrossed in such slogans as "British First," "Canada First," "Australia First," but, on the contrary, it should be an adaptation of the motto of the Three Musketeers, "All for One, and One for All."

Along with the removal of existing barriers, and a mutual understanding or agreement that no new barriers will be erected, there must naturally develop policies designed to make ever easier the flow of trade into and out of all parts of the Empire to all other parts. This may involve the ultimate creation of a new system or method of monetary exchange, even an Empire currency. It would seem to be essential that some system be developed whereby the currency of any one part of the Empire should always be on a par with the currency of all other parts; in a word that the gold exchange standard should apply at all times throughout the Empire, and that, for example, at no time should the Canadian dollar be at a discount with the British pound, or vice versa. The guarantee of such is obviously essential, undoubtedly to of tremendous assistance in establishing and maintaining Inter-Empire trade at a maximum, removing, as it would, much of the uncertainty and loss which now prevails.

If the forthcoming Conference can achieve a measure of success along these and other lines having the same general object in view the beneficial effect upon all parts of the British Empire will be almost incalculable. Not only so, but no other trading nations could afford to ignore such a development. The breaking down of trade barriers within the Empire would quickly force the breaking down of trade barriers by all other nations. It would be the beginning of a reversal of the suicidal policy which the world has drifted and which has resulted in an almost complete paralysis, or destruction, of international trade and commerce, ending in the present state of world depression, unemployment, suffering and hardship.

Canada may well be proud if, from their national capital, there is evolved a new economic policy for their Empire and the world. That this should emerge from the Conference should be, and we believe is, the fervent hope and prayer of the Canadian people irrespective of any minor political differences of adherence to special of schools of economic or fiscal thought.

Buy Locally

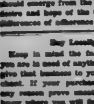
Keep in mind the fact that when you are in need of anything it pays to give that business to your local merchant. If purchases should be made in any reason prove unsatisfactory you know where you will feel free to get the material rectified. The door-to-door salesman is here today and gone tomorrow and has no stake in the community. Why patronize him.

Seasonal Ailes

Dr. A. Gundacheau, of Paris, makes use of a principle of physiology and injects sucrose and seasoning directly into the blood stream of his patients. He says the aids the flavoring in restoring the meat and in no way is necessary on cooking the food.

Air service between Cuba and the Isle of Pines is harrowing.

Pains in Stomach and Bowels So Bad Would Have To Sit Down



Mrs. C. Landry, Moncton, N.B., owner—"I am certainly recommending Dr. Pierce's Discovery of Wild Strawberry for cramps or pains in the stomach and bowels.

"Last Summer I had such awful pains in my stomach, and those pain of my bowels, at times, I would have to sit down. I had "Dr. Pierce's" so was soon relieved.

"When my children were small I always kept a bottle in the house and it helped them wonderfully whenever any of them had stomach complaints."

Lush Upheval

Contour Of Island In Boiling Sea Is Changed

As instantly leaving one island, population[illegible] only by a herd of immense sea lions and great flocks of birds, flogged, has given Father Bernard R. Hubbard what he declares to be proof of how volcanic islands "grow".

A great steaming mound of lava, he said in a message sent to Seward, has been pushed out of the earth and has changed the contour of one section of the island completely. The mass is apparently increasing in size.

The "growth" is taking place, the Santa Clara University professor managed, at a place where formerly a narrow[illegible] existed.

His observations were made on a voyage from Bristol Bay with his party on the ice[illegible] "Polar Bear." Despite storms and high seas, a successful landing was made.

Death Of Pioneer

Col. Herbert Bruford, Veteran Of Red River Rebellion, Dies In Winnipeg

Col. Herbert Bruford, veteran of the Red River Rebellion of 1870, and the North West Rebellion 15 years later, died recently in Winnipeg at the age of 85.

Born at London, England, he came to Canada with his parents as a boy and settled in Suffolk, with the Wellington Rifles at Guelph, Ont., when Lord Wolseley was forming his expedition.

Following service, Col. Bruford operated steamboats on the Red and Assiniboine Rivers here Later he was appointed chief engineer of the Northern Pacific Railway in Winnipeg. For several years he occupied the position of assessment and returned to Winnipeg only six months ago.

No Food-Proof Rule

Mushroom Hunter Must Depend On Knowledge Of Species

The public's desire for a fool-proof rule by which to distinguish an edible mushroom from a poisonous one is the subject of a pamphlet recently issued, Dr. Fred Reaver, curator of the New York Botanical Gardens, said in a lecture at New York.

"There is no such rule," he stated. "One must learn to know the mushroom species, as one learns to know would your friends from your enemies."

Dr. Reaver said that to the mycologist, or student of fungi, there was no significance in terms "toadstool" and "mushroom."

"Toadstool" is an edible toadstool or a toadstool is a poisonous mushroom, whichever way one may wish to put it."

Wheat May Vary

Women Graduated Over Half Century Ago Just Have Good Reunion

An 86-year-old woman, who waited 46 years for her diploma, received it at Huron College convocation. The woman was Mrs. Sibyl Chase Bullard, of Minneapolis, Minn., who completed the course at Huron in 1887, but failed to receive her degree because the college did not then confer them on women. It now is a co-educational institution.

Unless women be expelled from the system, no child can be healthy. Mother Eleanor Women Reformatories an excellent means to destroy crime.

Slightly Mixed

The president of a certain university was preaching on "Faith." "Faith," he declared, "is a[illegible] way."You have blind faith in the physician," he gives you medicine to take tells you to take it. 'Yours not to reason why; yours to do and die!' Almost equal to this is the story of the minister who solemnly warned his congregation that "Many persons have one eye on heaven, while with the other they are listening to the gossip of the earth."

Keep Health the Eno Way

You do not have to use drastic and strong cathartics that cause irritation. ENO'S "Fruit Salt," by gently and safely ridding the intestinal tract of poisons, will help to make you and keep you healthy. A dash of ENO in a glass of water every morning or night prevents the evils of constipation. Be ENO conscious!

ENO'S FRUIT SALT

Reduced Freight Rates

Lower Rates For Livestock In Quantities Less Than Full Carload

Reduced freight rates for the movement of livestock in quantities less than full carloads are being established by the railways, according to an announcement made by the Canadian Freight Association. Heretofore a livestock shipper has been required to ship or pay for 36,000 lbs in the case of cattle, and 16,000 lbs in the case of hogs and sheep in order to ship under the carload rates.

The new schedule will provide for additional rates subject to minimum weights of 12,000 lbs. and 6,000 lbs. in the case of cattle, and 11,000 lbs. and 4,000 lbs. in the case of hogs and sheep. The rates for the smaller carlots are somewhat higher than for the full cars, but they will give the shipper, who has not sufficient stock available to make up full cars, an opportunity of getting his smaller quantities to the markets by rail.

The new rates will apply to matter contrary from points in the prairie provinces within a radius of 200 miles.

It will be permissible for cars to be stopped at one intermediate point in transit for completion of load at a charge of $2.00 per car In making the announcement, the Canadian Freight Association stated that the new rates are in the nature of an experiment for one year.

Persian Balm the ideal toilet requisite for every discerning woman. Delightful in results. Creates complexions of rare beauty and charm. Delightfully cool and refreshing. Never leaves a vestige of stickiness. A velvety smooth balm lasting and effective. Making it truly "Summer-ized" in heat. All druggists invariably choose Persian Balm. It imparts that subtle distinction so characteristic of the elegant woman.

A Prison By Land

New York Has Last Word In Solitary Confinement

New York papers gave a bit of space the other day to the opening of a new prison. It was, in fact, a considerable social event, and one Gotham reporter wrote that "the list of guests would do credit to one of society's best publicized debutantes." This, it appears, is a sort of prison we do hear. Erected on Manhattan's Welfare Island, it is to be a house of detention for women, and judging from the description, it will never be much bothered by attempted escapes. Hot and cold water in every cell, shower baths, metal mirrors, a radio in every ward, the blessed place sounds as palatial as one of Canada's new observation cars.

Douglas' Egyptian Liniment is a quick, certain remedy for Head Ache or Throat. Four or five applications are usually enough.

Consider the Dandelion

It never fails to arrive on time. Whatever its environment, it gets to the top.

Whether in a lawn or a hayfield it rears its head above all surrounding vegetation.

It does not submit to circumstance. It overcomes them.

It refuses to accept defeat. If cut down it rises again.

It thrives on cultivation.

It is fiercely proud that its "yellow" is not the color for a quitter.

In 1929 the total number of deaths from cancer was 111,929.

40th Anniversary Of Salada Tea Company

Forty years ago this month in an unpretentious little building on Front Street in Toronto, the Salada Tea Company packed its first pound of tea. Founded in 1892 by the late Hon. Senator Peter Larkin, the business progressed very rapidly and by 1895 a branch had been opened in Montreal. Two years later the United States market was invaded and an office opened in Boston. To-day, three of the largest and finest warehouses in the world, devoted exclusively to the packing of tea, stand as a memorial to the founder Toronto, Montreal, and in Boston, the scene of the memorable tea party which precipitated the Revolutionary War!

The Canadian market was then supplied with China teas, Canada being the largest sole buying China tea of good quality. These teas were being sold from chests, exposed to air, dust, dampness, foreign odours, and as forth, all detrimental to the quality of tea. In England, which was still in the greatest tea-drinking country in the world, Ceylon and Indian teas of fine quality had practically displaced China teas, and were introduced to Larkin that Canadians also would prefer these fine teas. He, consequently, introduced a Ceylon and Indian blend to the Canadian public then conceived the idea of packing it in metal packages, in order that it would reach the consumer intact, with its flavour and quality unimpaired by dampness, store odours, etc. This step revolutionized the tea market on this Continent.

He sought a name for his product and on "SALADA" which was the name of an old Indian tea garden. All that was left now was to tell the public about it. He wisely decided that the quickest and cheapest way to do this was by means of the newspaper. The result was to create a demand for Salada Tea which the newspapers at his chief advertising medium to-day.

He strove always to give the public the best quality he could at the price and then advertise it for all he was worth. His achievement is the largest selling package tea in North America.

Stop the Cough. — Coughing is caused by irritation in the respiratory passages and is the effort to throw off obstructions that come from inflammation of the mucous membranes. Treatment with Dr. Thomas' Eclectric Oil will allay the inflammation and so relieve the cough will usually stop. Try it and you will be satisfied.

Disarmament Responsibility For Its Ultimate Solution Rests Primarily With the Great Powers

Disarmament was a political problem and the responsibility for its solution rested primarily with the great powers, Sir George Perley, declared at Ottawa. Sir George, who handled the Canadian delegation to the Geneva disarmament conference was addressing a joint gathering of the Ottawa branch of the League of Nations Society, the National Council of Women, the Women's Canadian Club of Ottawa, and the Canadian Club of Ottawa.

Efforts towards that end, he stated, had been initiated and carried on at Geneva by private conversations among the representatives of the nations chiefly concerned Many things had occurred to interfere with and prevent the success of the recent deliberations There were the elections in France, the illness of Premier Ram ay MacDonald, the necessity of United States Secretary of State Stimson returning to his country, the precarious position of the then German Chancellor Herr Bruening which had only recently resulted in his resignation. Much had been done in spite of circumstances, Sir George said in voicing his belief in the work of disarmament and the League of Nations.

A most important resolution on qualitative disarmament had been passed at the Geneva gathering by unanimous vote to the effect that any armaments which were found to be either aggressive in character or particularly destructive in their effects should be removed from national control.

The technical work of the conference was still progressing, Sir George stated, and political conversations would be resumed later when it was hoped conditions would be more propitious for further progress towards the objective which all so greatly desired.

"Discussion and not sentimentalism must be the bread, fundamental basis for the development of international good will among nations," the permanent peace and to disarmament," declared Miss Winnifred Kydd, Montreal, president of the National Council of Women of Canada, and one of Canada's three delegates to the conference.

Miss Kydd dealt with the preliminary work of the Conference sub-committee on moral disarmament of which she was a member, and which was the name of an old Indian tea garden. All that was left now was to tell the public about it. He wisely decided that the quickest and cheapest way to do this was by means of the newspaper. The result was to create a demand for Salada Tea which the newspapers at his chief advertising medium to-day.

He strove always to give the public the best quality he could at the price and then advertise it for all he was worth. His achievement is the largest selling package tea in North America.

Making Final Test

Hard-Headed Activities Of Wheat Being Tried Out

For the purpose of considering and advising upon the solution of urgent problems of agriculture all the major divisions of Canada the Maritimes, Quebec and Ontario, the prairie provinces and British Columbia, there has formed national advisory committees on agriculture of the National Industrial Council met in Ottawa.

Dr H M Tory president of the council, attended the meeting of commission and co-ordination in working out national problems.

D. Robert Noxon a prominent broker of the business of handling and exporting wheat, is one of seven or more grains trade in the last decade through research organizations working in cooperation.

He stated that rust-resistant varieties of wheat from all the agencies which developed them has been sold for final test. Those selected are being tried out at numerous points, and the resulting grain is to be studied by experts of the Dominion Department of Agriculture and the three provincial universities in the west.

The grain research committee since its inception has undertaken several important investigations. The visiting Noxon and there was now in progress the final report on the investigation of the drying of grain Canadian wheat crops by all points likely in urine."

Numerous complaints regarding the effect of the combines method of harvesting and threshing resulted in the inauguration of an elaborate investigation.

Relining Old Vessel

Clipper Ship Built In 1856 Will Sail Again

The day of wooden ships and iron men has not yet gone by.

The bark "Carmanagan," once "Queen of the Isle Clippers," has sailed for Bath, Me., to be fitted out in the same magnificent style in which she established a sailing record between London and Calcutta years ago.

Radiant, the then full rigged clipper ship will sail out of Boston to again engage in trade with Africa.

She has noted among her doings over the same route. Her crew has churned waters of the Arctic and the tropics and she has survived hurricanes and typhoons. It became the boast of the New England clipper ships still in service.

A syndicate headed by C. Nelson Rogers of Boston recently purchased her and she will return to that port where nobody ships were launched and stepped into place at the Bath Iron Works, Bath, Me. At Boston she will take on a cargo for a trading voyage to Africa.

She was built at Dumbarton, Scotland, in 1876, and was awarded a gold medal by the Institute of Naval Architects of London for the most beautiful lines of any clipper ship then built. The "Carmanagan" established a record of 69 days between London and Calcutta and the record has never been lowered by a sailing ship.

Her return to Boston will be engaged in the packet trade between New Bedford and the Cape Verde Islands.

Interesting Discovery By Archaeologist

Finds Another Secret Passage In Old Palestine City

Sir Flinders Petrie, the veteran archaeologist who has unearthed many of the secrets of the past, is still actively excavating at Old Gaza, the great city of Palestine which was well known to Abraham The latest announcement in connection with his work in the discovery of another secret passage leading from the city out into the desert. A great tunnel, leading under the walls and nearly 300 yards out into the desert, was found last year, and constitutes but one of the many features of the fortified city which military experts do not yet fully understand. Sir Flinders estimates that it will take another 50 years to excavate the area yet to be explored.

Emissaries Of Scottish Commerce Receive Splendid Reception On Their Recent Visit To Canada

When the emissaries of Scottish commerce and industry came to Canada recently they found a reception that far exceeded their most optimistic hopes. Sir George Paish, the famous British financial firm, emphasized this last point "in an address to 50 of the business men gathered to welcome the mission

"The trade between Montreal and Glasgow cannot continue at one way trade," he stated. "All that Scotland needs is a reciprocal trade Canadians must realize that they have to buy to Glasgow if they would continue to sell there."

There is change were not nearly numerous enough, however, to rob any possibilities of a smile. They were representatives of the old Historic Scotland, eager to tell her romantic story, to welcome those of Scottish descent, and they were legion and give them news of home Afternoon and evening they were busy and by men and women who sought help in locating the tartan worn by their forefathers. They became the centres of impromptu re-unions of Scottish Canadians, many of whom followed the highland accent to regain temporarily a dominance in their speech which it had lost long years ago.

Referring to this cordial atmosphere, a remark made by Sir Wm. Mavor, British Trade Commissioner at Toronto, who was sent over to Scotland to open the way for the visit of the Trade Mission and was closely associated with it throughout its stay here, is significant.

"Had the mission come here merely on a hard business basis it would not have met with anything like the success it has attained," he remarked in the course of a personal interview "It was lifted to a higher plane by the spirit in which it set out and the spirit in which it was received here. It may be said that the spirit of Scotland was strikingly personified in the kindly personality of the mission, His Grace the Duke of Montrose, whose presence contributed greatly to the splendid impression left in Canada by the Scottish Trade Mission."

Clad in kilts and sporran and the plaid of their tartan, the pipers played and swaying, among other images, that of the Knights of Nova Scotia, harbouring the plan, which has since materialized, for the colonization of Canada three centuries ago, the Duke captivated Canadian business men when the members of the mission were busie in leading Montrealers and Torontonians in the Highland fling and strathspey.

Of more practical significance were books to leading Montrealers and Torontonians in the Highland fling and strathspey.

Of more practical significance were books to leading Montrealers and chairmen and trade officials throughout the capital.—Agricultural and Industrial Progress in Canada.

Norfolk Fishermen Are Superstitious

Claim Weather-Vane Replacing Cross Brings Bad Luck

Mariners are notoriously superstitious.

The local governing council of Crosbie, the agreeable little township on the Norfolk coast, is respecting the superstition of the local fishermen in regard to a weather-vane depriving a large cross which crowned the church by the council The fishermen say the weather has been consistently bad since the vane was put up, and they have not been able to catch as many crabs and lobsters The cross, they assert, is "a bird of ill-omen," and an emblem of bad luck.

In deference to these representations the vane to to be taken down and a new one, depicting a ship in full sail, is to be set up

WORLD HAPPENINGS BRIEFLY TOLD

The National Government has undertaken with a group of former military aviators to develop a Chinese air force.

Amelia Earhart received the Order of Leopold from King Albert of the Belgians in recognition of her solo flight across the Atlantic.

On her first trip through the Strait of Belle Isle this season, the Canadian Pacific liner Empress of Britain again broke the record for Atlantic crossings.

Col. Herbert Swinford, veteran of the Red River Rebellion in 1870, and the West Rebellion 15 years later died in Winnipeg at the age of 91.

Prof. J. W. Gregory, Scottish geologist, and head of a scientific expedition studying earth movements in the Andes, was drowned recently, a brief Ottawa report said.

The total value of output of the British Columbia Fisheries in 1931 was $11,500,000, compared with $10,500,000 in the preceding year, according to a report issued by the Dominion Bureau of Statistics.

The fruit bill of the United Kingdom went up by nearly £22,000,000 last year, according to a report issued by the empire marketing board, with oranges for the first time in history proving the popular leader. Apples, millions of which came from Canada, were second.

Nearly 7,000 persons were killed and more than 30,000 injured in road accidents in England within the last twelve months, according to parliamentary returns. In London Metropolitan Police District alone, 1,332 persons were killed and more than 2,400 injured.

British Columbia lumbermen will send a trade delegation to China in October with that country if a reciprocal pact favored by Hon. Malcolm Langford, Minister of Lands, is concluded, the British Columbia Lumber Manufacturers' Association is adopted.

Red Rock Discovery

Vegetarians Healthy But Slow in Growing Body Hair

Experiments running over two years have been concluded at Kansas City where a professor has been observing the vegetarians and comparing them with meat eaters. He finds that the vegetarians do not generate body heat and energy as quickly as meat eaters, reaching the climax at 10 per cent. The vegetarians, he said, do not appear to be more active or intelligent than meat eaters, nor are they prompt to become sick. Apart from generation of heat he could see little difference in the two plans of diet.

PERSONAL

SCOTTISH LADY AT PRESENT IN Canada, would like to take in charge one or more young ladies, for experience in travel abroad, and other Canadian girls. Could act or accompany to lady, to any part of Continent or as travel companion. Has excellent testimonials both in Canada and in Britain. Would willingly give more information to interested party.—Apply Box 33, Winnipeg Newspaper Union, 270 Mulberry Ave., East, Winnipeg, Man.

Special Fellowship Awards Announced

Are Among Winners

The school of graduate studies in the University of Toronto, has announced awards of special fellowships open to graduates of other Canadian universities. The successful candidates are:

J. R. Dennis Beall and Miss M. J. Fraser, University of British Columbia; H. M. Chisholm, Dalhousie University, Halifax, N.S.; E. O. Beattan, University of Saskatchewan.

New Discovery Valuable

Makes It Possible To Evaporate Platinum Like Water

Platinum is caused to evaporate like water by a discovery announced from the California Institute of Technology. This precious vapor, probably the world's highest-priced mist, condenses into unrecognizable thin films upon a wide variety of materials. It costs them virtually permanently. Gunsmiths then dew it will cover fibres, converting them into platinum. Glass threads that seem made of pure platinum.

$22

A HOUSE TO STRUT WORKS—THE ADJUSTABLE SLIP

No wrap-over front makes it shadow proof.

There isn't anything more essential for a dressmaker than a perfect fitting foundation slip.

Study carefully whether the breadth of the figure and dress is generally.

There is a narrow mesh that clings to the figure and is suitable for the tight fitted dress of the moment. It is brought about by the bias cut that is in keeping with the slip to suit its wearer. The wrap-over fronts allow plenty of freedom for the bosoms, and still retain the straight lines of the slip.

And to make it fit you'll be pleased at its simplicity. Cut it out and practically you'll adjust it to your figure after the sides and shoulder seams are closed.

Style No. 3251 is designed for sizes 34, 36, 38, 40, 42, 44, 46, 48 and 50 inches bust. Size 36 requires 4½ yards of 39 inch material.

Price 15 cents in stamps or coin (coin is preferred). Write plainly.

WRITING WINS AUTOMOBILE

F. L. C. Bell, general superintendent for C.N.R. Montreal district, congratulating C.N.R. brakeman Donat Cyr, of Montreal, after Cyr has received a new automobile the prize he won when F. D. Jacob, for 15 years Dominion Ornithologist, and other judges decided Cyr's writing was more interesting than any of the thousands submitted in the Imperial Tobacco's first series of contests wherein competitors wrote on the inside surface of Turret cigarette packages. At the left is W. R. Tingle, director of the tobacco company; A. Desrosiers, also of the Imperial Company; J. E. Gilmour, superintendent for C.N.R. Montreal district, and the winner himself, Antoine.—Photo, Canadian National Railways.

Contract Bridge

By Sheridan A. Elliott, The Canadian Club, Toronto

In my last article I discussed the Official System of Contract Bridge from the standpoint of the founder of the system. Difference between it and the Approach-Forcing System Today's article has to do with the so-called One-Over-One variation of both systems. The One-Over-One was been developed by Geo. Reith of the Knickerbocker Whist Club, New York. Many of the members of the club have assisted in bringing the system to its present state of excellence. The Four Horsemen of Bridge, i.e. Mel Sims, David Burnstine, Wilfred Kerr, and Oswald Jacoby use this system and have won many national and sectional championships. Whether their winning has been due to the One-Over-One or to the fact that all four of these men are master players, is not certain. However, it is probable that the system and hand have been masterially in their successes.

The salient features of the One-Over-One are as follows:

1. The Opening Bid of One has practically the same undertakings requirements as The Approach-Forcing System, i.e. the assumption of a strong distributional hands, i.e. two suiters, the bidding may be opened with less than two and one-half honors, or tricks. An example of this opening would be the following:—Spades A J 9 7, Hearts K Q X X X, Diamonds X, Clubs X X.

2nd. Provided there is no intervening bid and the partner of the opening bidder responds with a bid of one other than one no trump, this response is definitely forcing and demands that the original bidder keep the bidding open for at least one more round. The difference between the Approach-Forcing and the One-Over-One is that any bid which is forcing in the Approach-Forcing System requires that the bidding be kept open until a game contract is arrived at while the One-Over-One forces simply requires that the bidding be kept open for at least one more round. Example: If the opening bidder bids one diamond and second hand passes, and if the opening bidder's partner bids one heart, the original bidder must bid again. The advantages claimed for this opening by its advocates is that the partners may feel out each other of their respective holdings at low bids, and also that this method of bidding gives both the strength and weakness of the bidding hands. Where the one and one bid system is always the chance that the opponents will make a defensive bid and find themselves caught between two fires of opposing pathetones with the result that they suffer a substantial penalty.

3. The opening bid of two in a suit is based on having trumps and not on honor tricks. In other words a two bid is made on hands which absolutely ensure the partnership of game even if the partner of the two bidder has a complete "rust." The type of hands which lend themselves to this bid are usually powerful two suiters or a very powerful one suiter. Example: Spades Q J 8 7 6 5 4, Hearts A K X X X X, Diamonds X, Clubs X. In this hand even with a six spot high in partner's hand, game is assured, as the original bidder has only three losing tricks.

4. The opening bid of three in a suit is a definite slam signal. It is a stronger bid than the two bid and demands that the partner of the three bidder bid a suit of which he has the ace. If he has no ace, he makes the conventional response of three no trump.

Example: Spades A K Q J X X, Hearts A Q, Diamonds X, Clubs A K Q X. If after a three spade bid the response is four diamonds slam is definitely assured in spades. This is the only situation in any of the systems so far discussed where ace showing is countenanced.

5. In all other situations except those outlined above, the One-Over-One has no variations of consequence from the Approach-Forcing System. The weak no trump response is used to show a balanced one to two trick hand. All no trumps bids other than jump no trumps and original no trumps are used to definitely measure your quick trick strength and in almost every case the no trump bid shows a minimum holding. However, in the One-Over-One, many users of the system like to make an opening bid of one no trump on a strong hand. If one no trump is bid and partner responds with two no trump the original bidder can guarantee enough extra value to rebid to three. In other words the contract is either one no trump or three no trump. The hand, provided there is no adverse bids, is never played at two no trump. In most bids of the opening bid is one heart and partner responds with two hearts the original bidder either passes or bids four hearts, never three. In major suits therefore where no interference bidding occurs, the contract is either two or four. In the minors it is either two or five.

It is probable that the intelligent use of this system requires greater experience than the use of the other systems. It is certain, however, that in the acid test of keen duplicate competition, the users of this system have been extremely successful. Whether their winning is due to the system or to the fact that they are master players is, amount of other systems, a mooted question.

The next article will deal with variations and their variations.

Had Original Ideas

New South Wales Bandits Out After Big Booty

These are days of mysterious accidents, peculiar robberies and dastardly crimes of all descriptions. But one could not help but smile at the news despatch from Sydney, N.S.W. There bandits stole a brick wall 20 feet long and six feet high. Others took 30 locomotives all excepting the frames, while still others carried off part of a church. This story is to be explained by the issue of one of the "rackets" in the United Nation where high-powered thieves will back a moving van up to a house or an apartment and if nobody stops them, take the entire furnishings in one trip.

Keeping one's possessions is not as easy as it used to be, not even on the farm in the days when export meant right.

NEURITIS HAS GONE!

Banished by Kruschen

"I had acute neuritis in the shoulder and neck arm, due to exposure to bad weather," writes the Rev. M. K. Y. "It was impossible to lift the arm to dress or to use it in any way and of course, the pain was dreadful. All external applications were useless. I got it completely removed again by keeping the parts affected warm and taking Kruschen. Of course, knowing Kruschen as a founder of best water. It took nearly a month but every vestige of neuritis has gone."

Neuritis is typical of a dozen other complaints—some minor, some very serious—which all result from long impurities in the blood. And it is Kruschen blood, circulating all over the system and setting up inflammation in the tissues, that causes these excruciating pains.

Kruschen salts can be safely trusted to get the matter right. Bottles of Kruschen contains just what Nature needs to personally your internal organs back into a healthy, normal condition.

FAVORITE CHARACTERS IN GENESIS

Golden Text: "We know that to them that love God all things work together for good, even to them that are called according to His purpose." Romans 8:28.

Devotional Reading: Hebrews 11:6

Lessons From the Life Of Abraham

The importance of Abraham is evidenced not only by the number of chapters in Genesis devoted to his life but to the many references to him and his faith, both in the Old Testament and the New. Faith was the outstanding trait of Abraham. He was the first, so far as we know, to venture on a venture with a purpose in mind. God and communed with Him and his beautiful title is "The Friend of God."

Jehovah appeared to Abram, and said unto him, I am God Almighty" (is the story of Abraham we are the easier to see God displace the unreverent belief of his time in many gods. In the words of Basil King, "To Abraham the new understanding came with a great marvel. With a God who is Almighty anything was possible. If he were, then a covenant more than an enthusiasm, it became a burning and consuming faith which he could test to its uttermost. His God entered a covenant with him and his beautiful title is "The Friend of God."

Jehovah appeared to Abram, and said unto him, I am God Almighty" (is the story of Abraham we are the easier to see God displace the unreverent belief of his time in many gods. In the words of Basil King, "To Abraham the new understanding came with a great marvel. With a God who is Almighty anything was possible. If he were, then a covenant more than an enthusiasm, it became a burning and consuming faith which he could test to its uttermost. His God entered a covenant with him and his beautiful title is "The Friend of God."

Abraham's message followed messages, as great perceptions broadened into greater ones. He learned that gain on his own personal account was not going to the world at large. He was the first abram we know anything about, the first to whom the word of Jehovah came in Ur of the Chaldees. God for himself could only be good in proportion as they, far into the future, should share it. Because he obeyed the Voice, not only he but others would be blessed. That a single right act is an universal asset. That because he was right, all the nations of the earth shall be blessed, was one of his great discoveries."

In Search Of Treasure

British Adventurers Locate Sunken Spanish Galleon In Southern Seas

A band of British adventurers who are seeking Spanish treasure made contact, recently, with a galleon on the bed of Chaguaramas Bay, Trinidad, which they hoped was crammed with gold ingots and precious jewels.

The operations have been directed by a "diving spring" owned by Frank Cooper, one of the leaders of the group, who crossed the Atlantic recently in the "Vigilant," a tiny vessel, in the hope of making a great fortune.

It was reported that on the "Vigilant" the men during over the bay, the "diving spring," held in Cooper's clenched hands, leaped from his grasp.

Chaguaramas Bay has long been looked upon as a place where treasure might be found.

It was there that Sir Francis Drake defeated by the British in a decisive naval engagement near the end of the eighteenth century. The legend is that the Spanish fleet contained one vessel loaded to the rails with gold and gems.

FOREST FIRES CAUSE HEAVY LOSS IN ONTARIO

Port Arthur, Ont. The number of men fighting fires in the Thunder Bay area has now reached 700, equal to the largest number employed last year.

Blazes at Whitefish Lake and Obonga Lake are requiring extra care, officials said, and 50 additional men have been sent to Sunday Creek to cope with the rapid spread of fire in that district.

The largest fire in the area is about 20 miles north of Graham, but although it covers about 50 miles of territory, it is not the most destructive being mostly in young growth.

To fight fires at Whitefish, Obonga and Dog Lakes, and at Gull River, all men and equipment must be taken in by 'plane.

Fires to the northwest of Eby Lake, about 30 miles from Port Arthur, destroyed a group of camps of the Pigeon Timber Company valued at $6,000. A dam which had cost $6,000 and about 10,000 feet of lumber also fell prey to the flames.

Joseph Barriault, 55, and Con Mahoney, 22, two members of a firefighting brigade, lost their lives in Onion Lake when a canoe in which they were riding overturned.

Sudbury, Ont.—Valuable timber is believed to be endangered by a bush fire which was ravaging some 3,000 acres of bush land near Gogama, north of here, according to word reaching Ontario forestry officials. The fire had been raging for 200 days.

One casualty was reported. Fred Mantha was injured and badly burned when struck by a falling tree.

Burial Of Violet Sharpe

Brief Services Attended By the Acting British Consul-General

Englewood, N.J.—Violet Sharpe, English servant girl in the home of Mrs. Dwight W. Morrow, was buried after a brief service attended by fellow members of the Morrow household and the acting British consul-general who has been instructed to make a report on the girl's suicide five days ago.

The simple cloth-covered casket was borne to a grave in Englewood cemetery, where rests the body of the late Senator Dwight W. Morrow, grandfather of the murdered Lindbergh baby, on the shoulders of four male employees.

No member of the Morrow or Lindbergh family attended the final rites, although they were represented by Arthur Springer, the late senator's private secretary, and Miss Josephine D. Graham, Mrs. Morrow's private secretary.

Decision Rests With Immigration Minister

Alleged Communists Have No Further Recourse To Higher Courts

Halifax, N.S.—Fate of the group of alleged Communists who have been detained in Halifax for some weeks while their efforts to evade deportation were before the courts, now rests solely in the hands of the minister of immigration, Hon. Wesley A. Gordon. It was stated by L. A. Ryan, counsel for the group, that there was no further recourse to higher courts as the decision of the full bench of the supreme court of Nova Scotia had been unanimous.

Prepared For Eventualities

Finnish Is Germany Will Face War If Necessary

Berlin, Germany.—The German Fascist party "will not shrink war if it is the last means of protecting our political and social freedom," Gregor Strasser, head of the entire organization of Adolph Hitler's party, declared in the first political broadcast any German government has permitted a Fascist to deliver.

"We National Socialists do not desire a new war," Strasser said, "but we will not shrink from war."

W. N. U. 1947

Kiwanis International

Delegates From All Parts Of Canada Attending Convention At Detroit

Detroit—Canadians from all parts of the Dominion arriving here for the 16th annual convention of Kiwanis International are prepared for four days of problems pertaining to unemployment and urban rural relations child welfare, adult education, and boys' betterment.

Kiwanis was founded in Detroit on January 21 1915, and the thousands of Kiwanians from all parts of Canada, and the U.S. crowd eg into the city consider the occasion a pilgrimage back to the birthplace of the service organization "We are pledged in our annual message. "We can be proud of our past accomplishments, and our present opportunity lies in willingness to serve in the social and economic problems that we face today.

The Canadian delegations are in charge of three district governors Charles A. Fowler, of Halifax, N.S. Ontario-Quebec maritime district; James P. Whyte, of Swift Current, Sask., Western Canada district, and Clint ss S. Hazley, of Seattle, Pacific-Northwest district.

Two international officers, Andrew G. Goal, of Hamilton, Ont., vice-president, and Dr. Charles C. Talbot, of Edmonton, trustee, will take leading parts in the convention.

Kiwanis Lions Clubs across Canada and the U.S. will meet simultaneously. This united fellowship occasion will bring together over 60,000 men in 1,500 clubs, all pledged to work for the community betterment and welfare work of Kiwanis during the year.

All Kiwanis clubs in Canada are observing Canadian citizenship week June 30 to July 6, with patriotic programs. The observance is being directed by the Kiwanis International committee on public affairs for Canada, of which J. Lorne Gage, of Ottawa, chairman, and Nelson A Harkness, Vancouver, and Richard W. Moore, Saskatoon, members of the committee.

British Immigration

Question Has Not Yet Come Up For Discussion At Inter-Provincial Conference

Edmonton, Alberta. Commenting on Senator A. D. McRae's suggestion as reported from Winnipeg, to the effect that the question of British immigration to western Canada be considered at the forthcoming interprovincial conference in Regina, Premier J. E. Brownlee says that he has not had a communication from any source in regard to the matter. The premier added that if the Dominion government were proposing to put it on the programme for the imperial economic conference advice to the provincial governments would have been given accordingly.

If occasion arises, however, the Alberta Government will be prepared to express its views on such immigration, says Mr. Brownlee.

Demand High Wages

Australian Jobless Refuse Pay Offered By Grape Growers

Sydney, Australia. The dole has driven some of the jobless here rather particular about the kind of work they are willing to accept, At Mudgee, centre of the vineyard district, grape growers agreed to give preference of employment in the picking season to local men on the dole. They offered £2.50 a day with meals and quarters added. The work was rejected.

Will Attempt Speed Flight

New York—Before taking off for Nashville, Tenn., Cyrus Peabody, a retired millionaire and commercial pilot, announced that within the next few weeks he planned a speed flight from New York to England, France and Germany.

Open Coastal Service

Vancouver, B.C.—The summer service between Vancouver and Skagway was officially opened by the Canadian National Steamships when S.S. Prince George, Captain Neil Mac-Lean, sailed from this port June 13.

FOR RURAL BETTERMENT

Prof J. R. Watts, M.A., D.D., of Queen's University, Kingston, who is to make a rural survey of Canada Division 11, Manitoba, for the United Church's Home Mission Board this summer. Already Professor Watts has made surveys in Ontario and Nova Scotia, looking to a start of a rural life program.

Farm Mortgages

Loan Companies In Alberta Will Not Foreclose Under Agreement

Ponoka, Alberta.—Mortgage companies will not foreclose on any farm mortgages for one year without approval of the Alberta Debt Adjustment Board, and no foreclosure will be made while interest payments are being maintained.

This assurance was given the Ponoka Constituency Association of the United Farmers of Alberta by Premier J. E. Brownlee in addressing the annual constituency convention. Premier Brownlee said the guarantee of the mortgage companies had been obtained.

Besides the promises not to foreclose, arrangements to make payments in grain were being reached.

Bloodless Sea Fight

British Ross Kinnaird and U.S. Cutter In Engagement

Halifax.—Tales of an old-fashioned sea scrap, in which the crews of a British rum-runner and a United States cutter battered each other with potatoes, turnips, paint pots and molasses jugs about 70 miles off New York, were told here after the motorships "Oneco" and "Mary F. Rotch" tied up in harbor.

Masters of both vessels claimed they had been rammed by the cutter "Dexter" in the fracas which began Friday, and the "Oneco" on Sunday. The "Oneco" had a large hole in her stern.

Gobre Theory

New Finding Of Medical Profession Regarding Treatment

Hamilton, Ont. Radical changes in the attitude of the medical profession towards the treatment of goitre may result if the findings of Dr. Undo Crotti, of Columbus, Ohio, as presented to the American association for the study of goitre, receive full acceptance. The president holds that iodine deficiency was the cause of goitre has been discredited. Dr. Crotti asserts he declares he has made the discovery of a micro-organism, a small fungus which he believed to be the cause. This fungus is found on all cabbage leaves as well as in the soil of those sections of the land known as goitre belts.

Receives Heavy Sentence

Gordon M. Simms Convicted On Swindling Charge

Washington Gordon M. Simms was sentenced to 15 years' imprisonment for swindling Mrs. Evelyn McLean of $104,000 in an alleged plan to return the kidnapped Lindbergh baby.

Justice James M. Proctor in the District of Columbia Supreme Court sentenced the former justice department agent to the maximum term under the law.

Simms, who is 39 years old, was convicted by his firm with the Ford Motor Company of England whereby the late Walter Chrysler and Canadian company will supply the English firm with $2,000,000 worth of Ford V-8 motors, leaving his post in 1930, and with 1,885 to 1,900 complete V-8 cars scheduled for delivery in July

The Canadian company will distribute the new 8 horsepower English Ford on its export markets. New Zealand, Australia, South Africa, Africa, Malay States and other British territories, while the English company will sell the V-8 in Great Britain, Spain, Sweden and other European and Asiatic countries, for which the English Ford company holds selling rights.

Mr Campbell emphasized that the business was taken at extremely close figures and represents practically 500 per cent increase over 1931, one of the first Windsor plant, but of Toronto and other tire and parts manufacturing centres.

Hold Station Master Responsible For Wreck

Death Sentence Imposed and Other Employees Get Prison Terms

Undersergeant, Ont.—The death sentence was imposed upon the railroad station master at Solsaya and his assistant who were convicted of responsibility for a wreck near the station in which a number of passengers were killed.

It was a head on collision between two trains and the station master was charged with having mixed the signals while he was intoxicated. Thirteen other railroad employees, including the crews of both trains, were sentenced to prison terms of one to ten years. One man was exonerated.

ST. LAWRENCE SEAWAY ROUTE HAS U.S. SUPPORT

Chicago—Negotiations with Canada for the development of the St Lawrence seaway is now at a favorable point according to the administration platform presented to the Republican National Convention here.

The St. Lawrence plank of the party platform reads:

"The Republican party stands committed to the development of the Great Lakes-St. Lawrence seaway. Under the direction of President Hoover negotiations of a treaty with Canada for this development is now at a favorable point. Recognizing the inestimable benefits which will accrue to the nation from placing the ports of the Great Lakes on an ocean base, the party reaffirms allegiance to this great project and pledges its best efforts to secure its early completion."

Big Car Contract

Ford Motor Company Of Windsor To Supply English Firm

East Windsor, Ont.—On his return from England recently, Wallace S. Campbell, president of the Ford Motor Company of Canada, announced that a contract had been entered into by his firm with the Ford Motor Company of England whereby the Walkerville plant of the Canadian company will supply the English firm with $2,000,000 worth of Ford V-8 motors, leaving this month for England and with 1,885 to 1,900 complete V-8 cars scheduled for delivery in July

The Canadian company will distribute the new 8 horsepower English Ford on its export markets. New Zealand, Australia, South Africa, Africa, Malay States and other British territories, while the English company will sell the V-8 in Great Britain, Spain, Sweden and other European and Asiatic countries, for which the English Ford company holds selling rights.

Mr Campbell emphasized that the business was taken at extremely close figures and represents practically 500 per cent increase over 1931, one of the first Windsor plant, but of Toronto and other tire and parts manufacturing centres.

Arms Conference Has Suspended Activities

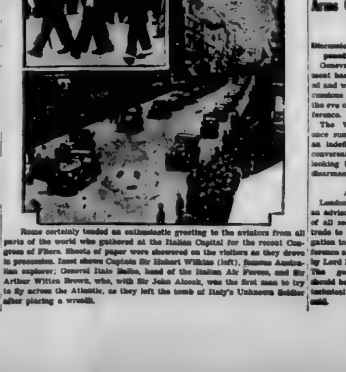
Discussions On Disarmament Postponed For An Indefinite Period

Geneva, Switzerland.—Disarmament has been temporarily sidetracked and war debts and reparations dependence come to the fore, almost on the eve of the Lausanne financial conference.

The World Disarmament Conference suspended formal activities for an indefinite period pending private conversations among political leaders looking toward some solution of the disarmament problem.

Advisory Committee

London, England.—The creation of an advisory committee representative of all sections of the British timber trade to accompany the British delegation to the Imperial Economic Conference at Ottawa was strongly urged by Lord Lovat in the House of Lords. The government's representatives should be adequately informed on the technical aspect of the question, he said.



Rome certainly loaded an enthusiastic greeting to the aviators from all parts of the world who gathered at the Italian Capital for the recent Congress of Fliers. Shouts of paper were showered on the visitors as they drove in procession. Inset shows Captain Sir Hubert Wilkins (left), famous Australian explorer; General Italo Balbo, head of the Italian Air Forces, and Sir Arthur Witten Brown, who, with Sir John Alcock, was the first man to try to fly across the Atlantic, as they left the tomb of Italy's Unknown Soldier after placing a wreath.

Pollution Of Fish Streams

Dominion Fisheries Inspectors On Watch To Prevent Injury To Country's Fish Life

Sawdust has to place but not in streams to contribute to fish and part of the work of fisheries inspectors under the Dominion Department of Fisheries is to see to it that such waters in the respective territories are not polluted with mill refuse or other substances inimical to fish life.

But how does sawdust for instance destroy fish life? It has real effect in two ways. By covering spawning beds it prevents the hatching of live fish from the eggs and in the second place it kills live fish by getting into their gills or breathing apparatus. Other kinds of waste for instance sawdust from certain classes of industrial plants are also injurious to fish life. It is because of these injurious effects upon natural resources which it is important to conserve that the Department of Fisheries requires that its officers in areas where the fisheries are under federal administration shall make careful inspection of mills and along streams frequented by fish and check any operators who may thoughtlessly be allowing sawdust or other refuse to fall into the water. Signs of this kind are of importance from the standpoint of fisheries conservation, and conservation is summed in the interests of commercial fishermen and anglers alike.

In most cases where refuse from an industrial establishment is reaching a fish stream the condition is willingly and promptly remedied by the operator when the fisheries inspector draws it to his attention. If this does not happen, however, prosecutions may be instituted under the Fisheries Act which provides that "no person shall cause or knowingly permit to be put, from chemical substances or drugs, poisonous matter, dead or decaying fish, or remnants thereof, mill rubbish or sawdust or any other deleterious substance or thing, whether the same is of a like character to the substances named in this section or not, in any water frequented by fish."

Planning Year-Round Supply Of Oranges

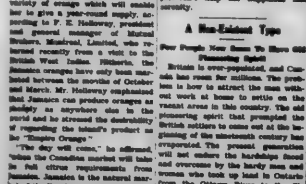
Jamaica Hopes To Have Variety Suited To Each Month

Jamaica is planning to produce a variety of orange which will enable her to give a year-round supply, according to F. E. Holloway, president and general manager of United Brokers, Inland, Limited, who returned recently from a visit to the British West Indies. Hitherto, the Jamaica oranges have only been marketed between the months of October and March. Mr. Holloway emphasized that Jamaica can produce oranges as quickly as anywhere else in the world and he stressed the desirability of supplying the island's product as the "Champion Year."

"The day will come," he affirmed, "when the Canadian market will take the full orange requirements from Jamaica. Jamaica is the natural market of the Dominion just as Canada is the natural country to supply the Dominion."

Wife—That's the kind of husband I have! Glad you have him. Dine and his wife to go and look at some $30 coats?"

Husband—"My dear, have I ever deprived you of the privilege of looking at $30 hats?"



"Mrs. Pitkin is said to be very economical."

"Yes, so economical that she uses another man to save her own husband."—Walter Jokeli, Berlin.

"Hamilton" Becoming Very Strong Force

In Year At Highest Establishment Since Its Foundation

With a strength of approximately 2,000 officers and men, the Royal Canadian Mounted Police is now at the highest establishment since its foundation in 1873. In the past few months this force has increased in excess of strength of nearly 200 all ranks due to the absorption of the customs preventive service and the provincial police in Alberta, Manitoba and the three Maritime provinces. Only British Columbia Ontario and Quebec continued to maintain separate police forces and the expectation is that an agreement may shortly be concluded with the Province of Quebec.

A unified protective force for the maintenance of the law in Canada is gradually being built up with all the advantages that unified control contributes.

Scottish Market For Cattle

Good Prices Are Obtained For Cattle Shipped From Saskatchewan

Higher prices than anticipated have been realized on the first shipment of Saskatchewan cattle to Scotland, according to a report received by the Department of Agriculture from C. H. Johnson, Canadian Trade Commissioner in Scotland.

The Scottish market offers a good demand for choice steers, weighing from 10 to 11 hundred weight, capable of being made into prime beef with three or four months' fattening, according to Mr. Johnson. The market absorbs many of this type in from April and July to the spring season, and from September to December, in the autumn.

Cow Fat and Lungs

According To London Doctor Lungs Cause Sound

Having believed for so long in the germ theory of disease, Dr. Paul Carton changes our ideas according to a London doctor, who finds that the growing fat produced by the bacillus.

From his study of cattle he has found that fat bubbles are the beginning of bumper rubs in females and girls have fatter tempers than boys.

In these germ lies the wound that other belief that the fat man is good tempered because he is too stout either to quarrel or run away. He just can't help his happiness and serenity.

A Non-Existent Type

Few People Now Seem To Have Old Pioneering Spirit

Britain is over-populated and Canada has room for millions. The problem is how to attract the man without work in the old land to the unpeopled areas in this country. The old pioneering spirit that prompted the British settlers to come out at the beginning of the century seems almost to have evaporated. The present generation will not endure the hardships faced and overcome by the hardy men and women who took up land in Ontario from the Ottawa River to the St. Clair. They laid the foundations of our Dominion, but that type does not now exist.

Carefully Watch Air Mail

Indians In London Make Sure Postage Is Affixed to Letters

Indians in London are using the air mail, but they must be sure that letters are affixed with stamps. The speed section of the box marked "Air Mails" in front of the general post office in London, however, is very often attentively watched by both men and women, who have just posted their letters to India. It is a characteristic trait of the Indian mentality when these to be thoroughly satisfied that everything is just as it should be, and they are not content unless the letters into his collection.

Prayed In Thousands

Among its Egyptian inscriptions, the Field Museum exhibits a prayer from an Egyptian lady's tomb, in which she asked for "1,000 loaves of bread, 1,000 jugs of beer, 1,000 alabaster vases of ointment, and 1,000 garments."

Given to the most brilliant star in the whole sky.

ROYALTY LOOKS INTO THINGS

Even royalty is curious and sometimes likes to look inside to see what makes things go. Here is the former Crown Prince Wilhelm of Germany (standing, right), apparently deeply interested in the powerful engine of Sir Malcolm Campbell's racing car The world-famous British speed king stand ing behind Prince Wilhelm, recently competed in the International Auto Meet in Berlin.

Scarecrow Had Grim Origin

Is Symbol Of Human Sacrifice Made In Black Ages

The scarecrow was not invented by nature nobody, according to the anthropologists, it had a grimmer origin than that being a link with those dark ages when every enterprise was attended by human sacrifices. When a ship was launched a human life was sacrificed (this is now symbolized by the breaking of a bottle of wine). When a building was begun, again a life was sacrificed (now symbolized by the laying of a foundation stone) So the farmer, anxious to appease the gods of the weather and to ensure good crops, made his sacrifice Gradually the practice of human sacrifice died out, but the farmer bowed to natural superstition to the extent of putting up an effigy in his fields in place of the human being.

Robot Athlete Sets Pace

Mechanically Operated Runner Used On Track At Oxford University

Like the mechanical rabbit that leads the whippets in a dog race, a robot athlete is being used to set the pace for the track men at Oxford University, England. The figure of a runner, mounted on a mechanically operated rubber-tired wheel, moves around the outside of the track at different speeds. By keeping abreast of the approaching robot, the varsity men learn to judge the pace at which they are running. The invention is said to be of special value in training distance runners, whose success largely depends upon their ability to pace themselves so that they can reserve sufficient strength to carry them through the final sprint.

One hears a great deal about the absent-minded professors, but none more absent-minded than the dentist who said accidentally to be applied the plate to his automobile.

"Now, this is going to hurt just a little."

Lake That Disappears

Big Body Of Water In Georgia Goes and Comes

Big Jackson, husky brother of a trio-swirls of fresh water lakes in Georgia, is visiting unknown parts again. This lake has a habit of disappearing and then returning to its bed in a most amazing manner. Big Jackson is about ten miles long and four miles wide when full and this is the second time within a year that it has dashed away through some mysterious subterranean channel and left only mud in its bed to explain the escapade. Jackson, Miccasukee and Iamonia form a triangle of big lakes along the Georgia-Florida line and have a partnership in the disappearing act. Each does the trick at irregular intervals every few years, but Jackson is the most prodigal. The fish that fill the lake event too When the water returns, fish will be unusually abundant. Whence the lakes go and what causes the recessions is a mystery.

Leider Zoo Now a Lake

Old Can Reclaims 100,000 Acres In Holland

By Gerben Di Bleine

The Zuider Zee, a familiar landmark on all maps of Europe for centuries, has become a thing of the past. Amid the screeching of steam and the clanking of excavation steamers on the eastern dike, the last gap was closed in the eight-and-one-half mile dam at Wieringen with Friesland. The Zuider Zee thus becomes an inland lake, as it was before the North Sea rolled in over Northern Holland 600 years ago.

Hereafter the Zuider Zee will be known as IJssel Lake, or, in the Dutch, IJsselmeer. The completion of the dikes will make it possible to reclaim 550,000 acres of new arable water for Queen Wilhelmina's little kingdom.

Nelsonian clags, made in Bolton, England, are more popular abroad than at home.

OBITUARY

The funeral of the late Mr. Fred Simmons, of Fort Saskatchewan, who passed away Friday, June 17, at the age of 57 years, was held on Sunday, June 19, from the United Church, Fort Saskatchewan. Rev. E. J. Hodgins conducted the service. Interment was made in the Fort Saskatchewan cemetery. The deceased leaves to mourn his loss his wife, two sons and five daughters, his father and mother, Mr. and Mrs. Wm. Simmons of Fort Saskatchewan, one sister, Mrs. T. Bland of Bottingham, Wash. The pallbears were: E. Atkinson, T. Wilcox, E. Flindell, N. McEachern, R. Jackson, Wm. Fisher. Floral tributes were received from the following: Father and Mother; Wife and family; Mary and Mert; The Bland family; and the McEachern; Mrs. Nurse; Herbert and Robert

The World's Way Out

The subject of tariffs and other trade restricting devices has passed, as it rapidly passing, out of the field of partisan politics not only in Canada but throughout the world. The severe economic depression from which all nations have suffered, and from which they still continue to suffer, has taught all people that it is economically impossible to provide work for people everywhere and at the same time erect barriers to prevent them exchanging the products produced by their labour.

The trained economists of all countries, the great bankers and large financial institutions, the executives of transportation systems, and finally the statesmen of the world struggling with the problems of mounting national debts, ever increasing taxation yet declining revenues, coupled with the necessity of making huge relief expenditures to keep people from starving, never realize that the remedy for this state of affairs lies in encouraging, rather than restricting, trade intercourse throughout the world.

It is no longer a matter of party policy, but of national, yea, international, policy. Regardless of party names and old party traditions and formulas or policies, people everywhere now appreciate the economic truth that it is impossible for every nation to have a so-called favorable balance of trade, that is, selling more to other countries than they buy from them. If one nation sells abroad, some other nation must buy, and when every nation adopts as its national policy that the selling of the largest possible volume of its products abroad and buying as little as possible from other nations, the inevitable result is stagnation of trade. That stagnation has been brought about, and the whole world is suffering as a result, and because of this national destruction of business millions of men and women are out of employment, while the youth of all countries approaching manhood and womanhood find no openings available to which to exercise their abilities and energies.

The only problem facing the world is how to break down these trade barriers. Inside the walls thus erected along all national boundary lines there have grown up industrialized all kinds, many of them artificially forced and developed and protected against similar industries established elsewhere in a national movement. To remove this protection from these artificially created and stimulated industries, thus confronting them with the competition of the more naturally placed and established industries of the same class, means the extinction of the former, resulting in loss and readjustments which no country is anxious to face.

Nevertheless, the world has reached an impasse where such losses and readjustments must take place. In the final analysis, these losses would ultimately be offset by greater gains; there would be individual losses, but great national gains. The world is beginning to realize this, but the problem is how to effect the necessary changes. It is doubtful if it can be brought about by any great international conference or agreement between all nations. And of course it is impossible for one nation alone to throw down its tariff walls while all other nations remain as they are. Some one must lead along the narrow path for many years, with the result that it was made the dumping ground for all other nations. It was Britain's action in finally closing its doors that brought home to the world the suicidal course which all had embarked.

These tariff barriers were erected piece-meal over a long period of years, they will have to be torn down by simply reversing the process. In the past one nation erected a tariff wall, then another followed on account of lost protection. Then nation number one raised its wall still higher, and the others followed suit. Now, in order to get out of the jails they have built for themselves, these nations must begin to lower their walls, one by one, in turn.

Probably the most effective way will be for two nations to enter into trade agreements calling for lower tariffs, or none at all, between them. Trade will begin to flow between each country and a third nation, and then a third will be anxious to enter into the same arrangement.

That this procedure will in all likelihood be followed is indicated by the recent announcement from Lausanne that Holland, Belgium and Luxemburg have reciprocally agreed not to impose any new tariffs, or other trade restrictions, between them and to proceed by annual reductions of 10 per cent. of their existing tariffs until a defined tariff level is reached. This is the first move this old world has heard for many years. True, these are small nations and not classed as among the foremost trading nations, but it is a hopeful sign.

Now, if that great group of nations constituting the British Commonwealth of Nations will, at the approaching Imperial Economic Conference at Ottawa, follow this lead and agree among themselves not only to impose no new tariffs, but to remove many of the trade restrictions now in force between them, and to proceed by annual reductions of 10 per cent. of their existing tariffs until a defined tariff level is reached. This is the second move this old world has heard for many years. True, these are small nations and not classed as among the foremost trading nations, but it is a hopeful sign.

Now, if that great group of nations constituting the British Commonwealth of Nations will, at the approaching Imperial Economic Conference at Ottawa, follow this lead and agree among themselves not only to impose no new tariffs, but to remove many of the trade restrictions now in force between them

WORLD HAPPENINGS BRIEFLY TOLD

Eighty-two Grecves were created in Ontario last year

Milk has dropped to eight cents a quart in Ottawa, the lowest price since 1921.

The Pope has approved construction of a new power station to make the papal state self-sufficient as far as electricity is concerned.

Showing a fine value of eight cents, a South African emergency stamp issued 77 years ago, was sold recently in London for $7.60.

Napoleon Blondin, of Springbank, Alberta, who acted as interpreter during the trial of Louis Riel in 1885, died recently at Calgary after a brief illness. He was 71 years old.

Officials of the Harbor Comm. Mtld., airport, have received $600 from Amelia Earhart Putnam in appreciation of their services at the start of her trans-Atlantic flight.

Miss Princes of Wales has consented to become patron of the Imperforate Band which is being raised to save the old wooden battleship as a baby-feeding ship for boys.

F. Potts of the Canadian Pacific Railway police, Montreal, captured the individual high score trophy for 1932 in the Dominion revolver competition.

A high place in the New South Wales philatelic exhibition, held recently at Sydney, has been awarded to Canadian postage stamps, considering its embracement from the post office department.

Depression has hit the horse population of Canada, the Canadian Horse Breeders' Association, which dropped 200 this year, due largely to decrease in the west being unable to obtain feed for them. The total membership is 2,444.

Admiral Sir Ernie Chatfield, commander-in-chief of British naval forces in the Mediterranean, will succeed Admiral Sir Frederick L. Field, first sea lord, as a lord commissioner of the Admiralty and chief of the naval staff, according to an order of the admiralty board effective February 28, 1933.

Wave Hill Is Sown

Settlement In Northern Manitoba Has Only One Cow

Although the government of Manitoba may take over the milk business of the Province and operate it as a public utility, it is not expected there will be any change in the price of milk in the little settlement of Wave Hill, situated where the Hudson Bay Railway has a division point. The milk delivery there is a monopoly. One cow, Daisy June, controls the whole output, and it sells for 20 cents a quart. Daisy June is the only cow in the world to be sown in that part of the country, where winter blizzards are not propitious to the dairy business.

A German who proposed to walk around the world got as far as Denmark, which he described and resisted arrest. A journey of this kind entails many dangers.

New Method Of Farm Management

Colonization Finance Corporation Adds To Staff Of Keen Manager

The recent appointment of a staff of six new farm managers by the Colonization Finance Corporation is not only a step forward in assisting settlers to maintain themselves in these trying times on their farms and to improve their condition, marks the latest and one of the most practical forms of constructive efforts in agriculture.

The Colonization Finance Corporation was set up by a number of the leading insurance and trust companies in Canada for the purpose of meeting the situation caused by the general agricultural depression. The president is E. R. Wood, Toronto, and the vice-presidents are: J. F. Walker, Toronto, and T. J. S. Dennis, vice-president; and T. O. F. Horner, manager.

The Colonization Finance Corporation body has carried on its work in the provinces of Manitoba and Saskatchewan during the summer and has now established a number of the districts and added to the staff of the new farm managers. So far 1,200 valuable properties have been placed under the supervision of the farmers immediately concerned had any knowledge of it. The amount of work and the value to the security of the effort in co-operation is simply shown in the way the farmers are responding to it. This year the area of farming land coming under the new farmer management is almost trebled, making necessary the new appointments.

The first men met under the field, for the Province of Saskatchewan, are as follows. They are:

Prof. Sommerfeld, Yorkton, Sask.; O. S. Longman, Indian Head, Sask.; W. D. Day, Delmas, Sask.; Kenneth McLean, Caron, Sask.; William Harkness, Weyburn, Sask.; Oscar Wheller, Dundurn, Sask.

The work of these men, along with that of the new appointments in Manitoba, will be under the direction of Colonization Finance Corporation, with headquarters at the Canadian Pacific Railway Building, Winnipeg.

The principle underlying this new farmers' development is not a new one. It is as old as the hills, in fact. That it is a sound basis is shown in the readiness of the farmer to accept the help of the surveyor and his manager.

The new feature of this service is in the fact that a finished corporation has said that they have faith in the land, in the soil, in the farmer, and that it is also backing the faith in them it made the land, and the soil, and the farmer.

The Colonization Finance Corporation Scheme had a knowledge of the psychology of discouragement that a farmer fell down in his re-pay ments on his mortgage his farm was sold. Always a negative sale. The land resulted in a general let-down of the farming activities. Soil became abandoned, weeds accumulated and the whole business suffered.

The argument for the new method of farm management is that these farms in which the banks and companies had an interest could be brought back to par, with the soil in good condition, clean and free from weeds, during the period of agricultural depression, when the change for the better came and farming could pay. It is a fair return for their labor. They would be in a better position to take advantage of the upward turn.

The Colonization Finance Corporation has been able to secure the services of men of the highest practical experience and standing in the work of advising methods of management of the farms handed to the farmers. Each of the men has been trained in the area covered their work. In the two years experience in these areas the farmers' management plan has advanced beyond the period of experiment. This year 200,000 acres have come under management, a large portion of which is in Saskatchewan. Together the Corporation has 434,000 acres under its supervision, consisting largely of wheat in summer-fallow agreements and a small percentage of rental.

Professor H. R. Sommerfeld, Yorkton, Sask.

Prof. H. R. Sommerfeld, who has just received an appointment to the Colonization Finance Corporation staff at Yorkton centre, was enthusiastically welcomed to his new field by the Board of Trade of that city, at a recent meeting held in his honor.

John Mc. Reinoehl, Prof. Sommerfeld has an exceptional academic standing as well as a practical experience which puts him in a class with the best farmers. He is an heavy from Manitoba. He was made a Rhodes Scholar now to fulfil the work of farm management for the important Swarthmore district around Yorkton.

Prof. Sommerfeld began, on a Manitoba farm, the son of the late H. Sommerfeld, breeder of purebred cattle and horses. He was born in Saskatchewan with his family and now operates a three-quarter section of rare land in the Saskatoon district. This was the first farm to be taken over by the new system as a greater production committee conducted in Saskatchewan, of an average of 30 farmers per acre for the 11 years that the district has held worked it.

During the same period Professor Sommerfeld joined the pioneer class in Agriculture at the University of Saskatchewan, and graduated with the degree of B.S.A. He followed this with a year at the University of Wisconsin where he took the degree of Master of Science in 1926.

Seven years as professor of soils at the Manitoba Agricultural College followed.

Prof. Sommerfeld has been in frequent demand as judge of live stock at fairs and exhibitions including Brandon, Regina and Saskatoon. He has been trained stock judging classes in Manitoba Agricultural College which have won four first places in six years, one of which won the Toronto Royal Fair, in 1930, when his team over the Ontario Agricultural College team. Prof. Sommerfeld was a member of the Agricultural Extension Departments of both Manitoba and Saskatchewan.

O. S. Longman, Indian Head, Sask.

O. S. Longman, who takes over the management of the farms in Indian Head, Sask., area, is a Western Canadian. He was born near Carnduff, Sask., and was given up in the Deloraine, Man., area. He is a graduate of Manitoba Agricultural College, and has been instructor in agricultural mechanics, field husbandry and other farm subjects at agriculture schools at Claresholm and Olds, Alberta. In 1930 he was appointed assistant in the School of Agriculture at Raymond, Alberta, and in this capacity supervised irrigation demonstration and extension services among the farmers.

For two years Mr. Longman was in the employ of the Alberta Department of Agriculture and in the summers he assisted in the soil survey parties conducted in the province. His report on the dry area resulted in the passing of the Berry Creek Area Act by the Alberta Legislature. He has also made a study of the best irrigation system, a survey looking to the establishment of a sugar beet industry in Southern Alberta, control of noxious weeds, use of commercial fertilizer, breeding and management of livestock.

Mr. Longman's appointment to the staff of the Colonization Finance Corporation was felt as a distinct loss by the farmers of Alberta and was deeply regretted by the residents of Raymond and vicinity.

Jos. D. Day, Oxbow, Sask.

Jos. D. Day is another graduate of Manitoba Agricultural College under appointment as farm manager for the Colonization Finance Corporation. His headquarters are Oxbow, Sask. Mr. Day also has a degree of M.Sc. from the University of Minnesota. Agricultural economics are a specialty.

A native of Iowa, Mr. Day's family settled in the Wilson district more than thirty years ago. Mr. Day had management of the home farm for five years when he specialized in seed grain.

The Day farm was the one on which the Consolidated Mining and Smelting Company carried out an extensive experiment with fertilizers. Outside his own farm interests, Mr. Day has been connected with cream-ries and cow testing corporations. He also was with the Robson Wheat Pool.

While he was studying for his Master's degree he was field manager for the late survey of Minnesota, and he brought him the offer of a position as agricultural representative in that state, but he preferred to return to Saskatchewan.

Oscar Wheller, Canora, Sask.

As manager for the Canora zone the Colonization Finance Corporation has obtained the services of Oscar Wheller, a recent graduate of the Manitoba Agricultural College.

Mr. Wheller speaks a number of languages which will enable him to do effectively with the Canora clients in the Canora district, many of whom are of European birth or extraction. Already he has made his mark in the district and his work has been greatly appreciated by the farmers.

Mr. Whaller has been manager of a large sugar beet farm and assisted in the land settlement project before coming to Canada. Since coming to Canada he has followed a large farm in Sask. Two years ago he entered Manitoba Agricultural College from which institution he was graduated this year with the degree of B.S.A. During the summer he did considerable work for the Manitoba Department of Agriculture in plant diseases, with headquarters at Steinbach, Man.

William Harkness, Weyburn, Sask.

William Harkness, who is now in charge of the Colonization Finance Corporation zone at Weyburn, Sask., was born and raised on a farm near Scotland Migrating to Canada he homesteaded at Barnes at Hartney, Man., Prior to Pilot and Glenlea, Man. He also is a graduate of Manitoba Agricultural College.

Enlisting in the 43rd Battalion, Mr. Harkness served overseas until 1919. On his return to Canada he joined the soldiers' Settlement Board as the supervisor and inspector, holding this position for 10 years. He then took the B.S.A. in Manitoba Agricultural College, and was appointed to the staff of the Canadian Pacific Railways Department, Calgary and Regina. He remained until resigning to take up the present position.

SUNDAY SCHOOL LESSON

JULY 3

CHILDHOOD AND EDUCATION OF MOSES

Golden Text: "Train up a child in the way he should go: And even when he is old he will not depart from it. Proverbs 22:6.

Lesson: Exodus 2:1-10; Acts 7:20-22.

Devotional Reading: Psalm 119:9-16.

Explanations and Comments

The Birth and Hiding Of Moses. Exodus 2:1-4. To Amram and Jochebed (Exodus 6:20) husband and wife who belonged to the tribe of Levi, a man and a woman who were strong and healthy, "a goodly child." Stephen calls him "exceeding fair," Acts 7:20.

"Some people have to struggle all their lives against physical disabilities and deformities. If a mother is born a child who is marked out from his fellows by unusual attractiveness and power that he is no better than his fellows. There is only way of coping with the situation. From the beginning, the privileged one must be taught his place in the unprivileged. Privileges and responsibility are indissolubly united. That is the wholesome truth which we all need to learn."—Harold Begbie.

For three months Jochebed kept her baby securely hidden, despite Pharaoh's cruel decree. Then she knew that the Hebrews should be sent into the Nile, where they would drown and their bodies be devoured by the crocodiles.

There are hosts of babies in our great cities who are exposed to a more fatal than were the Hebrew infants. What is being done to save them?

Jochebed was a woman of ingenuity and devices. The time came when she knew the pressure of the babe must be discovered, and then she must be silent (act) or of papyrus plants (bulrushes) and daubed it with bitumen (slime) and pitch, to make it water tight; into this she put the child, and laid the closet among the flush-water weeds (flags) by the river's brink. His sister Miriam was left to watch from a distance.

The Adoption Of Moses. Acts 7:20-22. In this clerical edition of the Sashadrin just before he was stoned to death, Stephen tells about the birth and saving of Moses, and declares that he was instructed in all the wisdom of the Egyptians, and was mighty in his words and works. Read also Acts 7:35 and Hebrews 11:24-26.

"It is my profound belief that a sacred purpose of ministers should be to every man, and that to every man is committed a certain definite and positive work. To every man is given a talent by which he can turn over fallow, open some prison door, and become a minister of emancipation. There is no business in which senior men can be leaders and commanders, more for the reason that we have been. Every man is born to confront the enemy of pain, tyranny, and sin, in the presence of oppression to play the hero. Every man is born to continue moral service in his time."—R. Jowett.

Cows Pamper Doctors

Sheep Of Riverview Vale Get Result With Milk Diets

Physicians are puzzled over the cure of Mary Ghostkeep, Homer, one of the Sarcee Indians, who met an accident, yet has broken nearly every bone in her body.

The 11-year-old girl was under treatment in a Calgary hospital by Dr. Frederick Harvey, of Northwestern University. She was suffering from a broken arm caused by a slight strain.

The physician said X-rays revealed that every large bone in her body had been broken at least once.

"The examination showed that the bone structure is so thin and brittle," said the physician, "that the slightest strain causes a fracture. She has had 36 to 40 fractures."

German railways will run excursion trains with secret destinations.

The rarest pun is a native of Sicily.

The drawer of memories. His comb Monotype, Chatham.

BRITAIN FAVORS U. S. PROPOSAL FOR ARMS CUT

Geneva, Switzerland.—Proposal of President Herbert Hoover, for a one-third reduction in world armaments, which provoked instant opposition from France and varying degrees of approval from other countries when submitted by the United States delegation to the disarmament conference, was welcomed for its "breadth of view" and at the same time supplemented by additional suggestions in a statement made on behalf of Great Britain by Sir John Simon, foreign secretary.

The United States proposal to cut one-third of naval, military and air armament expenditures with a result-ing saving to the world estimated at from $10,000,000,000 to $18,000,000,000 in the next 10 years was regarded despite absence of official communication, as a condition to reopening the war debts controversy. That view appeared to many observers despite the stress placed by the United States government on the statement that its representatives here have not discussed war debts and reparations.

Greeting the announcement with the words "that any reasonable step whereby the vast total of men under arms throughout the world can be reduced in any way which does not diminish the security of any country, is welcome," the British foreign secretary went on to declare: "I rejoice, on behalf of the United Kingdom, that in some respects we went more disarmament than is made in the constructive efforts in that direction. We have made no secret of the fact that we want submarines entirely abolished and indeed we have hitherto understood that in this respect we have the support of the United States delegation.

"But if submarines cannot be abolished," continued Sir John Simon, "and the view prevails that for some powers they are indispensable as elements in home waters, then let us at least limit their size to 35 tons. Again, the question of capital ships is again mentioned today, the United Kingdom delegation desire to point out that, as they understand it, the proposals now submitted make no provision for reducing their menaces size."

Hugh M. Gibson explained the Hoover program. It meant the United States was ready to scrap 386,000 tons of naval vessels and to forego the right to build more than 130,000 tons.

"In land materials," said Mr. Gibson, "our proposals would affect more than 1,000 heavy mobile guns and approximately 900 tanks; in aviation, about 800 horsepower aeroplanes."

Joseph Paul-Boncour, French Minister of War, promptly responded: "Reduction of armaments is inseparable with security. We are willing to study the Hoover proposals if the Americans will study the reinforcement of French security."

"Absolutely unacceptable," was the description of the Hoover proposals given by the French Minister of War in a press interview.

The German representatives said the proposals would give the conference "a new inspiration." Readiness to co-operate was expressed by Japan and more enthusiastic response made by Italy and Russia.

Deferral Declines

Report Manitoba Conservatives Will Not Contest Northern Bishops

Winnipeg, Man.—Conservatives of Manitoba will not contest the two deferred election seats at The Pas and Rupert's Land, it was made known at party headquarters here. Nomination day in these two northern ridings is July 4 and polling day July 14.

There will probably be an acclamation in Rupert's Land but in The Pas the Independent Labor Party will force Premier John Bracken to an election.

B.C. Coal Production

Victoria, B.C.—Coal production in British Columbia for the month of May showed an increase from the corresponding month last year, according to a report issued here.

Destructive Wind Storm

Tract Of Fertile Land In Southern Saskatchewan Suffers From Gale

Minstone, Sask.—Reminiscent of the Regina cyclone of June 30, 1912, the district south of Milestone was visited by a heavy wind storm accompanied by rain and hail which did untold damage to buildings and crops lying in its path. The gale came up quickly and though it lasted little more than half an hour it spread destruction over a tract of fertile land approx mately three miles wide and 12 miles long lying about four miles south of town

There were no deaths resulting from the storm, but Robert Resnick Jr., had a terrifying experience and a very narrow escape when the house in which he had been residing was lifted off its foundation and completely demolished. Mr Resnick was alone at the time, his wife being away visiting relatives, and he jumped from a height of about 15 feet to the ground His only injury was a sprained ankle

It was the worst storm ever experienced in this locality The worst hail damage was apparently done to the farm owned by C. Underwood, Mrs A. J Bradley Rose Cuttinglams and Wm. McCartney

Famine In China

Conditions Reported Rife In Hunkhed Areas

Vancouver, B.C. Desolation and disaster in the famine areas of China were described to members of the Canadian Club by Very Rev. Hewlett Johnson, dean of Canterbury Cathedral, London, England. England Dean Johnson spent three months studying conditions in China

Communism was rife in areas where food was scarcest, he declared. Conditions were so bad they were almost beyond imagination. Even luxuriously rich China had actually experienced the preparation of human flesh for food."

Many desperate people resorted to suicide when they had gone without food for days and no relief was in sight. Corruption was rampant in the severe handicap, due to poor transportation facilities, he concluded.

New "Mountie" Posts Being Established

One At Port Norman And Will Be Opened At Once

Calgary, Alberta.—Royal Canadian Mounted Police will be stationed at Port Norman, in the Great Slave Lake area of Canada's north, according to an announcement made by Major-General J. H. MacBrien, C.B., C.M.G., D.S.O., commander of the R.C.M.P. An officer may be stationed also at Hoke Bay, near the centre of the mining district.

The Fort Norman detachment, he said, would control the activities at Lake Mountain, where the new radium-bearing ore finds, which drew hundreds of fortune hunters into the district. Establishment of the Hoke Bay post will not occur for some time, he stated.

Veterans Ask Probe

Claims Alleged Fraud Casts Shadow On Administration Of Pension Act

Ottawa, Ont.—Increasing publicity given to allegation of fraud and misrepresentation in connection with some pensions casts a serious shadow on the administration of the pension act, the Associated Veterans of Canada have issued a statement calling for an investigation of the charge

The statement is signed, representatives of the Army and Navy Veterans, the Canadian Legion, including the Tuberculous Veterans section, the Great War and the Sir Arthur Pearkes Amputations' Association, the Canadian Pensioners' Association of the on Club of Hundred Soldiers and Sailors.

Ottawa, Ont.—No general investigation into the war pensions system and into frauds that have been perpetrated by reason of misrepresentation on the part of a number of recipients is contemplated, Colonel J. G. Thompson, chairman of the Board of Pensions Commissioners, said. That frauds existed was known, and these were being checked daily.

Epidemic In China

Cholera Reported To Be Raging In Southern Provinces

Hong Kong, China.—Cholera is raging throughout South China. Nearly 300 new cases are being reported each day, and 70 per cent. of the cases are proving fatal.

There was none at Hong Kong, but Canton was reported especially hard hit.

A report from Wuchow said 6 Chinese was arrested in possession of white pellets which he said certain foreigners paid him to throw into wells.

Report Treasure Found

Vancouver, B.C.—The Cocos Island treasure, sought by a party from Vancouver and estimated to be valued as high as $20,000,000, according to some versions is reported to have been located.

WELCOMES DISARMAMENT

SIR JOHN SIMON

British Foreign Secretary is strongly in favor of President Hoover's proposals, and would even go further

Bad Miner Misfortune

Saskatchewan's Trusty Playing Party Babyed By Motor Trouble

Regina, Sask.—Minor misfortune struck Saskatchewan's trusty paying party which started out early in June for its 2,000 mile trip among the waterways of the north taking out thousands of new dollar bills to pay the Indians, according to Inspector W. M Marison, of the Indian Department. The outbound motor boats broke down and it was necessary to send out an auxiliary motor to the party.

The canoe party is now on its way to Portage la Roche near the Alberta boundary, and it has already paid treaty at Canoe Lake and Clear Lake S. H. Simpson, Battleford, in the paying officer this year.

Rescuing Work As Railroad Engineer

Hon. Peter Heenan Going Back To His Trade

Montreal, Que.—Hon. Peter Heenan former Liberal Minister of Labor, is going back to overalls as a locomotive driver, and hopes to take the throttle July 5—the 30th anniversary of his arrival in Kenora.

"It is a good trade, and a good one," he said. "Besides I have a family to support."

Fruit Men Meet

Saskatoon, Sask.—J. A. Acheson Sherwin-Williams Paint Company, Winnipeg, was elected president of the Canadian Credit Men's Trust Association at their annual meeting here. J. F. Sullivan, Quaker Oats Company, Peterborough, Ontario, was named vice-president; H. Deichon of Winnipeg, being re-elected general manager.

Combat Forest Fires

Toronto, Ont.—Approximately 1,000 men have been added to the regular five-fighting contingent of the Ontario Forestry Branch this year owing to the particularly distinctive fire situation which had prevailed throughout widely separated parts of the province, Hon. William Finlayson, Minister of Lands and Forests announced.

Cowboys Hold Bronchos

Until Toronto Rodeo Authorities Come Across With Wages

Toronto Ont. Never say die spirit of the Canadian west has manifested itself here in unusual fashion

An even score of cowhands from southern Saskatchewan and Alberta were lending 65 broncbos on the outskirts of Toronto They rode off with the animals when they did not get paid for their week's work at a local stampede and rodeo And they have declared their intention of keeping the broncbos until the rodeo nether side come across

Seven-foot-tall Harry Hourie of the Wood Mountains, relative of the man who captured Louis Riel, instigator of the Northwest rebellion, was in the van as the 30 odd rode off with the [illegible]

DE VALERA PLAN DOES NOT MEET WITH APPROVAL

London, England.—Suggestions of President Eamon de Valera, of the Irish Free State, that the difference between Great Britain and the Free State over the payment of land annuities should be referred to an international tribunal is unacceptable to the British Government it was authoritatively learned following a meeting of the cabinet.

Considering the reply to De Valera's last note, in which the suggestion was made, the cabinet was assured as a firm in the opinion that only an Empire body could be permitted to arbitrate matters affecting the relations between the governments at London and Dublin

At the same time the ministers were not inclined to contest so vigorously a second point in the De Valera communication, namely, that if and when the land annuities, which are conditional to settlement, other annual payments by the Free State to Great Britain would also be suspended. It is, therefore, regarded as probable that the Irish government will agree to the principle of arbitration before an Empire tribunal. Great Britain would consent to having the scope of the hearing extended beyond the matter of land annuities

Advertise the West

Formal Opening Ceremonies At Port Churchill Approved

Winnipeg, Man. Formal opening of the Port of Churchill during the present season would meet with the full approval of the Manitoba Government, two cabinet ministers stated They added the hope the ceremony would be made the occasion to advertise the prairies' direct outlet to the sea to the world, and viewed with favor suggestions that overseas delegates to the Imperial Economic Conference attend

The recent statement of Hon. R. J. Manion, Federal Minister of Railways and Canals, that he was considering plans for formal opening ceremonies in connection with the Hudson Bay line the Welland Canal led Hon. W J Major, Attorney-General, and Hon J. S. McDiarmid, Minister of Natural Resources and Industry, to hope for early action.

Business Brisk At Churchill

Transport Company Is Increasing Equipment To Handle Freight

Churchill, Man.—Transport Limited, northern freighting firm, headquarters at The Pas, have moved their Churchill office and stables from their former site near the new town survey to a triangle just near the grain elevator G. A. Reid is in charge of operations here. The business of hauling goods by freight has increased. Word was received here that Capt. Harvey L. Weber, president of the concern, is shipping more horses north to take care of adding business.

Production Of Cars

Ottawa, Ont.—Production of automobiles in Canada, in May, totalled 8,321 cars, as compared with 6,816 cars during the previous month, according to a report issued by the Dominion Bureau of Statistics Customs records for May show that 163 cars were imported into Canada and that 374 were exported during the same period.

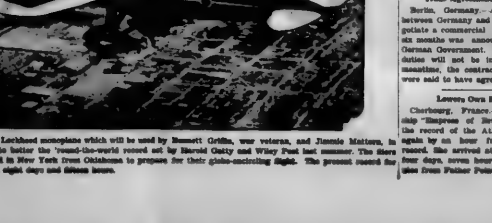
Trade Agreement Pending

Berlin, Germany.—An agreement between Germany and Canada to negotiate a commercial treaty within six months was announced by the German Government. Higher import duties will not be imposed in the meantime, the contracting countries were said to have agreed.

Lowers Own Record

Cherbourg, France.—The steamship "Empress of Britain" lowered the record of the Atlantic crossing again by an hour from her own record. She arrived at Cherbourg in four days, seven hours and 54 minutes from Father Point, Quebec.

Plane for New 'Round-the-World Attempt



This is the Lockheed monoplane which will be used by Bennett Griffin, war veteran, and Jimmie Mattern, in their attempt to better the 'round-the-world record set by Harold Gatty and Wiley Post last summer. The Stars recently arrived in New York from Oklahoma to prepare for their globe-encircling flight. The present record for the long trip is eight days and fifteen hours.

Freak Insurance Risks

Application For Protection Cover Great Variety Of Things

The name Pierre Fleet Rubelin, the famous violinist, has cancelled the $120,000 insurance policy on his hands in favor of a much larger (though possibly paltry) sum, it would not think there is practically no limit to the risks against which insurance may be effected. "We shall provide you," said your heart insurance agent, "with a policy which will pay you a weekly income if you become totally and permanently disabled by a cancer, or if you become a mental case, or if you become paralyzed, or if you become a victim of infantile paralysis, or if you contract pulmonary tuberculosis, or if you develop chronic bronchitis, or if you contract pneumonia, or if you inhale noxious fumes, or if you are bitten by a mad dog, or if you are bitten by a snake, or if you are bitten by a rabid cat, or if you are bitten by a rabid rat, or if you are bitten by a rabid mouse, or if you are bitten by a rabid bat, or if you are bitten by a rabid squirrel, or if you are bitten by a rabid rabbit, or if you are bitten by a rabid hare, or if you are bitten by a rabid guinea pig, or if you are bitten by a rabid hamster, or if you are bitten by a rabid gerbil, or if you are bitten by a rabid chinchilla, or if you are bitten by a rabid ferret, or if you are bitten by a rabid mink, or if you are bitten by a rabid weasel, or if you are bitten by a rabid stoat, or if you are bitten by a rabid ermine, or if you are bitten by a rabid polecat, or if you are bitten by a rabid skunk, or if you are bitten by a rabid badger, or if you are bitten by a rabid otter, or if you are bitten by a rabid wolverine, or if you are bitten by a rabid fox, or if you are bitten by a rabid coyote, or if you are bitten by a rabid jackal, or if you are bitten by a rabid dingo, or if you are bitten by a rabid wolf, or if you are bitten by a rabid bear, or if you are bitten by a rabid panda, or if you are bitten by a rabid koala, or if you are bitten by a rabid kangaroo, or if you are bitten by a rabid wallaby, or if you are bitten by a rabid wombat, or if you are bitten by a rabid platypus, or if you are bitten by a rabid echidna, or if you are bitten by a rabid anteater, or if you are bitten by a rabid armadillo, or if you are bitten by a rabid sloth, or if you are bitten by a rabid monkey, or if you are bitten by a rabid ape, or if you are bitten by a rabid gorilla, or if you are bitten by a rabid chimpanzee, or if you are bitten by a rabid orangutan, or if you are bitten by a rabid gibbon, or if you are bitten by a rabid lemur, or if you are bitten by a rabid tarsier, or if you are bitten by a rabid aye-aye, or if you are bitten by a rabid slow loris, or if you are bitten by a rabid galago, or if you are bitten by a rabid potto, or if you are bitten by a rabid angwantibo, or if you are bitten by a rabid indri, or if you are bitten by a rabid sifaka, or if you are bitten by a rabid avahi, or if you are bitten by a rabid woolly lemur, or if you are bitten by a rabid ruffed lemur, or if you are bitten by a rabid ring-tailed lemur, or if you are bitten by a rabid brown lemur, or if you are bitten by a rabid mongoose lemur, or if you are bitten by a rabid crowned lemur, or if you are bitten by a rabid collared lemur, or if you are bitten by a rabid white-fronted lemur, or if you are bitten by a rabid red-bellied lemur, or if you are bitten by a rabid black lemur, or if you are bitten by a rabid mongoose, or if you are bitten by a rabid meerkat, or if you are bitten by a rabid suricate, or if you are bitten by a rabid fossa, or if you are bitten by a rabid civet, or if you are bitten by a rabid genet, or if you are bitten by a rabid linsang, or if you are bitten by a rabid binturong, or if you are bitten by a rabid fanaloka

LOCAL NEWS

All roads will lead to the Parry Sound summer basket picnic on the afternoon of Wednesday the 6th of July, when sports to suit every taste will be indulged, including baseball, basketball, tug-of-war etc. Everything possible is being arranged for the pleasure and comfort of the visitors.

Souvenir tags will be sold on the grounds at 10 cents each.

The United Church Sunday School held a basket picnic at Borden Park, Edmonton, on Wednesday June 22.

Mr. and Mrs. Ed. Kolberborn and family left Sunday, June 26th, by motor to Silverton, Ont., where they will spend the next two months.

Jeff Dawson, Preston Sherry of Vermilion and Hughie McMaster of Willingdon, and Ralph Peacock and Russell Carvell returned early Monday morning after a two week's motor trip to Waterton Lakes and points West.

Miss Mary Oxley is leaving for Jasper Park on Thursday evening for a week's vacation.

Albert Jacobs took his motor boat out to Elk Island Park last week. On Tuesday evening he and a few friends were erecting a landing stage, whereby they could enter the boat without having to be rowed out.

He intends to leave the boat there during the summer and will take passengers around the lake.

The Editor took a few days off last week-end and motored to Lethbridge, where Mrs. Neale has been holidaying for the past month, both returning on Tuesday evening.

EVITON CHURCH OF CHRIST

11 a.m. Morning Worship.
12:15 p.m. Sunday School and Bible Class.
The evening service is withdrawn for the summer.

Brude[illegible]eim Has Big Sports Day

The entries for various competitions were large at the Bruderheim sports day, sponsored by the Board of Trade in Bruderheim.

The town was decorated with streamers and at 12:30 the citizens headed by the Bruderheim band, went to the sports field. The baseball tournament was as follows: Bruderheim defeated the Ports by the score of 11-6, and Lamont having the bye on account of the Chipman team defaulting. The visiting Lamont team defeated Bruderheim by a score of 17-11 in the finals.

Star defeated Lamont by a score of 13-10 in the ladies' basketball tournament, while Chipman was the semi-finals against Bruderheim and the final game from Star by the score of 34-4.

The competition was keen among the athletes. Mrs. William Staples won the heavy woman contest, receiving $2.50, the prize being a cent a pound. Miss Sevenk won the largest family prize by having 16 present, including herself and wife.

School Board Trustees Inspect School

Minutes of a regular meeting of the Fort Saskatchewan School Board held in the School on Monday, 4th of July, 1932 at 7:30 p.m.

Present:—Mr. F. Atkinson, Chairman, Trustees:—R.Todd, Dr. Grunert, and Dr. Calhoun.

The minutes of the last meeting held were read and adopted on motion of Mr. Todd.

The Board inspected the School building and grounds. It was moved by Mr. Calhoun and adopted that—new flooring be laid in Mr. Hambly's room, new desks for the Grade VIII room, and repairs to the roof where necessary be done. Mr. Todd to look after the matter of the roof repairs.

It was moved by Mr. Todd and adopted that the Secretary advertise for a caretaker for the coming year, to the least paper. Applications to be considered at next regular meeting.

The following accounts were passed on motion of Mr. Calhoun:—F. W. Smith 33c; J. T. Lalonde $3.60; Imperial Oil polish $1.40.

Mr. Anderson was present and submitted reports on recent examinations in grades 7 and 8, and 1st, and 2nd. year High School.

The meeting adjourned on motion of Mr. Todd.

CEMETERY FUND

The Fort Saskatchewan Women's Institute Cemetery Committee wish to make the following report for the 1932 season.

Previously acknowledged	$67.50
W. C. Tims (Toronto)	5.00
P. D. Gordon (Vancouver)	10.00
A. H. Rogers	10.00
Omar Bowden (Vancouver)	10.00
Total to date	$102.50

When, with the help of the above aid, women are able to buy wreaths and household things at the right time, the right place, at real savings, the puzzle of "how to manage on too little" does not baffle them so much.

"Aeroplane Spruce" was the name given recently to the largest salmon trout ever caught in the waters of Jasper Park, at least within the memory of the reputed oldest inhabitant. Weighing 16 pounds 11 ounces the big boy was landed in Pyramid Lake boat of Jasper town by Frank McLeod, a Canadian National employee who spent his afternoon off with a boat and rod and reel. The fish was on record because of the fact that Pyramid at that time became the base for a "Boeing Wasp" flying boat which is making scenic trips through the Park.

Interesting Displays To Be Shown At Edmonton Exhibition July 18-23

A number of new and interesting displays in the Manufacturer's Building will welcome patrons to the Edmonton Exhibition on July 18-23 Some interesting changes are also being made in the Women's Building, notably, the Provincial Department of Public Health, which is arranging an interesting and instructive display of food values and diets.

The Chinese exhibit, of old time costumes, lanterns, and Illuminations, ing features of life in ancient China, has been enlarged by the addition of articles from the Forbidden City and other items, and this show will be housed in the annex, located between the Old Timers' Building and the grand stand. The Old Timers' Association, by the way, are arranging to hold their usual reception in their Cabin, and visitors will be welcomed, particularly those who belong to the "advance guard" of families who settled Alberta; they will find many old friends in the Cabin, and an opportunity to visit and chat over old times.

Tickets are on sale now at the cut rate of 5 for $1, but they must be bought before the Exhibition opens, as they will be withdrawn from sale and the regular prices will be charged during the week of the Exhibition, July 18-23.

DEMONSTRATION LECTURE

A Demonstration Lecture on Dry Chemical will be given under the auspices of the Women's Institute in the Memorial Hall on Wednesday, July 13th, from 2 to 5 p.m. Miss Milne, of the Olds School of Agriculture will be the demonstrator. The meeting is open to the public and it is hoped that a large attendance both [illegible] will be there.

Hon. Frank Oliver was a visitor in town on Wednesday morning.

WABASSO COTTON GOODS DEMONSTRATION

Mrs. M. C. Calhoun, demonstrator for the Williamson Cotton Co. Ltd. will be at Jones, Graham & O'Brien's store on July 11th, 12th, and 13th, and will give a demonstration each afternoon of the three days at 3 p.m.

Tickets will be given out entitling the holder to a chance of winning a Wabasso bed set.

Make your plans to be at one of these meetings.

LOCAL NEWS

The St. George Tennis and Badminton Club held a tournament among its members on the afternoon and evening of June 29.

Heavy rain unfortunately prevented an early start. Tennis mixed doubles were played.

The finals were played on Friday evening resulting in Mr. Rogers and Mrs. Von Ifflend being winners, Mr. Ardley and Mrs. Boyd runners-up.

On July 9th, (afternoon and evening) the St. George Club will entertain the Excelsior Tennis Club. It is hoped that all members of the Club will turn out on that occasion and help to give the visitors an enjoyable time.

R. H. Mason,
Honorary-Secretary

Mr. F. Albert Redd, B.A.,LL.B. of the Collegiate staff Lethbridge, is visiting at the home of his parents Mr. and Mrs. R. F. Redd.

Mr. and Mrs. Chas. Magee are spending two weeks holidays at Alberta Beach.

"The Deadline" will be shown at the Empress Theatre Friday and Saturday of this week. Also on the same program is a comedy, two newsreels, and two cartoons. Don't forget it's this week.

Miss A. West left last Thursday evening for Calgary where she will spend the summer holidays.

Mr. A. Cosford Sup. of Elk Island Park had a very successful operation at the Lament Hospital last week.

We notice in the Lament Tribune of changes in the personal of the teaching staff.

Mr. French, principal for the past two years has resigned and Mr. Ross, who has assisted Mr. French during the past year has been promoted to the principalship. Miss Constance Smith, B.A., of Edmonton will divide the work with Mr. Ross.

Miss Mable Cosford, is the other change in the personal of the teaching staff, and will tutor grades 3 and 4.

Mr. E. T. Chambers of Vancouver, B.C., a business man of this district some 25 years ago, returned Monday for a visit after having been away for twenty years.

Mr. Chambers was in the Hardware business in the Fort and sold out to Gordon and Dalton. He says quite a change in the town and district around.

Mr. and Mrs. Jack Weibe and daughter and Mrs. White left by motor for Wembly, Alberta, where they will spend a few days.

How About A Community Survey?

The more favorable weather conditions prevailing throughout the prairie provinces this year as contrasted with the previous three years, and the more encouraging prospects for an average or even better than average crop this year, have had the result of restoring confidence to hundreds of people who make their homes in purely rural districts and in the towns and villages which exist solely because of the agricultural activities in the districts of which they are the centre. True, there is little ready cash yet available, but hope has been renewed that the farming community of Western Canada has brighter days ahead. The acute discouragement of 1931 is passing and people are again thinking and planning for the future.

Now the time to think and plan. There are many little things to do that will mean much to community betterment, and to the betterment and improvement of the individual furnished, but which were neglected in former years, because of the pessimism that the people were too busy to attend to them. That plan does not hold good at present, people in our towns and villages are not so busy at present that they cannot afford to give some time and effort to community affairs; time for things which call for the giving of some time and real effort but which do not call for the expenditure of money, but in the doing of which valuable community assets can be created.

Before we all get so busy with our own private affairs that we find we "have no time" for matters of general public concern, should it not be a good idea to make a survey of the "home" town or village, or community centre in strictly rural areas, with a view to effecting some improvement? For example, and without limiting the possibility of the whole subject, as the late Sir Andrew Macphail, in his famous essay on "Medicine," would say, there are many things that could be done. Is the cemetery a credit to the community? Are the streets or byways named? If so, has the question been considered, and the grounds become overgrown with weeds? Is the school an eyesore in the district, the reverse of an inspiration to the children? Perhaps a little paint is needed, or an odd piece of carpentry. If so, why not suppose a community effort to get the work done right and make the school a place of community pride? A little time and effort by all making a small contribution of a few hours will work wonders.

And now about the local cemetery where the pioneers of the community and the loved ones from nearby a home are sleeping? It reflects the spirit of a community. Is it kept trim, and neat and green, with trees and shrubs keeping off the blistering glare of a hot summer sun, and a few beds of flowers to lend a touch of colour? Are the paths and roads kept in order? Are the boundaries in repair? Or is it woefully neglected, a tangle of weeds, a place one shuns to visit, and so dismiss that every time a burial takes place the sorrowing and mourning of relatives and friends is increased by the thought that the remains of the dear departed one are left in such a place? Travelling over the prairie many such desolate spots are to be noted. Why not devote a few otherwise idle hours to changing the whole aspect of things and thereby for the better? Let some public-spirited person suggest that community to do the work on a purely voluntary basis.

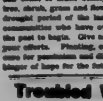
And that soldiers' memorial to which in the early years following the war everybody was proud to contribute. It was erected, not as a tribute to war, but as a loving tribute and lasting memorial to those of the community who were the victims of war. If it were merely a memorial to war, it would be well to forget it and let it fall into decay. But it is a memorial to our best and bravest who made the supreme sacrifice for us. Is that memorial more beautiful today than when first erected? Are there trees and shrubs, green lawns and flowers, all about it, and are they kept in order and trimmed and well cared for? Whatever the answer may be, it will likewise indicate the ideals, the sentiments and the public-spiritedness of the community of finest.

Do you reside in the treeless, level prairie country, and, if so, has your community united to transform a small section of prairie into a community park? There is lots of land available, seeds and seedlings can be obtained for very little,—not infrequently without any outlay of money. All that is required is a start in the voluntary effort of the public-spirited people of a community, and the contribution of some time and effort by them. And in these days, apart from the pleasure thus provided for your own people, such a little beauty spot or small park will advertise your community far and wide,—it is by such an enterprise it will be remembered when travellers have long forgotten how many grain elevators or garages your town or village can boast.

Finally, the individual farmstead. Does the house still stand stark and bare on the bald prairie as it did ten or twenty years ago when you first homesteaded it? Or are you living in one of those model farm homes that dot every traveller along our highways,—a farm home surrounded by trees and hedges, with a bit of lawn, and a garden, small though it may be? The money need not be a truly marvellous dimension to invest. It means to have the necessary ambition and to expend a little time and effort. Yet the dollars and cents value of trees and hedges about the farm home is very great indeed. Try to sell a farm without it trees in competition with one that possesses such an asset and the truth of the statement will be immediately apparent.

Many of our western cities, towns, villages and farms, which were hopelessly unattractive places ten and twenty years ago are today places which can boast of much beauty and charm as the result of organized and persistent tree, shrub, grass and flower planting campaigns. With the breaking of the drought period of the last few years, now is the time for individuals and communities who have overlooked or neglected the matter in the years of the past to begin. Give nature a chance and in the long run she will reward your efforts. Planting, cultivating and watching a grove of trees grow is a task for pessimism and discouragement; it is a joy in the present and a harbinger of hope for the future.

Troubled With Her Children Having Summer Complaint



Mrs. L. E. Montgomery, Ave. E. South, Saskatoon, Sask., writes:—"I am the mother of two children and have a great deal of trouble with them having summer complaint, in fact, several times every Summer they were not just to attack.

"I have found Dr. Fowler's Extract of Wild Strawberry to be the most effective remedy and keeps it always handy and give it immediately on the first sign of my loved ones suffer.

"Thanks to "Dr. Fowler's" I no longer fear the Summer months."

Canada Banned At Sea

Nine Members Of French Penal Colony At Devil's Island Period Up By British Steamer

Menaced by sharks as they drifted for five days in a waterlogged open boat on the Caribbean Sea, nine survivors of a dash for liberty from the French penal colony of Devil's Island were rescued by the British steamer "Trojan."

The men, after escaping from their island prison, which lies off French Guiana, attempted to reach sanctuary in Venezuela on the northwest. Storms at sea stripped the sail from their frail craft and filled it with water.

They told a dramatic story of the death of a comrade whose last words were "bury me ashore. Don't give me up to the sharks. I shall never see my friends again, but they will see my grave." Lured by the food body, sharks trailed after the boat, but the exhausted men refused to commit the pending on the Pomeroon beach in British territory. There they buried their comrade in a shallow sandgrave.

When they put to sea again, a tempest threatened to engulf them. They waved their shorts as signals, and the "Trojan" responded as the men were losing hope.

Use Miller's Worm Powders and the little fellow's troubles are over. These powders correct the morbid conditions of the stomach which nourish worms. They are tasteless, effective, and entirely safe. Miller Worm Powders are sold everywhere. The worms are speedily overcome and the child restored to health. The soundness is imparted to the organs and the health of the child steadily improves.

Trying New System

Vegetables Will Admit Farmers To Lucrative Fair This Year

Farmers may see it worth while to grow vegetables when they arrive at the gates of Western Fair in London, next September. The Fair Board are to consider a suggestion enthusiastically backed up by the relief department and all farmers in the district will be encouraged to grow a total of twenty-five acres of vegetables. The plan would be a complete, a central warehouse to which vegetables would be received weeks in advance and admission tickets issued.

Last winter the city relief department experienced great difficulty in collecting sufficient vegetables, and it is hoped that this system will solve the problem. Last year, the fair had assembled sometimes as many as 40,000 farmers attend the fair in a single day.

Pension Rules—The delight of daintily finished lingerie is its fragrant charm to the completion. Tones up the skin and makes it velvety and the texture. Cooling, refreshing, it is delightful to use. Never leaves the vestige of stickiness. Invaluable for heated face, and as a baby fixative. Wonderful for sunburn protection. Especially recommended in cases of roughness resulting caused by weather conditions.

Willing To Pay

Customer Will Give Hens For Rent In Kind

There is a contention that the tenant is prepared, usually, to pay a reasonable rent for a good farm, and a more attractively packed farm product. The thought was enough for Mr. Thomas Toronto storekeeper, who puts when the prices of 11-quart baskets of Ontario grown asparagus ranged from $1.60 to $1.80. From the wholesale standpoint of the $1.80 basket, it was apparent that buyers were willing to pay the higher price when receiving high-grade quality, and was a more attractive pack.

Muscular Rheumatism Relieved. — When one is a sufferer from muscular rheumatism the answer for better than to have the region rubbed with Dr. Thomas' Eclectric Oil. Let the rubbing be brisk and continued until relief is obtained. There is more virtue in a bottle of it than can be fully estimated.

Distribution of electric refrigerators in Canada has reached a new high peak. Winnipeg, with its low cost power, is one of the best markets in America for refrigerators and other electrical products.

A new oil well in the southern part of the Turner Valley, Alberta, is reported to have struck a flow of gas estimated at 25,000,000 cubic feet daily.

Hail Our Monetary System Be Changed

An Analysis Of Several Of the Proposals Made By Major Douglas

The following in brief, are some of the important proposals that have been made for changes in our monetary system :—

(1). That the weight of gold in the Canadian dollar shall be reduced from 25 grains to about 12 grains.

This would reduce the debts of internal debts, and those owing abroad payable in Canadian currency, by about 50 per cent. It would enable those who borrowed during the war years to repay with commodities or gold approximately the same value as when they borrowed it! It would, however, increase the price of all imported foreign goods 100 per cent, or automatically impose an additional 100 per cent. tariff on all imported goods and commodities imported into Canada. Those who loaned money during the last two years would be repaid about one-half of the value which they loaned. Those who borrowed money or purchased property during the last two years would automatically have the value of that money or property doubled. All those who bought wages or salaries would suffer great hardships until readjustments had been brought about. Prices of everything they had to buy would quickly rise to double.

Apart, however, from the virtual writing down of all debts by half there would be put into operation advantage becomes the price of all goods offered for sale, and of wages and salaries, would eventually rise by approximately 100 per cent as the gold behind the dollar was decreased.

(NOTE. This is simply inflation of currency. France, Germany and other countries after the war tried it and found it practically impossible to control. Inflation seems to be difficult to stop once it has started. The individual or group who is capable of stating where the inflation shall stop? and particularly who is capable of stopping it once it has begun? Inflation seems always to be in the end to currency becoming practically worthless.)

(2). That the Canadian dollar shall be depreciated in value to the present level of the British pound (i.e. from 25 to about 20 grains of gold) and that it shall be tied to the pound sterling.

(NOTE. This is a mild form of proposal No. 1 above. How the currency of an independent country like Canada with its own complicated budget, income and expenditures, could be connected to Sterling mainly with the British pound, is not stated. In any case would Canadians desire the value of their currency to depend solely upon the action of the British House of Commons and of the British people and not upon their own actions?).

(3) That the Canadian dollar shall be increased in value to that of the U.S.A. dollar as quickly as possible and tied to the full gold standard of the U.S.A. dollar, and that by law all debts owing shall be reduced by half but that the Government shall establish the proper relationship of prices of rents — wages — salaries — goods retail and wholesale, of professional services, etc., etc., so that shall revalue by law everything excepting money.

(NOTE.—This is financial and economic dictatorship, pure and simple, and is now virtually tried by Germany and is in fact the deflation of debts and the price of all things down to the currency value, instead of the inflation of the currency up to the debts and prices of all else as is proposed in 1 and 2. If a low general price level of commodities continues long enough, of course, this state of affairs is automatically gradually brought about for the reason that many debts would be payments of repayment, and so would be either written down or cancelled by bankruptcy or by private arrangement, and all other prices, wages and salaries eventually would have to decline to a parity with monetary values).

(4) That by international agreement all countries should agree to reduce the gold backing of their ability at notes and paper currency by a definitely agreed upon percentage.

This would result in a quick rise in the price of all commodities, then the price of all goods, services, wages, salaries, etc., would adjust quickly and an even balance, in time, would be established. The only real effect of this would be the reduction of all debts, both individual, national and international.

This would allow greater banking and gold behind notes and currencies than the 60 per cent., which is the common amount of gold available for monetary purposes in the world today seems to allow. This larger percentage of backing would consequently diminish the possibility of a country, which, whilst solvent, might be in danger of being drained of gold, as Ireland was recently.

(NOTE.—The great difficulty of getting many nations to agree either with the principle involved or of the amount of the gold reduction, might be almost insurmountable, although this method of controllable international inflation is the most favored of all proposals involving inflation by the majority of economists as a means of raising the price level of commodities and of overcoming what

IF YOU CAN'T NURSE BABY YOURSELF . . . TRY EAGLE BRAND!

Countless thousands of healthy, happy babies have been reared on Eagle Brand during the last seventy-five years. You will find our little booklet, "Baby Welfare" full of valuable hints on baby care. Write for it. Condensed Milk Co. (Canada) Limited, Dept. 0, 461 St. Paul St. West, Montreal. Please send booklet "Baby Welfare."

Name .....

Address .....

EAGLE BRAND CONDENSED MILK

is probably the major defect of the gold standard.

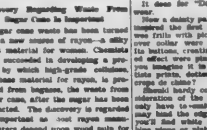
(5) This proposal is practically the same as No. 4 above, but with the proviso that all gold reserves shall be kept in an international reserve bank in which ordinary currencies (Gresham has been suggested)—and that the amount of gold behind the world's paper currency shall be raised or lowered periodically in order that the value of the currency will keep step with the world's gold production and with the relationship of supply and consumption of goods and commodities.

(NOTE. This, of course, would be a form of international managed currency with gold as a basis. This method would be much more difficult to bring into effect and to maintain than proposal No. 4, and no world body seem to come within the realms of possibility, at least for the present.)

(NOTE. The gold referred to in this article is pure gold mixed with the fourth alloy in the British sovereign and one-tenth alloy in the U.S.A. and Canadian dollar—or 113 troy grains of pure gold in the sovereign and 103 grains pure gold in the U.S.A. dollar. Or it means that the sovereign contains exactly 6.85% and so much gold as the dollar.

(To Be Continued.)

Mexico has just placed export duties on alligator skins.



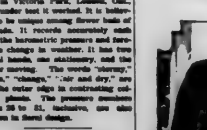
There is NO ODOR from FISH or from Vegetables cooked in CANAPAR

Boiled, steamed, fish comes out fresh and mild, swimming in its own juices, when you cook it in Canapar. Same for Cookies, Puddings. No fishy odour. No gummy steamer or scorched pan to clean afterwards.

And vegetables are simply delicious. Using Canapar you can cook them in their own juices, put over one steamer turned into another, and have a complete dinner for the whole family, all the different odds and flavors.

Canapar only costs 25 cents for 2 large envelopes. You can use it over and over again. Canapar comes in Plain or Salted. Both kinds are the same price. Ask your grocer for Canapar. No pan-scraping afterwards.

Canapar is the largest one contained entirely within Canadian industries, and the fourth largest on the North American Continent. Its area, according to present surveys, is 11,625 square miles, compared with 31,810 square miles for Lake Superior, 20,000 for Lake Huron, 22,069 for Lake Michigan, and 11,170 for Great Slave Lake. The greatest length is 180 miles and its width about 116 miles. Its elevation has not yet been accurately measured, but it is approximately 600 feet above sea level. Its depth varies up to 75 fathoms, or 450 feet, placing its floor below sea level.



Child: "We have forgotten to stamp the letter."

Boy: "What idiots we are."—Boston Transcript.

Good Progress Being Made In Extraction Of Radium From Great Bear Lake Pitchblende

Investigation into the treatment of the Great Bear Lake pitchblende ore is now being actively carried on by the Ore Testing Division of the Mines Branch, Department of Mines, Ottawa, under Mr. W. B. Timm, Chief of the Division. It is learned that progress is very satisfactory, and no remarkable tendency has been made considering the nature of the investigation and the small staff available for the work.

After preliminary investigation of all the known processes, Mr. Timm states, work was confined during February and March to one which seemed to be the most adaptable to the treatment of this particular ore. Here, the investigation has progressed from small laboratory scale work to pilot-plant scale, and some six trial runs have given encouraging results. The pilot-plant scale on which work is being conducted is approximately one-tenth that of commercial size, and material sufficient to give all the data with respect to operation and costs of a full mill run.

Extractions of radium from the ore have been well over 90 per cent., the last test made giving 97.6% per cent. This, however, is on one type of ore and, as the process is entirely a chemical one, other types may require variations in treatment and may not give such good results. No results, therefore, can be released for publication until all types of ore from the property have been thoroughly tested, and a satisfactory treatment worked out which can be embodied in a commercial treatment plant.

For some years only high grade pitchblende will be shipped from the Great Bear Lake property, i.e., ore containing above 40 per cent. uranium oxide. Later, the cobbled rejects and low grade ore will, no doubt, be concentrated at the mine to shipping grade, and the treatment plant will be erected in the most favourable position from the standpoint of the cost of chemicals. As it takes three tons or more of ore to the gram of radium, the advantage of shipping the ore to the supply of chemicals will be readily seen.

Lest there be any misunderstanding as to the meaning of the word concentration when spoken of in the treatment of pitchblende ore for the extraction of radium, it should be pointed out that the concentration of the radium is distinct from the concentration of the pitchblende in the ore. The latter will, no doubt, be done at the mine when it becomes necessary to carry out this operation. The concentration of the radium is that part of the chemical process in which the radium is extracted, is precipitated with barium, resulting in a radium-barium sulphate concentrate.

These concentrates will, with the topography and general characteristics of the Great Bear Lake territory, have to be treated in the Eldorado Mine Refinery at Port Hope, Ont., which is the largest one contained entirely within Canadian industries, and the fourth largest on the North American Continent. Its area, according to present surveys, is 11,625 square miles, compared with 31,810 square miles for Lake Superior, 20,000 for Lake Huron, 22,069 for Lake Michigan, and 11,170 for Great Slave Lake. The greatest length is 180 miles and its width about 116 miles. Its elevation has not yet been accurately measured, but it is approximately 600 feet above sea level. Its depth varies up to 75 fathoms, or 450 feet, placing its floor below sea level.

Great Bear Lake has long been known through the descriptions left by early explorers, particularly Franklin, Dease and Simpson, who made this lake their headquarters in the exploration and mapping of the Arctic Coast, but it is only recently that the area surrounding it has become of economic importance. In 1930, oil was discovered on the Macken zie River in the vicinity of Norman, where Great Bear River discharges the waters of the lake. The discovery well, and subsequent wells, drilled in 1921 and 1925, were capped and left for development when conditions are economically favourable. The oil has produced, unfortunately, a high grade gasoline. In 1922 outcrops of coal were reported to exist on Dowdy Bay on Great Bear Lake. From 1930 to 1932 biologists of the Department of the Interior made investigations over a large part of the Great Bear Lake area, with a view to grazing lands for reindeer. One of the areas found to be most suitable for this purpose lies immediately north of Great Bear Lake.

New Source Of Rayon

Discovery Regarding Waste From Sugar Cane Is Important

Sugar cane waste has been turned into a new source of rayon—a discovery which Canada Chemists have succeeded in developing a process by which high-grade cellulose, the basic material for rayon, is produced from bagasse, the waste from sugar cane, after the sugar has been extracted. The discovery is regarded as important as most rayon manufacturers depend upon wood pulp for cellulose. Sugar cane mills accumulate between 250,000 and 500,000 tons of bagasse annually. Much of this material has been used in manufacturing wallboard, but the enormous quantities have been used as fuel in the mills.

New Industry In Alberta

Factory Turns Out Potato Chips and Potato Wafers

A new industry has been launched in Lethbridge, Alberta, the output of which will be potato chips and potato wafers. The product is already on the market and the prospects are that large quantities of local grown potatoes will find a market. The industry is taken in hand by the potato chips which will be retailed in attractive, dust-proof containers. If the Lethbridge product proves popular the factory and its products will be extended.

Potato chips are a popular and nutritive food product in the States where similar factories have been established.

Fluid Barometer Is Unique

One In Victoria Park, London, Ontario, Is Said To Be Only One

A fluid barometer has been laid out in Victoria Park, London, Ont., and under test it worked. It is believed to be the only one of its kind in the world, and the first to be constructed in Canada. It records accurately each day the barometric pressure and temperature, and the humidity of the atmosphere. It also records rainfall, wind velocity and direction, sunshine, and the other moving. The words "stormy," "rain," "changes," "fair and dry," are set on the edge in large lettering and read plainly. The pressure records are from 26 to 31, inclusive, are also shown in fluid design.

Is Still Selected Animal Park

Elk Island National Park, Canada's second largest animal reserve, is within an hour's motor ride of Edmonton, Alberta. The bulletin is still issued from the Dominion Parks Branch of the Department of the Interior, Ottawa.

It is the purpose of this bulletin to keep the public informed on the development of their land. The policy is particularly dark and thick and the animals are all sturdy and well developed. They are not as wild as when they were originally captured, but it is inadvisable for visitors to go into the pens on foot, though they may be approached with safety in an automobile. Both the moose and elk in this sanctuary are also well developed specimens.

Discovering Star's Brightness

With a photo-electric photometer such as the one attached to the telescope at the Dominion Observatory, Department of the Interior, Ottawa, it is possible to measure the brightness of a star to within one half of one per cent. of its value. This instrument is used mainly for following the changes in the brightness of variable stars.

Riding Mountain National Park, Manitoba's Scenic Playground, Has Attractions For Tourists

Works In a Circle

Great Trouble in That Unemployment Creates Unemployment

Gross earnings of Canadian railways for March totalled $25,000,000, as against $30,000,000 for March of last year. But as operating expenses in March, 1931, were but $22,500,000, compared with $27,500,000 in March, 1930, the net position remained unchanged.

Many may ask how the railways could manage to get along in March of this year with $5,000,000 less of operating expenditure than in March, 1931? They may think that the railways must have been wasting a lot of money last year, or spending it unnecessarily.

The real facts, perhaps unfortunately, are quite different. In March, 1930, the number of railway employees was 145,000, with a payroll of $13,000,000. In March, 1931, the number of employees had dropped to 124,000, the payroll declining to $15,000,000.

Then, while the railways saved a lot in operating costs, it was at the price of 20,000 railwaymen being dropped from employment, with a monthly loss of $4,000,000 to purchasing power.

Here, then, the circumstances being what they are, helped the railways. But it wasn't much of a help to Canadian industry. The process went ahead with unemployment in that it creates unemployment.—Ottawa Journal.

Airplane Directed By Train Passengers

Demonstration Conducted From "Flying Restaurant"

Passengers travelling from London to Glasgow on the south train, "The Flying Scotsman," at a speed of sixty miles an hour directed by radiophone the movements of a forty-passenger airliner "Hercules," flying overhead.

Pilot G. R. Jones turned the controls over to passengers in the restaurant car of his passenger spoke with persons aboard the train.

This is believed to have been the first two-way conversation between an airplane and a train. An aerial was slung inside the observation car, but there was not sufficient clearance on the roof when the train passed under bridges.

When Time Flies

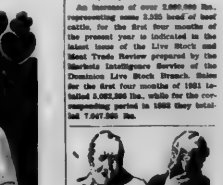
The advance of age is at first unperceived, but it perpetually carries and rapid, and when it is realized it seems to approach almost with speed of light, and life at last seems to end soon after its consciousness.

Anglo-American Alliance

A recent wedding of interest to society on both sides of the Atlantic was that of A. P. Stanley-Clarke, of the 16th and 20th Hussars, crack British regiment, and Miss Vivian St. George, prominent New York society belle. The newly-weds are shown as they left St. Mary Abbot's Church, London, England, after the ceremony. The bride is a sister of the well known Pierre St. George.

Quantity Increases Sales

An inventory of over 2,000,000 lbs., representing some 2,535 head of beef cattle, for the first four months of the present year is indicated in the latest issue of the Live Stock and Meat Trade Review prepared by the Markets Intelligence Service of the Dominion Live Stock Branch. Sales for the first four months of 1931 totalled 3,082,386 lbs., while for the corresponding period in 1932 they totalled 7,947,396 lbs.



"My wife is always shrinking with pains."

"How you so roundly for it?"

"Goodness! I sleep my eyes with cotton wool."—Manchester, Coin.

WORLD HAPPENINGS BRIEFLY TOLD

James W. Douglas, Edmonton, has been appointed stipendiary magistrate for the Northwest Territories.

Lady Eaton of Toronto, back in Canada after an extended visit abroad, told an interviewer in Winnipeg that Canada is doing too much worrying about the depression.

New York motorists paid approximately $2,000,000 during the past decade to run red lights, talk back to motorcycle cops and drive the wrong direction on one-way streets.

An issue of the Canada Gazette contains a proclamation designating the Waterton Lakes National Park as a part of the Waterton-Glacier International Peace Park.

Canada stands third in the public ownership of railways, India in first with 41,794 miles of road, Germany second, with 32,665, and Canada, 24,383, including federal, provincial and municipal.

Atlantic salmon eggs are being exchanged with the state of California by Dominion authorities for a corresponding number of steelhead salmon eggs to be used in stocking British Columbia waters.

Two hundred years ago in June, 1833, the Dominion of Canada assumed the rights of citizenship to the Jews of the country. Forty all over the Dominion celebrated the centenary of emancipation.

The British gunboat "Mendora" was boarded by mutineers by Chinese aeroplanes sent by General Chiang Chai-Teng to recover a quantity of munitions captured by Admiral Chan Chak, rebel commander of the Cantonese navy, but she was not struck.

Union Drilling Company of Calgary will commence drilling for crude oil in the heart of Alberta's "bad lands" where dinosaurs roamed millions of years ago. Vancouver capital is backing the venture and W. D. Mutter, of Vancouver, is heading the company seeking crude oil.

While screening gravel at the Hudson Bay railway yards at Churchill, George McDonald, machinist, found an old of the reign of George the Third. The coin is thin, and somewhat worn. The gravel from which the coin was taken, came from the shore of the bay. It is presumed it was lost by a sailor of one of the early expeditions.

A Perpetual Memorial

Late John Weller Superintendent Work On Welland Ship Canal

John Laing Weller is dead, but the Welland Ship Canal will be a perpetual memorial to his work. Few Canadians were familiar even with the name of the man who was in charge of the construction of the greatest public work ever completed in the Dominion of Canada. Yet it was Mr. Weller who was on the job; it was he who was head of the surveys, designs and carrying out of the big task from 1913 to 1917. When work was resumed in 1919 after the war, it was Mr. Weller who was made consulting engineer. For the last few years he has been on pension from the Federal Government.

There is wide spread interest in the Inland Lake district. Manitoba, on the part of sniping men in all parts of Canada. Over 600 reports on this district were recently sent out by the Manitoba Chamber of Mines.

Salvaging Lost Gold

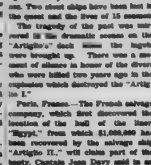
Divers Are Bringing Up Bullion From Sunken Liner

Brest, France. Thirty ingots of gold, valued at $1,000,000, were recovered yiger, dropped into the sea to fill up the rest of the $5,000,000 which went down with the liner "Egypt" ten years ago.

The $1,000,000 which was changed hands on the "Artiglio's" decks represents four years of dogged labor by Captain Jean Jouy and his men. Two steel ships have been lost in the search and the lives of 15 seamen.

The tragedy of the past was recovered in the dramatic season on the "Artiglio's" deck when the bullion were brought up. There was a moment of silence in honor of the divers who were killed two years ago in the explosion which destroyed the "Artiglio I."

Paris, France.—The French salvage company, which first discovered the treasure in the hull of the liner "Egypt," from which $1,000,000 has been recovered by the salvage ship "Artiglio II.," will claim part of the booty, Captain Jean Jouy declared in an interview with Paris-Midi, Paris newspaper.



$10

BLESSING, GRACEFUL AND YOUTHFUL WITH SECTIONING—LY PLACED APPLET FRILL

Here's a delightful model, full of charm for summery wear.

A caped frill covers the sleeveless arms in a smooth manner. And don't you think the skirt is smart with its slimming hip lines?

To make it: Cut it out and you'll finish it in less time than it would take to shop for one that is no smart as this model.

It is carried out in triple sheer print.

This silks in white or pastel, voile prints, sheer dotted batiste and sheer linen prints are dainty and cool especially.

Style No. 519 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust. For 36 requires 5¼ yards of 39-inch material.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Contract Bridge

By Sidney B. Hinds, Chesterfield Club, Toronto

In my previous article the methods of valuing the trick taking probabilities of hands were given. Today I will deal with the application of these principles.

It must be understood that in Contract it is the endeavor of the part nership to any particular deal, to fulfil as precisely and as definitely as possible the story of the twenty six cards held by the partnership. For this reason, certain basic conventions are employed and the certain definite formulas for card valuations. Both of these have been outlined in previous articles.

The opening bidder, under ordinary circumstances, opens the bidding when his hand contains three or four high honor cards which, he thinks under average conditions, will take from two to three tricks in any declaration he or his partner may make. Also the opening bidder guarantees, that, in case he and his partner are the declaring partnership, they will take as a minimum, from four to five tricks, if the deal is played in the original declaration made by the bidder. Therefore, there are nine tricks left for the three remaining hands, and that the opening bidder and his partner is to have at least three of them. Therefore when an opening bid of one is made normal expectancy by the opening bidder is that his partner will in the declared suit in his partner's hand. There three taking tricks are based on the law of average that is, high card tricks being suit tricks and ruffing tricks.

It must be borne in mind that, in Contract, provided there is no intervening bidding, the first response by the partner of the original bidder is the vital response. The entire hand is upon the first response that the success or non-success of that partnership depends. It is, therefore, of the utmost importance that this first response be precise In any raise by partner of the original bidder's declaration, the raise must be given in full. As normal expectancy is three taking tricks, the full raise in the number of suits is to have that the hand contains. The works out as follows The original bid is one spade This bid definitely informs the partnership that the bidding hand contains a minimum of from four to five taking tricks with spades trumps. The original bidder's partner decides that the spade bid fits his hand and that the deal should be played with spades as trumps. In his response hand he figures the actual trick taking probabilities of the hand with spades trumps. If he finds that he has three tricks, then he raises the bid to four spades. If the hand will take five tricks he raises the bid to five. In other words he gives raises corresponding to the number of taking tricks he has above three. The following example will explain this.

North
Spades J. X. X. X.
Hearts K. X.
Diamonds A. K. X.
Clubs K. X. X. X.

West
Spades X. X.
Hearts J. X. X. X.
Diamonds Q. J. X. X.
Clubs Q. X. X.

East
Spades Q. X.
Hearts K. Q. X. X.
Diamonds 10. 9. 8. X.
Clubs A. J. X.

South
Spades A. K. X. X.
X.
Hearts A. X. X.
Diamonds 10. X.
Clubs K. X. X. X.

The Bidding—South Is the Opening Bidder

S	W	N	E
1 Spade	Pass	2 Spades	Pass
4 Spades	Pass	Pass	Pass

In valuing North's hand the procedure is as follows:—

Half a trick for the four card spade suit.

Half a trick for the Jack of Spades. One trick for the ability to ruff the third round of hearts.

Two tricks for the Ace, King of Diamonds.

Half a trick for the four card club suit.

Half a trick for the King of Clubs. Or a total of two taking tricks with

PUZZ SALE

P.O. BOX 10 GALT, Ont. Can.

Spades trumps. Normal expectancy is three tricks. Therefore North has two raises and bids three spades.

South's hand is valued as follows:—

Two tricks for the Ace, King of Spades.

Two tricks for the five card spade suit.

One trick for the Ace of Hearts Or a total of five taking tricks. As North has shown five taking tricks and South has five, then North bids four spades, as the bidding has disclosed ten taking tricks in the combined hands.

The valuations which I gave you in a previous article are uncanny in their accuracy up to ten tricks. In the next article it will be shown under what circumstances they are not accurate and why. It may be said however that eighty per cent of the time they are accurate.

Body Emits Violet Rays

Rays From Woman's Eye Destroys Yeast Cells

A woman's eye killed yeast cells simply by looking at them at Cornell University recently. This discovery, suggesting the "evil eye," has found its use in ordinarily harmless form of ultra violet rays given off by human bodies generally was reported to the American Association for the advancement of science.

The experiments were described by Dr. Hans Blahn, of the Cornell Bacteriology Department.

The yeast cells—such a tiny particle—were laid on a glass slide. The woman placed her eye close, as in looking through a microscope. The cells died in a few minutes. Previous experiments with other parts of the body explain the lethal power in this feminine look.

Several years scientists have been reporting various discoveries that living things produce ultra violet rays. In the human body they were first found coming from working muscles, though not from resting ones. Then they were found in the blood and in carcinoma, a form of cancer.

The finger tip rays of several persons at Cornell killed yeast cells. Through quartz placed above the cells, the killing required about 10 minutes without it, less than a minute. The quartz helped to show that ultra violet was the cause. Yeast proved by being cooked when white is impervious to ultra violet was unharmed.

After the finger, the tip of the nose was discovered to be a fine ultra violet "tube." Then came the eye.

The human rays are not always lethal. Even some persons there are who benefical to tiny plants. There seems to be no difference in the kind but the quantity differs. Weak rays in a blind ai yeast. The same person emits it at different rates. He may be "killing" at one period and "benign" at another.

Horse Prevalent in China

Common Cold Prevalent Most In Crowded Centres

That colds are associated with crowded cities public health officials have long suspected. Dr. Wilson G. Smillie of Harvard now supplies the supporting evidence. In four isolated communities colds are caught only from outsiders. Spitzbergen's case is especially impressive. The miners of that most northerly community live and sleep in damp, hot barracks, work in drafts at temperatures below freezing, but catch no cold. When Dr. Smillie concludes that the common cold must be attributed to an infection probably to one that can never be seen under the microscope we naturally ask if there is no serum that will impart immunity. He holds out no hope. Only the secondary infections may perhaps be then controlled. The primary cold seems to be incommunicable—the price we pay for surviving in cities.

Man Adams Into Apple

It wasn't Eve who ate the Biblical apple in the Garden of Eden. It was Adam, Dr. H. A. Brandon, Chicago, explained in a lecture at Hull House, Town. The name Eve was conferred on her later, by Adam himself.

Treasure Hunt

The active search for oil in western Canada has switched to Northern Alberta, where there last week are planned in the Athabasca area, by Steelton Interests.

SUNDAY SCHOOL LESSON

JULY 10

THE CALL OF MOSES

Golden Text "Certainly I will be with thee." Exodus 3:12.

Lesson Exodus 3:11 to 4:20

Devotional Reading Isaiah 61:1-9.

Explanations and Comments

Called To a Great Task, Exodus 3. 10 The biography of great men is not confined to public events. It relates the incidents which are private, and describes the experiences which are significant and necessary for spiritual results. Thus it was with Moses we must be with him in the wilderness. In order to understand his conduct at the land of the bush of Israel." At Horeb the call came to Moses to become the leader of his people, deliver them from oppression in Egypt, and bring them forth on their way to the Promised Land. He stood before a bush that burned and yet was not consumed.

"Now clear is the anticipation here of what is now the accepted truth of the Christian mind, that the energy of God, though always expended in nature and in history, is never consumed and never destroyed."

"I have seen the affliction of my people . . . I am come down to deliver them . . . Come now therefore, and I will send thee to Pharaoh, that thou mayest bring forth my people, the children of Israel out of Egypt." With a flash of insight Moses knew that God was calling him to the stupendous task of delivering his enslaved brethren in Egypt.

"The dialogue between Jehovah and Moses, as in other cases, must be picturesque, but we must not think of it as giving expression in words which are naturally likest of the man-ner—to Moses' mental communings with God, through which he was gradually taught by him that, in spite of the difficulties which he saw before him, he was nevertheless the God's appointed agent for accomplishing His gracious purposes."—S. R. Driver.

"God has a way of His own into the spirit which He has made. He lays His will upon men, and the man makes the realization that he stands entranced by that being to specific submission and definite service"

"And on the path of duty to made plain,
May grace be given that I may wall therein,
Not like the bleating for his soiled train
But cheerful in the light around me thrown,
Walking as one to pleasant service gone."

Doing God's will as if it came my own,
Yet trusting not in mine, but in his strength alone."

—Whittier.

What Price Accidents

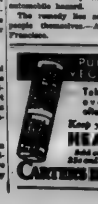
Burden Of Cost Falls On Just and Unjust Alike

The average citizen, when he picks up the paper and reads about an automobile accident may feel a fleeting moment of sympathy for the victim, but he dismisses the incident from his mind as something that does not concern him personally. If he stopped to think, he would realize that every automobile accident involving injury or loss of life affects his pocketbook. Nearly every such accident calls for emergency hospitalization and this is in turn costs money.

To this cost must be added the expenses of ambulance signals, court and traffic squads. Insurance rates also increase. So that any way one figures the matter out the burden of such accidents falls upon the just and the unjust alike.

In the year 1931 there were some 3,000,000 automobile accidents in the United States, with 1,000,000 people killed or injured. This is too appalling to even commend upon. The destruction of life and property in the end touches everybody's pocketbook much more than the cost which the accidents involve. The sum total of all these charges should be great enough to make the people of the United States band every effort to reduce automobile hazard.

The remedy lies solely with the people themselves.—Argonaut, San Francisco.



NAME BRITISH DELEGATES FOR EMPIRE PARLEY

London, England Announcement of arrangements for at least four British cabinet ministers to attend the Imperial Economic Conference at Ottawa, in addition to Sir Philip Cunliffe-Lister, Secretary for the Colonies, who is not in the cabinet indicated that Stanley Baldwin would lead the United Kingdom's delegation.

Mr Baldwin is Lord President of the Council and, at the second, acting Prime Minister. He will be accompanied by Lord Maibham, Minister of Health, Sir Thomas, Secretary for Dominions, and Walter Runciman, President of the Board of Trade all cabinet ministers.

The Australian and New Zealand delegations have sailed for Vancouver from Wellington, New Zealand, and arrive in the Pacific Coast city on July 15. The conference opens July 21. Stanley Melbourne Bruce, Assistant Treasurer, and R. G. Casley, Minister of Trade, head the Australian delegation, while New Zealand's principal representative is Sir J. G. Coates, Minister of public works, and Downie Stewart, Finance Minister

The first of the sections of the combined British delegations, including the commercial and industrial advisors, leave London this week. Representatives of South Africa, Southern Rhodesia and Newfoundland had also take their departure from London.

Reports from Dublin shed little light on the Anglo-Irish dispute that is likely to prove embarrassing at Ottawa. It announced that President [illegible] would not attend the Imperial Economic Conference because of pressure of business. It was indicated the Free State delegation at Ottawa would confine itself solely to consideration of trade questions and Dublin indicated it did not expect the larger issue of the Anglo-Irish dispute to arise.

Deportation Case

Appeal To Supreme Court Of Canada Is Refused

Halifax, N.S.—The appeal to the supreme court of Canada on behalf of alleged Communists held here for deportation on will be held up at least a week while Mr. Justice Rose, of the supreme court of Nova Scotia, considers the application for leave. When formal motion was made recently by L. A. Ryan, counsel for a group of eight of the alleged Reds, C. B. Smith, K.C., representing the crown, appeared in opposition to the appeal. His position sustained the application for a week, and intimated that he might hear further argument from Mr. Ryan.

The condemned men sought release under habeas corpus proceedings, but their action was dismissed by a chief justice court judge and later by the full bench of the Nova Scotia supreme court.

Scalds Prove Fatal

Delegate From Vancouver Attending Orange Gathering In Montreal,

Succumbs To Injuries

Montreal, Que.—John E. Carpenter of Vancouver, died in hospital here from injuries sustained when he was scalded in his hotel bathroom. He was believed to have been overcome by a sudden rush of drowning water for his bath and fallen into the water. He was 75 years of age.

Mr. Carpenter was in Montreal to attend proceedings of the grand lodge of British North America, of the Orange Order Monday he was elected deputy grand master of the Black Knights. He was a past grand master of the order in British Columbia.

Pagan League Visits Belfast

Belfast, Northern Ireland.—No untoward incidents marked the visit here of Cardinal Lauri, papal legate at the Eucharistic Congress. It was through a quarter mostly inhabited by Nationalists that the prelate entered Ireland's ecclesiastical capital. The route was diverted so that he would not have to pass through a Union district.

To Tour Canada

Group Of Empire Farmers On Visit To Dominion

Quebec, Que "To see and to learn" might be the motto of the group of empire farmers who arrived here on the liner "Empress of Australia." They spent two days in Quebec prior to starting on a trans-Canada trip.

Thirty-seven in number and including 13 women members of the party are all farmers or closely connected with farming, and represent the mother country, South Africa and Irish Free State They are travelling under auspices of the British National Union accompanied by Arthur Chatham, Secretary of the Union and former South African Trade Commissioner to West Britain

The party is composed of 13 members from all parts of South Africa, two from the Irish Free State and the remainder from England and Scotland. Among them are Donald Crawford, former treasurer of the National Farmers' Union of England, and M G Villiers, of Cape Province South Africa, a former candidate of the Nationalist Party.

Free State Senate Passes Oath Measure

But Bill Almost Unrecognizable On Second Reading

Dublin Ireland The Free State senate passed the Republican Government Oath Bill through its second reading stage by a majority of 12 votes, but the measure has been amended so the bill is almost unrecognizable. The amendment is the addition of the oath [illegible] to the oath of the Free State.

The government has no intention of accepting the measure in its present form," said Senator Joseph Connolly, minister of Posts and Telegraphs. It would let the bill go to the Dail Eireann "with the results that might be expected," he added.

This means the Dail may again pass the original measure, which after 18 months would become law despite the senate. The alternative is a general election in which the Republican Government would seek a decisive mandate for abolition of the oath.

Statues On Parliament Hill

Burnishing Up Statues At Ottawa For Imperial Conference

Ottawa, Ont. Relieved of their mantle of green corrosion, statues on Parliament Hill of Queen Victoria and Sir John A. Macdonald will greet delegates to the Imperial Conference independent in experimental coats of enamel.

After months of work, national research council chemists prepared a solution to remove the marring corrosion. The varnish was applied in an attempt to prevent its recurrence.

Opposition For Bracken

May Be Three Cornered Fight At The Polls

Winnipeg, Man.—Premier John Bracken may have two opponents in the by-election in The Pas on July 14. J. A. Campbell, Conservative, is to be nominated as a candidate for the seat and the Independent Labor party has announced that it will be in the field. Rupert's Land also will elect a member on July 14. M. G. Reeve-Conservative member in the last House, will run as a Bracken follower and probably will be opposed by Col. Arthur Sullivan, Winnipeg lawyer.

New Plans For India

London, England.—A comprehensive scheme for the future constitution of India, embodying both the aspects of federation and provincial autonomy, will be presented in a bill to be brought down in parliament by the British Government, Sir Samuel Hoare, Secretary for India, announced.

Sets Flight Record

Vancouver, B.C.—Making the flight from Winnipeg to Vancouver in one day, Pat Reid, noted Canadian pilot, landed at the Inland airport. He stopped at Regina, Lethbridge and Grand Forks en route, and averaged 160 miles an hour.

Crop Conditions

Improvement In Western Provinces Is Indicated In Government Report

Ottawa, Can.—Canadian crop conditions are much improved in the western provinces and distinctly lower in the maritimes and eastern Canada, as compared with last year This statement is made in the government report on crop conditions issued June 30.

Western crops have maintained their conditions fairly well, the report states, in a period of scanty rainfall and higher temperatures. Likelihood of heavy damage from cutworms is now past but grasshoppers are still dangerous and are particularly damaging in Manitoba.

In some large areas rain is needed to prevent crop deterioration, but generally the present moisture supplies are satisfactory.

In British Columbia, recent weather has been almost ideal with plenty of heat and rain. Hay is nearly completed. Cereal crops are looking fine.

Prospectors Use 'Plane

"Flying Box-Car" Carries Equipment To Northern Gold Fields

Lac Du Bonnet, Man.—Prospecting in Manitoba entered upon a new phase when ten prospectors with 6,000 pounds of supplies, equipment and five canoes, left here in one aeroplane for the Island Lake gold field, 200 miles north and on the Manitoba-Ontario boundary.

Their ship carried was the huge juniors of the Canadian Airways, the "Flying Box-Car."

The machine was chartered by the Manitoba Chamber of Mines with the result that the ten prospectors can now be in the field at a cost of about $60 each, including equipment

Send Up Test Balloons

Altitude Of 65,000 Feet Is Attained In German Experiment

Stuttgart, Germany.—Three test balloons carrying measuring instruments were sent up 65,000 feet under the direction of Prof. Erich Regener, of the Technical University. The altitude was greater than that attained last year by Prof. August Piccard in his ascension to the stratosphere.

Each balloon was 6½ feet in diameter and the three were hitched together 12 feet apart with the instruments in a gondola between them. They were handed down after three hours.

Will Keep Present System

Calgary, Alberta.—Alberta wheat pool will continue operating this season, by this judgment, returned every dollar he ever invested with Sedlowny, Mills and Co. He is also allowed interest at five per cent. from December 15, 1930.

Hon. Peter Heenan, former Liberal Minister of Labor is going back to overalls as a locomotive driver and hopes to take the throttle this week. "It is my trade, and a good one," he said. "Besides, I have a family to support."

Under New Regime

United Newfoundland Party Takes Over Reins Of Office

St. John's Mfld. This island dominion is now under control of the United Newfoundland party, with F. C. Alderdice, prominent St John's business executive as prime minister.

The Liberal administration of Sir Richard Squires suffered severe defeat at the general elections of June 11, has resigned, and members of the new government were sworn in. Mr. Alderdice also took the portfolio of Minister of Finance and Customs.

Other members of the executive council are. J. C. Puddester, Secretary of State; L. F. Emerson, K.C., Minister of Justice; H. A. Winter K.C., James Ayre, Hon. F. McNamara; S. J. Poole, Harold Mitchell, John Stone.

An Important Judgment

Ottawa Lumberman Awarded Full Amount Of Claim Against Province

Toronto, Ont.—In a judgment of far-reaching importance to brokerage houses D. R. Rochester, Ottawa lumberman, is awarded the full amount of his claim, $162,168.48, against H. W. C Sollowny, Harvey Mills and the Sollowny-Mills Brokerage Companies by C. H. Lennox, assistant master at Osgoode Hall.

Rochester, who dealt with the brokerage firm for more than two years, sued, in by this judgment, returned every dollar he ever invested with Sollowny, Mills and Co. He is also allowed interest at five per cent. from December 15, 1930.

Duce Escort to a Queen

Il Duce is shown with Queen Helena of Italy, on one of the very rare occasions on which they have been photographed together. The picture was made during the recent services to commemorate the fiftieth anniversary of Garibaldi's death in Rome. A monument to the wife of the national hero was unveiled at the Ossicolo as a feature of the celebrations.

FARM MARKETING BOARD MAY BE APPOINTED SOON

Ottawa, Ont.—A commission to study and report on the feasibility of a farm marketing board will be appointed by the Dominion Government in a few days it was learned here It is reported that during his recent visit to the west Hon. Robert Weir, Minister of Agriculture, went into the matter with western producer and dealers and that considerable progress has been made towards reaching a decision as to the men who should form the commission.

It is presumed that the commission would begin very soon to study the situation in order to be in a position to discuss the feasibility of a marketing board with exporters from other dominions who will be here for the Imperial Conference. The object of a board would be to prevent gluts of prices whenever Canada went on an export basis on such products as butter, cheese and other articles in which the exportable surplus is small compared with the domestic demand.

Judgment Reserved

Supreme Court Heads With Peter Veregin Case

Ottawa, Ont.—Judgment was reserved in the supreme court of Canada on the application of Peter Veregin, impersonal leader of the Doukhobors of western Canada, for leave to appeal against a conviction in Saskatchewan for perjury.

William J. Ottawa, counsel for the Province of Saskatchewan, appeared for the crown. Veregin was represented by P. G. Mclennan, Saskatoon.

With a number of clashes between opposing counsel largely on points of law, arguments ended the proceedings at the time of conviction in the king's bench court of Saskatchewan. After a jury trial, Veregin was found guilty in the king's bench division and was given a term of three years in Prince Albert penitentiary. On appeal to the appeal court, the sentence was reduced to 12 months.

Staging Wrigley Swim At Lake Waskesiu

An Entrants In Saskatchewan Event Must Be Amateurs

Saskatoon, Sask.—Permission has been granted to the Prince Albert Aquatic Club to stage the Saskatchewan Wrigley one-mile championship swim at Lake Waskesiu, Prince Albert National Park, Saturday, July 14.

In 1931 the Wm. Wrigley, Jr. Company, of Winnipeg, presented for annual competition two large challenge trophies for the men's and women's provincial mile swimming championships. Two members of the Moose Jaw Aquatic Club, Percy Reynolds and Phyllis Dewar were the 1931 winners.

All entrants must be amateurs and should apply to William Mclean, of the Saskatchewan pool elevators, Prince Albert, for entry forms.

Heavy Penalty For Fraud

Five Employees Of Steam In Moscow Sentenced To Death

Moscow, Russia Five employees of Moscow's state retail stores were sentenced to death after a six day trial on charges of [illegible] the state of 1,000,000 rubles ($500,000) by theft, illegal raising of prices and by supplying speculators

Seven others were sentenced to ten years in prison and eight were sent to jail for three to five years Three other defendants were acquitted

Printing Jobs Go Abroad

London, Ont.—Charging that $50,000,000 worth of printing for Canadian firms was done outside Canada in 1931, the Ontario-Quebec Conference of Typographical Unions trained its guns against this alleged condition. They will ask the Canadian Manufacturers' Association and other employing organizations to condemn the practice. The printing for such companies was done in countries as far away as Sweden, it was claimed.

Jack Miner Foundation

Bird Lovers Will Be Interested in Work of Famous Bird Sanctuary

Every person who has visited the Jack Miner Bird Sanctuary or read of it and its accomplishments, naturally wonders "what will become of the place when Jack Miner is no more?" However, every citizen of Canada and the United States will be pleased to learn through the columns of this paper that there has sprung into existence what is known as "The Jack Miner Migratory Bird Foundation, Inc." This organization has entered into a trustee agreement with Toronto General Trust to accept contributions and bequests for the purpose of perpetuating the Jack Miner Sanctuary, so that moneys from estate and trust fund will always be available both during the lifetime of Jack Miner's memory fades, and after he has gone, to feed and care for birds on the Jack Miner Sanctuary.

Jack Miner, in connection with the foundation has contributed sufficient money to finance the upkeep of the property in perpetuity, and he has on his part turn over the Jack Miner Sanctuary to "The Jack Miner Migratory Bird Foundation, Inc.," and of the board of trustees the Premier of Canada and the President of the United States to be a committee of two to name their successors.

If you have been interested in the work Jack Miner has been carrying on, or practically his own expense, what better living memorial do you think the people of America can be devoted to than to let Jack Miner see, while he is still in the land of the living, that people of the continent appreciate his work, by contributing and remembering the Jack Miner Bird Foundation, not only now but in their last will and testament or by a codicil to your will?

Previous to how made where Foundation can accept gifts in any form such as cash, stocks, bonds, money or real estate, and the income from same to be used for the birds' lung, food, and to otherwise care for the bird sanctuary.

Previous has also been made whereby one can endow his or her farm or country estate and leave same to "The Jack Miner Migratory Bird Foundation, Inc." and have it turned into a bird sanctuary with its management to the end, so that it has been endowed by contribution.

Jack Miner says, "The hope of the world is more love and education and less hatred—more compassion." and the time is over for him to be called on getting children to trade cent sweet bird boxes. For anyone who only wishes to contribute a little to a fund for educational purposes it should be borne in mind that Foundation is exempt from taxation, so a contribution or money to "The Jack Miner Migratory Bird Foundation, Inc." to be used for educational bird purposes is allowed as a deduction from the income tax return.

Any one interested in seeing your money to carry on this work, and the fine list of workers here in Canada started by Jack Miner? If so it is up to you to contribute or remember the place in your will, or both. Will you do it?

Sugar Shortage In Bonds

Subscribers In Rainy River Districts In Point

A serious sugar shortage has resulted in a reduction of the sugar ration from 3½ pounds a month for each person to 1½ pounds for the entire district, and two pounds for the workers in Moosonee.

Simultaneously the price has been increased from 10 to 15 cents a pound in the Turgeon stores, which take only foreign money. In the rations stores the price remains unchanged at 22½ cents a pound.

Retail stations at Moosonee cannot get supplies because of the shortage of confectionaries from the railway company, indicating that the rainy districts are feeling the shortage.

Sorry She Asked

They were married in the evening. Promptly their three-year-old son tucked himself in bed.

Next morning the bride, accompanied by her husband, went down to pay call. During the course of his play the lad rolled under the bed, and little Bobby Sims emerged to enter it. Presently the bride discovered him. If he saw the fall.

He replied, "Yes."

"Then don't you scare me!"

"I'm counting pictures on the floor."

A gold brick from the Cryderman mine, in Manitoba, was shipped to Winnipeg by express, and arrived without incident. It weighs 100 ounces, and is worth $2,000. This is Manitoba's newest gold producer. It has a 50-ton mill and a crew of 50 men.

Bonds now into $50,000 registered or withdrawn.

"The wonder boom of cricket" is what experts are calling this all-star group of Australian cricketers photographed at the Empress Hotel, Victoria, B.C., shortly after their arrival on the S.M.A. Niagara, from Sydney. Opening their Canadian tour against a picked Vancouver Island side, the visitors from "down under" scored 500 runs for eight wickets, all in a little more than two hours. The team, in this group, is as follows: Seated, left to right: Arthur Mailey, Bill Ponsford, Captain Dan Tennyson, Second Row: P. Carney, H. Ryder, H. McCabe, L. Fleetwood-Smith, Alan Kippax and Herman Carter. Back Row: W. F. Iven, Dr. R. J. Page, team physician, and Keith Tolhurst.

Gardening Notes

Control Of Garden Pests Requires Prompt Measures

Garden pests control is not sufficient unless prompt measures are taken just as soon as the enemies make their presence known. Roughly speaking, insect pests are divided into two groups, those that bite and those that suck. The biters are easily discovered by holes in the leaves or parts of the foliage being cut off, while nothing or dying foliage is a sign of suckers being at work or else some fungus. For the eating insects spray with poison such as Paris Green, Arsenate of Lead, fresh Hellebore or some potent preparation specially prepared for destroying garden pests. The latter will probably be found most convenient as it is usually necessary only to add a specified amount of water. Then, too, these preparations often include something else besides the poison so that contact with it and fungus may also be controlled. A sticker, that is something to make the solution stick to the foliage, is also included. Paris Green is usually applied at the rate of one ounce dissolved in ten gallons of water, with a couple of ounces of freshly slacked lime to make the solution stick and prevent burning of the foliage. One scant ounce of Arsenate of Lead also makes another good poison. Cut worms require special treatment. These grubs are about three-quarters of an inch long grey in color, and plump. If your freshly-set-out Petunia, Ettasia, Aster tomato, cabbage or just sprouted beans and peas wither and drop off at the ground line you will usually find a cut worm busy just where the stem leaves the earth. Mix one quart of bran with one teaspoon of Paris Green and add one tablespoon of molasses and enough water to moisten the bran. Spread this sweet, sticky mixture around the plants in the evening and the cut worm menace will soon disappear. Thorough cultivation is also advisable where cut worms are serious, and if the plants menaced are very valuable it is often a good thing to protect with a paper collar each half an inch into the earth around each plant. For cutting insects of which there are a few aphids or plant lice, spray with whale oil soap, four ounces of soap to a gallon and a half of water. Use a fine spray nozzle and the knowledge she had gleaned here first.

Burke never quite knew what impulse it was that had prompted him, as he made his farewells after the supper-party, to murmur in Madame de Vargicyr's ear, "Dine with me at the mirror night." It was as though the dark mysterious eyes had spoken to him, suggesting that in spite of the friendly overture which the shortness of his acquaintance with their owner would not normally have inspired.

It was not until the coffee and cigarette stage of the little dinner had been reached that Madame de Vargicyr suddenly shot her dart.

"So you come all the way up from this place, Coombe—Coombe Envie! —to see Mees Peterson, and hey, presto! She vanish the next morning!"

Burke stared at her almost rudely. The woman's perspicacity annoyed him.

"I came up to see my tailor," he replied curtly.

"Mais parfaitement!" she laughed —low, melodious laughter, tinged with a frank friendliness of amusement which somehow smoothed away Burke's annoyance at her shrewd summing up of the situation. "To see your tailor. Naturellement!" . . . you were not sorry to encounter Mees Peterson also, hein? You enjoyed that?"

Burke's eyes gleamed at her.

"Do you think a dog enjoys looking at the bone that's out of reach?" he said bluntly.

"And is Mees Peterson, then, out of your reach? Me, I do not think so."

Burke was moved to sudden candour.

"She might not be, if it were not that there is another man—"

"Do Monsieur Tor-mo-rin?"

"Yes, confound him!"

"Wo-oh"—with a long-drawn inflection compact of gentle irony. "You should be able to win against this Monsieur Tor-mo-rin. I think" regarding him intently—"I think you will win."

Burke shook his head gloomily.

"He had first innings. He met her abroad somewhere—rescued her in the snow or something. That romantic stunt always pays with a woman. All I did"—with a short, harsh laugh—"was nearly to break her neck for her out driving with me one day recently!"

"Is she engaged to Monsieur Tormarin?" asked Madame de Vargicyr quickly.

"No. Luckily, there's some old affair in the past holds him back."

She nodded.

"You shall marry her," she declared with conviction. "Me, Monsieur Beverley—sie, sie, quel nom!" —I am "clairvoyante, prophetesse," and I tell you that you wed marry sis heelz brown Jean."

Her foreign accent strengthened with her increasing emphasis.

Burke looked dubious.

"I'm afraid your clairvoyance will fail this journey, madame. She'll probably marry Tormarin—unless" —his eyes glinting—"I carry her off by force."

Madame de Vargicy shook her head emphatically.

"But no! I do not see it like that. 'Eh bien!' If she become fiancee — engaged to him—you shall come to me, and I will tell you how to make sure that she shall not marry him."

"Tell me now!"

"Non, non! Wis her your own way. Only if you do not succeed, if Monsieur Tormarin wins her—why, then, come to visit me at Chateau Varigny."

That night a letter written in the Comtesse de Varigny's flowing fargin handwriting sped on its way to France.

"Matters work towards completion," it ran. "My visit here has developed a prospect. There is no other would-be lover beside Monsieur Tormarin. I have urged him on to win her if he can, for if I have not wrongly estimated Monsieur Tormarin—and I do not think I have—he is of the type to become deeply in love and lose his head in matters where his feelings if he realizes that he has a rival. At present he refrains from declaring himself. The opposition of a rival will probably drive him into a declaration very speedily. When the dog sees the bone about to be taken from him—he snaps! So I encourage this red-headed lion of a man, Monsieur Burke, to pursue his "d'Afrez de coeur" with vigour For if Blaise Tormarin becomes actually betrothed to Mademoiselle Peterson, it will make his punishment the more complete. I pray the God of Justice that it may not now be long delayed!"

(To Be Continued.)

All Night With Asthma

Everyone knows how attacks of asthma often rob their victims sorely the whole night long Morning finds him wholly exhausted for a day of business, and yet, business must still be carried through. All this night suffering and lack of rest can be avoided by the prompt use of Dr J D Kellogg's Asthma Remedy, which positively does drive away the attacks.

Rich Gold Strike

Two Prospectors Find Wealth In Nuka Bay, Alaska

Reports of a fresh gold strike in the Nuka Bay district, 60 miles southwest of Seward, Alaska, were brought in by two prospectors who displayed a fifteen-pound sample of gold quartz estimated to assay $50,000 a ton.

The strike was made by Dave Downey and Tom Babcock, and the discovery was declared by veteran prospectors to be the richest ever taken from the district.

The cheapness of Shotter Grows' Worm Exterminator puts it within reach of all, and it can be got at any druggist's.

Not a Bad Definition

Robert Quillen in his private newspaper which he publishes "for his own amusement and the entertainment of his friends" refines "Radio" thus: "An expensive instrument you place in your home so some one can talk to you about toothpaste."

In Saskatchewan, south of approximately latitude 53, enough food is produced to support a population of 40,000,000.

"YES, I AM 40 YEARS OLD!" says Irene Rich

"YES, I am 40 years old. I don't mind admitting it a bit," says Irene Rich, "and I have two grown daughters of whom I am very proud. A screen star never worries about birthdays, you know.

But, in Hollywood, they guard complexion beauty above all else. They know it says youth quicker than anything else.

How does this lovely star guard complexion beauty? Just as so many other Hollywood stars do—the use of the pure Ivory soap method. Irene says: *Ivory Toilet Soap regularly for years," she says, "and can say genuine! See it.*

Surely you will want to try this fragrant, white soap. The cause of Lather-a-calm French soap for 10c.!

IRENE RICH and her two daughters (left to right) Frances, 18, and Josephine, 16, whose pictures appeared recently in Ivory Soap advertisements. Miss Rich's present photograph, (inset) is that of Miss Rich's mother.

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of "The Splendid Folly," "The Shrouded Path," "The Scarlet Shadow," "Dorothy of Downpatrick," Etc., Etc.

CHAPTER XXIV.—Continued.

Once more the curtain had fallen, and, to the hum of conversation suddenly released, the lights flashed up into being again over the auditorium. Simultaneously the door of Lady Anne's box was opened from the corridor outside.

"May I come in?" said a voice—a pleasant voice with a gay inflection of laughter running through it as though its owner were quite sure of his welcome—and Burke, big and striking looking in his immaculate evening kit, his ruddy hair flaming wickedly under the electric lights, strolled into the box.

What of no make the mistake of owning roads too thickly and also much too closely together. Under such circumstances good farms do not develop property. Flowers and vegetables, as soon as they have formed a good second set of leaves so that they can be identified, should be thinned out rigidly. In later thinnings of these vegetables the lettuce, beets and carrots the plants taken out can often be used on the table. The larger varieties of head lettuce give most satisfaction when the heads are dense and fine spart each way. Carrots should be thinned to about three inches apart, beets to four inches, parsnips to six inches, cabbage to two feet, radish, spinach from four to six inches, as they are used. This encourages the first heads and promptly corrects, although a light thinning of these vegetables just as soon as they crowding that is the result of haste, is advisable. Five pounds of corn, cucumbers and most melons are sufficient for one hill each of cultivation. Squash and pumpkin, however should be from two to four times apart and pass about the same.

During an earthquake in February, 1906, at Kingston, New Zealand, the sea-front rose 10 feet.

Hungary has appropriated nearly $5,000,000 to aid its farmers.

England will preserve billions of apples.

Little Helps For This Week

"It is God that girdeth me with strength, and maketh my way perfect."—Psalm xviii, 32.

Even as a nurse, whose child's temperfect piece

Can hardly lend his foot from place to place,

Leaves her fond kissing, sets him down to go,

Nor does uphold him for a step or two;

But when she finds that he begins to fall,

She holds him up and kisses him withal.

So God from men sometimes withdraws His hand,

Awhile to teach His infant faith to stand,

But when He sees his feeble strength begin

To fail, He gently takes him up again.—Quarles.

When the babe puts his little soft hand into yours, his hand is as strong as yours, since it is yours that guides it; so, when we put our hand into God's, we are by His grace as strong as He is, since He leads, and we only follow.—Henry Ward Beecher.

Keep your stock free from blemish with Douglas' Egyptian Liniment. Simmons' combination, quickly relieves bruises, sprains, strains, swellings, contraction of cords, stiffness of joints, and sore muscles.

Forecast Big Crop

The Lethbridge Herald says forecasters are already putting the Alberta wheat crop this year at 150,000,000. It's a long way to August 20, when cutting may be expected to commence, and many things may happen. However, if the price outlook were as bright as the yield prospects we would all be happy.

A $250,000 hotel is being built at Edmonton, Alberta.

If early promise is fulfilled, the Annapolis Valley should this year produce even larger yields of apples than in 1931 when the total crop was close to a million and three-quarters barrels, in the opinion of leading fruit men of Kentville, N.S. The bloom this year lasted over ten days and attracted visitors by the thousand from Eastern Canada and the United States.

Miss Constance Rogan, Middleburg, Va., established a record for wahleye in the Yellow Knife River, New Brunswick, recently, when she took a 17½ lb. Allabite silver salmon, the largest ever caught with a fly by a woman on that river. The record for tuben in these waters by a male angler weighed 21½ lbs.

Canadian Pacific standard time is standard time the world over. Prior to 1886, every town and city had its own local time, based on the sun, but in that year the suggestion of Sir Sandford Fleming, chief engineer of the Canadian Pacific Railway, that the world should be divided into 24 zones, one for each hour of the day, and that time within each of these areas should be standard, was adopted all over Canada and the United States. In 1929 the plan was also adopted in Europe after a conference held at Washington.

Gilbert Miller, proprietor, of Youngstown, O., has a grouch against wrigleys and dosey in cities buildings and summer homes. He found both his barrow to admit a motorist hood was an easier spread of five feet five inches taken from a summer resident near St. Jovite last season. "It hooks," he wrote to A. G. Seymour, general tourist agent, Canadian Pacific Railway, "so through both I've had and myself will end up in the garage." But that is the kind of trophy to be got in the forests of Quebec. Big bucks and lots of them.

VOL. 11 No. 17 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, JULY 13th, 1932 $1.50 PER YEAR IN ADVANCE

Municipal Dis ? Hold Busy Council Meeting

The Council of the Municipal District of Clover Bar, No. 317, held a regular monthly meeting on Saturday, July 9th, with all members in attendance.

The Secretary reported that thirteen school districts had consented to the by-law providing for the consolidation in part of the penalties added to school taxes. The remaining districts are yet to be heard from.

One application for old age pension was received and approved.

The matter of the consolidation of the road diversion in the N.W.S-53-24 was left in abeyance pending further information regarding the amount of compensation that was paid by the Provincial Government.

The Secretary was instructed to proceed with the cancellation of the plans of subdivisions of Ridgway Park, College Heights, Terrace Heights and Ridgeland.

The Committee appointed to investigate the matter of extending relief to John Lenz gave their report, and their recommendations were approved.

The Secretary-Treasurer submitted a financial statement for the six month period ending the 30th June. The report showed that the indebtedness of the District to the Royal Bank for municipal and school purposes was sixty per cent less than what it was at this time last year.

With the reading of correspondence the majority of which was in reference to hospital accounts, and the passing of payabeats and accounts, the meeting adjourned.

NOTICE

TOWN OF FORT SASKATCHEWAN
At the request of the business men, and others, of the Town, I hereby declare Wednesday, July 20th, to be a civic holiday.

G. T. Montgomery,
Mayor.

LOCAL NEWS

Glover Taylor left last week-end for the coast.

The Rev. and Mrs. C. Reed are leaving this week for a short vacation at the coast.

Mr. Louis Dubuc left this afternoon for Montreal, where he has been transferred. Mr. Dubuc is a member of the R.C.M.P.

Mr. and Mrs. Val Brocksbridge of Clarebeken, Alta, are visiting at the home of his mother here for a few days.

Mr. Jimmy Bill of Edmonton will be at the Fort Community Tennis courts on Saturday afternoon, and will instruct anyone in the art of tennis playing.

The Fort Hardware Co., announces that they have purchased two carloads of binder twine for this years harvest. This twine is first grade British Twine and sells at the lowest price in years.

The St. George tennis and Badminton Club entertained the Knoblior Club with a tennis tournament last Saturday afternoon and evening. Sixteen sets of eleven games each were played, a total of 176 games. St. George scored 307 points, Knoblior 69 points.

The executive wish to thank all those who helped to make the tournament a success. Those who put the courts in shape, those who made and served refreshments on the grounds, Mr. Brown and the hotel staff, and all the members for their hearty support.

The executive are now arranging a number of games with the Fort Community Club which will be played in the next few days.

R. H. Mason,
Hon. Sec. from Wales.

PARTRIDGE HILL NEWS

Mr. Lumby is away to his home at Victoria, B. C., on holidays thought decent.

Mrs. J. W. Attewell returned home from Edmonton last week-end with her baby girl, Welcome was stranger!

Mr. W. G. Alton of Craigmyle, Alberta, was a visitor here last week. Mr. Alton came up for the Farry Sound Picnic.

The Church Vacation school held under the auspices of the United Church Sunday School and under the supervision of Mrs. MacEwen and Miss Coone B.S.C. of Edmonton was well attendence and enjoyed by all the pupils.

Mr. and Mrs. George Whan and Mr. R. Bell of Marwayne, Alberta, and Mrs. Bell Johnston of Kinsell were the guests of C. H. Flintoff's on Sunday.

We have had some grand rain recently, the timely arrival means a lot to the crops at this time.

The countryside looks very beautiful. Housewives are turning their attention to berry picking, while the men are finishing up road work and summer-fallowing.

Bear in mind the big U. F. A. picnic here July 15th. Lots to eat and drink.

SPORTS PROGRAM
Ladies' Soft-ball game at 2 p.m. to be drawn for.

Supper 5 to 6:30 p.m.
Baseball, Ross Creek and Ypres Valley at 6:30 p.m.
Ladies' softball finals at 8 p.m. sharp.
Midway attractions the rest of the night.

LETTER TO THE EDITOR

Editor Record
Sir—

By noting the date of Sept. 5th, or the end of discount period for payment of school taxes, the Town Council has barred a large number of ratepayers from taking advantage of his privilege. Very few farmers of the school district will be able to benefit, owing to the fact that pay day for the majority of these comes only when their crops have been threshed. There practically is no threshing done in this locality by Sept. 5th. Could not the discount period have been extended far enough to allow ALL the RATEPAYERS of Fort Saskatchewan School District an opportunity to benefit?

R. Todd.

COMING EVENTS

The Victoria U. F. A. local will meet in the Josephburg school next Wednesday evening, July 19th, at 8 o'clock sharp. Mrs. Mc Nevgeton of Ranfiury, Alberta, U. F. W. A. Director for this Constituency will be present at the meeting. A good attendence is requested.

At 7:30 o'clock on Monday evening next, July 18th, Miss Anna Kreitlow, B. N., furloughed Missionary of the Medical Department of Mortvian Mission, Nicaragua, Central America will speak in the Josephburg Reformed Church. She tells an interesting story of her experiences in the land of revolutions.

The business man who can operate in the red without feeling blue, growing grey or showing the white feather or a streak of yellow, has learned the secret of keeping in the pink of condition—physically and mentally.

Approximately 25,000 base beans of tinplate are used each year by the Canadian lobster canning industry potentially all these being purchased

Local Young Man To Show Aeroplane Fuselage at Edmonton Exhibition

It is reported that the aeroplane fuselage, which has been built by Albert Jacobs, will be shown at the Edmonton Exhibition next week.

The fuselage is now complete and is a most entertaining and excellent piece of work and reflects the greatest credit on the young man who built it. All that is required now is just it in the air with covering, undercarriage, and of course, an engine. But, that difficulty has been overcome, as there is an engine on the way from the States.

Residents of the Fort and surrounding district, who have had seen the piece of work, should make a special effort to do so. When all of the circumstances surrounding the making the designing and the actual construction, are known, it is predicted that some kind of encouragement may be forthcoming and that the real ability of Albert will not fail to be recognized. It is not often today that we find young men with the grit and stick-to-it-iveness that has been displayed by young Jacobs Who knows but that some day in the not far distant future Fort Saskatchewan may be the home of a large aircraft building industry, larger things from little things often grow.

Here and There

The Nova Scotia Dairymen's Association will hold their next annual convention, in 1933, at the Carnewallis Inn, Kentville, N.S.

Shipments of celery to Canada from year from Bermuda totalled 35,500 crates in contrast to last year when the shipments were virtually negligible.

Eastern Steamship Lines, Inc., had heavy traffic on an excursion from New York to Nova Scotia on the occasion of the first trip in June of the S.S. Acadia from New York to Yarmouth, N.S.

Railroad transportation is an essential economic function on this continent and given reasonable free rein should speedily show good recovery, owing it to increase buying of materials and employment of labor says the Greenville (S.C.) News editorially.

Total production of honey in Canada in 1931 amounted to 27,-967,397 lbs. valued at $2,865,604. Ontario led the Dominion with a production of 12,980,000 lbs. with Manitoba second with 1,987,375 lbs., and Quebec third with 1,632,-000 lbs.

Ten thousand rainbow trout fingerlings have been deposited in the French River in June, following 7,500 fry written deposited last year. The previous experimental was so satisfactory that the present action has been taken and if success still attends these efforts, the French River Bungalow Camp will have added rainbow trout to its already well diversified angling attractions.

Bob Davis, globe-trotting New York film columnist, is back in his beloved British Columbia, having recently arrived from Honolulu aboard the Empress of Canada, of the Canadian Pacific fleet. He proposes to spend some time in fishing expeditions both in the province and also in the Rockies where he will meet Irvin S. Cobb and Courtney Riley Cooper, also famous American publicists.

Tourists spent almost one million dollars for every working day in Canada last year, a sum virtually equal to $365,000,000, the Canadapress, Ontario, Gleaner, points out are right that the point it into the class of big business which should be carefully fostered. Commenting on the same subject, the Nelson, B.C., News states that there are numbers of small towns throughout Canada which have not yet realized what the tourist business could do for them

Evidence of the growing popularity of the Canadian Pacific Railway low rate bargain return trips, inaugurated this year, was again furnished by the success of the Quebec Province and Montreal excursion to Toronto and Niagara Falls, June 17, when no fewer than 1,500 Quebecers took the trip in four specials on the Friday returning the following Sunday night. His Honor the Mayor of Toronto has at a hearty welcome to these jamboree rail trip.

RAIN RUINS PICNIC PLANS

Owing to unfavorable weather conditions during the week-end, the people of Farry found themselves which was to have been held at Elk Island park on July 11, has been postponed indefinitely. Arrangements had been made for Hon. Frank Oliver to give the special address for the occasion.

Kind of tough on the Farry members after waiting forty years for a picnic and it has to be called off on account of wet weather.

Ourselves.

Bruce Barton, the well known author and magazine writer, has proposed the toast: "To the only folks who can make us or break us—to Ourselves." And he quotes the saying of Carlyle "The world's being moved will not save us; nor the world's being lost destroy us. We should look to ourselves."

The truth of these statements, differently worded but meaning exactly the same thing, cannot be gainsaid. The biggest factor in the world now, as always, is the individual. No man is normally down and out, defeated unless and until he himself admits defeat. Furthermore, more people are destroyed by prosperity than by adversity, more people fail to grasp and enjoy the realities of life when the gods are showering them with riches or other gifts than when they are faced with difficulties and confronted with seemingly unsolvable problems.

It is then people begin to call upon latent powers they possess. William James, in his essay on "Vital Resources," pointed out that underneath our daily store of strength and courage, all of us have reservoirs that are tapped only by emergency. We are all able, under the test, to surprise ourselves with an unsuspected capacity to be and do many.

It is that capacity which is our greatest asset. It is our hope in the present and for the future. It is ours to employ now.

The writer is acquainted with a man resident in one of our prairie cities who lost his position over a year ago. He has a bed-ridden wife not only to support but to care for. He is not an educated man, and prior to losing his position received only a small salary. Did he despair and call upon the Government to help him "out relief"? Not a bit of it! He called upon his own reserves of strength. Although he had no experience, he got a job painting a garage. This led to other small painting jobs. Then at Christmas time he got work selecting orders on a mail-order house, and when he finished up garden work to do. Thus he keeps going. He is seldom idle because he is willing to take on any kind of a job, no matter how humble. And when you meet him he always has a new job to tell. He goes cheerfully to work every morning to accept Government or municipal relief, always looking forward to better days that most inevitably come, and in the meantime keeping his head well above water. He is a bigger, better man than ever before; has maintained his self-respect and kept his courage, and, in the days to come, will command a better position than any he might have secured had "hard times" not descended upon him.

This is a very simple illustration of a very ordinary individual. However the lens he has used is displaying the spirit of a hero. Yet he possesses nothing that each and every person has not got, namely, a reserve of strength, of courage, of determination, to call upon in times of emergency. But the important thing is—he called those reserves into action. Too many of us fail to do this. We hesitate, we drift, we refuse to use the powers lying latent in us with which we have been endowed. In a word, we have not faith in ourselves, and without that faith anything that others may do for us will fail far short of what such people will come out of the present time of difficulty weaker and less well equipped to take advantage of the opportunities which the future will offer to us.

Let us put ourselves to the test. We have been buffeted about; we may be gasping, but if we are strong of heart and keep on we will get our second wind." A race is never lost until it is over; we always have a chance to win until the tape at the finishing line is definitely broken. Our success or failure depends not on the other fellow, but on ourselves.

Mushing Has Its Use

Possibility It May Be Manufactured Into Wall Board

Mushing, the name-like substance that covers thousands of miles of Canada's treeless north country, has not found a use. An inquiry recently received by the Board of Trade at The Pas, Manitoba, may lead to a trainload of mushing being shipped in Saskatchewan, for use in the manufacture of wall board.

Sitting in the midst of millions of tons of mushing long believed valueless, officials of the board were amazed when they received the letter asking about the possibility of having a dozen carloads or so. Negotiations are now under way for shipment and the Board of Trade is looking into the possibility of getting a factory to locate there and use the material.

Hail Bird For Customer

Ontario Barber Has Pelicans Trade For Speedy-Six Tissot

Louis B. Lafrance, the oldest active barber in the Dominion, celebrated his ninetieth birthday in June. He has been engaged in the trade for seventy-six years, and hopes to be able to continue for another ten or fifteen. he says. He was born a Quebec City, coming to Montreal when he learned the trade. He then went West and opened a shop in Winnipeg, which at that time was little more than a village. One of his customers was Louis Riel, the leader of the Northwest Rebellion. Mr. Lafrance and Riel became great friends, and he thinks Louis was a very good man. He was in Winnipeg when Sir John Macdonald went out there to the dedication of Winnipeg as a town. Coming East some fifty years ago, he settled in Trenton, where he has kept shop ever since. He is the father of nineteen children.

It cost nearly $12,000,000 to supply London with water in the last 12 months.

All Her Children Were Troubled With Diarrhoea

Mr. J. J. Nisbet, R.R. 1, Bobcaygeon, Ont., writes:—"Last Summer all my children were troubled with diarrhoea, and were so bad I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry, so I got a bottle, and after a couple of doses you should have seen the change. My children were soon well again, and I am very thankful to your wonderful remedy. I feel it is the only one that deserves to exist and notice."

High Tariff Walk

Action Of U.S. Proves a Severe Blow To Canadian Agriculture

The exports from Canada to the United States of principal commodities, such as raw products or Canadian farms, or manufactured directly from such farm products, during the month of May amounted in value to $600,195, as compared with $3,327,346 in May, 1929, and $6,004,886 in May, 1921, according to the Dominion Bureau of Statistics.

The high tariff walls erected by the United States, culminating in the Hawley-Smoot tariff in June, 1930, were a severe blow to Canadian agriculture, making the export to that country of many commodities practically impossible.

During the eleven months ending May, 1932, the export of such commodities to the United States totalled $6,652,438, as compared with $44,078,-809 in the same period of 1929-30, and $171,492,863 in the eleven months ending May, 1921.

With a loss of 42 cents per bushel on wheat, the export to Canada's chief agricultural product to the United States dwindled from $161,686, or 3,846,809 bushels, in 1921-22, to $2,020,774 in 1931-32. Three cents per pound on beef cattle has caused a drop from $21,357,816 to $617,760.

Other dollars per head on sheep have declined from $1.25 to $1. Oats from $1,-066,313 to $836. Butter at 14 cents per pound fell from $2,389,271 to $145,584. Eggs at 4½ cents per dozen bushel from $4,762,311 to $572,709, potatoes at 75 cents per 100 pounds from $6,557,051 in eleven months of 1929-30 to $1,847,847 at 25 per cent ton from $2,389,326 to $115,979, etc. Of course, lowered prices have also had some effect upon the values.

Fast Ocean Travel

Canada Now Only Week End Journey From England

Canada is now only a "week-end's run from England," declared Canada to the round-breaking crossings of the Atlantic by the C.P.'s "Empress of Britain," says Viscount Rothermere, foreign newspaper proprietor in London. Viscount Rothermere declares that the interval between the time the "Empress of Britain," passed Point Rock lighthouse, off the Scilly Islands, and the time she reached the entrance to the Strait of Belle Isle, was only 72 hours and 55 minutes.

"The passage of the north Atlantic was made with only two slight gusts out of sight of land," declared Viscount Rothermere's message, "after which the rest of the journey was through smooth land-locked waters."

Treasonous Police Dogs

Bringing Them Addicts Into Canada Like Smuggling Liquor

The Stratford Beacon-Herald in connection with a case of a lad of six being bitten in Toronto by a police dog, comments that "many people do not agree that it was a mistake to bring this dog to Canada. It has not the background and tradition of the police dog in England. In Quebec, St. Bernard, Newfoundland or any of the other well-known breeds of dogs to choose from, it would be little more than a village. One of his customers was Louis Riel, the leader of the Northwest Rebellion. Mr. Lefrance and Riel became great friends, and he thinks Louis was a very good man. He was in Winnipeg when Sir John Macdonald went out there to the dedication of Winnipeg as a town. Coming East some fifty years ago, he settled in Trenton, where he has kept shop ever since. He is the father of nineteen children.

It cost nearly $12,000,000 to supply London with water in the last 12 months.

Your Children

will thrive on Christie's pure Arrowroots

For the tiniest babies . . . for older children . . . for growing boys and girls . . . there is nothing more delicious and nourishing than Christie's Arrowroots. No substitute is good enough.

Christie's Arrowroots

Miracle Recorded in Church

Masonic Panel Depicts Bushel Of Bread and Two Fishes

A fourth-century church, built during the reign of the Emperor Constantine the Great has been uncovered near Tiberius, on the way to Capernaum. This church commemorates the miracle of the loaves and fishes, performed by Jesus on the shores of the Sea of Galilee, and the actual stone said to have been used in the Gospel narrative as the boulder on which He stood has also been found in the centre of the church, where it presumably lay beneath an altar. Behind the stone a wonderfully designed mosaic panel was found depicting a vivid blush, red and yellow in basket, several loaves of bread, and two fishes. Although buried beneath dust and rubble for about 1,600 years, and only a stone's-throw from the sea, the mosaic shows no signs of erosion, and the colors are well preserved.

Good Service For Citizens

Toronto Health Department Forbids Tablets To Purify Water

A notice published in Toronto papers says that five tablets for the purification of water can be obtained from the city health department by any citizen. These tablets are recommended for those going on picnic or on camping trips where there are chances of having to use water of questionable purity. The tablets will purify water and make it fit for drinking in a few minutes.

That is a useful service for any city to give its people. People who go away and who use water of which they know nothing at all are running risks, and a tablet which will eliminate this risk is a friendly thing and a good travelling companion.

Game Fish in Bush

Transporting Speckled Trout Along Hudson Bay Railway Line

There is a possibility that game fish of the speckled trout variety, will be transported from the streams along the Hudson Bay Railway line to the Clearwater Lake summer resort and other adjacent waters by airplane or motor cars, as the lakes may be stocked for sportsmen.

R. H. Stevenson, inspector of fishing, who is in Churchill, is at present engaged in making a survey of the brooks along the bay line. It is his intention to pick out suitable places for the capture and hopping of fish until transferred to points.

Douglas' Egyptian Liniment, always quick, always certain, things relief to rheumatic pains. Economical and far more effective than liniments.

Using 'Planes in Stampede

Wild Horses To Be Rounded Up From Air

Klamath Falls, Ore. plans the sagebrust wild horse drive from the air. Three airplanes will dip low over the plateaus and passes, set the wild bands running, head them at the turns and finally stampede 2,000 of them as it is expected, into a gigantic trap at the rim of the canyon. The finest stallions and mares, it is promised, will be allowed to escape again to the hills, but most of that vast catch will be slaughtered—for chicken feed. The automobile could replace the horse in man's heart, but not even the auto could displace him in the belly. Only thunder-birds swooping down from the sky can bring extermination to these wiles, fleet, liberty-loving mustangs—can stampede them into poultry pail.—Christian Science Monitor

An Imposing Monument

Prince Of Wales Will Dedicate War Memorial In France

One of the most imposing war memorials on French soil is that which is to be dedicated by the Prince of Wales at Thiepval, on the Somme, next March. This monument, which is nearing completion, will be composed of triumphal arches 140 feet high, and only five feet less in breadth. On the pillars will appear the engraved names of 72,387 British officers, N.C.O.'s and men.

Anthony Bringo Nimmy, but Dr. J. D Kelloy's Asthma Remedy will replace the misery with welcome relief. Mail druggists or vapor it reaches the very innermost recesses of the bronchial passages and soothes them. Restriction passes and easy breathing returns. If you know as well how this remedy would help you as do thousands of grateful users, there would be a package in your home tonight. Try it.

And now it is reported crocodiles do not cry. Next thing we know someone will muster enough courage to tell them there is no such thing to a weeping widow.

It is said that more persons disappear from Paris than from any other city in the world. About 500 are reported missing every day in 1931.

Increased Resort To London Of Canadian Borrowers Shows New Financial Trend

Successful flotation of two provincial bond issues in the London market is accepted by New York bankers as a forerunner of increased resort by Canadian borrowers to the London money market "during the current period of financial strain and unsettled exchanges," says the New York Herald-Tribune.

The paper refers to the placing of British Columbia's £1,500,000 of 5s issue in London in May, which was quickly oversubscribed at 98, and of £1,000,000 Alberta 5s recently at 98½.

"The new trend," says the paper, "is somewhat of a tribute to the London new issues market, which recovered its poise last December.

"It remains the opinion of almost all competent authorities that the Canadian dollar will be eventually revalued on a parity with that of the United States, notwithstanding the present discount of nearly 15 per cent on Montreal funds in New York. The close inter-relations of United States and Canadian business interests and the large aggregate of Canadian gold bonds held in this country, are considered ample assurance of eventual exchange parity. Nor is it thought that such parity will be quickly achieved or maintain in a downward trend.

"It is accepted here that the Canadian financing in London had the tacit approval of the highest banking authorities in England.

"That in London is justified, since the effect on the exchanges accords with impressions prevalent here in regard to London financial policy. All the constructive tendencies between Montreal and London are mediated by New York. Canadian borrowing in London, therefore, means that additional proceeds will be exerted to depress the British currency unit in terms of United States dollar, with a favorable effect will be exerted on the Canadian unit in terms of the dollar.

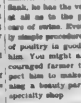
"That London is averse to any substantial rise in sterling has been shown by the establishment of the Exchange Equalization Fund. The effect of favorable borrowing in London coincides with the operation of that fund, and it is assumed that such encouragement will be given the flotation of Canadian bond issues in London."

Sounds Reasonable

Establishing City Man On Farm Might Not Pay

A prominent citizen of Passegrave, realizing that unemployed city workers have no means to establish themselves on the country, proposes that the State should finance them in the purchase of farms, stocking them with horses, cows, chickens and pigs, and supplying them with tools and seed. That kind of aid might be worth-while to a genuine "back-to-the-lander" who had been brought up in the country, but how can it benefit the man who has never known of life outside a city? He couldn't tell a cow's tail from a horse's stopper from the handstall, he is helpless when he sees himself on a milking-stool at a cow's flank, he has the vaguest idea or none at all as to the proper feeding and care of swine. Even the comparatively simple procedure of keeping a flock of poultry is not familiar to Greek to him. You might as well bring a discouraged farmer to the city and expect him to make a success of running a beauty parlor or a high-class specialty shop.

Winnipeg Newspaper Union



A CHARMING LITTLE MODEL THAT YOUNG, DAINTY AND VERSATILE

It can be carried out in a great many ways, and is all in all depending upon whether young daughter wishes it to wear it for parties, "best" or everyday occasions.

For parties, taffeta, crepe de chine or print in light navy blue and white is the idea as sketched. The yoke line merges into capelet sleeves in plain navy crepe. It's many practical.

Style No. 330 is designed for sizes 12, 13 and 14 years. Size 8 requires 1¼ yards of 35-inch material with ¼ yard of 35-inch contrasting.

Red and white polka-dotted dimity with plain white, nile green linen with yellow and orchid and blue checked linene gingham with plain orchid gingham are striking combinations, truly French.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

"I believe all men are stupid."

"Oh, no. Some remain bachelors!"—Sam Fisher, Montreal.

W. N. U. 1980

GEORGE E. CARTER WINS PROMOTION

Succeeds George A. Walton as General Passenger Agent C.P.R.

George E Carter Assistant General Passenger Agent Eastern Lines, with headquarters at Montreal, effective July 1st, according to announcement by R. C. McNeille Assistant Passenger Traffic Manager. He succeeds Mr. Walton who has decided on the Empress of Australia to sail on May 18. The position of Assistant General Passenger Agent now held by Mr Carter will not be filled. This decision was reached in view of the heavy duties of executive during the present business conditions, and considers the number of Assistant General Passenger Agents at present employed in the service of the Company in the Passenger Department at headquarters.

GEO. E. CARTER

Mr. Carter's promotion to one of the highest positions in the gift of the Passenger Department follows a career already marked by steady advancement. Mr. Carter entered the service of the Company as a stenographer in the Passenger Department at Saint John, N.B in September 25, 1911. Shortly thereafter he assisted for Overseas Service, and was wounded on the field of battle with the 21st Canadian Machine Gun Battalion. He subsequently became a member of the world famous Princess Pats, the character of his service with that crowning him with commission in the Imperial Army, from which he afterwards transferred to the Canadian Corps.

Returning from Overseas at the close of the war, he re-entered the Passenger Department of the Canadian Pacific at Saint John, N.B., and steadily worked his way upward through the ranks. He was transferred to posts of increasing responsibility at Quebec, and in turn was made Chief Clerk to the Asst. Pass. and Montreal offices of the Passenger Department. Mr Carter also made a special instructional trip to Europe in connection with the Canadian Pacific Steamships.

He was made District Passenger Agent at Saint John on December 10, 1928, and Assistant General Passenger Agent in Montreal on May 15, 1930. He is a member of the Traffic Club of Montreal and of the Rideau Club.

The United States imported 304,-000 pounds of garlic last year.

Eminent French Professor Declares There Is No Such Thing As The Gulf Stream

Hundred Acres Of Roses

Two New Varieties Yearly In Bulgaria Gentleman's Business

Sliven, in southwest Bulgaria, was but little known to the outside world in pre-war days. Only the antiquarian interested in the late Gothic church, or the tourist informed of his delightful old castle sat in the midst of a great and lovely park, would think it worth while to drop off there before passing on to the larger and historically more interesting towns of adventure tales and condemned to death all these interesting colonies of hopelessly poor voyagers that were held captive in its entangling wood. The Sarpenac Sea had a form and a beauty of its own, as much as rich as the discoverer's imagination. Its human population was as diversified as the circumstances set by the story teller required.

The Sun reminds us that the Gulf Stream plays a different but not less interesting part in story. It is responsible for the cold, wet seasons that afflict the eastern coast of the United States and the northwestern coast of Europe. When strange fish appear, the Gulf Stream brings them; when familiar fish disappear, the Gulf Stream takes them away. Outside the Hydrographic Office—a strangely perverse institution so emasculating the Gulf Stream that it reports volunteers' reports—the principal features of the Gulf Stream is to change its course. Not a season passes in which its course does not record everywhere except on the official charts.

It is a fortunate thing that Professor Le Dantec did not revoke the Gulf Stream while Benjamin Franklin was in Academy to Passy. Poor Richard was a firm believer in the great current, and he would have stood up for it. Even now there are those who, despite the finality of Professor Le Dantec's pronouncement, will hope for its reinstatement. Perhaps in the event of a recess when Professor Le Dantec isolated at the poles where it should have been.

Tariff Pleasantries

U.S. Accuses Pole As Bad "P

Practising Of Neighborly Trade

Colonel W. L. McGregor, president of the Canadian Chamber of Commerce, got a few things off his chest and on the heads of the American Chamber of Commerce in conventions assembled at San Francisco. Referring to tariff pleasantries between Canada and the United States, he says right out that the Americans started the game. The Smoot-Hawley Act is described as putting an end to fifty years of Canadian effort to trade with the United States. Particularly the newly threatened restrictions upon Canadian lumber and copper exports came in for rough handling. It is not much use, he says, trying to do business with a people who oppose unwilling to buy from us, although they sell us one-quarter of their exports, with the colonel. In the classic phrase, he is not arguing with the Americans, he is just telling them.—Montreal Star.

Bobby: "Daddy, a boy at school told me I looked just like you."

Dad (proudly): "And what did you say?"

Bobby: "Nothin'. He was big-ger'n me."

"Oh, I have forgotten my handkerchief! John, just run up and fetch it before the train comes in!"—Sondags-nisse-Strix, Stockholm.

Professor Georges Le Dantec of the French Sea Fisheries Bureau says "there is no such thing as the Gulf Stream." This says the New York Sun, is his admission. He hopes "that this categorical statement will get an end" to the conjectures inspired by reports concerning the uncertainty of the West in the North Atlantic.

The suppression of the Gulf Stream by the eminent French oceanographer is a hard blow to romance. Nothing the H has been reported since grim colonies abolished the Sargasso Sea of adventure tales and condemned to death all these interesting colonies of hopelessly poor voyagers that were held captive in its entangling wood. The Sargasso Sea had a form and a beauty of its own, as much as rich as the discoverer's imagination. Its human population was as diversified as the circumstances set by the story teller required.

The Sun reminds us that the Gulf Stream plays a different but not less interesting part in story. It is responsible for the cold, wet seasons that afflict the eastern coast of the United States and the northwestern coast of Europe. When strange fish appear, the Gulf Stream brings them; when familiar fish disappear, the Gulf Stream takes them away. Outside the Hydrographic Office—a strangely perverse institution so emasculating the Gulf Stream that it reports volunteers' reports—the principal features of the Gulf Stream is to change its course. Not a season passes in which its course does not record everywhere except on the official charts.

It is a fortunate thing that Professor Le Dantec did not revoke the Gulf Stream while Benjamin Franklin was in Academy to Passy. CANADIAN-UNITED STATES PEACE PARK DEDICATED

These photographs were taken when the Waterton-Glacier International Peace Park was dedicated under authority of the Canadian Government and United States Congress as a monument to 117 years of enduring peace and good-will between the two nations. Sir Charles A. Mandor of England delivered the dedicatory address at the colorful ceremony and he is seen at the top, centre, clasping hands of H. T. Stayon (left), superintendent of Glacier National Park, and N. Knight (right), superintendent of Waterton Lakes National Park. The Peace park idea originated with the Rotary Club of Carslake, Alberta, and was sponsored by the Rotary Club of Canada and the United States. The lower photograph shows Chief Two Guns White Calf adopting Lady Minster into the Blackfoot tribe as Princess Shining Star during the ceremonies.

WORLD HAPPENINGS BRIEFLY TOLD

The United States celebrated the 260th anniversary of Independence Day at a cost of more than 500 lives.

The $2,100,000,000 compromise unemployment relief bill was finally approved by the United States House representatives and senate conferees.

Limited embargo measure passed by the 1931 in British Columbia timber was estimated in an advance report prepared for Hon. R. L. Maitz, Provincial Fisheries Commissioner.

A shepherd and several hundred sheep were frozen to death on Mount Olympus, near Burns, Turkey, during a terrific snowstorm which followed on a recent heat wave.

By means of X-ray posters ill the Canadian Medical Association were able to read type upside down with their eyes closed in an experiment.

Ontario and Manitoba [illegible] hands in an unique Dominion Day celebration. The initial day of the Dominion of Canada was chosen for the formal opening of the first highway to connect the two provinces.

After several months of investigation, F. A. McGregor, registrar under the Combines Act, has reported the existence of a price-fixing combine among the fruit basket manufacturers of Ontario.

Mrs. Katherine Medill McCormick, widow of the diplomat, Robert S. McCormick, died of a heart attack in Versailles, France. She was 70. She was the mother of Col. Robert R. McCormick, editor and publisher of the Chicago Tribune.

Pirate treasure—$60,000,000 in pieces of eight, gold and silver bars, and chests rather—has been discovered on Cocos Isle by an expedition which left Vancouver, B.C., last February, Capt. R. D. Adams, a member of the party, reported.

Gold that led Jack Hornby and two partners to death by starvation in the Northern Canadian wilderness in 1927 is beckoning to other prospectors. This summer a party will go into the barren wastes in search of Hornby's secret strike.

A difficult operation was reported at the homeopathic hospital, Montreal, on eight-year-old Roy Bowman when a punctured heart.

Dr. J. Henry Cousins successfully removed the bullet from the heart of the boy. Robert Shepherd, fell upon his pocketknife while running, the blade penetrating the heart.

Old Roman Coins

Roman coins dated A.D. 330 to A.D. 354 were unearthed at the riverside home on the Thames of Viscount Craigavon, premier of Northern Ireland. The coins were found by a workman digging on what is believed to be the site of an old Roman road.

W. N. U. 1980

Shall Our Monetary System Be Changed

(Continued)

An Analysis Of Several Of The Proposals

By Major Bunge

(5) That Central Banks should endeavour to create a control over credit so that in times of prosperity credit would be restricted in order to prevent over-speculation and over-expansion of buying and production, and so that in periods of adversity credits would be more freely available.

(NOTE—Some critics consider number five the suggestion involves an over-straining of the workings of the quantity theory of money; in a subsequent article a brief explanation of the quantity theory of money will be advanced. Other critics say that it would be wise enough to decide when a period of over-expansion had arrived? and when prices are declining, and persons are fearful of making financial commitments for a future which they cannot foresee when it is noted, would be brave enough to step now and use the credit even though it were available.)

(7) That the Canadian paper dollar shall be based upon gold and silver instead of gold. This is exactly the proposal made by Karl Marx in 1844, in which Marx's sole object was to prevent the ruin of the country that there would be difficulty in finding the "metallic basis for money" until of course there would be one.

(NOTE—Many socialists and Communists advocate this today. We consider it unsound, so far as we can foresee, however, is willing to regard such a proposal as a temporary measure to meet [illegible] of world-wide depression.)

(8) That the purchasing power of the Canadian paper dollar shall be based upon the average value of a wholesale commodities instead of upon gold, and that financial principles be repayable with dollars of the same purchasing power that they had when the debts were contracted, which Somerlosky's index number would be chosen as the one. Commodities should be included in the make-up of the average. The Canadian Association were able to read type upside down with their eyes closed in an experiment.

(9) That limitations shall be instituted, using gold and silver as alternatives, which shall be so arranged that while one for the other, or for paper currency, it is a ratio set by law.

(NOTE—Every attempt in history that has been made to set up bimetallism has been found impracticable, for one metal inevitably to function, replacing in the most primal model of the two being driven out of circulation. Gresham's law, as it is called, states only one of the two metals is left to serve as a standard and remains out of circulation.)

(10) That accumulation shall be set up, which shall be composed of gold and silver, but as alternates as in bimetallism, but tied together in definite proportions of the metal bars, to be used as the standard and that paper currency shall be exchangeable for either gold nor silver, but only for bars of the fixed unit of the two. This was first suggested by the editor of this magazine in the Canadian Forum in 1927 in beckoning to other prospectors. This summer a party will go into the barren wastes in search of Hornby's secret strike.

(NOTE—The objection to this scheme again is that it would be difficult for nations owning various proportions of gold and silver to decide on the relative proportions of gold and silver to be used in the hundreds of the bars. The boy, Robert Shepherd, fell upon his pocketknife while running, the blade penetrating the heart.

(11) That the silver coins in use throughout the world should contain a greater proportion of silver than at present, and silver bars might be used to a far greater degree of small denominations, but of generous amounts, which would be exchangeable for silver only and not for gold. This, it is claimed, would raise the price of silver and help the buying power of the American continent on a silver standard. It is argued, however, that to effect any enhancement of the price of silver would seriously harm producers and debtors in the United States, Canada, and that even the benefits to Western China so much silver would be gotten as assessed by some.

(12) That the hanging of all currency and credit shall be nationalized and that all finance and banking shall be operated and managed by the government instead of by private institutions.

(NOTE—In [illegible] the general, note is made that no [illegible] of any country or by the [illegible] of any country or by the [illegible] ging any large portion of business, and that efforts in this direction should be made by the people usually and in high esteem

Baby's Own Soap

10 cents Individual Cartons

"Send for Our Free and Handy Guide"

and in disastrous losses which have to be borne by the taxpayers.

(13) That the [illegible] and other financial and banking methods with gold as a basis, should be left as they are without interference for claims proponents of this. The socalled crisis of money and the failing of prices has been the result of and not the cause of the present depression. Other [illegible] claims have been brought about by many factors many of which may not even be enumerated, but in [illegible] the World War and its aftermath of prejudice, hatred and ill-will among nations.

These orthodox supporters of the gold standard suggest that if international arrangements can be made that will restore confidence between one nation and another, that another [illegible] high tariff walls might be lowered, which would result in a free exchange of goods and commodities, and that the present War debts can either be cancelled or be paid mainly in goods and not in gold, that sufficient gold is in the world for all requirements and that prices will go up and down as they always have done, and that the present gold is sufficient gold in the world for all requirements and that prices will go up and down as they always have done, and that the present level of all principal nations are rapidly lowering, it is claimed that under special principle, long known to and practiced by Great Britain, that countries must exchange gold and their surplus gold [illegible] to those countries which borrow or take their gold and spend it in foreign countries.

(14) That the [illegible] attention to the fact that [illegible] [illegible] [illegible] [illegible] which allows of the lowering of lower grade gold ores which in turn will increase the production of gold. Dreary [illegible] will also bring out what has been hoarded for centuries. These increases in the amount of gold will automatically increase the [illegible] quantity theory of money result in a higher level of prices and commodities. At the very worst, state these people, deflation [illegible] [illegible] goods, commodities, interest on money, and all things have not been reduced to value. Debts that cannot be paid will either be cancelled or written down, taxes will have to be reduced, and so practically a new start will be made, a great stimulus given to industry and to trade, and of course, much has gone to support it.

In the consideration of all these suggestions, it must be borne in mind two important facts must be borne in mind. One is that Canada has to pay by contract to pay each year in gold [illegible] [illegible] [illegible] [illegible] and in repayments of debts. No solution of the Canadian dollar will be satisfactory which does not leave Canada in an exporting nation; that her goods and commodities she sells for export are paid for in foreign exchange. The second fact to remember is the Canadian dollar will ever increase by one cent the amount of money required to realize that sum contracts at balanced heads should only occasionally be contracted for and then only when the balance is in favor of buyers, as the sum has definitely located enough high cards to make the success of the sale bid fairly certain. On the other hand, sluss contracts may be bid on unbalanced hands much more frequently, as the additional factors or [illegible] and short suit tricks produce [illegible] make sluss much more profitable than to hands where these additional factors are lacking.

The hand following is given as an example of arriving at a high contract which is impossible of fulfillment on account of value duplication.

Insect Pests Cause Damage

Second Biggest Destroying Crops In Parts Of Saskatchewan

While the cutworm armies are cleaning up on gardens and weed patches in all parts of Saskatchewan, reports of another pest which has not been so prevalent in other years and has destroyed seed grain in many hundreds of acres, are being received.

A report that the United States army forces had been found responsible for losses of fourteen per cent. observed. The responsible pest, which has done damage in other sections and within six miles of Saskatoon, is the seed maggot, which destroys the grain before it has a chance to germinate, particularly affecting late sown oats and barley.

Kenneth M. King, in charge of the Dominion Entomological laboratory in Saskatoon, identified the Hessian fly which there had cleaned up 15 per cent. of the crop in a large field as the seed maggot, known on the coast and recognized in the United States. There farms have been infected and about 100 acres of crop capped in the experimental stable.

According to Mr. King infected fields are located at Wilkie, Woodrow, West Paris, Dinsmore, Bridgeford and Cheddar. A field six miles north of Saskatoon

was the first which came to the notice of this maggot, belong to a native species that is always fairly abundant, but this is the first time its depredations that the maggot has been observed causing any serious damage to this crop. Mr. King says: "Wheat farmers in Saskatchewan sometimes such as heavy moisture after a long, wet period might have particularly favorable for development of the maggot. In the field examined at Saskatoon, where the heavy damage was done, he found as many as seven maggots in a single kernel of barley.

The unborn, a branch of the army worm family, resulted from the moth that was extremely prevalent this spring. At famous one farmer's wife went out for her greens and found them so completely eaten that one would not have guessed they ever grew in her garden.

Japanese Love Flowers

Chrysanthemum Is Queen and Cherry Blossom King Of All

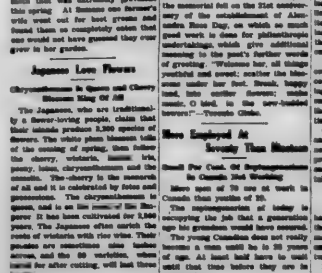
The Japanese, who are traditionally a flower-loving people, claim that their islands produce 2,500 species of flowers. The white plum blossom is that of the coming of spring, then follow the cherry, wisteria, azalea, iris, peony, lotus, chrysanthemum and the camelia. The cherry is the monarch of all and it is celebrated by lotos and pronunciation. The chrysanthemum is queen, and is an im- [illegible] flower It has been cultivated for 1,500 years. The Japanese often enrich the roots of varieties with rice water. The petales are sometimes nine inches across, and the 60 varieties, when used for after cutting, will last three weeks.

Fifty-Fifty

A mail order house recently received one of its advertisements printed in a native dialect. "Send it-this—it good, will send check."

They replied with, "Send check—it good, will send article."

It's pretty hard to tell what does bring happiness. Poverty and wealth have both failed.



"Sammie will never do anything big. Heredity is against him."

"Do you know his family?"

"Yes. They are merely honest people."—Journal Amusant, Paris.

W. N. U. 1500

Queen Alexandra

Unveiling Of a Beautiful Memorial To the Well-Beloved Queen

There was something peculiarly solemn and touching about the unveiling recently, on the grounds of Marlborough House, London, of a beautiful memorial to the well-beloved Queen Alexandra. The sculptor, aged and infirm, who had thrown his whole soul into the work, was received by the King and Queen, by whom he was congratulated on the excellence of his production. Albert Gilbert, who designed and executed the memorial, which consists of figures depicting Faith, Hope and Charity, began the work four years ago. Evidently a temperamental artist, he is reported to have destroyed several of his early designs rather than expose them to public criticism. This was to be the triumph of his career, and he struggled on against illness and disappointment with remarkable courage. At last he was satisfied, and London is endowed by another splendid example of the sculptor's art.

The ceremony outside the Marlborough House gates, around which the sculptured group perpetuates Alexandra was beloved by the British people, and the means of her widower-husband were favored by a sympathetic and admiring people.

Mrs. Alexander, a Danish Princess born, journeyed to England to become the bride of the Prince of Wales when she was greeted with a great outburst of enthusiasm, which received in Tennyson's lines: "Rose and Dane and Dane are we, but all of Dane to-day is English in the Dane, Alexandra." The unveiling of the memorial fell on the 21st anniversary of the marriage which took place on Rose Day, on which so much good work is done for philanthropic undertakings, which give additional meaning to the day's festivities. Words of greeting "Welcome her, all things purified and sweet; soother the blossom that blows; sea to sea blow the sound, blow mother flowers; make music, O bird, in the new-breathed heaven!"—Toronto Globe.

More Employed At Seventy Than Nineteen

Result Per Cent. Of Septuagenarians In Canada 20st Working

More men of 70 are at work in Canada than youths of 20.

This interesting statistic of today is brought to the fact that a generation ago his grandsons would have resented. The young men would have taken it as an insult to be told that in 50 years' time they would be working at the age of 70 when they were in their prime.

The remarkable proportion at any age in a man's jobs is during the 40's, whereas it steadily recedes until the 70's, when only 20 per cent. of the men only half had arrived at 20.

Records of the bureau show that the years spent in prison by Canadian youth are lengthening.

Had the Same Fault

An Englishman had invited an American friend to visit his shooting box in the Highlands. The host told him they did not have much sport, as the birds were shy, but that did not worry the host, who admired the glorious scenery.

As they stood at the top of a fine mountain, from which they obtained a magnificent view of the surrounding crags and placid lochs, the spurring host said caustically:

"Isn't this marvelous? Why, just to stand here makes a man feel like a little god.

"It does," agreed his guest. "I tell you I've had nothing but a bean emotion since we arrived."

New Advertising Pays

New York Newspaper Finds Its Receipts Expanded On It

Back in 1926 there was a general strike in the newspaper trades in New York, causing the publication of metropolitan daily printed in English as well as the foreign and Italian papers. For many two weeks only one a daily bulletin was issued. This carried no advertising, as there was no room for any. During this period, the advertising was suspended, but the merchants of New York realized human reading into millions and millions. For the first time it was definitely proved that their success was largely dependent upon advertising—that is, if they wanted to do business on a large scale.

During the present depression the merchants which have consistently continued and vivid directed advertising campaigns have been much more successful than those who started their retrenchment programs by cutting down on the advertising.

Of course even the best advertising and the biggest appropriation cannot sustain the sales of an inferior product, but if the merchandise responds good value, advertising is a vital factor in keeping it moving.

The Acid Test

Salesman—Ladies and gentlemen I have here the famous flexible comb that will stand any kind of treatment. You can hand it dumbly—pay on it with a hammer—you can twist it—you can—

Interested Listener—Say, Mister, can you comb your hair with it?

Soviet Russia led all other countries in the purchase of American industrial machinery last year.

United States Paper Has Admiration For This Trail

He is a pompous, choleric old chap at times, and can use such a vile vocabulary that at least 16 ships would be used to carry this amount.

"Churchill is going through now just as Vancouver experienced some years ago," Mr. Harting said. "Vancouver had precisely the same difficulties in getting shipping to use its facilities. Today Vancouver is an accepted fact in the trade."

Gems from the greater part of Saskatchewan's wheat area [illegible] now be shipped to Liverpool at lower cost via Churchill than by the rail, lake and lake-ocean route from Montreal, Mr. Harting said.

Tapping the Rock

Bird-Banding Contributes Much Of Scientific Knowledge

Bird-banding has afforded much new and valuable scientific information concerning Canada's native wild birds and any person who finds a banded bird is requested to help in the advancement of this work by reporting the details to the commissioner of national parks of Canada, Department of the Interior, Ottawa. An interesting fact brought out by a recently reported banding operation is recounted here.

Official band 122367 was placed on a purple finch by Mrs. Frank Hubbard, at Port Hope, Ontario, on March 23, 1926. The finch was next found, with a leg band, by Miss Blanche Spear at Deep Brook, Nova Scotia, on July 6, 1931. Miss Spear took the bird home and placed it in a large screened-in porch, where, with care, the finch recovered. Its power of flight sufficiently to be released on August 16, 1931. As the finch was still wearing the band when it was liberated, it is possible that it may be again reported.

The raider of the S.S. Berengaria weighs 35 tons.

Letters To the Editor

Are Usually Polished Unless Of a Libelous Nature

There are some people who think that an editor publishes only those letters which agree with editorial opinion of his paper. That is not true.

There is only one thing that appeals to editors in newspapers, and that is the Libel Law. Unless opinions are slanderous, or statements clearly contrary to the actual facts, all letters are published.

African Sapphire are using lipstick.

THERE LIES A BOWL OF ROSES

Mrs. Helen Wills Moody (left) and Miss Sarah Palfrey, members of the United States women's Wightman Cup team, are shown with the famous trophy which they won from John Bull's representatives by the narrow margin of four matches to three. An onlooker has filled the trophy with roses in a pretty tribute to the vanquished.

◆ FANCIFUL FABLES ◆

Sailings For Hudson Bay

Insurance Rates Now Placed On An Equitable Basis

Churchill prairie Canada's ocean gateway to the markets of Europe, will be a world recognized port "In a very few years," in the opinion of W. H Harting Montreal shipping agent.

Already he said in an interview, insurance rates for the Hudson Bay navigation season are on an equitable basis and will grow progressively lower as the volume of business increases.

Insurance underwriters are quoting lower rates this year than last, when 5½o trial grain shipments were successfully made from Churchill

Some [illegible] Saskatchewan grain are stored in the year-old government elevator on Hudson Bay and within a few days this huge structure will be swelled to the elevator's 2,500,000 bushel capacity Mr. Harting is [illegible] the [illegible] Dominion government.

Definite sailing of the first ship to enter Churchill with commercial cargo was announced by the Montreal agent. The "Penwyworth" is to leave Newcastle-on-Tyne, July 13, making stops at Antwerp and Liverpool before crossing the Atlantic and entering Hudson Straits. It will deliver a mixed cargo at Churchill early in August.

But the "Penwyworth" would be only one of a fleet of ships to visit Churchill during August and September if arrangements are completed for shipping 4,000,000 bushels of western grain to Europe via the northern route. At least 16 ships would be used to carry this amount.

"Churchill is going through now just as Vancouver experienced some years ago," Mr. Harting said. "Vancouver had precisely the same difficulties in getting shippers to use its facilities. Today Vancouver is an accepted fact in the trade."

Gems from the greater part of Saskatchewan's wheat area [illegible] now be shipped to Liverpool at lower cost via Churchill than by the rail, lake and lake-ocean route from Montreal, Mr. Harting said.

"I can be a desperate fix, and I don't know where I am to ask to lend me the money."

"You reassure me. I thought you were going to ask me."—Washington, Scotland.

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author of "The Sweet Girl," "The Second Mrs. Tanqueray," "The Rich Mrs. Holder" & Dramatized, Ltd., London.

CHAPTER XXV.

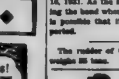
Arranged By Telephone

The visit to London, if it had not been pretty to Jean Burke which Lady Anne had hoped for, had at least accomplished certain things.

It had acted as a brake upon the untidy turning wheels of two lives precariously poised at the top of their brief hill of which no traveller can see the end, but which very surely leads to heartbreak and disaster, and had sufficed, as Jean had suggested that it might, to reawaken Rob to a more normal and temperate state of mind.

He and Claire had passed a long hour alone together the day after his return to Staple, and now that the first violent reaction, the first instinctive impulse of inhumanable revolt from Sir Adrian's spying and brutality had spent itself, they had agreed to shoulder once more the burden Fate had laid upon them, to fight on again, just holding fast to the simple knowledge of their love for one another and leaving the ultimate issues to that great unfathomable Player who "bither and thither moves, and mates, and slays," and with the shadowed skies of our State open but with the insight of eternity.

Jean had seen them coming hand in hand through the cool green glades of the wood where the great decision had been taken, and nothing in the two young storm-tost faces brought a sudden pang into her throat. She turned swiftly aside, avoiding a meeting, feeling as though the very solid ground upon which not even so close a friend as she could break without violation.



By Lydia E. Pinkham's Vegetable Compound

Is Sunshine Too Much For You?

Nursery circles under her eyes If she would only try Lydia E. Pinkham's Vegetable Compound in tablet-form, she could be strong and happy again.

To Jean herself the week in London had brought a certain new tranquility of spirit. Quite naturally and without effort thanks to Lady Anne's skilful stage-management she and Blaise had been constantly in each other's company, and, with the word "disloyal" murmuring in her heart like some tender undertone of melody, the hours they had shared together were no longer a mingled ecstasy and pain, marred by torturing doubts and fears, but held once more the old magic of that wonder-day at Montevarn.

Somehow the dividing line did not seem to matter very much, now that she was sure that Blaise, on his side of it, was loving her just as she, on hers, loved him. Indeed, at the stage Jean made no very great demands on life After the agony of uncertainty of the last few months, the calm convoy that Blaise loved her seemed happiness enough.

Other sharp edges of existence, too, had smoothed themselves down — as sharp edges have a knack of doing if you wait long enough. Burke seemed to have accepted her last answer as final, and now spared her the effort of constantly warding off his more portuous love-making. so that she felt able to continue her friendship with Judith, and her consequent visits to Willow Ferry, with as little "gene" as though the episode at the "Honeymoon" Inn" had never taken place. Jean was inclined to believe that Burke was genuinely slightly remorseful for his behaviour on that particular occasion.

Apparently he had not made a confidant of his sister over the matter, for Judith, ignorant of the real situation of a back thought of any kind that she approached Jean on the subject of spanning a few days with her, cried "Goodby at their bungalow for the Meer.

"Geoff and I are going for a week's blow up in the country of a fortnight's 'pick-me-up' Come with us, Jean; it will do you good after stuffy old London blow the cobwebs away!"

But Jean, at last, Jean felt that discretion was the better part of valour. It was true that Burke appeared to have accepted her decision at present, but in the informal companionship of daily life in a moorland bungalow it was more than probable that he would become importunate. And she had no desire for a repetition of that scene in the inn parlour.

Therefore, although the Meer, with its great stretches of gold and purple, its fragrant, heathery breath and its wonderful sunsets, appealed to her in a way in which nothing else on earth seemed quite to appeal, putting at the same time a definite check upon longings for home and country pulls at the heartstrings of a wanderer, she refused the invitation, de Burke and Mrs. Craig packed up and departed to Three Pit Bungalow without her, and Jean and Blaise remained the even tenor of its way.

The weather was glorious, the long, hot summer days quivering into breathless nights when the hills and dales amid which the old house was set were bathed in moonlight mystery—trans, and Jean, under the spell of planetary, reverence with shadows where unthousand-of dragons lurked, hastened with expectant feet to the rendezvous of her lover, the glimmer of hall, ribboned palaces or the bottomless wells of some ethereal fairy castle.

More than once Jean's thoughts turned wistfully towards the Meer which she had so longed to see by moonlight with Blaise "baby at her side. God must have made for this spirits"—and she felt disposed to blame herself for the added attachment which had impelled her to refuse the invitation to the bungalow.

"One loses half the best things in life by being afraid," she told herself pensively. "And a second chance to take them doesn't come!"

She felt almost tempted to write to Claire and propose that she should join her at the bungalow for a few days after all if she still had room for her. And then, as often the way of things just when we are contemplating taking the management of affairs into our own hands, the course of events altered itself without any effort on Jean's part.

The telephone bell rang, and Jean, who was expecting an answer to an important message she had "planned through on Lady Anne's behalf, hastened to answer it. Very much to her surprise she found that it was Burke who was speaking at the other end of the wire.

"Is that you, Geoffrey?" she exclaimed in astonishment. "I didn't know your bungalow was on the telephone I thought you were miles away from anywhere!"

"It isn't And we are,' came back Burke's voice 'From a certain quality in it she knew that he was smiling "I'm in Chichagamtch, phoning from a pal's house I've a message for you from Judy"

"To-o-?" inlened Jean cagerringly

"She wants you to come up to-morrow, just for one night It'll be a full moon and she says you have a hankering to see the Meer by moonlight Have you?

"Yes, oh yes!"—with enthusiasm

"Thought so It certainly does look topping Quite worth seeing Well, look here, Judy's got a party of friends down from town, who are coming over to us from the Round Devon side -going to drive up and stay the night, and the idea is to do a moonlight scramble up on to the top of one of the tors after supper Are you game?"

"Oh! How heavenly!" This, comprehensibly, from Jean.

"How what?"

"Heavenly! Heavenly" — with increasing emphasis. "Can't you hear?"

"Oh, heavenly—yes, I hear Yes, it would be rather—if you come to think of it

Even through the 'phone Burke's voice conveyed something of that unmistakably hurt forlornness of his.

"I won't come—unless you promise to behave," said Jean warningly.

Rubbing over with pleasure at the prospect vouchsafed by the invitation, she found it a little difficult to infuse a baffling starnsness into her tones.

"I'll be good to Miss Penny's Welcome back Burke's answer, spoken rather gravely. "I made you a promise last time we were at the Meer, and I'll keep it. Word of a Carthusian. I'll keep that."

"I'll never kiss you again till you give me your lips yourself."

The words of the promise rushed vividly into Jean's mind, and now that steady voice through the 'phone uttering its quiet endorsement of the assurance given, made her feel suddenly ashamed of her suspicions.

"Very well, I'll come then," she said hastily. "How shall I get to you?"

"It's all planned, because we thought—at least we hoped—you'd come. If you'll come down to the hampton by the three o'clock train from Cowden Haven. I'll meet you there with the car and drive you up to the bungalow. Judy is going to drive into Newton Abbot early, to do some marketing, and afterwards she'll lunch with her London people—the Holfords. Then they'll all come up together in the afternoon."

(To Be Continued.)

The Line Is Busy

But Chinese Have Most Polite Way Of Saying So

In China, when a subscriber rings up the telephone exchange the operator says: "What number does the Chinaman ask of the moon and stars desire?" After a short silence the exchange responds, "Will the honorable graciously forgive me? The emergency of the insignificant service and permit this humble slave of the wire to inform him that the number is sufficiently censored line is engaged?"

Tired All Day Long

Mother and Daughter Both Praise Dr. Williams' Pink Pills For Restoring Vigor

Interesting Case Quickly Relieved

"Being rundown, I was not able to do my housework, had no ambition, and could not sleep at night," writes Mrs. A. Amoit, Grafton, Ont. "I saw an advertisement for Dr. Williams' Pink Pills. Trying them, I got relief right away; so I kept on taking the Pills, and now I am able to do my work with pleasure, and I have an appetite whatever."

Mrs. Amoit adds: "My daughter was also rundown. Every one thought she was going into a decline. I gave her Dr. Williams' Pink Pills, and I could see success immediately."

Don't allow yourself or your daughter to be robbed of health and vigor. Take Dr. Williams' Pink Pills. They banish rundown or nervous conditions by creating new red blood cells, which impart health and vitality. Get a supply at your druggist's, or by the new 50 cents cartridge—adv.

Practicality Is Amazing

Birds and Fish Seem To Have Extraordinary Time Sense

Some birds certainly have a sense of time. Observations made at Burton Abbey, England, in the month of June prove that the lark is definitely the first to sing in the morning. This it are two minutes after three. Next comes the thrush, third the blackbird, fourth the blackbird. Then in order the reed bunting, robin, sedges, willow-wren, rook and garden warbler. The whole list is then long to give, but the name order was kept faithfully, morning after morning, ending with the tree sparrow which does not round its nots until four thirty-seven.

Great shouts of a delicious little fish called "sand eels" of the coasts of Kansas on the same day in the same month, with such regularity that from time to time out of mind, the day has been set apart by the natives as a holiday and a feast day. The shoals take twenty-four hours to pass, and the next day the feast is again until the same day the following year. There is no explanation of the amazing punctuality of their yearly visit.

Persian Rule—the unrivalled toilet powder. Essential in every dainty woman. Imparts rare charm and beauty to the complexion. Refines and whitens the skin. Makes hands delightfully white. Quick and refreshing. Relieves roughness. Ideal for the feminine distinction. Delicately fragrant. Swiftly absorbed into the tissues, leaving no stickiness. Persian Balm invariably creates a subtle elegance and charm.

THE RHYMING OPTIMIST

By Alice Hegan Rice

HEART OF GOLD

Life is a flower with a golden heart;
Though petal after petal drop away
As one by one the swift-winged years depart,
Still something of its charm and fragrance stay.

As ever wider open falls the rose,
Still heavier, more potent grows its scent,
And rare, new loveliness the hours disclose,
Sheltered,
Surpassing speech, yet strangely eloquent.

A flower is life; yet, as youth's petals fall,
And flying years reach out with eager clutch,
Time is defrauded; he cannot take all
But only graces valued overmuch;
For not until the final leaves unfold
Does it reveal its matchless heart of gold.

Monthly Inconsiderate

According to an official, says London Punch, the effects of income-tax collection are so monthly furnished that it isn't possible to ask taxpayers to take a seat. Nor is there any recommendation for those who faint.

No child should be allowed to suffer for an hour from worms when prompt relief can be got in a simple but strong remedy—Mother Graves' Worm Exterminator.

Only On Map

With all the present talk of communism, it might be well to point out that although, on all maps of the world, the British Empire is colored red, there is very little of that spirit found in any part of the Empire.

Nome, Alaska, is farther west than the Hawaiian Islands.

Little Helps For This Week

"Great proud have they which love Thy law."—Psalm cxix. 165.

Dear Lord and God, Author
Of time as timeless my call:
O grant me that it all
This will of mine
May still be one with Thine!

Teach me to answer still,
Whate'er my lot may be,
To all Thee possible
Of good or ill,
All goods as God well.

—Alice Williams.

The rest of all dissatisfaction and discontent with self, and with one's surroundings, and with one's prospects, can never be reached until we go limes; to the well of God to our soul's birth and soul's nature, and beside the discovery of that will for us, and the doing it our chief aim and hope. No change in life's circumstances, no larger worth, no brighter outlook will be enough. We ourselves need to be born again: it is not our outward life that need to be refashioned.—Norman Smyth.

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

MUCH PREFER APPLEFORD WONDER PAPER

With so much inventive thought being given to the cleaning problem and so much work, it is only natural that a wonderful substitute for the messy dust cloth should be sought.

Now it has been found! Appleford Wonder Paper which actually does—as in clients—as if problem is receiving a hearty welcome from Canadian women since the dust cloth and all they stand for.

Wonder Paper is made from clean rags and soft paper pulp, thoroughly saturated with a high-grade furniture polish and absorbs dirt instead of spreading it.

Appleford Wonder Paper comes in handsome package, twenty-five sheets, each as large as a duster. You merely crumple a sheet into a soft wad, and go over the surfaces requiring attention.

You'll be amazed at the quick and lasting result Wonder Paper gives. When one side is worn and soiled, simply turn the sheet and use the other. After the furniture or woodwork has been gone over, you can still use your Wonder Paper on the floors.

And when you're through—throw it away. No duster to shake out or wash. No bother at all. The most obnoxious part of housework done in half the time and with half the effort. Doesn't the Dust appeal to you?

Special Offer

Wonder Paper is made by the makers of the famous PARAGON Sandpaper. Your paper in the Crown Box. Most grocery, hardware and department stores sell Appleford Wonder Paper. If, however, they don't, just send the coupon and we'll give you a new and unique booklet entitled "Leftovers," containing one hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd., Toronto.
Enclosed find 25c for which please send me [illegible] sheets of WONDER PAPER and your 100 recipe booklet "Left-overs."

LOCAL NEWS

Mrs. A. E. Segare left Monday with Mrs. Roberts of Innisfail, for a trip through the north country, and will attend Women's Institute Conference at Big Meadow, Peace River and Wembley. She will return around July 31. Mrs. Segare is vice president of the Alberta Women's Institute.

Miss A. Metcalf of Cheadle, sister of Mrs. P. Murray and Miss McKay were guests at the home of Mr. and Mrs. Frank Murray over last week-end.

Mrs. C. H. Grannet and family are holidaying at Cold Lake.

From time to time we come across interesting advertising matters used by business men either on there Job Printing or on web their Advertising. The latest one we picked up was:— A well known merchant in Town uses these lines on his printing. "You grow here town merchant before you buy elsewhere, It will pay you to do so", put the same merchant sends some of his Advertising and printing to be done elsewhere.

Mr. and Mrs. F. A. Redd and little son of Lethbridge, are visiting at the home of the former's parents. Mr. Redd is meeting examination papers in Edmonton.

Ralph Cunningham of San Francisco, is visiting at the home of Mr. Dave Hammond.

The Misses Lydia and Elsie Mohr returned home last week-end, and will spend the summer vacation.

Letter to the Public

Dear Sirs—

"A misapprehension which has got abroad through exaggerated rumors, is in urgent need of correction. The facts are as follows: One evening I saw in my stable yard a couple of men with a team, loading grain from the granary, going over to them, thinking it was my tenant, who often loaded grain out for crushing at his home, but found otherwise. One man was shovelling behind a high wagon box (tank), I spoke to him and he to me; I took him to be Mr. McContell (George), whom I met before only on two or three occasions, believing that he was obtaining some barley, as he does the year before from my tenant, I though nothing more of it and returned to the house. Two weeks or so later, casually, my tenant asked me if I had seen anyone taking out barley as two hundred and fifty bushels had been removed, without his permission and assuredly without value. I had to think for a few minutes, and then remembered about the person I took to be Mr. McConnell, and told him about this occasion, asking him if he had made any arrangement with him, and was assured that he had not, nor with anyone else. I went to the Fort and consulted Cons. Warrior, reporting the fact to him. He advised me to see Mr. McConnell, which I did at once, and after some conversation, I came to the conclusion that the man I spoke to, taking the grain was not he, but I must state, very strongly reminded him. I spoke frankly of the incident, asking him what the conclusion that it was not Mr. McConnell that I had seen and that it was a case of theft, for which I am sorry, for which I am truly sorry, as I would be the last to do anyone an injustice, and an apology is necessary to the Mr. McConnell for the misconception, which I hereby publicly tender and trust that the suspicion of him may remain.

The matter, however, they trust, were pretty held to come into the yard in daylight, and remove not only one, but four loads, taken on one or two, days. I have proved from home at Bremner, as they must have had no great cause to load before daylight or the first load to be taken to the granary, for a second within that time. It were almost impossible, but the grain was taken bright, and without any liberty. That constitutes "stealing", and that has occurred in this community before from guarantee out in the field, but not lability under the proprietors eye open. It is supply a case of "believe it or not".

Yours very truly,
G. W. Wilson, M.D.

Vessels, boats, and gear used by the fishermen of Prince Edward Island in 1931, in hauling and hauling their catches had a value of more than $756,000. The capital investment in the fish canning and curing plants of the province was slightly more than $160,000.

VOL. 11 No. 15 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, JULY 20th, 1932 $1.50 PER YEAR IN ADVANCE

Local Senior Softball Team Wins Mitchell Trophy at Lamont

The Fort Saskatchewanites invaded Lamont last Wednesday and returned with the spoils of war in the shape of the Mitchell trophy, emblematic of baseball supremacy. The cup has been changing hands with alarming frequency here this year and its sojourn here was brief, the third game and the third team being sufficient therefor.

The game was a shut-out for the locals, the first they have suffered this year, Manager Herbie' crew of sluggers being held absolutely helpless at the hands of the 600 pound battery of the Fort's in the persons of the mountainous Richard Turner and his equally dapple partner Signor Holland. Lamont in fact collected only 2 safties and these not until the 8th and 9th innings, when Scrabe singled through the short field and again in the ninth Walker connected for a single to left field. Eleven Lamontites fanned out.

Mydansky, (on the mound for the locals) worked exceptionally well himself but the boys were playing, what might with justice be termed loose ball behind him. He whiffed 15 of the visitors and allowed only 5 hits, but one of them was a 6-ply smash by Gant with the bases crowded to two-thirds of their capacity. The hefty Dick drove in the first tally when he hit a double to centre, and when Dick got to second on a hit, well you can figure it out for yourself it was some clout. The second scorer was tallied on three errors in the 7th inning. The other 2 came as before mentioned, on Gant's smash to left field in the final stanza. Yes, 3-0 was the score.

Lamont Tribune.

LOCAL NEWS

Mr. and Mrs. A. V. Carlson of Chipshaw, Alberta, are visiting Dr. and Mrs. Calhoun.

Dr. and Mrs. W. P. Calhoun will leave Sunday to attend convocation at Calgary for a few days and will holiday at Banff.

Mrs. T. Lane and daughter Marion left Saturday for Toronto, Ont., where they will spend a few weeks vacation.

It has been decided by the Committee in charge to hold the postponed Ferry Scout Picnic on the afternoon of Wednesday the 3rd of August, and it is hoped the residents here will see his way to help with sunny weather this time. The original program planned will be carried out, and the baseball and basketball tournaments and other sports should attract the young people while the older people will "romp round".

We noticed in the Edmonton Journal on Tuesday evening where Bandmaster of Fort Saskatchewan had ordered the Journal 6-sails race to be run on Wednesday. This race is run every year in conjunction with the exhibition and this year there are 15 entries, including Jack Wahlberg of Saskatoon winner of last years event.

Miss Lillian Berg and Mrs. Mary B. Ardley and Mrs. H. B. McAdie all of Fort Saskatchewan and district won many prizes in the various women's needlework and culinary classes at the Edmonton Exhibition on Monday.

Mrs. Roy Marler of Bremner was first in the Knitting work in silk or cotton class.

Mrs. C. J. Kidd and son Bude of Fort Versailles, is visiting her daughter Mrs. H. Ardley here for a couple of weeks.

Mrs. Kidd is the proud owner of the only restaurant and rooming house in the far north, besides being a very efficient general merchant and fur-trader.

PARTRIDGE HILL NEWS

The U. F. A. picnic held last Friday was well attended and a success from every angle The sports were keenly contested; Baseball between Ypres Valley and Rose Creek resulted in a win for the former. Ypres Valley, Beaver Hills and Partridge Hill ladies soft-ball teams gave the prize to Ypres Valley.

The horseshoe trophy went to the old veteran Ed. Ashton, with C. H Flintoff runner up.

George Lawrence and Frank Kulak did a land office business well their Aunt Sally and Coconaut shys.

Messrs Flintoff, Gillison and C. Lawrence were the former Ypres Valley ice cream and cold drinks at the booth.

The lucky ticket No. 1 on the Afghan was held by Wm. Attwood who is now the proud possessor of a new baby and a new Afghan. We ask you what more can he ask for in life!

The bountious supper provided by the U. F. W. A. was well patronized. In the evening a dance was held in the school at which Messrs Smith, Bell and Berg provided the music.

At a joint service at Beaver Hills last Sunday morning, the flower service put on by that church was much enjoyed. On this occasion all joined in whistling Mrs. and Mrs. Hodgins, and family a safe and pleasant journey on their holiday trip.

Frank Kulak is wearing a broad smile these days. Its a son. Congrates Frank.

Mr. and Mrs. W. Knutson and family of Cavendale, visited Mr. Hillis and Miss Sadie Whitson on Sunday.

Amongst the kiddies holidaying in the city during fair week are:—Hazel Lawrence, Marguerite and Bobbie Warring, Vera Osbaldeston.

Mr. and Mrs. C. Underwood and Gwen, and Mrs. E. Osbaldeston who is attending summer school visited Mr. and Mrs. W. Osbaldeston last Saturday.

Mrs. H. Rye received the sad news of the death of her sister, Mrs. Harrison, Edmonton last week. We extend our sympathy to the family.

Amongst those who attended the Vegreville Constituency U. F. W. A. conference in Lamont Tuesday, were Mesdames Warring, A. Krebs, A. Hall, Osbaldeston, W. Gillison, G. Lawrence, C. Alton, Pearce and Flintoff and Miss Osbaldeston, also Messrs Gillison, Pearce and Flintoff. The U. F. W. A. local with three a fine exhibit of handicraft and was accorded third place.

BUY-BYE BLUES

"Buy now?"
They told us a year ago.
"That's how"
We'll end the depression." So
Our family agreed "All right, we'll go
Buy now?
By now
Our family has reached the end—
And how!
We haven't a single friend,
Not a thousand borrow, we cannot lend
By now!
Bye, now!
It's stranded us high and dry.
Bye, now!
To Pole—no use to cry—
We'll take a gun and we'll all go bye-
Bye now!

Albert Jacobs took his aeroplane fuselage to Edmonton on Monday morning where it will be on exhibition during this week in the manufacturers building.

Sardines packed by Pacific coast fisheries are now stood up in tall cans, instead of laid in the old flat type. In other words, instead, of being packed in the sardines, they are now packed in like passengers in a street car.

BASEBALL

The Westbourne Ball Club was to play here on Monday evening against the local senior Club for the Mitchell Trophy now held by Fort Saskatchewan.

A very good crowd attended in expectation of seeing a worth while game, but the visitors didn't turn up and no report was heard from them. The locals after waiting some time, picked up two teams from amongst themselves and played.

It was just too bad for the locals after having a good crowd attend and being able to collect around $25 then having to give it all back. Better luck next time.

In Westbourne not turning up, they lose their chance at playing for the Mitchell trophy this year.

On Friday evening of this week the Fort Ball team meets Bruderheim here and the much coveted Mitchell Trophy will be at stake. So be sure and see the game.

Josephburg News

The ladies aid meeting will be held at the home of Mrs. George Geteltinger on Thursday, July 28th, at 2:30 p.m.

The ladies aid picnic tendered on July 6th, although it rained in the earlier part of the day, there was a good crowd in attendance. In the morning Pleasant View and Josephburg played baseball the score being 26-3 in favor of Josephburg.

The Fort Junkers and Josephburg played an interesting game at Josephburg on July 13th. The latter winning by a score of 8-5.

After the ball game a dance was held in the school which was well attended.

There will be no service on Sunday, July 24th., as Rev. Winchcomb will be at Holmtal, Alberta.

49th BATTALION CHURCH PARADE TO BE HELD IN EDMONTON SUNDAY

The annual church parade of the 49th Battalion (Edmonton Regiment) Association will be held in Edmonton on Sunday, the 24th July.

Ex-members of the battalion will assemble on the parade ground at 10 a.m. The service will be held in the open air on parliament hill. Captain the Reverend G. C. Reynolds officiating. The service will be broadcasted over the radio. Major General the Honourable W. A. Griesbach will command the parade. The Service battalion will supply two bands, the colors with a color party and an escort. After the service luncheon may be had at the King Edward Cafe by members, their wives and families at fifty cents per head, children under 12 years half-price. Members of the Association will wear medals and decorations. Any man who ever served in the battalion is eligible to attend. A 50-forty-seven attending the Edmonton Exhibition are requested to stay over the week-end and attend this service. The committee provides an opportunity for old friends to meet again and talk over old times. Those church parades attract a great deal of favorable notice from citizens generally and the press.

Earl Hay Hon. Secretary.

Restoring World Confidence.

The signing of the Lausanne treaty on July 9 by all the great European powers, whereby all the German war reparations were wiped out, and provided for instead that Germany shall pay in one lump sum an amount which represents one cent for every dollar demanded by the Allies after the close of the war, marks a new and an important forward step in the direction of establishing the peace of the world and in restoring the economic health of all nations.

Apart altogether from the specific agreements set forth in this historical document, and the gains thereby conferred upon a long suffering world, the fact that the great European powers, and more especially Germany and France, have at last met on common ground, and have signed a treaty as a result of consultation and compromise rather than one forced by one upon the other, is one of the most hopeful occurrences for many years.

Since the signing of the Peace Treaty, and the imposition of a war indemnity on Germany totalling the huge and impossible sum of $56,000,000,000, together with many other humiliations and penalties, nothing but bitter feelings have prevailed on the continent of Europe. Physical warfare has been followed by an even intensified economic warfare. Fortifications and barbed wire trench entanglements have been replaced by tariff walls, surrounded by high and ever higher tariff barriers. Each nation has been determined to have as little trade intercourse with its neighbors as possible; each one endeavoring to economically strangle the other. Each was suspicious of and feared the other. Each demanded security from the others. These things were deadlocked, trade stagnated, all people suffered, and warlike armaments steadily increased despite all efforts to reduce and control them.

Recently intolerable "reservations" took place between various nations, international conference followed conference without any tangible results being achieved until confidence in the world's political leaders, and even in our existing institutions of government, was more or less shaken. Even in Western Canada leaders of certain parties and groups openly predicted the failure of this last Lausanne conference. This loss of confidence was, indeed, the world's greatest loss because it was shattering all hope of success and a way out of our difficulties being found.

The signing of the Lausanne treaty refuted the prophecies of these pessimists. It demonstrated that our statesmen are not bankrupt in vision, patriotism, statesmanship. It has once again proven that where there is a will there is a way out if patience, persistence, tact, coupled with determination, and a will to succeed is in evidence.

The Premier Ramsay MacDonald belongs the chief credit for this great achievement. He refused at all times to recognize the possibility of failure. When the probability of getting France and Germany to agree seemed most remote, when consultation followed consultation without results, Ramsay MacDonald kept up the good fight until finally he succeeded in bringing these two historic enemies together. Justly deserved were the warm congratulations extended to him by King George. The whole world owes him a debt of gratitude. He has restored confidence in democratic institutions of government throughout the world, and has thereby paved the way for further measures of future conferences.

Besides wiping out the war reparations of $56,000,000,000 which Germany was obligated to pay, and replacing that sum with a lump sum of $250,000,000 to be paid when Germany can call bonds for that amount, the Lausanne treaty declares suspension of collection and payment of interwar-years debts for a term of years; it includes an agreement between Turkey and the Danubian states which are in financial difficulties and whose prosperity is closely linked with that of Germany; it creates a committee to study the grain problem in the Danubian states which are embarrassed by the huge surplus; and it creates machinery for a world economic conference under the auspices of the League Of Nations, in which all nations, including the United States, will participate.

The Lausanne conference did not accomplish everything that some people hoped of it, but it did succeed in making tremendous strides along the road to world betterment and a restoration of confidence which it is essential shall be restored before there can be a return to world confidence, world trade, world prosperity. Had that conference ended in failure, the outlook would have been dark indeed, whereas the large measure of success achieved not only means an immediate betterment, but also the assurance of a more encouraging together of the nations in a better, more hopeful, more friendly spirit to consider other problems, such as disarmament, tariff barriers, international currency problems, and allied subjects.

The world outlook is decidedly better because Ramsay MacDonald stuck to his principles and unflinchingly fought for a return to reason and world brotherliness at Lausanne.

The Great Rear River

Great Bear River which flows from Great Bear Lake to the Mackenzie River, is approximately 75 miles in length and has a drop of about 136 feet in this distance. It is shown on a map of Great Bear Lake and district on the scale of eight miles to an inch just issued by the Topographical Survey, Department of the Interior, Ottawa.

Fortuna Migratory Birds

The Migratory Birds Treaty, administered by the Department of the Interior, was made between Great Britain and the United States to protect certain species of game and insectivorous birds migrating between Canada and the United States.

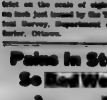
Pains in Stomach and Bowels So Bad Would Have To Sit Down



Mrs. G. Lumley, Moncton, N.B., writes:—"I was certainly recommend Dr. Peckey's Inward Gold Shamrock for the relief of pains in the stomach and bowels.

"Last Summer I had such awful pains in my stomach, and bowel part of my trouble, at times, I would have to sit down. I took 'Dr. Peckey's' and was soon relieved.

"When my children were small I always kept a bottle in the house and it helped me immediately. I write in my of their full confidence."

Power Of Advertising

One Of the Indispensable Tools To the World In Reconstruction Of Industry.

Advertising is one of the indispensable tools to be used in the reconstruction of North America's industry, was the keynote of an address to the convention of the Parcle Advertising Clubs Association, at Vancouver, by George W Kleiser of San Francisco.

"Advertising," he declared, "is a powerful instrument which should be used with the greatest skill and care in order that the rebuilding may be sound and lasting once the upturn has begun.

"With the change in the situation from one where anything could be sold that could be manufactured, to one where anything can be manufactured that can be sold the opportunity exists for a genuine demonstration of the results that can be obtained through powerful advertising, intelligently done.

"This," he said, "should be done on behalf of numerous products directed to a timid and doubting public through the primary media serving them.

The confidence of both advertiser and public, which to a greater or lesser degree has been shaken by extreme indulgence in advertising during these unusual times, must be restored. This can be accomplished only through honesty, truth and straightforwardness in advertising it-self," he said.

"Advertising will, no doubt, be one of the first agencies and probably will be one of the first industries to recover if those to whom it is entrusted use it powerfully and wisely."

Power Sales

Power sales is inactively absent in Edmonton. Delightful to use. Subtly fragrant Cooling and refreshing. Imparts a most youthful charm to the complexion. Invaluable for softening and whitening hands. Invisible. Tones and stimulates the skin. Useful for the family also. Protects the tender skin of the children and is excellent for the father as a hair fixative and cooling shaving lotion.

Vaccine For Tuberculosis

Discovery May Mean Partial Control Of Dread Disease

In a copyright story, the Milwaukee Sentinel said 10 years of research by Dr. Edward D. Frost, agricultural bacteriologist at the University of Wisconsin, have been rewarded by discovery of a vaccine "Tubercle," which ultimately may bring partial control of tuberculosis.

The vaccine is obtained from tuberculosis bacilli treated by ultra-violet rays.

"The rays," the paper said, "otherwise kill the germs of tuberculosis, but apparently produce little chemical change in their scientific bodies or "toxins," and from the ray-treated bacilli the doctor obtained a vaccine which was physically harmless, yet potent enough to control live bacilli.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but as a highly beneficial medicine for children's ailments. They correct the disorders of the digestive system to healthful action, which the presence of the child will be restored and its constitution weakened.

Too Many Physicians

Examination Conditions Of Profession Being Lowered, It Is Stated

Too many physicians are being turned out from the medical schools, according to the statement of the medical profession is being lowered, declared Dr. J. M. McCallum, Victoria. Chairman of the Committee on Medical Colleges of Physicians and Surgeons of Ontario, at Toronto.

Dr. W. T. Wells, Wells Island, had pointed out 225 students went up for the Dominion examination and that only five were "plucked" and 40 others "conditioned" because they failed in one or two subjects.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is a safe one for driving worms from the system.

Keep Well with Eno's Help

If you are healthy, take ENO . . . When you are not well, take ENO, for in most cases the beginning of all ailments is in the intestinal tract. ENO'S "Fruit Salt" rids the intestinal tract of all the accumulated poisonous waste matter. Be ENO conscious. Start taking ENO'S "Fruit Salt" to-day.

ENO'S "FRUIT SALT"

Noted Inventor Passes

Death Of Mr. Gillette, Of Safety Razor Fame, At Los Angeles

King Camp Gillette, inventor of the double-edged safety razor blade died recently at Los Angeles, at the age of 77.

The inventor and manufacturer succumbed after undergoing several operations during two years for an intestinal malady.

He went to California nearly 30 years ago from Boston, where he organized the Gillette Safety Razor Company in 1901.

His Los Angeles realty transactions were among the largest ever recorded here.

Educated in Chicago, Mr Gillette became a salesman and later London branch manager for a bottle-stopper company. After conceiving the thin, sharp blade to overcome the task of straight-edged shaving, he devoted five years to evolving a holder.

The razor was launched as a commercial product in 1903. Only 51 sets were sold that year, but annual sales of as many as 15,000,000 razors and 1,000,000,000 blades followed.

Mr. Gillette was born in Fond Du Lac, Wis., January 5, 1855. His father, George Wolcott Gillette, was an inventor before him. His mother wrote "The White House Cook Book."

Further Reduction Of Sea Forces Proposed

Great Britain Launches Move At Geneva For Disarmament

Great Britain has launched a move for another five power naval conference aimed at further reduction of sea forces.

The proposal for a five-power naval conference between Britain, the United States, Japan, France and Italy was advanced by a high British authority in a press interview.

He proposed that it be held in the interval before the naval disarmament conference resumes its activities in the fall.

A Power Of Its Own.—Dr. Thomas' Eclectric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most reliable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast.

Old Defects Complete

Aviators usually steer clear of the Mera Mountains near Dzamberg, Georgia, because the "Zinutsia," a granite cliff some 200 feet high, possesses magnetic qualities. It deflects the compass almost 180 degrees at its summit.

Cocaine is obtained from the leaves of the cocoa plant.

Your Asthma, Yes. The efficacy of Dr J D Kellogg's Asthma Remedy in relieving that is recognized to be hoped for, it is to be expected It seldom fails to bring relief and by your own individual case it will do the same So universal has been the success of this far-famed remedy that every one afflicted with this disease owes it to himself to try it.

To Build New Bridge

Preliminary Work On Bridge Over South Saskatchewan River

Progress is being made on the construction of approaches to a new bridge over the South Saskatchewan River at Outlook, according to H. H. Macfarlane, chief engineer of the Department of Highways. The work is being done as a relief measure.

Though there is little likelihood of any work on the bridge itself being started this year, soundings have been taken preparatory to selection of the site of the bridge and work on the approaches started.

A New Discovery in Feminine Hygiene

MEDICALLY APPROVED

Why dabble with dangerous poisons? Why suffer the inconvenience of preparing solutions?

Why be uncertain?

H. G. Tablets contain no poison, crystal or bichloride, yet destroy germs instantly proven in a few seconds.

H. G. Tablets are non-caustic and will not harm the most delicate tissue.

Designed to serve the most exacting requirements of feminine hygiene, and are unsurpassed for use by men and women in the treatment of local infections of the urinary or men's sex tissue. H. G. Hygienic Tablets afford a safe, convenient and satisfactory means of protection against virile, health-wrecking infections. Packed in a small vial containing twelve tablets, they can be carried inconspicuously in hand bag or travelling kit. Dissolve one tablet in douche and, immediate action are the secrets of H. G. Hygienic Tablets.

Handy and easy while, the tablets is easily placed, and acts immediately thereby eliminating in the saving annoyance, retiring to work at once as an antiseptic and functioning without injury to the delicate membrane with which it comes in contact. Not only does the tablet destroy the bacteria by contact, but the powerful germicide is carried by the disinfection of the tablet has the same antiseptic effect as that of the tablet itself, and prolongs its protective efficacy for several hours. Both tablet and vapour are more powerful than any carbolic acid dilutions, or poisonous other solutions used for the purpose of protection from bacteria in feminine hygiene.

H. G. Hygienic Tablets provide an effective, stainless, safe and simple method of feminine hygiene, and meet all the requirements of the fastidious and free woman.

Imperial bio-chemists and many well-known medical authorities have approved the formula of H. G. Hygienic Tablets and attested their harmless germicidal power.

If for any reason doubt exists regarding the safety of the use of these Tablets, we recommend that you take a douche for your family protection and thereby lose nothing their harmlessness and efficiency.

SENT ANYWHERE BY MAIL

If your druggist is unable to supply you, or if you prefer to send direct, remittance below and H. G. Tablets will be sent you a full size tube of H. G. Hygienic Tablets by return mail, postage paid by the distributors of the tablet has the same satisfactory guarantee as the tablet itself, and prolongs its protective efficacy for several hours. Both tablet and vapour are more powerful than any carbolic acid dilutions, or poisonous other solutions used for the purpose of protection from bacteria in feminine hygiene.

Tree Planting On Prairies Sole Remedy For Soil Drifting And The Conservation Of Moisture

Extensive tree planting alone can save Saskatchewan from the fate which has overtaken the Sahara desert, according to Capt. Richard St. Barbe Baker, who passed through Winnipeg, on his way from the Peace River country to Toronto. As late as the time of Mohammed, Capt. Baker said, the Sahara was a well-wooded and fertile area. Then came a great influx of Arabs who, like the settlers of the western plains, cut down the trees and began farming operations. The result was to convert the once-rich Africans plains into an arid and unsettled tract, unfit for human abode.

One of the first hundred students to attend the University of Saskatchewan when the war broke out, Capt. Baker is now completing a tour of Canada, which he had not seen for years. He was delighted with the appearance of Manitoba, where tree protection has evidently encouraged growth. But in Saskatchewan he noted the extensive denuding of the plains, and based his prediction for the future upon his study of the past.

Tree planting on all rising ground, Capt. Baker declared, was the only remedy for this state of affairs, which was resulting in a changed climate, soil drifting and desolation. He urged upon Western Canada the adoption of the policy in force in New Zealand, where forestry was being made to pay.

In that country one private company had already cut $4,000,000 worth of timber. The money was invested in tree-planting, and it was believed that in 15½ years from the date of planting the dividends upon the investment could be expected. In the interval the trees did much to conserve moisture and eliminate soil drifting. From a tree-planting viewpoint "the land grew money" was the New Zealand slogan.

Capt. Baker said it was deplorable to see soldiers in Prince Albert Forestry nursing off the trees on their farms. This left an alkali deposit which was injurious to the soil. Instead, he advocated the establishment of a plant for distilling alcohol from the trees felled, saying this would in time make Canada self-supporting in matter fuel. A new enforcement was being perfected in France which could save the gas generated by burning charcoal (made of wood). The price of tree planting was, therefore, in his opinion, not only good agricultural investment, but also a policy that paid actual dividends.

Capt. Baker is the founder of a society named "The Men of the Trees," located in England by Sir Francis Younghusband, its aim being the protection and encouragement of forest growth. He is also an author and forestry expert, having recently been appointed a special Arbor officer employed by the British Government.—Winnipeg Free Press.

The Pendulum Clock

A pendulum clock gained, owing to the increase of gravity with latitude, about one minute and twenty seconds a day when taken from Ottawa to the mouth of Mackenzie River, North West Territories, by an official of the Dominion Observatory, Department of the Interior, in connection with gravity work. Taken to a height of 2,000 feet it lowered fast up a mountain side in British Columbia it lost about thirteen seconds daily.

"Pardon me, but can you let me have a light?"—Minneapolis Chieftain.

Heavy Damage Suffered By Farmers In Southern Saskatchewan

Hail losses in southern Saskatchewan were very serious according to insurance officials at Regina. Heavy damage has been suffered in districts where farmers have not been able to effect insurance.

According to C. C. Cook, president of the Farmers Mutual Hail Insurance Company claims this year have not been numerous but those which have been received are large.

Seven claims ranging up to 100 per cent. had been received from the district between Pasqua and Moose Jaw following a hail storm in that district. E. C. Quigley, secretary of the Saskatchewan Municipal Hail Association, said.

Lloyd George Not Impressed With Value Of the American Forces

Newton D. Baker President Wilson's secretary of war has revealed that David Lloyd George, then Premier of Great Britain at one time apparently deserted the removal of General John J Pershing as commander-in-chief of the American Expeditionary Force in the Great War

In a letter to Chief Lloyd C Griscom, former Italian officer between General Pershing and the British War Office Mr Baker wrote that the wartime premier complained the United States army was perfectly useless to the British forces and was on the verge of asking for General Pershing's recall

At the conclusion of a dinner in London in 1918, Mr Baker wrote, Mr Lloyd George with vehement emphasis, complained that the United States army in France was of no service to the British at all in spite of the fact that Great Britain had stripped necessary supplies and ships in order to carry United States troops to France and that they had scarcely gotten to France before General Pershing began sending them to the British and took them into his own custody on another part of the line.

"This description was most correct and vehement resulting in the final declaration of Lloyd George that so far as Great Britain was concerned the American army was perfectly useless and the ships service devoted to bringing them over wasted."

Mr Baker replied that from his own observation on the front there he was convinced that the American troops were "at least detaining that many German divisions which might otherwise be added to the commitments against the British and French."

He countered with an offer to discontinue the transportation of American soldiers on British ships and to devote only such forces as could be carried on American vessels.

The next morning Mr Baker replied, Lloyd George "was in a hurry to India, said that Mr Lloyd George "asked me to say to you that you should think it over and write him later which he raised for discussion had eaten dinner."

Delphi Bedouin

A critical moment in a court case had arrived.

Counsel for defence rose and pointed at his finger at the man in the witness box.

"Now, sir," he commenced, "the whole evidence hangs on the destroying of letter Think before you answer What did the postmaster say?"

The witness, after a thought, gave an items of deep thought:

"I remember, he said at last. 'The postmen said 'Every bean seeds a telephone'."

Albury, Australia, has banned all dog racing.

Twenty sweetroast is a new, appetizing food.

Songs Of Yesterday

Old Favorites Have Strong Appeal In This Modern Age

It used to be theory of those who constructed radio programs that music composed further back than the day before yesterday was old-fashioned and unsuited to the demands of an up-and-coming age Now the program magnates are less sure of themselves and of the public taste.

The devotees of a feature called "Today and Yesterday," offered by a New York station, invited their audience to specify their favorite music Six thousand replies were received, 614 songs were suggested, and first choice, with 513 ballots was none other than our old friend, "Auld Lang Syne." "Home, Sweet Home" came next, followed by "Old Folks at Home," "Annie Laurie," "Old Black Joe," "Old Kentucky Home," "Old Man River," "Carry Me Back to Old Virginny," "Suwanee River," "Old Dan Tucker," "Oh, Susanna," "Dixie," "Yankee Doodle," "Old Oaken Bucket," "Old Folks at Home

Opportunity For Service

Out Of the Welter of War Has Grown a Greater Understanding

The opportunity for service was never so great as it is now. The reason is that to the last few years, the world has changed.

Now, time and distance have been annihilated by science, and radio, telephone and four lines have changed into mutual confidence and understanding on the spirit of the World War. I do not proclaim an Ideal state, nor desire to engender expansive to sentiment. I merely mean that in common suffering was found a greater capacity to see each other in a more generous light and to honor each other in a more hopeful way. I mean that, in this great commonwealth of ours and youths of many nations, ideals and ideas we once believed peculiarly our own were found and much honor of our friends from other lands.

We learned that their hopes and aspirations were those we had ourselves. We came to believe that the things we had in common were greater far than those which divided us. Out of this fuller knowledge of one another, from this free and frank interchange of thought, has grown, as I say, a greater understanding and a finer sympathy, upon which lies may be reared the enduring structure of a cooperative purpose.—Premier Bennett at Syracuse.

Mild Feeling Exists

Large Stock Yard To Be Located At Hudson Bay Junction

Contrary to recent despatches emanating from The Pas, Man., a huge stock yard, capable of feeding two train loads of cattle at one time will be built in Hudson Bay Junction this summer. The information was given by J. I. Cross, president of the Hudson Bay Junction Board of Trade by H. Byron Turner, director of the Canadian National Railways in Prince Albert.

Hudson Bay Junction is chosen by the company as the best feeding point for cattle going over the Hudson Bay line, and will also be used extensively for accumulation of cattle going to eastern markets. Eighty pens will be constructed with complete equipment for watering and feeding. Railway facilities are already ample to care for a large volume of traffic, with plenty of room for expansion. The location was chosen in view of the quality of native upland hay growing in the country.

Rail Subways To Cross English Channel

Undertaking Also Means Only Three Cabins On Steamer

Considerable interest was aroused by the arrival at Dover of a 65-year-old man, Sherrah Bakhpersat, of Switzerland, who had crossed the channel from Calais on a hydroplane.

Bakhpersat is the first Dutchman to accomplish the feat on this type of machine.

He took 14 hours to make the crossing, during which he encountered a blizzard, and was forced to descend when he reached Dover harbor.

His machine is about 12 feet in length, consists of two pontoons and floats, with two petrol propelling paddle wheels, one on each side of the craft.

Roosevelt's last entitled all foreign born boats to leave the country.

"The door's stuck. What can I do?"

"Answer in a couple of those cigars you gave me. That will stop it."—Widow Jones, Burke.

CANADIAN WOMEN JOURNALISTS MEET IN ROCKIES

The Ontario delegation to the sixth triennial convention of the Canadian Women's Press Club, guests at the Banff Springs hotel, paused for a photograph before entering the beauties of the Canadian Rocky Mountains. In the group are. Mrs. Baxter, Detroit News; Miss Dickson, Mrs. Robson, Ottawa; Miss Margaret Grier, Ottawa; Miss Isobel Armstrong, Ottawa; Miss Eleanor Stevenson, London. Miss Margaret McGibbon, President Toronto Branch; Miss Charlotte Whitton, Ottawa, and Miss Lila Stanley, Kitchener.

Slavey Animals Cheap

Low Prices Quoted By Dealer To Crown Hunters

That old-fashioned custom of having an ordinary day on hom-ent reversed its bones will go by the board as soon as the public realize real slavey pets may be acquired dirt-cheap. According to a plan but announced by a New York animal dealer to crown men, you may pick up a slavey puppy-dog for only $250 and $300. Get one of these and your neighbor's scrubby police dog will look like a fat-fish, for a canine prepossession is a common dog from the heart of Africa.

Or, if you wish to be a bit flashy, much cozy $1,500 and a pair of pigmy apes can be had for $2,000. Dogs-on-hoof may be had for $2,000. Dogs-on-prison. And look at these: Turkish porcupine $60, pair Australian opossums or single black-faced ewes $150, pair bear $200. Abilene bovine (weighing 210 pounds) $250.

Not interested? Well, here's a snap. A big Rhinoceros tiger for only $4,000. Then again you may want something cozier; a Cape buffalo from Africa, for instance. Fourteen hundred dollars for a large volume of trouble, with plenty of room for expansion. This location chosen in view of the quality of native upland hay growing in the country.

A New Idea

Leaves Prune Fig Tree Hog Its Food By Headdown On New Island Scene

Nature has been tied to the Dashbakers who are to be interned on Pier Island and their deaths for medium ideas of dress. A fig tree has been discovered steaming amid the fennel cover of the island.

According to officials supervising the internment camp, the tree, which is the fons of Freudens nap, if they decide to abandon modern dress, supply themselves with similar garments to those favored by Adam and Eve.

Just where the fig tree came from, or who planted it, is a mystery to officials, but they claim that it is large enough to supply a generous quantity of leaves for the clothing of the new residents.

Farming Corporation

Frank J. B. Barajeau Will Carry On Family Conservation Work

Frank J. D. Barajeau, of Montreal, Annapolis Royal, N.S., and Victoria, is forming a corporation named the Barajeau Forest Foundation, to carry on the forest conservation campaign and "save the big trees" movement inaugurated by him.

He has enlisted the support of his family together with the funds which he has elected to them to finance the project, and has retired from business and divided his fortune between his family and his forestry foundation.

By this method of financing his big tree purchases nothing will be diverted from his forest conservation work, as that task may be carried on at the same time.

Oil extracted from cherry pits is now becoming commercially valuable.

Greek music, the lyre and others being much more important.

Latvia has established import quotas for wheat and cotton.

Hong Kong Buys Frozen Fish

New Departure Proving Success For British Columbia Producer

White residents of Hong Kong, China, have recently been introduced to a new fish food from British Columbia in the shape of frozen herring and they are reported to have received it with relish. Hong-speaking fish people in British Columbia, alert to find and develop new markets, have discovered that their frozen herring are welcomed in the British settlement at Hong Kong in preparing the herring for this trade the producers select first quality fish, freeze them without salt, and put them up for market in 50 pounds cases. Several shipments were made to Hong Kong during the herring fishing season just ended on the east and west coasts of Vancouver Island. For many years past British Columbia has produced here does a large business with China in dryssalted herring but the export of frozen herring to Chinese ports is a new departure The dry-salted herring shipped to China are used by the Chinese people themselves while the sales of frozen herring in Hong Kong have been made to white consumers.—St. Thomas Times-Journal.

Temperature To Order

Hamilton and Cambridge engineers are working on a plan for the control of atmospheric conditions within the Arctic circle, particularly the temperature. Humidifier will be able to prove a boiler in winter and produce a climate in his house rivalling the pleasures of the Gulf Stream. Oil and gas are other boilers in summer to bring the temperature and breeze air of the mountains and seashore to his abode.

Export rug and carpet makers in Germany now number 80,000.

London has many murder mysteries.

Chain shoe stores are being opened in Toronto.

Fewer Spinsters In The World

Number Of Women Increasing But More Enduring Marriage Made

There are fewer spinsters in the world and they are becoming fewer each year. Yet there are more women.

In Britain the marriage outlook for women is growing steadily brighter, for while 30 years ago 3,950 out of every 10,000 women in England remained single the proportion is now down to 3,686 while in Scotland there has been a similar decrease.

Fifty per cent of the women in Australia and New Zealand were unmarried in 1901 now there are 63 per cent.

Denmark has fewer spinsters also, but Japan and Italy have increase in number.

There are 350,000,000 spinsters in the world, of whom Britain has 6,500,000 the United States 11,000,000, and France 5,000,000.

America had 297 adult spinsters per 1,000 women in 1910. Ten years later there were 273, and now only 264 of them are spinsters. This despite the fact that for years more and more girls are born in comparison with boys in America.

In Germany the population was 37,700,000 in 1910 and 62,060,000 in 1925 an increase of 4,700,000.

But the number of unmarried women remained almost stationary. There are about 16,000,000 of them, and in this 15 years of growing population only increased by 30,000

In France today 64 women in 100 are not married, against 68.3 in 1925, despite the fact that the excess of women over men—the "surplus" women—has more than doubled since the war years.

There were 6,953,000 spinsters in France in 1921, and the figure fell to 4,883,000 in 1926. Married women numbered 6,689,000 in 1921, and 8,194,000 in 1926—an increase of 605,000.

These figures are of vital importance to every woman in the world—but no one seems to explain satisfactorily the paradox of more women and fewer spinsters.

There were more marriages at all ages in 1927 in England and Wales than in 1923—306,000 instead of 295,000—but there were fewer women married between the ages of 20 and 30—30,000 instead of 43,000.

In Switzerland there were slightly more marriages in 1927 than in 1926, 36,282 instead of 35,113. But the number of marriages between the ages of 20 and 30 slumped from 5,113 to 4,576.

Why have women, according to statistics, a better chance of getting married?

Because experts say marriage is entered into more lightly and that thousands of men and women who would not otherwise, because their whims have employment and are self-supporting.

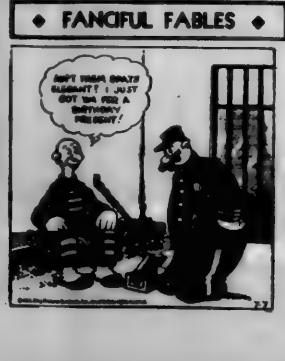
Helping Him Out

Confused Shopper: "I want a pair of spot-rimmed horsiden—I mean spore-rimmed bottlen—dash it! I mean bork-rimmed gorgles."

Polite Floor-Walker: "I know what you want sir. Mr. Brown, show the gentleman a pair of rim-spurned bottles."

Modern Romance

Down at Fort Scott, Ontario, a farmer was blowing at 5:17 pm just in a show window. "I just married $45 pounds of meat," said the farmer, "and for my check for the pounds was just 29 cents higher I could buy that suit."



If only fathers could find the inventor of unbreakable dolls for children.—Boss Hunter, Hanford.

"I have found Baby's Own Tablets the best of all children's remedies for Summer Complaint, Colic, Teething and Constipation," writes Mrs. George Walker, Thessalon, Ont. Certificate of SAFETY in each 25c package. More than 1,750,000 packages sold in 1931

Dr. Williams' BABY'S OWN TABLETS

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of "The Splendid Folly," "The Herself Of That Host," Hodder & Stoughton, Ltd., London.

CHAPTER XXV Continued

"I see. Very well I'll come to Oberhampton by the three train tomorrow afternoon" repeating his instructions carefully.

"Right That's all fixed, then."

"Quite Mind you also fix a fine day —or night, rather Goodbye"

A murmured farewell came back along the wires, and then Joan, replacing the receiver of its clip, ran off to apprise Lady Anne of the arrangements made.

"Lady Anne looked up from some village charity accounts which were puckering her smooth brow to smile approval.

"How nice, dear! Quite a charming plan you'll enjoy it. Especially as there will be nothing to amuse you here tomorrow. I have two village committees to attend I'm in a chair, so I must go. And Blaise, I know, is booked for a busy day with the estate agent, while Nick is going down to South Devon somewhere for a day's fishing. I think he goes down tonight. Really, it's quite unusually lucky that Judith should have fixed on tomorrow for her moonlight party."

CHAPTER XXVI.

Moonlight On the River

The moorland, warm with its subtle fragrance of gorse—like the scent of peaches when the sun is shining on them—teem with the faint hum of salt burns by clean winds that had swept across the Atlantic, came to Joan's nostrils crisp and sparkling as a draught of golden wine.

Before her, mile after mile lay the white road—a sword of civilization cleaving its way remorselessly across the green wilderness of mossy turf, and on either side rose the swelling hills and jagged peaks of the granite tors, melting in the far distance into a vague, formless blur of purple that might be either cloud or tor as it merged at last into the dim haze of the horizon.

"Oh, blessed, blessed Moor!" exclaimed Joan. "How I love it! You know, half the people in the world haven't the least idea what Dartmoor is like. I was outlawing to a woman about it only the other day, and she actually said, 'Oh, yes—Dartmoor, It's quite flat, I suppose, isn't it?' "Flat!"—with sweeping disgust.

Burke, his head on the wheel of the big car which was eating up the miles with the facility of a hen-conscientiously scratching rubbish, smiled at the indignant little cadi with which the speech was concluded.

"You don't like flat levels, then?" he suggested.

She shook her head.

"No, I like hills—something to look up to—to climb.

"Spiritual as well as temporal?" She was silent a moment.

"Why, yes, I think I do" His smiled sardonically.

"It's just that terrible angelic tendency of yours I complain of. It's too much for any mere material man to live up to I wish you'd step down to my low level occasionally You don't seem to be afflicted with human passions like the rest of us" he added, a note of irritation in his voice

"Indeed I am"

Joan spoke impulsively out of the depths of that inner, almost unconscious self-knowledge which lies within each one of us dormant until some lance-like question pricks it into spontaneous affirmation She had hardly heeded whither the conversation was leading, and she regretted her frank confession the instant it had left her lips.

Burke turned and looked at her with a curious speculation in his glance

"I wonder if that's true" he said considerately "If so, there's still asleep I'd give something to be the one to rouse them."

There was the familiar half-turbulent quality in his voice the sound as of something held in leash Joan sensed the danger in the atmosphere.

"You'll rouse one of them. The quite ordinary, commonplace one of bad temper, if you talk like that," she replied prosaically "You've got to play fair Geoffrey keep the spirit of the law as well as the letter."

"All's fair in love and war—as I told you before," he retorted.

"Geoffrey!—indignantly.

"Joan!" mimicking her. "Well, we won't quarrel about it now. Here we are at the journey's end Behold the carriage drive!"

The car swung round a sharp bend and Joan gasped Its nose up to a roughly-made track which served to link a species of cobbled yard, constructed at one side of the bungalow, with the high road which ran below.

The track cleaved its way, rather on the principle of a railway cutting, down through the abrupt ascline which flanked the road that side, and rising sternly between crumbling, overhanging banks, fringed with coarse grass and tufted with clinging patches of gorse and heather, debouched on to a broad plateau, where the road below was completely hidden from view; on all sides there stretched only a limitless vista of wild moorland, devoid of any sign of habitation save for the bare, crumpled walls of the bungalow itself.

As the scene unfolded, Joan became conscious of a sensation of unfamiliarity. An inexplicable impression of having seen the place on some previous occasion, of familiarity with every detail of it—even to a recognition of its peculiar atmosphere of loneliness—took possession of her. Only she knew that it was associated in her mind with something disagreeable. Even now, as at Burke's dictation, she waited in the car while he went to the bungalow door, the passing through in order to admit his guest by way of the front door, which had been secured upon the inside, she was aware of a feeling of intense repugnance.

And then, in a flash, recollection returned to her. This was the house of her dream—of the nightmare vision which had obsessed her during the hours of darkness following her first meeting with Geoffrey Burke.

There stood the solitary dwelling, set amid a wild and desolate country, and in one side of it grew that same wretched-looking, scrubby little fir tree, all of them bent in the same direction by the force of the winds that always swept across the Moor from the wide Atlantic. There Fir Bungalow! Why, the very name Sissie might have prompted her!

Her eyes fixed themselves on the green-painted door. She knew quite well what would happen next. The door would open and reveal Burke standing on the threshold. She watched it with fascinated eyes.

Presently came the sound of steps, then the grating noise of a key turning stiffly in the lock. The door was flung open and Burke strode across the threshold and came to the side of the car to help her out. Joan waited, half terrified, for his first words. Would they be the words of her dream? She felt that if he chanced to say jokingly, "Will you come into my parlour?" she should scream.

"Go straight in, will you?" said Burke. "I'll just run the car round to the garage and then we might as well get tea ready before the others come. I'm starving, aren't you?"

It spell was broken. The everyday commonplace words brought with them a rush of overpowering relief, sweeping away the dread which sense of unreality and terror, and as Joan nodded and responded gaily, "Absolutely famished," she could have laughed aloud at the ridiculous fears which had assailed her.

The inside of the bungalow was in charming contrast to the somewhat austere exterior The living-rooms, furnished very simply but with a shrewd eye to comfort, communicated with the other by means of double doors which, usually left open, obviated the cramped feeling that the comparatively small size of the rooms might otherwise have produced, while the two lattice windows which each boasted were augmented by French windows opening out on to a verandah which ran the whole length of the building.

Joan, having delightfully explored the front portion of the bungalow, joined Burke in the kitchen, guided thither by the clinking of crockery and the cheerful crackle of a fire. He wakened into fresh life by the scientific application of a pair of bellows.

"I had no idea you were such a domesticated individual," she remarked, as she watched him carefully covering the brown earthenware teapot, and he received itself into a jolly little "tete-a-tete" affair, perfect. Birthday don't smatter at all. And nowadays other women are taking their cooking lessons!"

"To keep youthful charm grand complexion beauty. A slide a-glow with the internal ing freshness of youth is always allurin'," in lovely actresses tell you. Use Lux Toilet Soap regularly as we do."

LOCAL NEWS

Mr. and Mrs. W. J. Lateur of St. Hubert Bank, accompanied by Miss C. Lateur of Smithford, are visiting their brother J. W. Lateur of Fort Saskatchewan.

Mr. and Mrs. Loshy and family are holidaying at Banff.

Mr. and Mrs. H. Thorne left Sunday by motor for Banff, where they will spend a few days.

Rev. H. J. Hodgins with Mrs. Hodgins, Ewart and Lawrence left this week on a trip to Ontario by motor.

Rev. F. Forster of Airdrie and family will occupy the parsonage during the month of August in the absence of Mr. Hodgins, and will take the services in the latters field.

Mr. and Mrs. P. Shepherd of Legal were visitors in the Fort on Thursday last.

Mr. Chas. Pinnell took Mrs. Pinnell and family to Alder Lake, where they will spend three weeks holidays.

A large number of town people attended the Edmonton Exhibition on Wednesday afternoon and evening.

Mr. and Mrs. Allan Murray left by motor on Sunday for two weeks vacation at Banff and other points of interest.

LETTER TO THE EDITOR

July 11th, 1932.

Editor Record.

In the results of the school examinations given in your issue of June 30th., my attention was especially focused at the heading chosen for the list of pupils whose grades disallowed a "pass" from Grade 4 to Grade 5.

They were branded "failures", with the qualification, "best to be omitted".

I wondered if that caption was really a bright idea, or merely a happy thought. It seems to me if it wasn't colored with animus, as the motive, it at least showed carelessness or extremely bad taste, for one who is known to be as capable a teacher as the instructor in these grades is acknowledged to be.

Three out of the five "failures" were pupils who finished grade 3 last year. Is it cause to stigmatize them as "failures" because they were not able to make two grades (3 & 4) in one term?

One of those pupils made over 50 per cent average in grade 3 the previous term, and over 95 per cent average in grade No. 1.

Resident.

BUY NOW

Speaking at a dinner tendered to a large group of Kingston, Ont., businessmen, H. E. Stephenson, of the McKim Agency, held that the audience some simple but important truths regarding the building of business, in an informative address. He pointed that the best way to sell a product was to tell the truth about it, because the public read the newspaper advertisements as a guide to their purchasing. Then he went on to give some advice to these Kingston businessmen, which is applicable to the businessmen of any community. He said:

"If you have a local newspaper, use it, even if you are located in one corner of the country and can only get value from a part of the circulation. Tell your story from time to time and you will profit by it. The newspaper is an important factor in building together a community, and to the extent that you use strengthen it you will be making the paper a stronger medium of your own and the manufacturers' advertising.

"Too many merchants endeavor to sidestep owing a newspaper advertising man or publisher for fear that they cannot be induced to pay for some advertising and too many publishers keep away from the merchants because they feel that that is the merchants attitude.

"This is absolutely wrong, as the interests of the two are so bound up with the growth or prosperity of the district that they should work together at all times.—Ex.

Plans Arranged for Parry Sound Picnic

Undaunted, the Committee in charge of the Parry Sound Basket Picnic, which has been postponed twice on account of the inclement weather, are again busy with preparations to hold it on the afternoon of the 3rd of August, and it is hoped there will be a large attendance. It is expected that Premier Brownlee will be present, and also other distinguished gentlemen, who will address the gathering.

The original program of speakers, sports etc., will be carried out, and everything possible done to make the day an enjoyable and memorable one.

The roads to Elk Island Park traverse a beautiful stretch of country, and are in excellent condition. From Edmonton to the park 44 miles, from Fort Saskatchewan 16 miles, and from Lamont to the park is 7 miles.

Mr. W. R. Pearce is chairman of the Sports committee, and interested parties should get in touch with him immediately, regarding baseball and basketball competitions, and other sports.

A half holiday will be observed in the Fort on Wednesday afternoon, the 3rd of August.

WHITE WHALES AT CHURCHILL

Come and get 'em. That's the answer to the white whale question, so far as Churchill and the Hudson Bay region is concerned. There are tens of thousands of these greater porpoises in the Churchill River, the harbor and the outer waters. Trappers take the whales without any trouble by using a home-made harpoon made out of scrap metal. They go out in a canoe with a piece of board or an empty can for a float, harpoon the animal, and leave the tin can or board attached as a mark which shows them the location of the whale when it is dead. Then they hunt it ashore and cut it up for dog food. People in these regions, however, are satisfied that something should be done to reduce the white whale population. They show that these large mammals do away with vast quantities of small fish that are of value.

MRS. EMMALINE GRIESBACH DIED AT THE COAST

Word was received here of the death of Mrs. Emmaline Marie Griesbach, mother of Major-General Hon. W. A. Griesbach, C.B., C.M.G., D. S. O., who left for the coast city some days ago on receiving word of the seriousness of her condition.

The late Mrs. Griesbach was born in Hawkesbury, Ontario, over eighty years ago, she was the daughter of the Hodgins family, an old-time Canadian family well-known in the east. She married the late Major Griesbach in Winnipeg and came with him to Fort Qu'Appelle, where General Griesbach of Edmonton was born.

The family came to Edmonton with G division of the Royal North-West Mounted Police some time in 1884, and Major Griesbach was in command of the police post at Fort Saskatchewan for many years. Following his retirement from the force he moved to Duncan, B. C., and afterwards to Chemainus, B. C. He died about ten years ago and following his death Mrs. Griesbach moved to the coast and has lived there ever since until her death on Monday morning.

General Griesbach is the only son. Another relative living in the Edmonton district is Mrs. Neil McKay of Calder, who is a niece of the late Mrs. Griesbach.

The funeral will take place from All Saints Church on Thursday, the 28th, at 2 o'clock.

Many of the old-timers in this district will remember Mrs. Griesbach.

ANNOUNCEMENT

Dr. Calhoun will be out of town from July 25th until August 8th.

How does the table read?

Josephburg News

Mr. and Mrs. George F Mohr, and Mr. and Mrs. John Mohr Jr. motored to Vegreville on Sunday and visited relatives there.

Mr. and Mrs. Fred Gabel and family of Winnipeg are visiting their aunt, Mrs. Pein. Untersuchts for several days.

A very interesting game of baseball was played between Ypres Valley and Josephburg last Thursday evening, the latter winning by a score of 6 to 4.

Mr. and Mrs. Frank Booker Sr., and Wilfred, and Mr. and Mrs. F. E. Booker Jr. motored to Meadow View on Sunday to visit Mr. and Mrs. August Dorosein, formerly of Josephburg.

May we congratulate Miss Elsa Booker who sang all last week on the Children's program at the Edmonton Exhibition grounds.

Born to Mr. and Mrs. George N. Mohr on Thursday, July 21st., a daughter.

Born to Mr. and Mrs. G. Wojtyshyn of Josephburg, a son.

Tennis Tournament Held

The Fort Community Tennis Club and the St. George Tennis Club held a friendly tennis tournament last Monday and finished the events on Thursday evening.

Some very close and interesting matches were played off, one in particular occurring in the mixed doubles between Mr. Holt and Mrs. Shaver of the St. George Club and I Hirtzen and Miss L. Mohr of the Fort Community. The match seesawed back in-forth until the St. George players took two games to win by a score of 11 to 9. This match was hotly contested in every game.

The tournament attracted a number of people and the games were played off in record time.

BASEBALL

The Fort Senior Baseball team were defeated at the hands of the Lamont nine here Monday night, by a score of 13 to 5.

The Mitchell trophy held by the Fort was at stake and now Lamont has it back home again after being held by the Fort for one short week.

The local club was in very bad form and the Lamont team had easy going throughout the game.

Fort Saskatchewan will play Lamont on their diamond next Monday evening for the cup.

Mr. Hargreaves, engineer at the Provincial Coal had a small fire in his motor Chrysler car on Sunday afternoon. No great damage was done.

Stopping the car Mr. Hargreaves put on the emergency brake and started up and drove down as far as Williamson's gate before he noticed anything wrong, by that time the floor boards were beginning to smoke. The blaze was soon extinguished by water.

"Co-Operation"

The Fort Saskatchewan Record has been requested to reprint a letter which appeared in the Community Press, Sedgwick, recently, from the pen of Mr H Gaschis of Killam. It is nearly three columns long and we find it impracticable to print it in full. However, we notice that our esteemed contemporary, the High River Times, has commended it very nicely, so with apologies to the High River Times, we clip out the summary and publish it. The subject matter is "Co-Operation."

In the correspondence column of the Sedgwick Community Press, there is carried a lengthy treatment of the Co-operative systems as operating in Alberta. In the writer's opinion only such consumer's co-operatives as are based on the Rochdale plan are sound. Among the principles of the Rochdale system are: (1) Qualification, a consumer, irrespective of occupation, race or creed; (2) One man, one vote, whether he has one or even one thousand shares; buys $1.00 or $1,000 worth annually; (3) Profits from the individual up, to decentralize control over the lives of the people and place control in the individual himself. (4) It should be allied with no political party, for where so allied a split is inevitable.

Quoting these and other principles the writer believes that Alberta Co-operatives are not based on the same principles. He asserts that (1) the U. F. A. plan restricts its services to U. F. A. members. The U. F. A. is an exclusive organization and being an occupational group, it must remain so, none but farmers may join. (2) The U. F. A. speaks of helping consumers as a whole, and then recommends help to its members. (3) There are those "untiring efforts along political lines" and economic efforts must eventually antagonize all consumers. (4) The restriction of business to one class and the opposition to organized retail trade, creates a danger politically to the U.F. A. and also the same restriction in business volumes creates a danger as a mercantile unit. (5) Possibly this unfair business competition to retailers may have had some effect in the results achieved in Red Deer and Athabasca bye-elections.

An extract from the U. F. A. organization committee report of 1932, instructs the Central Board thus:—"Central Board to lay down a definite policy governing all branches." This is absolute centralized control. Yet centralization seems to have been a Rochdale principal. The Central Board apparently aims to unify and control the U. F. A. Co-operative from the top, but the experience of the past is that there must be individual control in order that the individual may learn, through loss or gain, how his business should be managed.

"This province has numerous organizations doing co-operative business, some on the right basis, some on the wrong basis, and all these separate institutions are actually competing with each other for business—overlapping in service and creating excessive overhead costs."

The writer quotes the president Mr. Robert Gardiner, as saying: "Co-operation amongst all classes is the

(Continued on Page 6)

Eno Cleanliness Means Good Health

Water does not remove grime from your hands . . . you need soap, too. It's the same with inward cleaning . . . it takes more than a mere inward products, but they could not sell only what Ireland could not supply and were also faced with a high tariff wall which the States would not. Now England steps a 100 per cent. tax on Irish goods, accompanied by a threat stalwart from Dominion Secretary, J. H. Thomas to the effect that England would not allow a unless agreement between two members of the British Commonwealth to be treated as a scrap of paper.

Do Valera's break with England may have been a fine gesture at the Eucharist, but in making it he lost the customer who took 90 per cent. of what Ireland had to sell. The Guinness breweries at Dublin, famous for their stout, and Henry Ford plant at Cork, Ireland, will probably continue exporting to England, but this will be due largely because of the individual nature of their product.

The Free State is primarily agricultural, and England is its natural outlet. Ireland, by reason of its geographical location, cannot export as advantageously to any other country. Continental Europe and overseas countries are being treated produces both as cheaply as they can supply. Shipping to Ireland is cheaply supplied by England. Ireland is not.

It looks as though de Valera, for all his brave words, may have to do it now or eat humble pie. Just your choice.—Detroit Saturday Night.

Driven Last Spike

Ontario Premier Attends Function On Completion Of James Bay Road

Cabinet ministers, fur-traders and Indians, met at the Ontario's new Premier George S. Henry drove home the last spike in the Temiskamaga-Moosonee railway, which runs from Cochrane to James Bay. It was a golden spike, suggesting the vast mineral wealth now open to development in the North. The Premier swung his mallet forcefully and true, like the man who built the railway to tap the Yukon of the north.

The Old Of the People's Prayer also was present, and Dr. Thomas' Eclectric Oil continues to maintain its high standard of purity and its usefulness each year. Its sterling qualities have brought it to the front and today it is used by many and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

Constable Found Shot

Joseph Loughlin, a member of the police force at Regina, Saskatchewan, for the past six years, was found shot dead at his mother's home at Cavtech, Londonderry, Ireland. A coroner's jury returned a verdict of suicide. Loughlin had been spending his leave in his boyhood home and was to have returned to Canada this week.

Toothache and neuralgia are instantly relieved with Dougias' Egyptian Liniment. Safe and sure remedy. Also recommended for burns, sprains, sores and bruises.

May Alter British Uniform

Blouse tunic with wide brims, jodpurs with leather buttons and side pockets, open-necked shirts and leather boots, with probably no leggings, are features of the British soldier before long. A committee of the war office is now considering the abolition of the present heavy service dress, fitting khaki jacket and heavy trousers and puttees.

PERSONAL

SCOTTISH LADY AT PRESENT IN Canada, would like to take in charge one or more young ladies, or married couple, as paying guests, with Canadian girls. Could act as companion to lady, in any part of Canada or travel companion. Best references unobtainable both in Canada and in Britain. Would willingly give name to the suitable applicant. Address Personally Box 55, Winnipeg Newspaper Union, 190 Rothwell Ave., West, Winnipeg, Man.

Most Rounded Freighters

Opening Of St. Lawrence Waterway Will Call For Different Type Of Lake Vessels

Complete revision in design of Great Lakes freighters will take place upon the completion of the St. Lawrence waterway, shipping experts believe. News that an agreement between Canada and the United States for the waterway has been completed created considerable speculation in shipping circles.

When the waterway is finished, vessels will be able to go from the head of the lakes direct to the Atlantic ocean. And on this fact hinges the possibility of many changes in lake freighters.

The majority of the lake boats are not equipped for salt water. The long open deck of the lake boats, with its many hatches, are not regarded as practical for ocean use.

However, radical change in design of inland-water boats would be an expensive proposition. Millions of dollars worth of unloading and loading machinery has been installed at the ports, and most of it is peculiarly adapted for the open-deck type of vessel.

Custom Clearing Plant For Grain Appreciated

Farmers Near Swift Current Praise Facilities Of Federal Station

Farmers in the Swift Current district are highly appreciative of the facilities accorded them at the Federal Experimental Station in the form of a custom cleaning plant for seed grain. Last year upwards of 6,500 bushels were cleaned at a charge of 5 cents per hundred pounds of unscreened grain. A fine seed of the kind brought in by farmers contained wild oats, French weed and Russian thistle, the latter proving particularly difficult to clean from flax seed.

Persian Balm quickly relieves chapping, windburn and all roughness caused by weather conditions. Keeps the complexion clear and lovely. Completely absorbed by gentle rubbing with the hand. Delightful after shaving. Stimulates the skin. Makes it soft, smooth and flawless. Preserves and enhances natural beauty. Soothes, refreshes and invigorates. Makes hands soft and flawlessly white. Imparts that subtle charm so essential to true elegance.

Honored By Emperor

Missionary Only White Man To Hold This Chinese Degree

The only white man to hold a degree of honor from the Emperor of China is the Rev. John Darrach, O.B.E., LL.D. Dr. Darrach represented the Canadian Presbyterian Church at an undistrict sized corner in his native town of Mochervet, Scotland, and later became a missionary to China. After the Boxer rebellion, on the opening of the Hanchai University, he was chosen as the man most acquainted with Chinese history, literature, and religion. His translations are now standard works in China.

Miller's Worm Powders are a pleasant medicine for worm troubles of children, and they will take it without objection. When directions are followed they will not injure the most delicate child, as there is nothing of an injurious nature in its composition. They will speedily rid a child of worms and restore the health of a sufferer from worm trouble. Miller's Worm Powders have stood the test of half the effect, you are a recovery such does for more satisfactory.

Immense Value To Canada Of Her Wild Life Resources Stressed By Minister Of Interior

The tremendous value to Canada of her resources in wild life was stressed by Hon. Thomas G. Murphy, Minister of the Interior, in his opening address at the Provincial-Dominion Game Conference which was held recently in Ottawa. He stated that the Dominion's annual income from wild life had been estimated at $83,000,000, and that to many people, especially the Indians and Eskimos, the wild life was their only means of livelihood.

Mr. Murphy, under whose Department the administration of the Migratory Birds Convention Act comes, prefaced his remarks with an outline of the important work before the Conference He drew attention to the fact that the Act applied to insectivorous birds, which are among man's greatest friends, as well as to game birds, a point of great importance to the habits of these deserved study, as well as those of game birds, to secure information to guide them scientifically. The Act Former placement could not believe that the buffalo would in such a short time become practically extinct in their wild state, nor could residents of Canada and the United States conceive that the vast pigeon, which once flocked in countless thousands, could completely vanish from the earth.

Reports received at Ottawa in the past year indicated that even a time of crisis in regard to waterfowl The drying up of the marsh areas in Southern Alberta, which were the breeding grounds of the wild duck, had seriously decreased the supply of ducks over the greater part of Canada and the United States. This situation suggested the need of regulations and control, if ducks were not to disappear like the vast pigeon.

No better plan to protect birds had been devised than that of bird sanctuaries, in addition to the many sanctuaries scattered through the settled parts of the provinces, especially the Prairie Provinces, the Game in the Northwest Territories had been set aside as reserves in which nobody could shoot, and Quebec had recently reserved all that portion of the province north of the transcontinental railway line for the use of Indians and Eskimos in Canada 500,000 square miles of country had been so set aside.

Mr. Murphy gave a few personal observations on a desk hunter. The considerably of sportsmen was, he said, a wonderful thing. One sportsman, according to his own account, was a stranger, and the birds as they came on, but he needed no formal introduction, because he realized by the other's actions that they both had the same point of view, the same idea of fair play, and of keeping in mind the future, and the pleasure of those who might come after.

This led Mr. Murphy to discuss the question of how to preserve. The best way, in his view, was to pass on the information as to the need of conservation—to get the public with the sportsmen on the matter, for the need they would not only carry out the regulations, they would set up an even higher standard than the law, and they would frown down any violations of the Act on the part of others.

The problems of administration were not all the same in all parts of Canada. The object was to ensure cooperation. This promised, he believed, were men who would not only look at things from the administrator's standpoint but also from that of the sportsman in field. That being so he believed the Conference would be an unqualified success and would frame regulations which would further conserve wild life not only for the present time but also for future generations.

Won Cowboy Championship

Alberta Horseman Awarded Honors At Calgary Stampede

Excelling in all the arts of horsemanship, steer riding, roping and other performances for which he was famous Herman Linder, of Cardston, Alberta, was awarded the North American all round cowboy championship, at the Calgary stampede on the 11th of July, it was announced by Eddie Woods, of Emmett, Idaho

Linder also captured the Canadian all-round championship and the stampede provincial honor, both of which he held last year.

The North American bucking horse riding championship was won by Pete Knight, of Crossfield, Alberta, with his youthful namesake, Harry Knight, of Banff, taking the championship with Bello

A new recognized world record for cold roping (three ropes) was set by Bob Vroonie, of Enna, New Mexico, who roped, downed and tied his calf in 13 and 4-5 seconds, compared with the previous record of 15 and 2-5.

Timothy Hunter, of Kimberley, B.C., won the Canadian championship bareback bucking contest

More than 174,676 people visited the stampede during the week.

Mystery Station a Puzzle

New Zealanders Get Programs From Some Unknown Station

Radio fans in New Zealand have been much puzzled by a mysterious broadcasting every night, and radio officials have been unable so far to be able to locate its source. The announcer always prefaces his remarks with "Aries, aries," and at times it breaks into "Hello, hello," but it is undoubtedly the equivalent of "Hello, hello." Some nights he gives an English lesson to Japanese, and on Sunday nights he accompanies it what is presumed to be Ancestors. English and French. The programs are in English very hard to follow owing to the foreign accent. When he commences his announcing in English after speaking in Japanese he undoubtedly says "Hello, hello," but with a foreign accent. Some authorities believe it may be from the powerful station at Saipan, French Indo-China.

Canada's Wood-Pulp Production

Of all the wood-pulp produced in Canada in 1930, 4,000,000 tons of the figure lately issued by the Dominion Bureau of Statistics, in co-operation with the Forest Service, Department of the Interior, somewhat over 90 per cent. was composed of two species, namely, spruce and balsam fir, or balsam. The remainder was made up of hemlock, jack pine, and poplar, with a few less important kinds.

A SMART LITTLE KNOCKABOUT FROCK FOR SHELTER IN SHEEN OR CUTTON OR LINEN

The brief bodice in double-breasted effect makes it quite unusual And it has a generously full cut skirt with pleats to swish about

A blue and white striped print with white trim is darling as sketched.

Then there are delightful batiste prints with pink prints, plaque linen and gingham all so fascinating and suitable for this model in pale blue or pink schemes

It is made in a jiffy. And won't you be surprised at its small cost.

Style No. 587 is designed for sizes 6, 8, 10 and 12 years.

Size 8 requires 2 yards 35-inch, with ¼ yard 35-inch contrasting

Price of pattern 20 cents in stamps or coin (coin preferred.) Wrap coin carefully

Message From the Sea

Tells Of Plight Of Seamen Off Coast Of Africa, More Than Ten Years Ago

A message from the sea, purporting to tell of the plight of a seaman off the coast of Africa more than 24 years ago, was picked up recently by Austin Carty on the shore of White's Cove, Digby Neck, N. S.

It was written on a piece of ruled paper, yellowed with age, and contained in the traditional bottle.

"January 17, 1906 Accompany off the coast of Africa Have just sight, at hand after 23 days and 40 sights I have one loaf of bread and one pint of water. My strength is going fast and I don't think I will reach land.—Oscar Lawrence A.B."

"Your profession?"

"Snow sweeper."

"What do you do in the summer?"

"Pray for more and a severe winter."—Pages Union, Yverdon.

Work On Huge Waterway Plan To Commence Next Year Will Spread Over Seven Year Period

Assists British Subjects

British Columbia Woman Given Unofficial Service In Los Angeles

Down in Los Angeles where some British subjects are hoping to keep time fighting the depression and the aftermath of the real estate boom, a Canadian is doing valuable work in making their situation easier She is Mrs. Elsie MacGregor, formerly Miss Elsie Craig of Penticton, B.C.

This energetic Canadian woman is head of the British Benevolent Association which undertakes to straighten out many of the worries of stranded Britishers

This organization is a community chest agency in which the relief work of the Daughters of the British Empire and the British War Veterans is consolidated They are looking after British war veterans, straightening out pension complications, coaxing overseas relatives to see their duty and do it by these expeditions of theirs, looking after a variety of claims attending to Britishers who have violated immigration laws, and persuading His Majesty's government to buy their way home, and countless other embarrassments that beset so many of the 100,000 British in Southern California.

Mrs MacGregor was born in the Klondike, schooled in Berlin, speaks German like a native, and was therefore detailed for prison war camp work in England during the war Associated with the British Consul in Los Angeles during the Hon Geoffrey Fisher's seven years, she knows that city well. With the help of a few volunteers she takes care of all family cases.

Sausage and Grasshoppers

Said To Multiply and Thrive During Years Of Sausage Shortage

Numbers of grasshoppers thrive with the eleven-year sausage cycle. They are most numerous at sausage maximum according to investigations carried out at the Dominion Observatory, Department of the Interior, Ottawa. A record of grasshopper numbers in Manitoba, 1895-1929, published by an official of the Entomological Branch Department of Agriculture, Ottawa shows a close relationship to the sausage cycle. A sausage maximum is approaching rapidly, and grasshoppers are expected to be very numerous in the Province this year and in 1932. South Africa is suffering from a plague of locusts at the present time.

Rubber Factory In Turkey

Sweden is building the first rubber factory in Turkey, located in Istanbul. The new enterprise is organized by Gosta Gislow, head of the Swedish rubber plant at Gislaved in connection with the Swedish Co-Operative Association It will be led by Gosta Kerner, a Swedish engineer, although all workmen will be Turks.

Brazil will extend three of its government railway lines.

High railway rates are driving business to boom in Albania.

Work of Stone Age Artist

Five Statuettes Found in Russia Are Over 5,000 Years Old

Five mammoth-bone statuettes, believed to be 25,000 years old, have been discovered in a prehistoric encampment at Gagarino, in the Tambov Province, Central Russia.

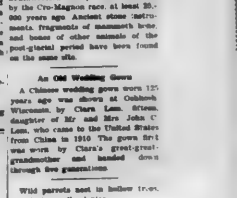
Archaeologists say that there can be no doubt that the statuettes were made by a Stone Age artist, when Southwestern Europe was inhabited by the Cro-Magnon race At least 25,000 years ago Ancient stone instruments, fragments of mammoth bone, and bones of other animals of the post-glacial period have been found on the same site.

An Old Wedding Gown

A Chinese wedding gown worn 125 years ago was shown at Oshkosh Wisconsin, by Clara Lau. Grimm, daughter of Mr and Mrs John C Lau, who came to the United States from China in 1910 The gown first was worn by Clara's great-great-grandmother and handed down through five generations

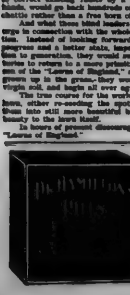
Wild parrots nest in hollow trees, usually in small colonies

The stickiness of milkweed juice is due to its rubber content.



"Mary did you find half-a-crown in the table?"

"Yes, thank you very much, sir."—Adv. for Ada, Manitoba.



Just Help Yourself

"A gentleman who stopped overnight at a family hotel in a Mid-western town in the United States, was annoyed when the electric light bulb in the room went dead. He phoned the desk about it. "Just raise your window," the clerk told him, "and answer a bath from the electric sign running down the front of the hotel. He did and got a bath from the letter "H."

WORLD HAPPENINGS BRIEFLY TOLD

In one day 4,000 people paid for admission to the Livingstone National Memorial at Blantyre, Scotland.

Lady Beatty, wife of Earl David Beatty, died in her sleep at Dingley, Leicestershire, England.

The Norwegian Government will occupy a strip of Greenland this summer despite protests by Denmark.

Two United States companies are gaining registration work on a transAtlantic route to Europe via Canada and the Arctic.

In 1931, 684 insurance were granted in Canada, or 21.5 per cent. fewer than in 1930 when they were 870, the Dominion Bureau reports.

British Columbia has made formal application to the federal government for an extension of $50,000 from relief funds to aid in a land settlement scheme.

Soviet industries increased their output 19.6 per cent. during the first six months of 1932 over the corresponding period last year, according to figures published here.

Another surprising discovery by the famous Curie family, a ray cheaper and more easily by-passed than radium by lead, is reported in "Nature," British Journal of pure science.

A small pebble flung up against the brass "voice" of a propeller caused an air board bound from Croydon, England, to Paris, with 24 passengers, to return to Croydon and transfer the passengers to another machine.

The hope that Lord Willingdon, viceroy of India, would end the impasse between the government of Premier Ramsay MacDonald and Mahatma Gandhi was expressed by George Lansbury, Labor Leader in Commons.

Interesting Facts About St. Lawrence Waterway

Completion Of Shallow Project Will Take Seven Years

Extent Both of the projected St. Lawrence development hereafter.

Cost—Between $750,000,000 and $900,000,000.

Income — Equal apportionment, with Canada being credited with $250,000,000 for existing deep canals and other navigational works.

Hydro-Power — Five million h.p. will eventually be made available. In the international section, 2,200,000; and in the Quebec section, 2,800,000. (The latter includes the Beauharnois development).

Power Distribution—The international section's development of 2,200,000 h.p. will be divided equally between Canada and the United States, Ontario will take all of Canada's share.

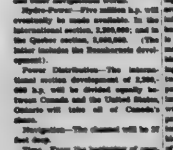
Navigation—The channel will be 30 feet deep.

Time—From the beginning of operations until the first power is delivered—seven years.

Length of the entire deep waterway—about 2,000 miles.

Some Helpful Hints

It is convenient to remember that milk removes ink spots, that cigarette ashes remove rouge left by a wet glass on furniture, that a wet handkerchief removes lint from a dress and that the blank casting away from silver jewelry.



Sweetie.

Author: "I have good news for you."

Wife: "Have you sold your novel?"

"No, but I have found a publisher to whom I have not sent it."—Yuri Zhar, Stockholm.

Contract Bridge

By Sheila B. Hatch, Carmelite Club, Toronto

Defensive Position in Contract

Defensive procedure in Contract is that part of the game which requires more experience, knowledge and practice than any other particular department. And this knowledge and experience is entirely apart from that needed in the actual defensive play of the cards.

The defensive bidder is in the position of a general in a battle in which the forces are not evenly matched and the bidder knows this fact and knows that his forces are inimical to the forces of the adversaries. And it follows that the conservative policy of defensive bidder is usually not at all advantageous, sabotage, and any other unscrupulous measure must come to hand. And this must be done with the two objectives of dissolving and intimidating the opposition, and at the same time, not destroying the power in all the systems of contract so far developed the principles behind good defensive tactics have only been hinted at upon. And the reason for this is, chiefly, because so far as defense goes, each psychic deal is an original problem in itself. It then follows that any rules or principles laid down for defense must, for these reasons, be subject to much greater variation than the principles of offensive bidding.

It may be said, after a partnership has opened the bidding, that the majority of the time, the advocates of the opening bid are temporarily in the defensive. It has been shown that on a rubber, the opening bid is made on defensive strength, and therefore immediately the opening bid is pass

When Times Were Hard

Wide Contrast Between Little Almost Forgotten Story and Present Day

Does this generation know what hard times are?

An Ontario farmer does not think so, and he has been talking something about the depression that started in 1929—20 years ago.

In Toronto, he says, they have a meal and good board to be had for $5 a week. It was a very good restaurant where you got $16 a week, and very best of living never topped $18. An expenditure of $20 a week was considered extravagant, and $25 more. The standard price for a house was $7 a month. Either wheat wasn't even dreamed of.

Things had to be cheap on the farm and they were. Listen to the old timer at Dundalk:

"Most of the people preaching about hard times don't know what hard times are. We had good times for the past 34 years and are still having them compared with the three-year depression of the middle thirties; in fact, this is a genuine prosperity compared with the lean years of '31, '32 and '33. They were cutting at $30 a ton (but nobody had any to sell); oats were 15 cents a bushel; you got 11 bags of potatoes for $1.50; cows were selling for $35 to $45 and, owing to scarcity of feed, hundreds of horses went to the knacker-yard at Toronto at $1.50 apiece.

"I remember selling a neighbor a quarter of beef for $2—but of course, nobody had $2 in those days. As to the cost of living, farmers' families lived off their farms, but the cow who stood to the heat didn't regret it.

"You could buy eggs at eight cents a dozen; plenty of pigs ready to wean were sold at 50 cents apiece; calves, two or three days old could be bought for $1.50; turkeys weighing about 10 cents and a good gobbler would bring 50 cents. At that time you could buy a low grade flour at 90 cents per bag, so, downgrade, if you took a number of bags.

"Tobs were made in those days, which would brand a man as 'soft' nowadays. He talk of giving a cow to a hired man in part payment for his wages. The cow was handed to a labourer for a part of his year's work. A neighbor sold two cows to a hired man for $70—$2,800 each. And when the men came back into their own they declared they were paying too much for that. The seller gave them back a dollar.

"This old timer had a chance and was looking for another to set up as a yoke of oxen. He made it clear he was in exchange for the following: A colt valued at $15, a colt worth 20 cents, and four bags of bonedge at $2 a bag."

All of which, if memories would have a tendency to prove that there was just now and in such a time an unbearable problem in comparison with their predecessors. But it makes one the less pessimistic for hearing the little story which is related by the Winchester Press:

"A farmer went to Ottawa married and sold four dozen fresh eggs for 60 cents and a bag of potatoes for 40 cents. He had other stuff to dispose of all commanding low prices. The point is this: The farmer was accompanied by his wife and they wanted to do a little shopping. Deciding and why they went into a department and ordered two fried eggs, with a few fried potatoes and a cup of coffee. When they reached the bill it came to more than 60 cents or just 20 cents less than they had sold their eggs for. Once again the farmer had to dig down and pay a bag of potatoes for. One might go further and point out that it cost $2.60 for a small lunch for a certain number or candy or meals to the farmer and his wife, to whom credit is due. Meals and wages in the towns and cities are not to exceed such the prices of farm products, and that is where the final adjustment will have to be made."

How The Rat Died

It's out of the question into the business office for the small glass. Small glasses in which grains trickle from one container to the other is just three centuries are being utilized by many United States business houses as to save payment of the new tax on long-distance telephone calls, says Duke that length of time.

BEAUTIFUL NEW BRIDGE SPANS THE RIVER THAMES

Our photograph shows the new Lambeth Bridge over the River Thames, in London, England, which is to be opened by the King shortly. Lambeth Palace, the home of the Archbishop of Canterbury, can be seen in the background.

Russia To Mechanize

St. Lawrence Waterway Route Expected To Help Develop Far North

The St. Lawrence waterway will greatly benefit the port of Montreal and will give employment to many thousands of people in the district, Colonel Henry Tilley, member of the Montreal Harbor Commission stated.

The presumption is that the Montreal section will be kept busy at the same time as the international section—the completion of one would be of no use without the other, and linking up with the Hawkesbury section it will make a waterway that is bound to benefit Montreal," he said.

"No one believes that ocean liners will be going through the new waterway—the elements of time and cost always govern their movements. Tramp boats will go through, but they are doing that now.—I saw one in Chicago the other day that had gone through the Welland canal. More will be doing so through, but I still believe the bulk of the cargoes will be transhipped at Montreal, into lake boats. Ocean navigation will stop at Montreal, as ever, and if the country is going to benefit the rest of Canada, Montreal must benefit as well. If you make a business centre more accessible by putting improvements in the waterway within reach more traffic may go through it is bound to bring more business to the centre, and,

"Russia has been a demand for an outlet from the west, and if we do not take advantage of that we have not the slightest right to complain of the future."

Hobbs Leading Problem

Canada Doing Well Than Year In Building Reports

Canada had a commanding position in British imports of a number of commodities during the first five months of 1938, according to a Department of Commerce return. Canada led in British imports of bacon, patent leather, canned salmon, lobsters, copper, ore, crude zinc and nickel.

Canada runs well up in British imports in many other commodities. She ranked second to Argentina in wheat; second to Russia in barley, to Argentina in oats, to Australia in wheat-flour, to United States in hams, to Irish Free State in beef cattle and to Australia in lard.

British imports of beaver from Canada have shown almost level with those of the Irish Free State due to an import in May almost 33 times that of May, 1937.

Over Thousand Auto Fatalities Last Year

Motorists Mind Greatest Murder With Quebec Record

One thousand three hundred and two persons were killed in motor vehicle accidents during the spring 1938, according to preliminary figures compiled by the Dominion Bureau of Statistics. This is an increase of 12 over 1937, and was also greater than the 1936 figure of 688. The figure for 1937 gives a proportion of 12.4 deaths per 100,000 population.

Ontario, with the largest population, was next deaths in 1937, and Quebec, 288, increased from the 1937 figure of 217 and 188. All other provinces with the exception of Manitoba showed decreases in the past year, though the difference in the Saskatchewan and British Columbia was only one death each.

About Sound Waves

37 Only Quarter Inch Long Sound In Record

When we throw a stone into a calm pond we notice that waves run out across the pond from the point where the stone entered, and that the crests of the waves are a regular distance apart. The distance from the crest of one wave to the crest of the others is the length of the wave. So it is with sound waves. When a bell vibrates it causes waves in the air, which beat against the drum of the ear, and produce in our consciousness the sensation we call sound. These air waves, which produce sound, are called sound waves, and their length—as in the case of water waves—is the distance from the crest of one wave to the crest of the adjoining wave. The shorter the wave the higher is the pitch of the sound, but when the wave becomes shorter than a quarter of an inch, its sound is no longer audible to the human ear.

Just Around the Corner

Dishonor Bound — Not Time Much To Wasteful Residents

"I hope you have a good constable."

"Same to you."

"Say, by the way, the feeble are on your part of the lake. They should be just around the corner from your place. You should look in for them during the summer. They'd love to see you."

"What do you mean by around the corner? I'll never forget the summer a girl told me to look in on her, that she was just around the corner from a certain hotel. I stuck around the branch at the wharf and asked directions, when to my conversation, the girl, the point of the matter, finally said, 'Look, you've not going to walk, are you? It is eight miles!'"

Peace Has Its Heroes

Gallantry and Courage Of Flying Service In Noted

Although still young in point of years, the flying service already has its traditions of gallantry and courage. Two recent incidents bring this to the fore again. One was the regrettable crashing in Tibet Lady Chetwynd-Talbot and her companion, Miss Ada M. Norris and Mary Taylor, while they were crossing on the aerial route over the Great Rose Lake country. Chetwynd-Talbot succeeded two days in making his way to safety, but Miss Norris was left behind, by taking his place over enemy lines. Since the War he had performed prodigies of valor in snapping out aerial routes through the Arctic wastes. The measures of his value to Canada and flying can hardly be estimated. Probably the finest compliment that could be paid his memory is to say that he died at the controls.

The other incident, one of many that has given flying its high repute, is the case of an American who kept his disabled plane in the air above Van Cortland Park, New York, because to land might have entailed death and injuries to the hundreds of children playing in the park. Sir Sherman von Lieutenant Alfred Williams, formerly of the United States navy. His gas pipe had broken and there was imminent danger of an explosion. Despite that, he kept his plane circling crazily. Finally he had brought a passenger attached to a screwdriver and police had cleared the field for his landing. Fortunately the landing was successful. All the risk of his own life he probably saved scores of children from injury or worse.

Making Tunnels Safe

Thousands Machine" Detects Obstructions and Flaws

Tunnels are of varying heights and widths, but all of them come within the scope of the standard gauge of railroads, which is 4 feet 8½ inches. Tunnels range from 13ft. to 15ft. 6in. in height and from 9ft. to 30ft. 3in. in width. It is the business of the "Hodgdon" train, or Trumpbell Measuring Car, to see that tunnels are kept free of any obstacle which would jeopardize the safety of trains passing through them.

The "Hodgdon Machine" is a custom building vehicle with spikes radiating in all directions. These spikes are connected electrically with the interior of the vehicle, so that should any obstruction be met with in passing through the tunnel the circuit would be broken. This vehicle also ensures that the measuring clearance is observed. Should the vehicle strike the roof of the tunnel, the "Hodgdon" train by means of protruding plates fixed to a frame and also electrically connected with the interior of the car.

Canadians Are Fond Of Proposed Canals

Commerce Nearly Six Billion Dollars Worth Passing 1938

Canada are very fond of proposed transportation canals, according to most recent statistics consisting of nearly $6,000,000 worth of such proposals carried in 1938. This was in addition to huge expenditures of old-fashioned portage made out of railroad and railroad cars. Imports of Canada in 1938 amounted to nearly two and half million dollars while exports were valued at nearest exporter of a million dollars.

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of
"The Splendid Gesture," "The Herald Holder & Dumpleton, Ltd., London.

CHAPTER XXVI (Continued.

"So, much he deserves already. "It is evil my lot."

A look of concern spread itself over Jess's face.

"I think we ought to get the car out again and go and see if anything has happened," she said decisively. "They may have had a spill. Were they running by motor?"

"No. Judy drove down to Newton Abbott in the dog-cart, and the Redfords proposed hiring some sort of conveyance from a livery stable."

"Well, I expect they've had a smash of some kind. I'm sure we ought to go and find out! Was Judy driving that excitable chestnut of yours?"

He shook his head.

"No a perfectly well-conducted pony, as much as Moses. We'll give them a quarter of an hour more. If they don't show up by then, I'll run the car out and we'll investigate."

The minutes crawled by on leaden feet. Jess felt restless and uneasy and more than a trifle astonished that Burke should manifest so little anxiety concerning his sister's whereabouts. Then, just before the quarter of an hour was up, there came the shrill thrills of a bicycle bell, and a boy cycled up to the gate and, springing off his machine, advanced up the colonial path with a telegram in his hand.

Jess's face blanched, and she waited in tast suspense while Burke ripped open the ominous orange-colored envelope.

"What is it?" she asked nervously. "Have they — is it bad news?"

There was a pause before Burke answered. Then he handed the flimsy sheet to her, remarking shortly:

"Read for yourself."

Jess's eyes flew along the brief message.

"Returning homeward. Am staying the night with Redfords. Judy."

Her face fell.

"How horribly disappointing!" Her glance faltered regretfully to the fallen face of the moon shining like a pallid ghost of itself in a sky still luminous with the afternoon sunlight. "I don't see why we couldn't have lit night after all!" she continued. "I wonder what has happened to make them change their plans?"

Burke volunteered no suggestion but stood staring moodily at the swiftly receding figure of the telegraph boy.

"Well, I guess I'd better get out the car," he answered. "I suppose it's the only thing to be done."

He moved off in the direction of the garage, Jess wishing rather dismally that he looked less relieved.

"I am disappointed!" she declared. "I just hate the sight of a telegram boy! They always spoil things. I rather wonder you got your telegrams delivered at this outlandish spot," she added meaningly.

"Oh, of course we have to pay subsidy. There's no free delivery to the back o' beyond!"

As he spoke, Burke vanished into the semi-dusk of the garage, and presently Jess heard sounds suggestive of ineffectual attempts to start the engine, accompanied by a mutter of curses or two. A few minutes later Burke reappeared, looking rather hot and dusty and with a black smear of oil across his cheek.

"You'd better go back to the bungalow," he said gruffly. "There's something gone wrong with the works, and it will take me a few minutes to put matters right."

Jess nodded sympathetically and retreated towards the house, leaving [illegible] it was growing chilly the "cool of the evening" manifest itself early up in Dartmoor — and she was not at all eager to find herself indoors. The wind had dropped, but a curious, still sort of coldness seemed to be permeating the atmosphere, faintly moist, and as Jess stood at the window, gazing out half absently, she suddenly noticed that the moon had disappeared behind the low-lying ground towards the right of the bungalow. Her eyes narrowed abruptly as she became aware of her. The valleys between the distant tors were hardly visible. They had become mere beaten cupping was rapidly overflowing with vapour, even as she watched them crept higher, inch by inch, as though rebounding to some impulse of a rising tide.

Jess had lived long enough in Devonshire by this time to know the risks of fog — caught in a mist on Dartmoor, and she sped out of the room, hastening to get to the garage whence were Burke but he must hurry his task her on the threshold of the bungalow, and she turned back with him into the room she had just quitted.

"Are you ready?" she asked eagerly. "There's a regular moor mist coming on. The sooner we start the better."

He looked at her oddly. He was rather pale and his eyes were curiously bright.

"The car won't budge," he said. "I've been tinkering at her all this time to no purpose."

Jess stared at him, a vague apprehension of disagreeable possibilities presenting itself to her mind. They were predicaments to an extraordinary extent, and if the car remained re-

"Won't budge?" she repeated. "But you can't — we can't stay here! What's gone wrong with it?"

Burke banished out into a string of technicalities which left Jess with a confused feeling that the mechanism of a car must be an inventions of the devil designed expressly for the chastening of human nature, but from which she succeeded in gathering the bare relation fact that something had gone radically wrong with the car's running powers.

His apprehension quickened.

"Maybe the best of a bad job—and remain each 'Nine,' he suggested lightly.

Jess frowned a little. It did not seem to her quite the moment for jesting.

"Don't be ridiculous, Geoffrey," she said sharply. "We've got to get back somehow. What can you do?"

"I can't do anything more than I've done. Unless we are said here we've got to stay."

"You know that's impossible," she said in a quick, low voice.

He looked at her with a sudden devil-may-care glint in his eyes.

"You never can tell before hand whether things are impossible or not. I know I used to think that heaven on earth was impossible," he said slowly. "But we are here now. We drew a step nearer her. "Would you mind so dreadfully if we had to stay here. Bits kiss Prunes-and-Prisms?"

Jess started at him in astonishment, in amazement which slowly turned to nervousness horror as a sudden almost unbelievable idea flashed into her mind. Instead into being by the [illegible] half-confident note in his tones.

"Geoffrey——" Her lips moved stiffly and, even to herself, her voice sounded strange and hoarse. "Geoffrey, I don't believe there is anything wrong with the car at all. . . . Or if there is, you've tampered with it on purpose. . . . You've said going straight with me——"

She broke off, her startled gaze searching his face as though she would wring the truth from him. Her eyes were very wide and dilated, but back of the anger that blazed in them lurked fear—dark fear.

For a moment Burke was silent. Then he spoke, with a quiet deliberateness that held something ominous, memorable, in its very calm.

"You're right," he said slowly. "I'm not going straight with you. But I'll be frank with you now. The whole thing — [illegible] to come up here today, the moonlight expedition for tonight everything — was all fixed up, planned solely to get you here. The car won't run for the simple reason that I've put it out of action. It wasn't quite sure whether or no you could drive a car, you see?"

"I can't," said Jess. Her voice was quite unpronounced.

No? So much the better, then. But I wasn't going to leave any such a hitch in the cards by which I had to pass."

"By which you hold me?" she repeated dully. She felt stunned, incapable of protest, only able to repeat, parrot-like, the words he had just used.

"Yes. Don't you understand the position? It's clear enough, I should think!" He laughed a little recklessly. "Either you promise to marry me, in which case I'll take you home at once —"

The car's not damaged beyond repair—or you stay here, here at the bungalow with me, until tomorrow morning."

With a sharp cry she retreated from him, a sudden fear in her eyes.

"You—no! Not that!" The poignancy of that caught-back cry wrenched the words from his lips in hurrying, vehement self-disclaimer. "You'll be perfectly safe—as safe as though you were my sister. Don't look like that. I'm not a blackguard, even when driven desperate! You must imagine that I would hurt you by whom I worship—my little white love?" The words rushed out in a torrent, hoarse with passion and [illegible] "Jess, Jess, my darling!"

"Before God, no! You'll be utterly safe, Jess, sweetest, beloved—I swear it! You shall not even suspect that you're there as the guest of honour in the whole world could hold you." He was silent a moment; then, as the tension in her face gradually relaxed, he went on: "But the world won't know that—the note of tenderness was gone now, swept away by the resurgence of his passion. "Jess, you will be mine, mine irrevocably, irrevocably true. The heavy glamour which had fallen seemed suddenly filled with the dream-Burke's voice—insisting and [illegible]

". . . . . you'll be stamped with the mark of the beast for ever. It's too late to try and run away. . . . . It's too late."

CHAPTER XXVII

Into the Mist

"Then that telegram—that tale grams fresh Judy—I suppose that was all part of the plan?"

Jess felt the futility of the question even while she asked it. The answer was inevitable.

"Yes"—briefly. "I knew that Judy meant staying the night with her friends before she went away. I sent the wire—because I rather her back."

"Judy did that?"

[illegible] was made an [illegible] anguish of reproach in the low, quick-spoken whisper that Burke felt glad Judith was not there to hear it. Had it been otherwise, she might have regretted the share she had taken in the proceedings, small as it had been. She was not a man, half-crazed by love, in whom passion-blurred vision nothing counted save the winning of the one woman, nor had she known Burke's plan in its entirety.

"Yes, Judy sent the wire," he said. "But give her so much credit, she didn't know that I intended this. She only knew that I wanted another chance of seeing you alone—of asking you to be my w.ife. and I had her that you wouldn't come up to the bungalow unless you believed she would be there too. I didn't think you'd trust yourself alone with me again—after that afternoon at the inn"—with blunt candour.

"No, I shouldn't have done."

So you see I had to think of something come way. And it was you yourself who suggested this method."

"I—incredulously.

"Yes. Don't you remember what you told me that day I drove you back from Dartmoor?—'A woman's happiness depends upon her reputation.' She looked at him quickly, recalling the scattered details of that afternoon Geoffrey's gibes at what he believed to be her fear of gossiping tongues and her own answer to his taunts: "No woman can afford to ignore completely the opinion of others in life over thoughts.

The remembrance of it all was like a torchlight flashed into a dark place, illuminating what had been hidden and inscrutable. She spoke swiftly.

"And it was then—that afternoon—you thought of this?"

He bent his head.

"Yes," he acknowledged.

Jess was silent. It was all clear now—penetratingly so.

"And the Redfords? Are there any Redfords?" she asked directly.

She scarcely knew what prompted her to put so purposeless and unimportant a question. Actually, she felt no interest at all in the answer. It could not make the least difference to her present circumstances.

Perhaps it was a little the feeling that this trumpery process of question and answer served to postpone the inevitable moment when she must face the situation in which she found herself—face it in its simple crudeness, denuded of unessential clay and [illegible]

She looked at him with a slow, measured glance of bitter contempt.

"Even a turbulent opposition might be preferable to marriage with you—more endurable," she added, with the sudden tormented impulse of a trapped thing to hurt back.

"You don't really believe that" — impetuously—"I know—I know I could make you happy! You'd be the one woman in the world to me. And I don't think"—more quietly—"that you could endure a starved name, Jess."

She made no answer. Every word he spoke only made it more clear to her that she was caught in a trap from and fast in a web from which there was no escape. Yet, little as Burke guessed it, the sardonic humour of "what people might say" did not trouble her to any great extent. She was too much her father's own daughter to permit a mere question of reputation to force her into a distasteful marriage.

Not that she minimised the value of good repute. She was perfectly aware that if she refused to marry Burke, and he carried out his threat of detaining her at the bungalow until the following morning, she would have a heavy penalty to pay—the utmost penalty which a conventional world exacts from a woman, even though she may be essentially innocent, in whose past there lurks a questionable episode.

"Suffered A Severe Attack Of Dysentery

Mr. P. L. D. Maillet, Verner, B.C., writes:—"Last Summer I suffered from a severe attack of dysentery. I tried nearly everything on the market, without getting any relief, until a friend told me to use Dr. Fowler's Extract of Wild Strawberry, which I did, and I got immediate relief. Now I am making it a rule to always keep a bottle of it in my medicine chest.

"Wild Strawberry is now called for dysentery, colic and diarrhoea, but I always use it for the genuine "Dr. Fowler's."

FORT SASKATCHEWAN RECORD
Published Every Wednesday E. Hoole, Editor and Publisher
WEDNESDAY, JULY 27th, 1932

Mr. Geo. Cranston announces that a change in adults prices will take effect this week at the Empress Theatre. Adults tickets will be 20 cents and 2 cents tax, making a total of 22 cents in all. Children's tickets remain the same price. This is quite a saving on two adults, you save 16 cents and that's half the price of another show.

This week a mystery talking drama will be shown and the usual high class talking comedies.

Family Reunited After 35 Years

Members of Alton Family Will Meet At Picnic Wednesday

For the first time in 35 years, 10 members of the Alton family, all brothers and sisters, are to hold a reunion at Elk Island park on Wednesday. They are to assemble at this time for the get-together of Furry Bound oddimore, whose picnic had to be postponed twice on account of rains making roads impassable for motor traffic.

The Alton are expected to attend are: James H. Alton, of this city; W. G. Alton, of Craigmyle; John Alton, of Edmonton; Joseph Alton, of Lamont; Daniel Alton, of Vancouver; Mrs. H. Phillips, a sister, of Lamont; Thomas Alton, of Parsons, B.C.; Mrs. J. Cunningham, a sister, of Alberta, Ont., Robert Alton, of Kitscoty, Alberta, and Mrs. R. Petrie, a sister, of East Clover Bar.

D. Alton, is well-known in Edmonton where he was for several years superintendent of the streets department, has arrived from Vancouver to attend the reunion.

School Board To Hold Special Meeting Friday

Minutes of a regular meeting of the Fort Saskatchewan School Board, held in the Town Hall on Monday, 1st. August, 1932 at 7:30 p.m.

Present:—Mr. F. Atkinson, Chairman, Trustees—Mr. R. Todd, and Mr. R. A. Brown.

The minutes of the last meeting held on July 6th were read and adopted on motion of Mr. Todd.

The applications for position of caretaker were opened and considered. It was decided to meet with the applications at a special meeting to be held on the 8th. Instant.

The resignation of Miss Stevenson as teacher was received and accepted on the motion of Mr. Brown. As several applications for the position were on hand, it was decided that the matter of filling the vacancy created by Miss Stevenson resigning, would be dealt with at the special meeting on the 8th. Instant.

Mr. Todd's motion regarding High School pupils will also be taken up at the special meeting.

The following accounts were passed for payment on the motion of Mr. Todd. C. A. Brown, carpenter and other work $43.60; Calgary Power Co., $1.50; F. W. Smith, Disinfectants $4.35; Imperial Oil, polish for floors $6.20; The Record, advertising for caretaker $1.50.

The meeting adjourned on motion of Mr. Brown.

PREMIER BROWNLEE SPEAKS AT SPRUCE GROVE

The ratepayers of Spruce Grove held a meeting at Winterburn last Thursday when they heard Premier Brownlee and Hon. R. G. Reid, minister of municipal affairs discuss the new plan of For larger Municipal Units.

At the meeting the ratepayers strongly objected to the scheme, as the question of what adjustment would be made as some municipal districts have a considerable debt. The Premier stated that the departmental officials would determine a fair basis of equalization. It was suggested that districts that were in debt, that a special tax be imposed.

The plan might work out alright, but a municipal district that was holding their own would sure hate to merge with other municipal districts that are in debt. Also by imposing a special tax, is that going to bring them out of debt. If the district now can't collect enough in taxes to keep them out of debt, how can they collect enough of the special tax to make it worth while for the district that is all clear.

Councillor Ed. LeHeix Dies Here Friday Last

* * * * *

Councillor E. P. LeHeix, a resident of Fort Saskatchewan for many years, died here Friday afternoon, July 29, at the age of 68 years, after a long illness. He was elected to the Town Council in 1926, and again last February.

The deceased was with the Imperial Oil Company for over 30 years, and was a Past Master of the Fort Lodge of A.F. & A.M. He is survived by his wife, one son Milton, of Fort Saskatchewan; his mother, Mrs. D. T LeHeix of Montreal, Que.; four brothers, Phillip, George, Stanley and Walter, all of Montreal; one sister, Mrs. Stanley Rodmer of Montreal, and one cousin, Mrs. Walter Perren of Edmonton. The service was held on Tuesday afternoon at 2:30 o'clock at the Fort Saskatchewan United Church. Rev. Mr. Wright of Morinville officiated and interment took place in the Fort Saskatchewan cemetery. Victoria Lodge, No. 18, A.F. & A.M., conducted a Masonic service at the graveside.

The pall-bearers were:— Dr. R. D. Mason, T. W. Lane, W. A. Graham, C. R. W. Magay, Wm. McAdie, and Jas. Biddle.

Howard and McBride funeral directors.

BASEBALL

The Lamont baseball team Friday night brought home the bacon from the Cup from the Tofield team when they defeated them by a score of 12 to 4.

This cup originated in 1919 and never before has been held by the Lamont team. J. E. Harkins, manager of the Lamont team had the team playing good ball on Friday.

The Lamont baseball team are now the holders of two cups, the McCallum cup and the Minshall cup won from the Fort last week.

Mr. Hopper—"But I didn't intend to be. He talked to me like my wife does, and I forgot myself and answered, 'Yes, my dear.'"

Preferential Tariff For Canadian Wheat Favored by Murray

James R. Murray, General Manager of The Alberta Pacific Grain Company, Limited, has issued the following statement favoring preferential tariffs on wheat from the Dominions entering the Motherland.

"It is ridiculous to suggest, as from despatches from Ottawa during the past few days indicate, that the entire Grain Trade of Canada and grain growers of the West consider that a preferential tariff in favor of Canadian Wheat in the British market would be of no advantage to Canada. Confidential briefs, indicating such a view, may have been submitted to the Dominion Government by the authorized spokesmen of various bodies, but it is absurd to assume there is no contrary opinion among those they purport to represent. The official representations made by Grain Trade organizations are not the views of all grain dealers any more than the Wheat Pools and Provincial Governments express the views of all farmers in the West.

"Almost everyone can agree that a quota system would be cumbersome and useless, but a preferential tariff is a different matter. Personally, I believe the free entry of Canadian wheat into the British market, by far the biggest wheat importing market in the World, with a duty against foreign wheat, would be a distinct advantage in marketing our Canadian crop and over a period of years would assist in obtaining better prices for our Western grain growers. Considering the almost prohibitive tariffs against all wheat imports now in effect in all European countries, I believe there is much to be gained and nothing lost by such a preference.

"It seems to me unfair and unpatriotic at this time, when wheat growers in Western Canada need all the assistance and encouragement they can get that spokesmen, who at best supposedly represent less than half of the farmers in the West should take the position that a preferential tariff in favor of our wheat in the British market is a matter of supreme indifference to them. Whatever the views of our Western farmers may have been on the matter fifteen or twenty years ago, I do not believe they are today indifferent to the advantages that accrue to them from such a preference. I believe that if the Dominion Government can, in exchange for tariff concessions on British manufactures entering Canada, secure a preferential tariff in favor of Canadian wheat entering the British market, they will accomplish something of great benefit to the whole of Canada and will earn the thanks of the majority of farmers and business men in Western Canada.

Safe Cars And Reckless Drivers

Between six and seven o'clock on Tuesday morning is the safest hour in the week to ride in an automobile. The most dangerous hour is between five and six o'clock on Sunday afternoon. Automobile accidents happen most frequently in broad daylight, on clear days, when roads are dry. If the driver of the car is between 20 and 30 years old, the chances of an accident taking place are 81 per cent. greater than if he is between 40 and 50.

These are some surprising and little known facts about automobile accidents brought out by an analysis recently completed by United States insurance statisticians. They relate, of course, to that country, but inasmuch as conditions in Canada and the United States are so similar in so many respects it is possible that we would not be far astray if, in the absence of detailed information relating to Canada, these figures were applied to this Dominion as well.

What are the causes behind the rapidly increasing hazards of motoring?

In 42 out of 100 accidents, the cause can be traced directly to an error made either by a driver or a pedestrian. Only once in 20 times is the machine definitely at fault. The commonest mistakes made by a driver, leading to a fatality, are driving off the roadway, exceeding the speed limit for the time and place, and going ahead without having the right of way. Other important factors in accidents caused by drivers are: Reckless driving, driving on the wrong side of the road, skidding, cutting in, passing on a curve or hill, and failing to signal properly. Left turns are far to more dangerous than right turns.

The "weaving driver," "the speeder," and the "road hog" are the three types of motorists who cause most highway accidents. Among pedestrians, those who cross the street in the middle of the block, walk in the direction of traffic on country roads, or step out into the street from behind parked cars are responsible for a majority of accidents in which these on foot are struck by passing autos.

In only 56,330 cases, out of 1,351,400 accidents studied, were the crashes due to mechanical failure. When the cars were at fault, defective brakes led the list as a cause. In the order named, other defects contributed to the accident toll: lack of chains on slippery roads, blowouts and punctures, one or both headlights out, defective steering gear, glaring headlights, taillights out or obstructed.

If you ask most people under what road conditions a majority of auto accidents occur, you will probably be told: "Icy roads" or "wet streets." As a matter of fact, the insurance company experts found that only three per cent. of the 1351 accidents occurred on icy surfaces and less than 16 per cent. on wet surfaces. In 81 per cent. of all mishaps, the roads were dry Also, 60 out of every 100 accidents resulting in death occurred under clear weather conditions. And most accidents happened in daylight.

When a motorist starts on a ride, if he meets with an accident, the chances that it will occur before he gets out of the driveway are one to 208. The chances of its occurring on a railroad crossing are slightly greater; of its happening on a bridge, one to 103; of its taking place on a curve, one to 35; on a state highway, one to five, and at a street crossing, one to two and a half.

What kind of drivers are most frequently in accidents: Young or old, experienced or inexperienced? Figures compiled in the survey upset some popular beliefs. For instance, they show that more than 51 per cent. of all drivers involved in accidents which resulted in fatalities or injuries were experienced motorists with a year or more practice at the wheel. Over-confidence is given as a major reason for the high percentage of experienced motorists who figured in mishaps.

So far as age is concerned, the most hazardous time for automobile driving is under 20. The accident record of drivers under this age, last year, was 20 per cent. worse than the average. The record of those between 20 and 30 was 29 per cent. worse than the average; between 30 and 40, three per cent. better than the average; between 40 and 50, 20 per cent. better; and beyond 50, 36 per cent. better.

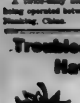
While it is still a disputed point whether the increasing average speed of automobiles and the lifting of the speed limit in certain cities have caused more accidents, the investigation shows undeniably that the stepping up of speeds has increased the seriousness of accidents when they have occurred. Incidentally, the researches just made by the Chicago Safety Club reveal that travelling a mile a minute is three times as expensive as motoring 35 miles an hour. The extra 15 miles an hour trebles the upkeep costs of the car.

With such facts in mind as have been established by this survey, motor car drivers should govern themselves accordingly, and by so doing they may save themselves much sorrow. First, check over your car for defects which it has been shown are the chief causes of accidents resulting from mechanical weaknesses. Then note the principal causes of accidents due to the driver himself, where and when they are most likely to take place, and the steps that should be taken to prevent them taking place. If an accident takes place, the responsibility is, first and foremost, your own; secondly, the driver of the other car; thirdly, the condition of your own car; fourthly, the condition of the other fellow's car. Therefore, it is up to you to prevent an accident.

A twice-daily aeroplane service is being operated between Shanghai and Nanking, China.

The word "pianoforte" is a contraction of two Italian words meaning soft and loud.

Troubled With Her Children Having Summer Complaint



Mrs. L. S. Montgomery, Ass. St. South, Sudbury, Ont., writes:—"I am the mother of two children and have a great deal of trouble with them having summer complaint, in fact, several times every Summer they were not expected to recover.

"I have found Dr. Fowler's Extract of Wild Strawberry to be the most effective remedy and keep it always handy and give it immediately on the first sign of any bowel complaint.

"Thanks to Dr. Fowler's I no longer dread the Summer months."

Unusual Guest Of Honor

Skeleton Made London University Master Creepy Affair

A man who died a century ago was the guest of honor at a dinner given at University College, London, England.

He was Jeremy Bentham, great philosopher and lawyer, who was one of the founders of the college.

He wore the same clothes as he did a century ago, and hobbed on with last approval at the 20 distinguished professors, economists, philosophers and lawyers who toasted him.

The eerie dinner was given in celebration of the hundredth anniversary of his death. In his will he had expressed the hope that his disciples gathered together to discuss his great work, would have his skeleton in their midst.

For years the skeleton has sat on a chair in a glass case, dressed in his own clothes, with the skull at his feet, and a wax effigy of his face in its proper place.

The distinguished gathering drank to his health, and then proceeded to discuss his ideas which have become a part of our legal and moral standards.

It was Jeremy Bentham who said, "The greatest happiness for the greatest numbers."

Seek Pirate Gold

Americans Salvage Experts Hope To Locate Treasure Off Bahamian Cayes

Pirate gold and other treasure said to have been looted from two Spanish galleons, is believed to be worth $40,000,000 in the prize for which New York and Baltimore salvage experts are making a search.

Despite previous attempts which failed, the modern fortune hunters, equipped with a diving bell and other apparatus, hope to locate the Hog-fish brig "Defender," which sank off the Delaware Capes in 1776.

Lightships Modernized

Many Powerful Shorland Lights Guide Mariners On Atlantic

The virtual completion of the modernization of the seventeen outside lightships on the Atlantic coast, whereby all were given more powerful shorland lights to guide the feet of mariners, has been announced by the lighthouse service of the Department of Commerce. The progress of modernization increases is terminated by the announcement that Charleston, S.C., lightship is to have a light of 14,000.

Miller's Worm Powders are a prompt relief from the attacks of worms in children. They are powerful in their action and while leaving nothing to be desired as a worm expellant, have an invigorating effect upon the youthful system, removing fever, biliousness, loss of appetite, restlessness, pallor and other similar bad fellow disorders caused by worms in the stomach and bowels.

Helped Himself By Ghost

A touching friendship between Yorkshire March. 6 ft. 2 in., Scottish giant, and Andre Suchanhoff, a midget, ended in tragedy when the midget, rising from his baby bicycle, collided with a motor van in London, England, and died of injuries. March, a professional strong man and circus performer, died at the hospital when told that the midget had died.

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Exterminator has proved a boon to suffering children everywhere. It seldom fails.

The British royal research ship, "William Scoresby," has returned to England following an expedition to study the Humboldt current and the submarine plateau near the Falkland Islands.

A new process has been patented to make the basic ester of Portland cement but instead of gypsy.

Appointed Acting President For C.N.R.

S. J. Hungerford, One Of Canada's Best Known Railroad Operating Officers

With the resignation of Sir Henry Thornton as Chairman and President of the Canadian National Railways effective August 1, Mr. Hungerford, Operating Vice-President, has been appointed by the Board of Directors as Acting President of the Company.

Samuel J. Hungerford is one of Canada's best known railroad operating officers. His experience has ranged, in more than 45 years, from the humble position of machinist's apprentice, where he commenced in 1886, to that of Vice-President in charge of Operation, Maintenance and Construction of Canada's largest railroad system, the Canadian National Railways.

Born in Bedford, Que., sixty years ago, J. J. Hungerford entered railroading as an apprentice with the Southeastern Railroad, later part of the C.P.R., at Farnham, Que. Completing his apprenticeship he worked as machinist at many points in Quebec, Ontario, and Vermont, and in 1894 was appointed Chairman of Windsor Street Station, Montreal. From 1897 Mr. Hungerford worked as roundhouse foreman at Farnham, master mechanic at Farnham, Megantic and McAdam Junction, and in 1901 was transferred to Cranbrook, B.C., as locomotive foreman with the Canadian Pacific From Cranbrook, he moved in 1903 to Calgary as master mechanic of the Canadian Pacific's western division, and in the following year was made superintendent of the locomotive shops at Winnipeg, becoming in 1906 superintendent of shops.

In 1913, Mr. Hungerford joined the Canadian Northern Railway, as superintendent of rolling stock with headquarters at Winnipeg and in 1915 he moved to Toronto in the same position. In 1917 Mr. Hungerford became general manager of the Eastern Lines, Canadian Northern Railway, and in the following year was named Assistant Vice-President, Operating, Maintenance and Construction Departments of the Canadian National Railways with headquarters at Toronto. With the taking over of the Grand Trunk Pacific lines, Mr. Hungerford, in October, 1923, became Vice-President in charge of Operating and Maintenance Departments of the Canadian National and Grand Trunk Pacific Railways and two years later, in October, 1923, he was made Vice-President and General Manager of these lines, with headquarters at Toronto, in which position he continued until his appointment, in February, 1933, as Vice-President in charge of Operation, Maintenance and Construction of the Canadian National System, with headquarters at Montreal.

Railroading conditions have altered greatly since the days when S. J. Hungerford commenced service as an engineman at Farnham in 1886. Then, woodburning locomotives were still in use; cars were coupled by the old "links and pins" and airbrakes were unknown. Hours of work were long and pay was small, and apprentice training systems were not brought to the stage where they are today when every effort is made to educate and encourage the boys to learn while they earn and fit themselves for better jobs.

Locomotives of 1886 were pygmies as compared with the 4360, 6167 and the 6700 classes of engines used today, on the Canadian National System, and the trains they hauled were mere boys compared with the huge freight hauls and six-foot passenger trains which are now operated. Practices in handling locomotives at shops and on the road have undergone many changes, as the growth in size of locomotives which have had to be "shopped" and many of the improvements in shop practices in Canada have developed under the watchful eye of S. J. Hungerford, who has always held the admiration of those who worked with him because he knew every phase of the work so thoroughly himself.

Quoting an 1832 statute which prohibited the legal profession from sport while going to and from court, R. L. August, Chicago attorney, was dismissed by a jury when charged with speeding 31 miles an hour.

Young Britons won't have to swim the Severn any more learning the lesson of old Mr. English Sedge. A thoughtful manufacturer has provided them with a pocket knife with the name engraved on the handle.

The telephone service between Great Britain and Egypt was inaugurated by a conversation between Mr. Baldwin, speaking in the Prime Minister's room in the House of Commons, and Sidky Pasha, Premier of Egypt.

Some Memory Experts

Both Women and Men Have Some Remarkable Work

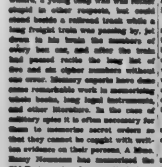
There was once a mathematical wizard, a young chap who was rather stupid in other respects, but could instantly stand beside a railroad track while a long freight train was passing by, jot down in his brain the numbers of every box car, and after the train had passed recite the long list of two and six cipher numbers without any error. Memory experts have done some remarkable work in memorizing whole books, long legal instruments, and other literature. In the case of memory spies it is often necessary for them to memorize secret orders so that they cannot be caught with written evidence in their pockets. A Miss Rosey Newsome has committed the Old Testament and can recite it from beginning to end. She now is learning Shakespeare's plays by heart.

"I have always maintained," declared Charles, "that no two people on earth think alike."

"You'll change your mind," said his fiancee, "when you look over our wedding presents."

Defendant (in local votes)—"Justice, justice, I demand justice."

Judge (rapping for order)—"The defendant will please remember he is in a courtroom."



Britain's first day. Minderva, Vienna.

Contract Bridge

By Sheridan B. Shiels, Cavendish Club, Toronto.

Defense Tactics

In my previous article a general outline was given of the high card and distributional strength necessary for the overcalling hand to hold when making a defensive overcall. It was shown that, when vulnerable, the overcalling hand needs a stronger hand both in high cards, and in taking tricks in the suit bid, than when not vulnerable. Also that, when a bid of two is necessary to overcall, the hand overcalling must be considerably stronger especially when vulnerable. What I will try to show today is how far it is good bridge to carry defensive bidding.

This must be answered by an analysis of the favorable side of the score sheet. An average contract rubber may be said to consist of one hundred points profit to the winners. This one thousand points for the purpose of this analysis, is divided into four hundred points below the score and the four hundred points represents the re-coupled or invisible value of the final game or rubber bonus. The one hundred points represents the concealed or invisible value of the final game of the rubber. If then, a first game of a rubber is worth a total of four points, it follows that defense which stops three first game at a cost of four hundred points, is good defense. Notwithstanding the hard fact, that the defense partnership has against them in the hand, a certain definite four hundred points. Still if the incurring of this four hundred point penalty stopped game by the adversaries, the defense has more than made even. If, however, after the deal is completed and the four hundred point penalty incurred, it is found that the adversary opponents could not have made game, then the penalty incurred is a total loss, to the penalty incurred. It follows that the defense bidding must be predicated on two basic factors:—

First. It is certain that the opponents can make game, if it is not certain, then as a rule, it is best, rather than overbid and take a penalty, to allow the opponents to play the hand with the aid of declarer's hand. If it is certain that the opponents can make their contract, then the defender must know how large a penalty he is going to incur, and that knowledge constitutes the second basic factor.

It is necessary for the overbidding side to closely approximate, through their knowledge of their combined hands, together with a knowledge of the combined holdings of the adversaries, the number of tricks they will take when playing the hand contract. It is stressed always in this discussion that the defender's contract has been doubled.

The following table shows the penalties which are allowable to defenders in order to save game.

To save game the defenders may be set three tricks doubled. If the contract is not less than three tricks, the defenders show a profit. If not more than three tricks the defenders show a loss.

To save second game, when the declarer's game is vulnerable, only four tricks doubled may be taken. If the set is less than four tricks, the defenders show a profit, if more than four tricks a loss.

To save rubber game a set of two tricks doubled may be taken. If less than less tricks the defenders show a profit, if more than two tricks a loss.

Defense Against Partial Games

Almost one game in four on the average is made by a side having a partial score. It follows then that a partial score is worth one quarter of the game score premium, plus the partial score itself. This gives an invisible value to any partial score of between one hundred and fifty and two hundred points. The responsibility in defense overbidding to save partial scores is very small and it takes very close figuring by the defenders to successfully defend against partial score contracts. As a rule the defending partnership plays it to defeat game, when trying for game and so is going to be set two or three tricks. If to save partial score he is set three tricks doubled nevertheless, he has suffered a big loss. If he is set two tricks doubled to his bridge score, and if he is set one trick doubled he has made a profit.

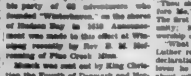
To sum up then, defensive overbidding is a very important factor in Contract, but its use must be predicated on proven card valuation methods, and also on ability of the player to estimate closely the losing tricks in the combined hands, if the contract is played in the combined.

Rescued For Adventure

Danes and Norwegians Plan To Steal Cabin Of Churchill

Danes and Norwegians of the Lofoten Fiords, are planning to erect a memorial cabin of Churchill to the memory of Captain Jens Munck and his party of 62 adventurers who founded "Winterhaven," on the shores of Hudson Bay in 1619. Announcement was made to the effect at Vienna recently by Dr. H. M. Hoffening of Pine Creek Mine.

Munck was sent out by King Christian the Fourth of Denmark and Norway in 1619. With the party was Captain Rasmus Jansen Ambus, first Lutheran pastor to set foot in America. Along with 60 of the party, the pastor died of disease during the terrible winter of 1620, leaving Captain Munck and two men the survivors of the ill-fated expedition.



650

AMAZINGLY ATTRACTIVE IN THIS LOVELY DRESS

Suitable for normal or larger figures.

Here's a nice day dress, so full of charm and modishness. It has the popular bolero and softly tied bow collar neck, so becoming and liked. The skirt is slenderizing too with blue lily opening and length giving panel in front and at the back.

Dark blue and white crepe silk print with plain white is stunning on the effect.

A black and white striped cotton voile is very effective, as are polka dotted batiste prints and chambrays.

Style No. 650 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. It requires 3¼ yards 39-inch printed material, 6625 1¾ yards 39-inch plain material.

Price of pattern 15 cents in stamps or coin (coin preferred.) Wrap coin carefully.

SUNDAY SCHOOL LESSON

AUGUST 7

THE TEN COMMANDMENTS

Golden Text: "Thou shalt love Jehovah thy God with all thy heart, and with all thy soul, and with all thy might." Deuteronomy 6:5

Lesson: Exodus 19:1 to 20:21

Devotional Reading: Psalm 19:7-14

Explanations and Comments

The First Commandment: Worship God Exclusively, verse 3. When these words were promulgated from Mount Sinai the world was given over to the worship of many gods, and the words "Thou shalt have no other gods 'before Me,' mean "in addition to Me." The first commandment implies God's unity; it forbids polytheism, the worship of false gods.

"What a man loves, that is his god. Covetousness reminds us, and justifies this declaration by adding that what he loves he carries in his heart, goes about with it night and day, sleeps and wakes with it, he it what it may.

Wealth or pelf, pleasure or renown often are a great many Christians who God will put up with in a big man's heart," says Booth; "there is one thing He will not put up with a little place." We cannot serve God and mammon.

The Second Commandment: Worship God Spiritually, verses 4-6. The second commandment forbids image worship, the making of an object of worship of any graven image or likeness of anything that is in heaven above, or that is in the earth beneath, or that is in the water under the earth. The earth was thought of as a flat and resting upon a huge abyss of water (God is digest). He, the true God, must not be worshipped under false forms.

"For I, Jehovah thy God, am a jealous God," jealous of My honor, of the use of images which turn the worshipper's mind away from his relation to Jehovah.

There is a danger that a crucifix, which is but a symbol, may come to be regarded as a charm, a divine talisman, and inevitably become so important in a worshipper's mind as to take from him the One it symbolizes.

"Visiting the iniquity of the fathers upon the children, upon the third and fourth generation of them that hate me." A young man who halted a college professor why the best did not say that the sins of the fathers were visited upon the children to the seventh and eighth generations as well as to the third and fourth, received this answer: "Because there will be no seventh or eighth generation. Then sin extinguishes itself before it gets that far."

"This edict is supported by a great physical law which proves that sorrow is the friend of righteous living and the foe of its opposite. Vice shortens life, weakens posterity and pollutes its blood. Virtue lengthens life and invigorates posterity, insuring its bodily health and intellectual strength. The children of the wicked may resemble their parental heritage or the children of the good forsake the ways of their fathers. Here a conflict of principles arises. The law of heredity is offset by the law of free choice."—R. Parke Cashmore.

The Fourth Commandment: Remember God's Day, verses 8-11. The seventh day is to be distinguished from other days by abstinence from labor. "The Sabbath was made for man," Jesus declared. The needs of the mind, and spirit require one day of rest in seven.

Where Silence Rules

No Word Is Ever Spoken In Gruenau Monastery

In the broad orchards of the monastery of Marienwald, in the Hitzl, Germany, the only sounds are the sighing of the winds in the trees and the songs of the birds. The monks who prune the trees and pluck the fruit are silent. Theirs is the strictest Catholic order of penitents in the world. From silent to lay brother these monks work for a living, always in complete silence. Their food is simple, and their monastic garb may be changed only every eight days. All of the females of the monastery sleep together on plain boards in one room.

Michigan May Sell Salt

Lake Odawaman at Pontiac, Michigan, may obtain salt from "Ye Olde Worm Hedge," a stand lumber near one of Oakland county's most popular dining resorts. "Clarke" of the "Clarke" still worms at six dozen for 25 cents.

Guy: I'll have you understand there's good blood in my veins.

Gulliver: Yes, and how much did they pay for the transfusion?

Home economics specialists point out that washing the skin with the feet would increase the possibility of its cleanliness.

Canada Exporting Less Wool

Manufacturers Are Using More Of Home Grown Product

"There times as much Canadian-produced wool was bought last year by the Canadian industry as was exported said Major Douglas Hallam, Secretary of the Canadian Woollen and Knit Goods Manufacturers Association, speaking in Toronto. The use of Canadian wool is steadily increasing, due to improved merchandising methods adopted by sellers the 30% increase in yards of thread which Canada, and the duty on imported wool."

In a report issued through the National Research Foundation the methods by which Canadian wool gets on market are outlined. Anatomy buy five lambs and sheep, the wool is marketed as pulled wool, and over 90% of such wool is bought by Canadian manufacturers. Seventy woollen and knitting mills bought wool direct from farmers. One hundred and eight firms listed as wool dealers of experience associations handled Canadian wool for re-sale. Approximately five million lbs. of the clip was used in home industries.

This Burglar Alarm Works

Sounds Siren, Explodes a Bomb and Imprisons Thief

The smash and grab jewel thief, who has infested England for the past few months, has met his equal in science.

Neither the vigilance of the police nor the precautions of jewellers have succeeded in diminishing the number of these brazen robberies. But it will take the best criminal brains in the world to carry on the face of a new precautionary invention.

A demonstration of the invention was given before jewellers at Southend-on-Sea. A jeweller turned himself into a robber for the purpose of the demonstration.

The hole large enough for a man to pass was made in a jewelry shop by smashing it in with a blackjack. Then a number of melodramatic things happened.

First a deafening siren went off which could be heard for three-quarters of a mile around. A gas bomb exploded, followed by a smoke bomb which cast a screen about the jewels and blinded the raider.

As though this were not enough a secret steel panel snapped across the window, imprisoning the raider and protecting the jewels.

Rain Controls Fuel

Or How Reading

Average Speed In Around Six Words Per Second

Six words per second, or about four and one-half hours for a standard book is good average reading speed, and most people can aspire to reach this seemingly extraord nary capability. It is the brain, not the eye, which determines the speed of reading. The eye cannot move steadily, but must move in a series of jerks, with pauses between. These pauses are needed to see the printed page clearly, but still more to give time for the meaning to be grasped.

Four women and two men, who started from Melbourne, Australia, by automobile six months ago, have arrived at Dover, England, after having motored 12,000 miles of their native continent.

Science has figured that the earth travels 250,000,000 miles on its annual trip around the sun, and that more than 1,000,000 miles are travelled by the globe every day.

"I can't oppose you. I haven't enough work for the men I have."

"That does not matter. Very little work would keep me going."—Pearl Blum, Stockholm.

Letter to the Editor

To the Editor.

Dear Sir:—

In our home of July 27th there is an article under the title of "Co-operation" which is a reprint of a radio-cast reprint of a letter written by Mr. H. Gaudin and published in the Community Press, Sedgewick. As this article is misleading and not strictly in accordance with the facts; and as you have given space for its publication, I would respectfully request enough of your valuable space to make some comments on it. The article is too long to analyze fully so I will confine my comments to three points only. But before doing so I wish to say that the statement that: "only such consumer's co-operatives are based on the Rochdale plan can succeed" is childish.

The first point I wish to deal with is the statement that: "The U.F.A. plan restricts its services to U.F.A members", so did the Rochdale plan. According to the constitution of "The Rochdale Equitable Pioneers", which I have before me as I write,—each member of the "Society" was required to buy four shares no more, no less, at £1 each, or a total of £4, an amount equal to $20 in Canadian money.

In the U.F.A. plan each person desiring to take advantage of the benefit of buying co-operatively must become a member of the U.F.A. organization by paying an annual fee of $2. This makes him a member at large of the U.F.A. organization and this gives him all the benefits of buying by any or all the commodities handled co-operatively by the U.F.A. co-operative committee. (I will refer to this committee later on). If he wishes to associate himself with the local union in his district and reap the benefits—which are numerous—of being a member of a "local" he can do so by paying the fee which the "local" collects from each member to finance the affairs of the local. As each local has local autonomy with regard to local fees, the fee varies in the different "locals" from 25 cents to $2 per annum. If he wishes to become a full fledged member of the U.F.A. he can join the constituency associations—Federal and Provincial in which he lives, by paying an additional fee of from 25 cents to 50 cents per annum, in each case, and this gives him all the benefits of the U. F. A. in all its branches, socially, educationally, economically, politically, for an annual expenditure of approximately $4.00.

The Centralized Control: Mr. Gaudin has quoted one clause of the reconsolidation made by the organization committee in its report to the 1932 convention viz: "That the central Association lay down a definite policy governing all branches of the Association". Here, to fully understand what this clause means it will be necessary for me to quote that part of the report that leads up to the clause quoted above. And, by the way, Mr. Gaudin did not quote the clause correctly as he used the term "policy board" instead of "Central Association", and again he said, the committee "instructed" and when the committee only expressed an "opinion".

I quote as follows; beginning with paragraph two organization in the last few years has resulted in the formation of a number of associate organizations that have tended to reduce the strength of the parent organization. The change of the policy adopted by the 1931 convention of this association, whereby the material benefits of the united activity are shared by the whole association, as well as by the individual members therefrom, will in our opinion effectively contribute to the stability of the whole movement. This organization has expressed its desire that the benefits connected therewith shall be available only to the individuals who comprise the organization." —

"The co-operative purchasing field offers great possibilities." However, it should be kept in mind that failure in this field would have a disastrous effect on the whole movement. We wish to point out that in our opinion the following important rules should be borne in mind."

Then follow the twelve rules, of which the one misquoted by Mr. Gaudin is No. 9

Clause five of the original "declaration of principles" of the U.F. A. says: "Our organization is continuously in authority, and while through it we formulate declarations of principles—these are at all times subject to change by the organization." Every revision of the declaration or principles since has reaffirmed this clause and never once has the organization or any of its constituent parts departed from this principle. The report of the committee referred to above was presented to the convention for the consideration of the delegates and after a lengthy discussion it was adopted and the sponsors expressed therein confirmed. Then we see that the instructions to the Central "Board", referred to by Mr. Gaudin, came from the delegates who were the representatives of the individual members and conform to the principle of "building from the individual up and placing control in the individual himself" and whatever policy the central association lays down will be placed before the delegates at the 1933 convention and either confirmed or rejected by them before it is acted upon.

Now Mr. Editor this letter is getting rather long and as I do not wish to impose on your good nature I will have to leave my comment on the third point until a future issue of your paper

A. Lonan

It is reported in England that of the 4,000,000 persons who should have paid income tax last year only 2,250,000 did so.

Getting genuinely intoxicated by inhaling odors emitted by certain perfumes is a new society diversion in Europe.

Good Crop Conditions Here

Grain crops in Alberta are entering the ripening stage, under varying conditions, with the general prospect continuing to point to a harvest considerably above that of the past few years. Local conditions are excellent, and a very good yield of all grains is anticipated.

The cutting of rye has commenced and wheat will start in about a week to ten days.

There is a plentiful supply of feed in this district.

Jen—"Do you come from Boston?"
Henry.—"No! I'm talking this way because I cut my mouth on a bottle."

Would Raise Price of Farm Products

Stabilization legislation, as now in force in many parts of the British Empire with respect to primary products, if passed in Canada would be the means of immediately raising the price levels of many primary farm products and thus hasten the restoration of purchasing power to the basic Alberta industry of agriculture, declared J. Russell Love, United Farmers of Alberta member of the legislature for Wainwright, in addressing a constituency meeting at Irma on Wednesday last.

Foreman: "Are you a mechanic?"
Applicant: "No, I'm a McCarthy."

Who Discovered It?

By Bruce E. Brown, Vice Pres., Perry-Hanby Advertising Co.

I was a printer's devil some 20 years ago on a small town weekly. It was a hard job for the editor-owner to sell advertising in those days. Merchants simply didn't believe in it.

Along fifteen years ago the small city weekly was "discovered". Advertising began "trying out" the country newspaper field. Gradually they found out that the small town weekly, with its advantage of being read from cover to cover with its relatively few pages of competing advertising, was an excellent buy for national advertisers. None of this advertising was bought on sentiment, some of it was purchased to support the paper. It was bought for just one reason—it paid.

The local merchants had not "discovered" the value of advertising space in the small country weekly. The very men who should have known its value, did not, for the very simple reason they had not used it enough to find out about it.

Many small town merchants are passing up today the opportunity to use the productive columns of the weekly newspaper to sell their goods more cheaply, more quickly, more profitably.—Copyright 1932.

Who does your Printing ?

Do you send it out of Town!

Why!

Do you know that every Dollar you spend in town for Printing is spent here and that Dollar will come back to you in one way or another.

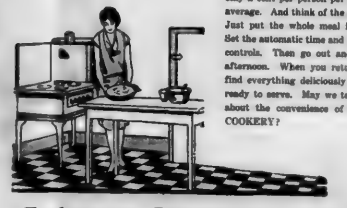
But! When you send that Dollar out of town for Printing, it never comes back.

The Fort Record would be pleased to submit proofs, samples of stock and prices on your Job Printing requirements.

The Record Job Office

DO YOU KNOW THAT FOR A CENT PER PERSON

you can Cook Electrically



Because ELECTRIC COOKING seems such a luxury, most people think that it must be expensive. But, like all other electric services, ELECTRIC COOKING costs a surprisingly small amount . . . only a cent per person per meal on the average. And think of the convenience. Just put the whole meal in the oven. Set the automatic time and temperature controls. Then go out and enjoy the afternoon. When you return you will find everything deliciously cooked and ready to serve. May we tell you more about the convenience of ELECTRIC COOKERY?

Calgary Power Company Limited

S. PHILLIPS Local Manager **Edmonton**

SAYS FARMERS ARE OPPOSED TO FUTURE TRADING

Winnipeg Man. The curtain was rung down on the public hearings before Sir Josiah Stamp's Royal Commission on grain futures but not before the Canadian Wheat Pool made a dramatic last minute dash into the spotlight with a plea for government supervised futures trading At its last session in Canada, the commission board A. J McPhail, chairman of the Pool's Central Selling Agency, and Andrew Cairns, Pool stat istician

Alone among the 53 witnesses who testified at eight sessions in three prairie cities Mr McPhail represented the "inner-circle" salesmen, who handle half of Canada's wheat crop for 140 000 farmers. Other members of the Central Selling Agency attended the hearings at Winnipeg, Regina and Calgary, but none took the stand Pool members, even directors of the co-operative, testified but the Central Selling committee went unrepresented until the final day

A great majority of the West's farmers, claimed Mr McPhail, who spoke on behalf of 54 000 producers, is head of the Saskatchewan Wheat Pool, are opposed to futures They are strongly of the opinion that the futures' effect on the price they receive is detrimental, though they have no definite proof Government supervision of the Winnipeg Exchange, thought Mr McPhail, would offer data to show whether or not complaints against the options system are justified.

Suspicion in farmers minds would be dispelled, stated the Pool man, if an unbiased study of statistics and records secured under government supervision invalidated the complaints against futures trading as unfounded. On the other hand, he said, if there are weaknesses and abuses, the sooner they are exposed and corrected, the better for all concerned. Mr. McPhail referred to the United States plan of futures market supervision as "a valuable guide to Canadian authorities as to the nature and extent of legislation necessary."

Failure of the futures market to assume "anything like the risk-carrying function so commonly attributed to it," was pointed out by Statistician Cairns as an additional contributory factor to present low prices. He claimed that the market, distressed by the 1929-30 debacle, were hesitant to come into the market now, with the result that necessary buying to absorb "hedging" sales was not present, price-recession following.

Urge Postal Reforms

Suggestions To Speed Up Mail Service Framed By Manitoba

Winnipeg, Man.—Two suggestions to speed up mail service were contained in a resolution passed by the Manitoba Postmasters' Association, it was learned here.

The first requests that size of "open letter" envelopes be restricted to five inches in length, it being claimed that, in many instances, letters have been lost or delayed through use of large envelopes. The second seeks to eliminate use by large firms of the well known and popular stamped return envelope. These are sent out by companies in rural districts and returned from there without the local postmaster being accredited the revenue, it was said.

F. H. Nelson, Russell, Man., was re-elected president.

May Visit Canada

Miss Yaisley May Enter Steadmen II Re Complete With Lunch

Ottawa, Ont.—Miss Alexandra Yaisley, daughter of the late Canon Yaisley, famous Rhodes scholar, will be permitted to visit Canada if she complies with Canadian laws, it was stated in the House of Commons by Hon. W. A. Gordon, minister of immigration.

J. S. Woodsworth (Labor, Winnipeg North Centre), drew the minister's attention to a statement appearing in the press that Miss Yaisley had been prohibited entry into this country.

New School Readers

Now Studies For Western Province To Be Introduced Shortly

Edmonton, Alberta. An inter-provincial committee of educationalists has met in Edmonton in a two-days' session on the school reader question. With Alberta represented by Dr John Y Ross, deputy minister of education, the reader committee met there. Dr S. J. Willis, superintendent of education for British Columbia; Dr. R. Fletcher deputy minister of education for Manitoba, and Dr J. S. Huff, superintendent of education for Saskatchewan.

To this committee had been submitted the report of an inter-provincial committee which met in Edmonton in January last, and from the two days' consideration of the report and of other information there resulted an agreement upon the specifications to be furnished publishers for the proposed new set of school readers. The publishers will be asked to follow the general requirements then laid down and will submit competitive books for adoption as authorized texts in the four provinces. The new readers are to be ready for introduction in the fall of 1932.

Ribbon Roll Expenses

Salary Of Governor-General Is $65,000.00 With Travelling Allowance Of $50,000 Per Annum

Ottawa, Ont.—The total salary of the governor-general of Canada is $65,000 per annum, and in addition to this, he receives a travelling allowance of $50,000 per annum, it was stated in the House of Commons in answer to a question by R. J. Cardin (U.P.A., New Brunswick). Other allowances in addition to salary are $10 000 for office-de-camp, and $25,000 for fuel and light, making a total of $140,000 in all.

The total cost of maintaining Rideau Hall, the governor-general's residence for the three fiscal years, 1927-28, 1928-29, 1929-30, were, fuel and light, were $126,225. In 1927-28, it was $43,225; 1928-29, $40,360; 1929-30, $42,864.

Apart from his annual travelling allowance of $50,000 the governor-general received $3,956 in 1927-28; $3,259 in 1928-29; and $2,464 in 1929-30, for attendance and repairs to railway cars.

Other expenses incidental to the position of governor-general paid by the Dominion government total $30,000.

Better For Export

Sir Josiah Stamp's Opposition For Higher Prices In View Of Heavy Production

Ottawa, Ont.—Farmers impressed in better production have pleased Canada on the export market, and there is no immediate expectation of higher prices, Sir Josiah Robert Weir, minister of agriculture, was told by representatives of the Montreal Produce Dealers' Association.

The combined association in better production had to the retention ceiling of confidence, attended by T. W. Grieve, A. McIntyre, K. D. Cleve and John Channell, all of Montreal. Sir Josiah in discussion was as to whether it would be advisable to withdraw part of the production from storage, to be held for next winter, when Canada might be again in an exporting position. The produce men said, however, that production was increasing so rapidly that it would be hazardous to hold butter, particularly as with cows being turned into the fields the later shortage would be of butter quality than stocks now on hand.

Sets New Aviation Mark

Capt. Shields Flies From England To Montreal In 3 Hours and 20 Minutes

Hendon, England.—Flying the same little red plane in which he shattered Colonel Lindbergh's speed record for a trans-continental flight in the United States, Captain Frank M. Hawks, of Texas, set a new aviation mark for European points to shoot at, even though he failed to accomplish the task he had set for himself.

Leaving here at 6:30 a.m., he arrived in Rome 3 hours and 20 minutes later, but on the return flight he was forced down in France by lack of fuel and could not complete the round trip.

British Award For Canadian

Dr. Charles Camsell, deputy minister of mines, upon whom a signal honor has been conferred in the award of the gold medal of the British Institution of Mining and Metallurgy. This is the second time since 1921 that the award has gone to a Canadian.

May Hold Conference On Unemployment

Federal and Provincial Members Likely To Meet When Session Closes

Ottawa, Ont.—Little doubt exists in political circles that representatives of the Dominion government and the provincial governments will forgather some time next autumn to make provision for unemployment next winter. It is also probable that during this conference the question of immigration will be brought up.

The government is understood to be well disposed to consider a proposal that a time limit be fixed in regard to deportations so that no immigrant who comes to Canada could be deported after living here a certain number of years. This would necessitate changes in the immigration laws.

The department of immigration claims to have no record for the deportations questioned in the British House. It was stated emphatically here that Canada would never relinquish her exclusive right to regulate immigration into this country from any source.

Will Open Toronto Exhibition

Admiral Of The Fleet Earl Jellicoe To Speak At Open Air Pair

Toronto, Ont. Admiral of the Fleet Earl Jellicoe will formally open the Canadian National Exhibition on Friday, August 28, it was made known in a cable from High Commissioner to Howard Ferguson in the board of directors, informing them of Earl Jellicoe's acceptance.

The annual convention of the British Empire Service League, of which Earl Jellicoe is president, will meet in Toronto immediately preceding the national exhibition. Delegates from all over the Empire will be in attendance.

Reorganization Plan Hears Many Changes

Western Officers Of Soldiers Settlement Board May Be Amalgamated

Ottawa, Ont.—Amalgamation of western offices, early retirement of two more and many of employees—these results will follow from the reorganization of the Soldiers Settlement Board, which was announced by Hon. Wesley Gordon, Minister of Immigration.

Offices at Regina and Prince Albert will be closed down, and the work of the board will be concentrated at Saskatoon.

The board at Ottawa, consisting of three members, of whom the chairman is Col. J. G. Rattray, of Manitoba, is to be abolished, and the work done by one man to be appointed his or son. There will, also, be a huge cut in the Ottawa staff.

This plan of reorganization seems to have been worked out by Hon. McGibbony of northern Ontario. Mr. McGibbony, said to be a close political associate of Hon. Wesley Gordon, has appointed some time ago to make an investigation of the department. He was paid, it is said, $2h per day, plus expenses. He had had some experience in farm matters, having been associated with the Massey Harris Company. He has made an exhaustive survey of the department, visiting all the offices from Ottawa to Vancouver, and his recommendations are now being implemented.

Thousands Deported

Total Of 6,398 People Deported From Canada During Year 1929

Ottawa, Can.—A total of 6,398 people were deported from Canada during the year 1929, it was stated in the house of Commons by Hon. W. A. Gordon, Minister of immigration, in answer to a series of questions by R. J Spencer (U.F.A., Battle River).

Mr. Gordon stated that 1,564 of the total were deported to the British Isles; 156 to Poland, 113 to Germany, 327 to the United States, and the remainder were divided among various countries. Countries, New Zealand, Newfoundland, China, Japan, and South Africa.

The reasons for deportations were many. Of the total number sent back from Canada, 1,695 were deported on public charges, 1,174 because of convictions for criminal offences, and 648 as mental defectives. Physical defects were largely responsible for the deportation of 233.

Mr. Spencer was informed that the cost of deporting these people was $138,236.

Unveiled Remembrance Stone

Ottawa, Ont.—On April 23, His Excellency the Governor-General, over the long distance telephone, unveiled a remembrance stone in London, England, to Michael Faraday, whose epoch-making discovery led to the birth of the electrical industry. The Earl of Bessborough is a former director of London Power Company.

REDUCED SERVICE ON RAILWAYS IS DISCUSSED

Ottawa, Ont The question of railway rates and of reductions on railway services is one directly for the Board of Railway Commissioners, and the government has no authority to intervene in respect of such matters, Hon. R. J. Manion, Minister of Railways and Canals, informed the Commons.

The Commons was considering a resolution sponsored by Oscar Boulanger (Lib., Bellechasse). This motion asked that in order to relieve unemployment the government should invite the railways to re-establish reduced passenger rates in favor of colonists, and that grants from public funds be made to help the railways in so doing.

In support of his motion, Mr. Boulanger said a better distribution of people between cities and rural parts was necessary in Canada. There were too many people in the cities, where there is little hard time, they were finding it impossible to find employment. "Back to the land movement" would clear this situation and the government should lead the way by assisting the railways to grant lower colonization fares. During the past five or six years, great numbers of farmers abandoned the country in favor of the city and they formed, Mr. Boulanger believed, the vast majority of the unemployed of today.

Another needed immigration until a short time ago, why not assist colonization, the member for Bellechasse asked.

From Robert Gardiner, U.F.A leader, came the opposite contention. "Under present agricultural conditions not one dollar of public funds should be spent to take one person back to the land. In some sections of the west, rather than open up new farming areas, they should be closed and the settlers until recently on them moved to him. Competition from automobiles and buses were two contributing factors to the decline in passenger revenue.

In many parts of Canada curtailment of services had been found necessary by the railways. Daily services were made tri-weekly and in one case this would lead to a saving to the Canadian National of $30,000 a year. In one instance it had been found the cost of operation was $1.20 a train-mile while the revenue was 30 cents.

This decrease in service had resulted in "personal pouring in" to him, Dr. Manion stated, but he did not believe it was the duty of the minister of railways to intervene.

It was not the part of the government to influence the railways, particularly in these days when the National system had difficulty in meeting its obligations, continued Dr. Manion.

He would certainly make sure that Mr. Beckmeyer's motion reached the management of the two railways.

Replying to a comment by Mr. Mackenzie King, the minister declared that in the last two weeks the railways had reduced week-end fares, he presumed for the purpose of securing more passenger traffic. Revenue was being lost, due to competition by buses and private motor cars.

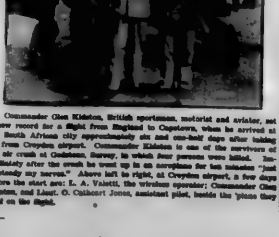
Recognize Spanish Republic

London, England.—Sr. Hon. Arthur Henderson, secretary for foreign affairs, announced in the House of Commons that all the Dominion governments had fully concurred in the decision to officially recognize the new republican government of Spain.

Plan Air Race Around World

Los Angeles, Calif.—A race around the world between two ambitious flyers in identical monoplanes became a possibility here with preparations by John Henry Mears of New York, and Wiley Post, Oklahoma City, speed flyer, entering the final stages.

BRITISH PLANE SETS NEW RECORD



Commander Glen Kidston, British sportsman, motorist and aviator, set a new record for a flight from England to Capetown, when he arrived at the South Africa city approximately six and one-half days after taking off from Croydon airport. Commander Kidston is one of the survivors of the air crash at Cadenham, Surrey, in which four persons were killed. Immediately after the crash he went up in an aeroplane "just to steady my nerves." Above left to right, at Croydon airport, a few days before the start are: L. A. Valetti, the wireless operator; Commander Glen Kidston, and Lieut. O. Cuthbert Jones, assistant pilot, beside the plane they used on the flight.

BELIEVES WHEAT TARIFF WOULD BENEFIT CANADA

Winnipeg, Man.—It is not entirely true that the grain trade of Canada and western grain growers consider a preferential tariff in favor of Canadian wheat in the British market a disadvantage to Canada.

"Confidential briefs, indicating such a view, may have been submitted to the Dominion Government by the authorized spokesmen of the grain trade, but it is absurd to assume there is no contrary opinion among those they purport to represent. The official representations made by grain trade spokesmen are not the views of all grain dealers any more than the wheat pools' representations to government express the views of all farmers on the point.

"Almost everyone can agree that a quota original could be cumbersome and useless, but a preferential tariff is a different matter. Personally, I believe the free entry of Canadian wheat into the British market, by far the biggest importing market in the world, with a duty against non-empire wheat, would be a distinct advantage in marketing our Canadian crop and over a period of years would assist in obtaining better prices for our western grain growers.

"Considering the almost prohibitive tariffs against all wheat imports now in effect in all European countries, I believe there is much to be gained and nothing lost by such a preference.

"It seems to me unfortunate, particularly at this time, when wheat growers in western Canada need all the assistance and encouragement they can get, that spokesmen who at best supposedly represent less than half the farmers in the west, should take the position that a preferential tariff on our wheat in the British market is a matter of supreme indifference to them.

"Whatever the views of our western farmers may have been on this matter 15 or 20 years ago, I do not believe they are being indifferent to the advantages that would accrue to them from such a preference.

"It seems that if the Dominion Government can, in exchange for tariff concessions on British manufactures entering the Canadian market they will accomplish something of great benefit to the trade of Canada and will earn the thanks of the majority of farmers and business men in western Canada."

Italy Denies Story

Rome, Italy.—The ministry of marine has issued a second denial of a story current about an Italian "secret navy." The ministry said the report that two cruisers and two torpedo boats had been ordered constructed a year before the order was announced in parliament was false.

Take Wheat As Cash

Toronto, Ont.—The Canadian branch of a British firm of feed products exporters announced that it would take wheat for all produce sold in western Canada after August 1. Then it will ship the wheat to Great Britain and market it there.

Adhere To Agreement

London, Eng.—Spain notified the British Government recently that it will adhere to the European consultative pact, first negotiated by France and Great Britain.

More Than Ever Around World

More than 20,000 tons of cigarette paper were produced in France in the last year.

Soviet Restrictions Against Sales Removed

Peasants May Sell Products With Exception Of Grain

Moscow, Russia.—Soviet authorities announce a new important step in the direction of removing official restrictions against sales by Russian peasants of their own products.

Hereafter all peasants living within a distance of about 30 miles of Moscow are freed from contracts which heretofore obligated them to deliver their produce to state co-operative organizations at fixed prices

An exception was made regarding grain. Grain contracts will remain in operation.

The only reservation is that those peasants who have not joined the collective farms must carry out 50 per cent. of their contracts for potato deliveries

Transients Journey East

Calgary Unemployed Leave For Harvest Fields Of Saskatchewan

Calgary, Alberta.—Calgary's transient unemployed situation was relieved somewhat when Royal Canadian Mounted Policemen permitted a number of the workless wanderers to journey eastward to harvest fields in the province of Saskatchewan.

It was learned, however, the men were still not permitted to journey past Winnipeg City Boss the police felt sure were destined to harvest jobs were allowed to leave Calgary via the rods."

May Leave Ottawa Post

Rumored That U.S. Minister To Canada Will Ask For Leave

Ottawa, Ont. Reports on high authority in the capital are that Hon. Hanford MacNider will ask early next month for leave of absence from his post as United States Minister to Canada, Col. MacNider, it is understood, will proceed to the United States for the presidential election, and may resign his post after the election on November 4. His name was put in nomination at the recent Chicago Republican convention as candidate for vice-president.

Canadian Cattle Sold

Selected Crops From Saskatchewan Following Bought In England

Regina, Sask.—A shipment of cattle from the University of Saskatchewan to England has been sold, according to word here from the Dept. of Agriculture from Dean A. M. Shaw, who is in England.

Particulars were not available as to prices on the cable, said A. H Auld, Deputy Minister of Agriculture. The shipment from the university was a selected cargo of steers.

Break 10 Records

Ottawa, Ont. Some 68,000 names will be inscribed in the Book of Remembrance which will be placed within the casket of the altar in the memorial chamber here names of Canadians who gave their lives in the Great War. The task of executing the volume has been given to James Purvis, heraldic artist, London, Ont.

Two Wooden Money

Klagenfurt, Austria.—They're taking wooden money in the province of Carinth a from the farmers who have not enough coin of the realm to pay their taxes. The government announced that those who had no cash could pay in pine or beechwood at approximately the market price.

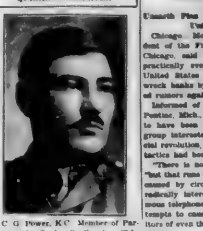
Cholera Epidemic In China

Manila.—Reports from interior China indicate thousands are dying daily in virtually every province from a cholera epidemic, which extends into Manchuria and Indo-China. At least 70 out of every 100 persons contracting the disease are dying, it was reported.

Arbarbi On Screen Again

New York.—Rococo C "Fatty" Arbuckle is returning to pictures. Warner Brothers announced it was signing the one-time film comedian for a comedy.

QUEBEC'S OBSERVER



C. G Power, KC Member of Parliament for Quebec South who will be official observer for the Province of Quebec at the Imperial Economic Conference.

Gorgulov Found Guilty

Assassinator Of President Paul Doumer Must Pay Penalty

Paris, France.—Dr Paul Gorgulov was found guilty of assassinating President Paul Doumer, of France, at the close of his trial.

Witnesses, telling of Gorgulov's life, said he had to struggle against frequent hysterical outbursts

Gorgulov protested violently when one alienist said that while not mentally deranged he could not be called entirely sane.

Ivan Lazaroff, a Russian laborer, declared on the stand that Gorgulov had been a member of the old Russian cholo, or secret police, and testified that Gorgulov and other members of the cholo captured him on one occasion and tortured him, twisting his arms and beating him, burning his arms and bending back his fingers until they broke.

Two of the defence alienists said Gorgulov unquestionably was insane.

Five River Drivers Drown

Boat Capsized When It Was Sucked Into Rapids

Dean Rivers, Ont.—Four of a party of nine river drivers, employed at sweeping on the Ottawa River for the Upper Ottawa Improvement Company, perished when their boat was sucked into the eddy of the True Rapids and capsized as they were endeavoring to run the turbulent part of the stream.

Another member of the party is not accounted for and it is feared that he met the same fate. Three managed to cling to the upturned boat and reached the shore safely while another swam to shore.

Mystery Shipment Of Gold

London, Eng.—A "mystery" shipment of £250,000 in gold left Plymouth for New York recently, and the news caused much surprise on the London bullion market. Bankers, however, believed it to be a private transaction.

Meat Stay Away

Belfast, Ireland Nationalist members of the Northe n Ireland party received a resolution regarded as equivalent to a command from the "Irish Republic Army" calling upon them to attend no more sessions of the Ulster House of Commons.

Wide-Spread Plot

Unearth Plan To Wreck Banks In United States

Chicago, Ill.—Melvin A Traylor president of the First National Bank of Chicago, said he had reports from practically every large city in the United States concerning a plot to wreck banks by circulating unfounded rumors against them.

Informed of an investigation at Pontiac, Mich., into such a plot, said to have been started by a radical group interested in fomenting a social revolution, Traylor said the cases "are local."

"There is no doubt," Traylor said, "but that runs on Chicago banks were caused by circulation of rumors by radically interested persons Anonymous telephone calls were used in attempts to cause panic among depositors of even the largest and strongest banks.

"Reports were received in Chicago from many other cities where the same system was used. I am of the belief that the plot against banks was nation-wide."

Estimating the Crop

Goode Expects Yield Of 420,000,000 Bushels This Year

Winnipeg, Man. Grain experts who have just returned from a crop inspection tour of western Canada, said that conditions at July 30 indicated a prairie wheat crop estimated at 420,000,000 slightly below the 16-year average of 450,000,000 bushels.

Extreme heat during the past 10 days and lack of rain in parts of central and southern Saskatchewan may cause a slight revision of these figures, they stated, but on the whole the crop conditions were reported to be fairly good.

Slight deterioration has taken place in southern Saskatchewan in areas which suffered from drought last year, and rainfall is needed if the standard of the crop is to be maintained, they said. Conditions in Alberta, northern Saskatchewan and Manitoba were found to be very good.

Lumber Industry

Shipments Shipment Of Gold

London, Eng.—A "mystery" shipment of £250,000 in gold left Plymouth for New York recently, and the news caused much surprise on the London bullion market. Bankers, however, believed it to be a private transaction.

Meat Stay Away

Belfast, Ireland Nationalist members of the Northe n Ireland party received a resolution regarded as equivalent to a command from the "Irish Republic Army" calling upon them to attend no more sessions of the Ulster House of Commons.

TRADE TREATY WITH S. AFRICA EXPECTED SOON

Ottawa, Ont. Negotiations between Canada and South Africa since the opening of the Imperial Economic Conference have been so successful that a trade agreement between them is expected in two weeks It was made clear that this treaty will not conflict with the broader negotiations of the conference.

Experts from the Department of Trade and Commerce, which is under Hon. H H Stevens, are meeting with the advisers of the South African delegation and smoothing out the difficulties They are optimistic that an agreement can be arrived at which will greatly increase the trade interest the two countries.

Canada has been seeking for some time to develop trade with South Africa, and the year is buying some 60,000 tons of sugar from that country There is also hope of increasing the importations of pineapples, wool, oranges, Indian corn, and steel, a form of hemp cordage.

The balance of trade between the two countries has been considerably in favor of Canada. In the last calendar year she sold South Africa goods to the value of $9,302,398, and bought from her to the value of $4,416,666

In the fiscal year ending March 31, 1931, Canada sold South Africa: wheat, $2,158,000; flour, $1,327,000; newsprint, $1,604,396; automobiles, $2,023,600; farm machinery, $980,000; electrical apparatus, $675,400; boiler twine, $70,600; wood products, $300,000; apples, $45,100; rubber boots and shoes, $144,000; canned fish, $137,000; wrapping paper, $400,000. There was also an extensive list of miscellaneous goods in which it is hoped to increase the sales. Lumber is looked upon as one of the products in which there is considerable possibility.

All the present time South Africa enjoys the British preferential tariff in goods coming into Canada.

Outlines Air Mail Service

Scotland Route Offers Advantages Says Captain Von Gronau

Montreal, Que.—An air mail service from Europe to the Pacific Coast was briefly outlined by Captain Wolfgang von Gronau in an interview with the Canadian Press.

"The steamships are so fast now we can offer little competition between Europe and New York," Captain von Gronau said. "But a service direct from Europe via Iceland, Greenland and across the continent to the Pacific Ocean with intermediate stops should offer many advantages and a great saving of time. It is to study such a project that we have made this present flight.

He said he had been in touch with the Royal Canadian Air Force for information about flying conditions and routes in western Canada. The captain was glad to hear his gasoline had arrived safely at Prince Rupert, B.C.

New Stamp For Manchukuo

Harbin, Manchuria. New Manchukuo postage stamps have appeared following the suspension of Chinese postal service throughout Manchuria. Japan will handle all Chinese and foreign mail bound for the new Pu-Yi Government. This is taken to mean recognition of the Pu-Yi Government by Japan

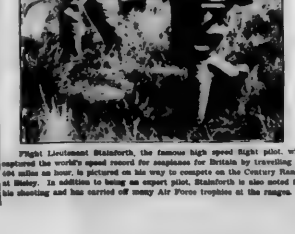
Adopt Western Method

Harbin, Manchuria. Banditry, kidnapping and looting contrives rife throughout the territory. Three Japanese railway officials were k dnapped. The Pu-Yi Government has decided to adopt the electric chair method of executing criminals instead of shooting or decapitation.

Try Cattle Smuggling

Belfast, Northern Ireland.—Attempts to smuggle cattle from the Irish Free State into Northern Ireland began as a result of the tariffs. About 50 head were seized by the Ulster constabulary at Forkhill, South Armagh. The drover abandoned the animals and escaped over the border.

SPEED KING TRIES LIS LUCK WITH THE RIFLE



Flight Lieutenant Stainforth, the famous high speed flight pilot, who captured the world's speed record for seaplanes for Britain by travelling at 404 miles an hour, is pictured on his way to compete on the Century Range at Bisley. In addition to being an expert pilot, Stainforth is also noted for his shooting and has carried off many Air Force trophies at the ranges.

War Debts

President Apathetic Offshoot U.S. Attitude In Policy Pursued

A perusal, indeed a most extensive review in policy was made when the American Government did not accept the suggestions of Lord Balfour in 1922 and remedy the inter-governmental obligations arising from joint participation in the World War Years in of course no answer to the foreign legislative argument that these obligations were real debts and that all debts ought to be paid The trouble with this legalistic argument is that while theriom it is irrelevant The fact of the matter is that these who are to receive payments on account of these intergovernmental obligations cannot afford to take them, for the reason that unless the situations which these obligations represent be relieved, the economic and financial condition in every land will grow steadily worse until not are all ruined. Legislatively the American people are a creditor nation as to these obligations, but as a matter of fact, already in insisting upon that position they have lost in capital values and in destruction of business many times what would ever to received if all these intergovernmental obligations were met in full. When the Congress in December last voted that these intergovernmental war obligations should be reduced per annum, it declared, without in the least meaning to do so, that it was in favor of prolonging and increasing the present depression. In obedience to that declaration those depression has been prolonged and has grown steadily worse day by day.—Hamilton Mercury Editor

Coffee Becoming More Popular In England

Hot Tea Consumption Averages About Eight Cups Daily

Britishers drank two pots and a quarter billion Senior cups of tea in 1931 than in 1930, and almost six billion fewer than in 1929.

But it cannot be said that the tea drinking habit is decreasing rapidly. Consumption in 1931 still averaged approximately eight and a half cups daily for every man, woman and child in the United Kingdom.

The habit of drinking at least one cup of tea before rising in the morning still lingers and rare is the home, or office which does not have its tea regularly every afternoon.

While consumption of tea is decreasing, coffee is becoming more popular. Coffee consumption in 1931 was 33,500,000 pounds, an increase of about 1,500,000 pounds over 1930, but still representing considerably less than one pound per person for the year.

Old Car Is Interesting

Bought At Auction In Toronto For Purpose Purpose

An automobile sold for $70 at an auction in Toronto. The car was a 1926 model. About 20 years ago Mrs. Agnetah Meadows closed her home, leaving the vehicle in the garage. A small tree grew in front of the garage doors. Then the owner returned recently. The tree was cut down and the ancient car moved out. A representative of the company which made it bought the car and will use it for exhibition purposes.

Company is said to be developing a new mysterious death "ray" machine. This machine, it is said, may be able to destroy battleships and aeroplanes through immobile power waves it will send out.

"I can make 25 notes that can't be detected."

"Then what are you waiting for?"

"A simple to copy."—Boilerplate, Sketch.

W. N. U. 1932

Auto Plant Is Moved

Europe's Largest Motor Car Factory Built In Germany

Following the recent announcement of reciprocal arrangements between Canadian and British companies for marketing new Ford cars in the British Empire and Europe, two additional banks of British newspaper editors, including members of the Empire Press Union and representatives of Canadian newspapers, visited Dependents and Imperial Europe's largest motor factory, built by the Ford organization, on what three years ago was literally a heavy swamp on Germany's doorstep.

The plant is one of the most self-contained in existence, having its own powerhouse, blast furnaces, coke ovens, by-product factories, making even such commodities as bennite for motor fuel. It will ultimately employ 15,000 men and turn out cars at the rate of two hundred cars per hour and yearly.

Hugely regard the plant as little short of a miracle, as its 12,500 tons of constructional steel work from British yards rests largely on piles. Electricity is the main motive power, even the six miles of roof windows being opened instantly by pressing buttons.

Issue Amazing Will

Revised Map He Sent At Opposite Ends Puzzled

Ontario has some amazing wills in its records, one of which, written by a rhyming clergyman, may be made the Surrogate Court in Osgoode Hall, Toronto. That of the well-known "character," Dr. Dodge, of Goderich, Ont., is famous and often quoted. He was a man of rough-and-tumble nature.

Part of the estate was left to a sister "because she is married to a minister . . . when she bequeaths," and a share to another sister "because she is married to nobody, nor is she likely to be, for she is an old maid." Also "I leave my late brother's watch to my brother Hugh, desiring him at the same time to give up whisky, gaming, radicalism and all other sins that do most easily beset him." A friend is left "a strong prayer . . . to end that he may drink tea therefrom, to comfort him in the selection of a distinguished wife." To a third friend "because she is an old maid and pious, I give my clever cap, with a coverage to it . . . also my grandson's coral bells, as it should amount to use an old woman talking coal."

Increasing Silence Quantity

Since 1921, says the Standard Bureau-Herald, the amount which Germany should pay has ranged all the way from $21,250,000,000 down to an even $1,000,000,000. The last amount is just a little better than three per cent of the first amount. If the rising tempo on the reparations scale be anything to judge how much the rest of the world should pay to Germany.

"I had to bite she'd accept me the first time I proposed."

"Did you think she would the second time?"

"They would have been no second time."

Many splendid scenes were witnessed when the Governor-General installed in state in the House of Commons to open the Imperial Economic Conference. In the picture on the left Lord Scarborough is shown at ullention as he was about to enter the Parliament Buildings, while the photograph on the right shows a small section of the vast crowd of spectators gathered in front of the Victory Tower to watch the celebrities enter the House of Commons and to hear the speech of the King. Altogether a splendid day was spent by the numerous sightseers outside the main building on Parliament Hill

Atlantic Air Service

Canada Surveys Bring Made To Establishment Of Undertaking

In the surrounding clashing of industry it is heartening to note that in one direction, at least, thought is being taken for an expanding future. That is in the work of advancing plans for a regular trans-Atlantic Air Service between this continent and Europe. Negotiations have started for the east and the west coasts of Greenland with a view to obtaining weather data, and a complete hydrographic information of this nature is very essential to the success of establishing a permanent air service across the Atlantic. One expedition is headed by the noted explorer, H. G. Watkins, who is extending two years in Greenland, and south of the Arctic Circle. The other expedition it to be carried out by the University of Michigan under Dr. A. L. Hasbrouck.

The latter party will conduct research work on the Greenland icecap from west to east on the west coast. The work has been put under way by Pan-American Airways. It is interesting to note that Rolls or no flying surveys will be made during the first twelve months. The expeditions will confine themselves at first to studies of the currents, storms, and general meteorological conditions. A trans-Atlantic Air Service, when it does arrive, will have to be established on a very firm foundation of knowledge in respect of conditions to be met. There is every indication that these plans will be carried to completion and taking every precaution with which they make.—Winnipeg Free Press.

North Magnetic Pole In Canada

The north magnetic pole is located in Bathurst Peninsula on the Arctic Coast of Canada, and the south magnetic pole in South Victoria Land south from New Zealand.

United Irony was exported to the United Kingdom, Netherlands, Germany, France, United States and several other countries during 1931.

British Trains Speeded Up

Will Have Fastest Service Ever Given Travelling Public

Following the record-breaking runs of their crack trains, the Cheltenham Flyer and the Flying Scotsman, the Great Western Railway and the London and North Eastern Railway respectively have projected "the fastest train service ever offered to the travelling public," to come into operation on July 10.

On the same day a new European coal speed record will be established by the London, Midland and Scottish Railway, when as part of a sweeping programme of train accelerations the Manchester express will be retimed to cover the 177 miles from Wilmslow, near Manchester, to London (Euston) in 173 minutes, an average speed of 61.7 miles per hour.

This is asserted to be the longest non-stop railway journey in Europe to be scheduled at more than 60 miles per hour.

The new record run forms part of a comprehensive speed-up whereby 3,028 L.M.S. trains will be accelerated by a total amount of 6,434 minutes daily.—St. Thomas Times-Journal.

Work For the Workless

United States To Give Employment On Highway Construction

A quarter of a million men working 30 hours a week for 11 months—that will be the result, a nation-wide survey indicated, if the United States $130,000,000 federal appropriation to aid states in highway construction.

In practically every state, the construction programme, designed to make the jobless self-sustaining, was cited as a vigorous step in the right direction. Relief workers generally were enthusiastic over the provision for a 30-hour week, thus providing jobs for more workers over a longer period.

Health and Wealth

Statistics Show People Not Suffering Physically From Hard Times

In spite of widespread unemployment and wage reductions, 1932 has been so far "the best of all health years" for a large section of the industrial population of the United States and Canada. Health conditions from the first of the year to the end of May have been better than ever before for the same period of the year, statistics collected by a life insurance company show.

Barring this period the death rate among the company's industrial policyholders reached the unprecedentedly low figure of 9.3 per 1,000. The death rate for May alone was 8.8 per 1,000, the lowest, with the exception of May, 1931, ever recorded for this month. The low rates are due chiefly to large drops in the death-rates for three important diseases, tuberculosis, pneumonia and influenza.

A new low point in the tuberculosis death rate this year is expected as the basis of the low figure set during the January-May period, which is the part of the year when mortality from this disease is always highest. Accidents, even automobile accidents, caused fewer deaths than far in 1932 that in the same period of 1931, and there were fewer deaths than ever before connected with childbirth.

The dark spot on this picture of good health is caused by increases in the deaths from diabetes and cancer The mortality from cancer is much higher than ever before with a rate of almost eight per cent. since 1931.

No Great Difference

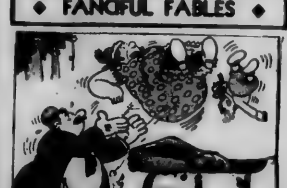
Bottom Of Ocean Is Just Like Ground Above

Tom Eadie, noted diver, answering the question of what it is like at the bottom of the ocean says: "On a bright day, and on a sandy or gravelly bottom, you can see all around you at a depth of 120 feet. You can't see that on a cloudy day, and on a mud bottom on a cloudy day you can't see anything at all and have to go by touch only. And the bottom of the ocean is just like the ground ashore. There are little rises, and little hollows. Perhaps there will be a rock sticking up here and there."

Oldest Ability

Friends of John White, of St. John's Nfld., claim that he is the oldest golfer in the British Empire. He started to swing the clubs 75 years ago at Pitlochry, Scotland, and is still playing the game at 90. He continues to use a mid-iron he bought 70 years ago.

◆ FANCIFUL FABLES ◆



"If you want to get this, you must eat only fruit, toast, lean meat, and drink orange juice."

"Then we after meals?"—Boston Herald, Madrid.

THE HOUSE OF DREAMS-COME-TRUE

A Beaverbrook Still London.

CHAPTER XXVII.—Continued.

But she had courage enough to face the consequences of that refusal, to stand up to the clatter of poisonous tongues that must ensue, and trust enough to hold on the loyalty of her real friends, knowing it would be the same splendid loyalty that she herself would have given to any one of them in like circumstance. For Joan was a woman who won more than mere lip-service from those who called themselves her friends.

Burke had never been more mistaken in his calculations than when he counted upon forcing her hand by the mere fear of scandal. But none the less he held her — and held her in the meshes of a far stronger and more binding net, had he but realized it.

Looking back upon the episode from which she had escaped unscathed and naturally sparing, Joan could almost have found it in her heart to smile at the sinister importance which, at the time, that same incident had assumed in her eyes.

It had seemed to her, then, that for Blaize ever to hear that she had been locked in a room with Burke, had spent an uncounted hour or so with him at the "honeymoon" *Ann* would be the uttermost calamity that could befall her.

He would never believe that it had been by his will of hers—as she had thought at the time—and that fierce lover's jealousy which had been the origin of their quarrel, and of all the subsequent mutual misunderstandings and alcofness, would be roused to fresh life, and his distrust of her become something intensely more difficult to combat.

But compared with the present situation which confronted her, the happenings of that past day faded into insignificance. She stood, now, face to face with a choice such as surely few women had been forced to make.

Whichever way she decided, whichever of the two alternatives she accepted, her happiness must pay the price. Nothing she could ever say or do, afterwards, would set her right in the eyes of the man whose belief in her meant everything. Whether she agreed to marry Burke, returning home in the colour of sanctity within the next hour or so, or whether she refused and returned the next morning free, but with the incontrovertible fact of a night spent at Burke's bungalow, alone with him, behind her, Blaize would never trust or believe in her love for him again.

And if she promised to marry Burke and so save her reputation, it must automatically mean the end of everything between herself and the man she loved—the dropping of an iron curtain compared with which the wall built up out of their frequent misunderstandings in the past seemed something as trifling and as easily demolished as a card house.

On the other hand, if she risked her good name and kept her freedom, she would be equally as out of from him. Not that she feared that Blaize would take the blackest view of the affair: she was sure that he believed in her enough not to misjudge her as the world might do but he would inevitably think that she had deliberately chosen to spend an afternoon on the Moor alone with Burke "playing with fire" exactly as he had warned her not to, and getting her fingers burnt in consequence—and he would accept it as a sheer denial of the silent pledge of love understood which bound them together.

He would never trust her again—nor forgive her. No man could. Love's loyalty, recked by the rough currents of jealousy and passion, is not of the same quality as the steady loyalty of friendship that calm, unshakable confidence which may exist between man and man or woman and woman.

Moreover and here above was where the fear of gossip troubled her even if the inconceivable happened and Blaize forgave and trusted her again, she could not go to him with a shrived mantle, give him herself as the gift was outwardly tarnished. The Torrearin pride was unyielding as a rock. Torrearin women had always been above suspicion. She could not break the tradition of an old family that she deserves to the man she loved! No, if she could find no way out of the web in which she had been caught she was set as far apart from Blaize as though they had never met. Only the agony of meeting and remembrance would be with her for the rest of life!

Joan envisaged very clearly the possibilities that lay ahead—serving-ed them with a breathless, torturing realization of their humiliations. To wait to be a fight—here and now—for the whole happiness that life might hold.

She turned to Burke breaking at last the tense silence which had descended upon them.

"And what do you suppose I feel towards you, Geoffrey? Why I am too content to have your with think of you as I must think?"

A faint shadow flitted across his face. The "contemporary" *Ann* would be the uttermost calamity that could befall her.

He would never believe that it had been by his will of hers—as she had thought at the time—and that fierce lover's jealousy which had been the origin of their quarrel, and of all the subsequent mutual misunderstandings and alcofness, would be roused to fresh life, and his distrust of her become something intensely more difficult to combat.

But compared with the present situation which confronted her, the happenings of that past day faded into insignificance. She stood, now, face to face with a choice such as surely few women had been forced to make.

Whichever way she decided, whichever of the two alternatives she accepted, her happiness must pay the price. Nothing she could ever say or do, afterwards, would set her right in the eyes of the man whose belief in her meant everything. Whether she agreed to marry Burke, returning home in the colour of sanctity within the next hour or so, or whether she refused and returned the next morning free, but with the incontrovertible fact of a night spent at Burke's bungalow, alone with him, behind her, Blaize would never trust or believe in her love for him again.

And if she promised to marry Burke and so save her reputation, it must automatically mean the end of everything between herself and the man she loved—the dropping of an iron curtain compared with which the wall built up out of their frequent misunderstandings in the past seemed something as trifling and as easily demolished as a card house.

On the other hand, if she risked her

tank to which he had set himself, although he had no intention of yielding.

She stared at him doubtfully

"Will you? Will you take me home, Geoffrey? . . . . Or"—bitterly—"is this only another trap"

"I'll take you home—at once, now —if you'll promise to be my wife. Jean, it's better than waiting till tomorrow—till circumstances force you into it!" he urged.

She was silent, thinking rapidly. That sudden break in Burke's control, when for a moment she had feared his promise would not hold him, had warned her to put an end to the scene —if only temporarily as quickly as possible.

"I can't think. I can't say. Geoffrey, I must have time. I shall not give you the pledge you ask merely in order to get home—and then decline to keep it! I think—truthfully—I should be quite justified in the circumstances."

He smiled a little and shook his head.

"No," he said quietly. "I'm not afraid of that. If you give me your word, I know you'll keep it. You wouldn't be—you—if you could do otherwise."

For a moment Joan was tempted, feeling tempted to take his mind letter at her and use it to entrench herself from the position into which he had forced her. As she herself had said, the circumstances were such as almost to justify her. Yet something within her, something that was an integral part of her whole nature, rebelled against the idea of giving a promise which, from the first moment she made it, she would have no smallest intention of keeping. It would be like the breaking of a princess's given parole—equally mean and dishonourable.

With a little mental shrug she dismissed the idea and the brief temptation. She must find some other way, some other road to safety. If only he would leave her alone, leave her just long enough for her to make a track for it—and she looked into the wide wilderness of mist-wrapped moor!

"It would be a virtually hopeless task to find her way to any village or to the farmstead, three miles away, of which Burke had spoken. She knew that. Even more—she felt not half consciously entirely lost their bearings in a Dartmoor mist, and, as far as she herself was concerned, she had not the remotest idea in which direction the nearest habitation lay. It would be a hazardous experiment—fraught with danger. But danger was preferable to the dreadful safety of the bungalow.

In a brief space, stung to swift decision by that tense moment when Burke's self-mastery had given way, she had made up her mind to risk the open moor. But for that she must somehow contrive to be left alone.

She must gain time—time to allay Burke's suspicions by pretending to make the best of the matter, and then, on some pretext or other, get him out of the room. It was the only of escape she could devise.

"Well, which is it to be?" Burke's voice broke in harshly upon the wild turmoil of her thoughts. "You promise—and Staple within an hour and a half! Or—the other alternative?"

"I don't think it can be either—yet," she said quietly. "What you're asking—it's too big a question for a woman to decide all in a minute. Don't you see"—with a rather shaky little laugh—"it means my whole life? I—I must have time, Geoffrey. I can't decide now. What time is it?"

He struck a match, holding the flame close to the dial of his watch. "Seven o'clock."

"Only that?" The words escaped her involuntarily. It seemed hours, an eternity, since she had read those few brief words contained in Judith's telegram. And it was barely an hour ago!

"Then—then I can have a little time to think it over," she said after a moment. "We could get back to Staple by ten if we left here at eight-thirty?"

"Three or thereabouts. We should have to go slow through this infernal mist. Joan"—his voice took on a note of passionate entreaty—"sweetest, won't you give me your promise and let me take you home? You shall never regret it. I——"

"Oh, hush!" she checked him quickly. "I can't answer you now, Geoffrey. I must have time—time. Don't press me now."

"Very well." There was an unaccustomed gentleness in his manner. Perhaps something in the intense weariness of her tones appealed to him. "Are you very tired, Joan?"

"Do you know"—she spoke with some surprise, as though the idea had only just presented itself to her—"do you know, I believe I'm hungry! It sounds very material of me"—laughing a little. "A woman in my predicament ought to be quite above such gross needs—not pangs of hunger."

"Hungry! By Jove, and will you might be by this hour of the day!" He smiled reminiscently. "Look here, we'll have supper. There are some chops in the larder. We'll cook them together—and then you'll see what a really domesticated husband I shall make."

He spoke with a new gaiety, as though he felt very sure of her utilitarian instincts and glad of the strain of the struggle of opposing wills was past.

"Chops! How heavenly! I'm afraid"—apologetically—"it's very unromantic of me, Geoffrey!"

He laughed and, striking a match, lit the lamp.

"Disgustingly so! But there are moments for romance and moments for chops. And this is distinctly the moment for chops. Come along and help me cook 'em."

He flashed a keen glance at her from the shadow of the doorway and the shadows of the room. But there was nothing in it to contradict the insouciance of her speech. Her cheeks were a little flushed and her eyes very bright, but her smile was quite natural and un forced. Burke reflected that women were queer, unfathomable creatures. They would fight you to the last ditch and then suddenly surrender, probably liking you in consequence. Perhaps Joan had come to realize that she had gone too far, that she had been playing with fire, and was ready to admit it.

Rural and Urban Residents

Of the population of Canada 46.2 per cent. are rural dwellers and 53.7 per cent. reside in urban centres. Ten years ago the proportions were 50.5 per cent. rural and 49.5 per cent. urban. The largest proportion of rural population is found in Prince Edward Island, where the country residents represent 76.3 per cent.

The Egyptians were among the world's great archers, using the bow as their main weapon in fighting.

DEFINITE HELP FOR DWELLERS IN APARTMENTS

Chickens say found to cook fish, cauliflower and cabbage

CANAPAR IS A PRODUCT OF HAMILTON FIRM

Long does a woman, in apartment, hotel or home, who has not at some time or other reluctantly foregone fish, cabbage, and cauliflower because of the odours they gave off when being cooked? Or who has not suffered from other people close by who cooked these foods regardless?

Canapar entirely does away with the annoyance. More than that, it actually improves flavor and food value. Canapar is a product of Hamilton Printing Co., a firm of long experience in the printing method of simmering and confining food and its flavours to the food concerned.

Canapar comes in large sheets, in a handsome package. When boiling vegetables you simply wet the sheet of Canapar and make a bag similar to a pudding bag. If you are steaming them you line your steamer with Canapar, arrange food and commencing, and fold corners of the Canapar to prevent steam from dropping back.

Boiled or steamed fish is particularly delicious done this way. No fishy odor in the kitchen, no gummy kettle to clean. When roasting meat, fowl or game add Canapar. It prevents the fats and juices from burning, and eliminates scouring of the roasting pan.

Canapar saves fuel. You can cook three vegetables at once

Fort Sch To Open September First

Minutes of a special meeting of the Fort Saskatchewan School Board, held in the Town Hall on Friday, 14th. of August, 1932 at 7:30 p.m.

Present:—Mr. F. Atkinson, Chairman, Trustees:—Mr. R. Todd, Mr. E. A. Brown, Dr. Grunert and Dr. Calhoun.

The minutes of the last meeting held were read and adopted, on the motion of Mr. Todd.

Consideration of the applications for the position of caretaker for the current school year was continued from last meeting. It was moved by Dr. Grunert and adopted that—C. A. Brown be appointed to the position at $25.00 per month. A months notice either side to terminate agreement.

The matter of filling the vacancy on the school staff was then taken up. Although no advertisement had been put in the papers, there were a large number of applications. It was moved by Mr. E. A. Brown and adopted that—Miss Ellison M. White be appointed at a salary of $850.00 per annum. Duties to begin 1st September next.

The following resolution made by Mr. Todd was adopted:—

Whereas the high school is becoming more and more crowded, and

Whereas practically all of the graduates from grade 8 are entering the high school regardless of their aptitude or inclination for academic studies, and

Whereas it is evident that an increasing number of students are over stressing student activities and outside interests to the detriment of their academic progress, and

Whereas the whole four grades (composed of thirty units) of the high school are considered a four year course, and in any event, should not take more than five years, and

Whereas seven units a year is considered by the Department of Education as the normal number to be taken. Be it Resolved that—

Beginning on 1st September 1932, this Board requires each student to pass in at least five units per year of the Departmental Examinations.

That prior to entering high school for the next year and in accordance with the intent and purpose of Sec. 139 of the new School Act (139 old) students failing to attain this minimum be required to appear personally accompanied by parent or guardian and teacher, before this Board in order that the reasons why the Board should allow them to continue in high school. That any students requiring longer than five years to complete the four grades of the high school be charged tuition fees at the rate of $75.00 per year for 7 units or $12.50 per year per unit if less than seven.

Moved by Mr. Brown and adopted that—the next regular meeting be held in the School, on the 29th of August, instead of the 5th. of Sept. and that trustees inspect the school and issue such orders as may be necessary, to the janitor.

It was decided that the School would open on the First of September.

It was moved by Dr. Grunert and adopted that arrangements be made to have the grass and weeds on the grounds, cut and removed.

The following accounts were passed for payment on the motion of Mr. Brown:—Beaver Lumber Ltd. $65.46 for flooring; A. M. Carruthers $10.75. The meeting adjourned on the motion of Mr. Todd.

Special Meeting of Board Of Health Held

A meeting of the Board of Health of the Town of Fort Saskatchewan, was held in the Council Chamber on the 8th., day of August, 1932, at 1 p.m. Dr. R. H. Mason, the Medical Health Officer, in the chair. Those present were Mayor G. T. Montgomery, Dr. T. W. E. Henry, W. A. Graham and J. Ritchie, Secretary. Reports were submitted regarding the epidemic Infectious Diarrhoea, which showed that the epidemic was abating.

The Medical Health Officer reported that there were certain toilets on the flat exposed to the air, and that millions of flies were breeding in and out, and recommended that these toilets be torn down, and new fly proof toilets erected. It was finally decided to have these attended to in the meantime with lath and tar paper. The Town Constable was instructed to inspect every toilet building in the Town, and report result of his inspection to the Town Council. The Medical Health Officer was also instructed to put a placard on the house on the flat condemning it as being unfit for occupation. This house is situated on the roadway.

The Board instructed the Secretary to notify two or three parties in the Town to have the manure removed within 24 hours which is piled in their yards, adjacent to their stables, failing which proceeding would be instituted.

The Board authorized the Medical Health Officer to take a sample of drinking water from each town well, once a month, and have same analyzed at the Provincial Laboratory.

The meeting adjourned.

"HEARTBREAK"

Charles Farrell and Madge Evans in a Romance of Love that triumphed over—

Romance! There is the heart of "Heartbreak." With a host of enemies between, he aped to the girl he thought he had wronged. World she understand? Would she forgive? He had to go to her. But duty, country, the world of them?

In this heartrending dilemma Charles Farrell finds himself in "Heartbreak", the Fox picture of love stronger than life, triumphant over misunderstanding, next attraction at the Empress Theatre on Friday and Saturday of this week.

Madge Evans, ravishing blonde beauty is starred with Charles Farrell, Hardie Albright, Paul Cavanagh, and John Ridge make up the superlative feature support.

"Are you the defendant?" asked the prosecuting attorney of an old negro who had taken the stand.

"Naw, sah, boss, not me."

"Then who are you?"

"Yo' the gen'leman what stole de chickens."

Grand Crowd Attends Parry Sounders Picnic

The Parry Sound Picnic has come and gone, after two postponements. It was originally scheduled for July 6, but weather interfered and it was not over until July 31, again it rained and this time it was definitely postponed. At a meeting called, Mr. G. T. Montgomery, Mayor of Fort Saskatchewan, also Chairman of the Parry Sound Picnic committee was appointed to arrange a suitable time to hold the picnic. It was finally decided to hold the picnic on Wednesday, August 3rd.

A grand crowd attended the picnic and a rough estimate would place at 2000, and 611 cars were counted passing through the gates at Elk Island Park. But this does not include what they were all Parry Sounders, some were however a great many persons, who came to this country anywhere from 20 to 40 years ago.

The committee's idea was to unite these old-timers for one day at least, and they accomplished their purpose. Those who had not seen each other for years, but who had come from the same town or district, met and clasped hands in a real old family manner.

There no doubt to it many postponements and the very uncertain weather of last Wednesday, the workers lolled for the day, did not put in appearance. But the sports program was carried off, and there was one item on the program that the Parry Sounders thoroughly enjoyed, that was the log rolling or boring contest, something that the younger generation have little about. The older fellows from the river districts of their home district, took to logs, (and to the water too), provided for this purpose.

There was Frank Hisey of Rose Creek, who has'nt rode a log for a good many years, and Wm. Pearce and Archie Bennett. These hardy fellows not equipped with caulked boots, but with rubber soled shoes, took innumerable duckings much to the amusement of the big crowd that watched from the lake bank. After many tries on the part of the contestants Wm. Pearce was eventually declared the winner.

Two baseball games were played, one in the afternoon between Bruderheim and Lamont, which the rain put a stop to a one-sided affair with Lamont ahead.

In the evening Lamont and Fort Saskatchewan tangled in another one-sided game with the Fort running by the score of 16-2. Brown and free hitting characterized both contests at least on the losers side. Ralph Pocock, pitching for the local team was unbeatable in the game.

The picnic could be call a hugh success and no doubt the Parry Sounders will make this an annual affair, if old man sol let's them.

COMING EVENTS

Brown Betty Teapots ..... 35c each.
1 Gallon Crocks ..... 15c each.
Yellow Mixing Bowls ..... 15c each.
Jones, Graham & O'Brien

The 40th Anniversary of "SALADA TEA

For 40 years SALADA has given the finest quality in tea. Present prices are the lowest in 15 years.

Lessons Of The Depression

A cabinet minister in one of the prairie provinces has expressed the view that the present business depression in this country is "a blessing in disguise" because it is teaching people many lessons which it is in their own interests and in the interests of the country at large they should learn.

While one can agree that many people are learning some rather hard lessons these days, taught in the school of bitter experience, we are hardly prepared to go so far as to regard such experiences as "blessings," even in a disguised form. The men and women out of work in cities and towns, and the farmers who have suffered complete crop failure year after year, and who have not been able to market such meagre crops as they may have succeeded in raising at a price above the bare cost of production, and both of which groups have, of necessity, been forced to subsist on Government and Municipal relief, and go deeper into debt for that relief, fail to see where the "blessings" come in.

But it cannot be denied that some valuable lessons are being learned, hard and bitter though the experience of learning these lessons may be. And if these lessons are thoroughly learned, taken to heart and not forgotten when the difficult days of the present have passed, then the trials and hardships of the present will not all be lost; there will be some profit in future years.

Quite a few people, for years, have learned to appreciate the value of having a little something in reserve, something laid by for a rainy day, or the old adage puts it, or, perhaps, on the prairies we could more appropriately say, for a dry year. The mistake of spending up to the last dollar of one's income in years when they had become has been improved upon therefore the different steps of the present have passed, then the trials and hardships of the present will not all be lost; there will be some profit in future years.

Quite a few people, for years, have learned to appreciate the value of having a little something in reserve, something laid by for a rainy day, or the old adage puts it, or, perhaps, on the prairies we could more appropriately say, for a dry year. The mistake of spending up to the last dollar of one's income in years when they had become has been improved upon therefore when

BACKACHE NOT DUE TO AGE

Many people think that backache is a trouble that comes inevitably with the coming years, but this woman of 71 proves that it is not.

"I suffered for a long time from backache," she writes, "but put it down to my age (71). Reading your advertisement, I thought I would try Zutoo-Kem Pills. I have been taking it for some time and have found great relief. I thought you would like to know it has done me a world of good." —(Mrs.) H. B.

Pains in the back are the penalty paid for inactive kidneys. Kruschen Salts can be safely trusted to set the matter right. Zutoo-Kem contains just what Nature needs to persuade your kidneys back into a healthy normal condition. After that, your blood throws off all impurities, there's no more trouble; no more pains; backache becomes merely a bad memory.

WORLD HAPPENINGS BRIEFLY TOLD

Manitoba's only salt well has started production in commercial quantities.

France has agreed to make no more forward revision of her debt to the United States until conditions are more favorable.

Richard Nicholls, Bosman of the Centre Hotel, Swansea, who does not bet, has received £2,000 sterling to stand 48 consecutive Derby races.

Mill stones used for grinding wheat 200 years ago will be used again by Albert Miller, who is at present preparing to operate a water mill near Brighton, Ont.

There was a substantial gain in the Prairie Provinces wool clip last year. Alberta clipped 4,554,000 pounds, Saskatchewan 1,000,000 pounds, and Manitoba 1,200,000 pounds. Total 7,-261,000 pounds.

President Hoover's fortune has increased from $4,000,000 in 1920, when he retired from active business, to $700,000 at the present time, the magazine Fortune asserts in its August issue.

The appointment of S. J. Hungerford, acting president of the Canadian National Railways to be a member of the Board of directors of said company, was announced.

A great aeroplane, believed the largest land 'plane ever constructed, has been completed in the eleventh hour at the Ford Motor Company, Dearborn, Mich., and the plane is now kept in the immediate future.

Adding to his already huge holding of big trees, Frank J. D. Bampton, of Montreal and Assiniboia Rapid, U.S., has completed the purchase of an additional 200 acres of giant Douglas firs on Vancouver Island.

While delving his own cornfields, Dr. Hugo Schnorr, Giegish expert, tried to pass another worker out and was late a hero with that force that he knocked it down at Hughes Gardens.

The collection of nineteenth-century British Empire postage stamps gathered by Dr. H. A. Jones, president of St. John's College, Cambridge, Mass., was sold recently for nearly $50,000.

Phosphorus for medicinal use is obtained from distillation of bone.

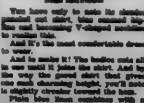
Newspapers Win Prizes

Premier Weather Reminder Awards At Hamilton Convention

Prizes were awarded to the leading weekly newspapers at the annual convention of the Canadian Weekly Newspaper Association when the Hamilton (Ont.) Spectator, published by C. W. Bishop, was awarded the Charles Cockshutt cup, open to those with circulation over 1,500 and under 2,500. Second prize went to La Cloche (Que.) Whalebone, and third to the Dalhousie Leader, of Carleton, Man.

The High Average shield in the competition for papers under 1,500 circulation was won by the Grand Forks, B.C., Gazette. A. F. Mason, publisher. There was a tie for second between Almonte (Ont.) Dispatch, and Carling, Newfoundland, Western Star. Swan River (Man.) Star and Times was third, and Flin Flon Miner, of Man. Loudon School, publisher, was fourth.

A special prize for the best front page display donated by J. A. McLaren, of the Derby Examiner, was won by the Yorkton (Sask.) Enterprise, published by E. H. Wynn.



THREE HELPFUL LESSONS ARE TOLD THEMSELVES BY THREE WOMEN FOR THEIR SISTERS

THEY SUFFERED

You have only to note its charming face and beautiful bobbed hair to realize that Dorothy Vodgood suffers from headaches.

And it's the most comfortable dress to wear.

And to make it! The bodice cuts all in one until it joins the skirt. And by the way the skirt is cut it has only one such alarming height, you'll note in slightly circular around the hem.

Finish this linen sundress with a blue and white printed crepe linen in the collar and cuffs.

Style No. 271 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inch bust. Size 38 requires 5¼ yards of 35-inch plain material with 1¼ yards of 35-inch figured material.

It is equally attractive carried out in one material with the figured used for cuffs and collar.

Price 15 cents. Please fill coupon in clearly or coin (coin preferred). Wrap coin carefully.

SUNDAY SCHOOL LESSON

AUGUST 16

THE TEN COMMANDMENTS II.

Golden Text: "Thou shalt love thy neighbor as thyself." Leviticus 19. 18.

Lesson: Exodus 20.12-21.

Devotional Reading: Psalm 15.

Explanations and Comments

The Law Of Filial Piety, verse 12.—Then shalt honor here and respect thy father and thy mother. This is the first commandment with promise, Ephesians 6.2: "That thy days may be long upon the land which the Lord thy God giveth thee." The promise connected with this command is common with almost all the commandments. In the ancient people of God, as God ruler be the main thing to the individual. The people among whom the Hebrew family ideal is maintained, whose children render obedience to parents during the time of immaturity, and support them, will be the nation of strength, retaining its land and enjoying its blessings, and abiding." "The motive and not the reward, for honor thy father, could it be the true one; but for glorious but general out of Egypt, it was true. —H. W. Fulton.

The Law Of Life, verse 13.—Thou shalt not kill. As the commandment were translated "not" is not the most exact word for kill. The English Revised Version (not the American), translates the sentence, "Thou shalt do no murder." The prohibition does not include every kind of killing, but only that kind which is murder. Under this title a man is under no more his life or that of his fellow than he is charged with manslaughter, not with murder. One person may be killed or executed by a personal motive or passion. The soldier in battle is not actuated by personal hostility against the one whom he kills, he is fighting for his country. The law of self-defense does not violate the law of murder.

The Law Of Purity, verse 14.—Thou shalt not commit adultery. Jesus made this commandment more searching when he said, "Whosoever looketh on a woman to lust after her hath committed adultery with her already in his heart," Matthew 5.27-28.

Adultery is the violation by a high plain when he said it was impossible to deal with the question of divorce. Jesus declared that the only ground for divorce was fornication, Matthew 19.9. Paul declared that a believer could not be divorced by a husband or wife who was an unbeliever, 1 Corinthians 7.12-15. Adultery is the violation of the marriage vow, and does not violate the law of adultery.

The Law Of Property, verse 15.—Thou shalt not steal. Theft is the taking of property without the permission of the owner. Robbery is the taking from another man's property, though it be done but temporarily, against the owner's will. Kidnapping is the stealing of a man, a woman or a child. Fraud is the getting of property by deception. Embezzlement is the misappropriation of money or property entrusted to one's care. Counterfeiting is the making of money or other articles of value in imitation of genuine ones. Forgery is the making of a false document or signature. Two people wrongful accusations. Two people wrongful accusations. Two people wrongful accusations

A Challenge To Wheat

Remarkable Growth Of Industries In West In Period

Wheat may still be king in Western Canada, but its position is no longer unchallenged. With the development of the country other industries have been springing up, and a return from the Bureau of the Dominion Bureau of Statistics shows the extent to which the so-called Prairie Provinces, Manitoba, Saskatchewan and Alberta—have become centres of manufacturing industry.

The gross annual value of manufactures in these provinces reaches a total of $200,000,000. There are more than 2,000 manufacturing establishments, with a capital of over $200,000,000, employing nearly 30,000 hands, and paying in salaries and wages $30,000,000.

The ten leading industries in the order of their importance based upon the gross value of products are: flour, and feed mills, slaughtering and meat packing, petroleum products, railway rolling stock, car and allied, metallic sheet, butter, printing and publishing, breweries, bread and other bakery products, printing and bookbinding. These industries have an annual production of over $200,000,000.

The principal manufacturing city is Winnipeg, which has 543 establishments employing nearly 20,000 hands and producing a value of more than $94,000,000. Other leading manufacturing centres in the order of their importance are: Calgary, Edmonton, Regina, St. Boniface, Saskatoon, Brandon and Medicine Hat.

Appalling Ignorance

Some Price American Tourists Shocker For Hot Weather

Until recently the price American tourist story was about a man who stopped at a gas station a few commers ago with state on the side of his car in question. Of the many he reported to find "this side of Montreal." Now an equally authentic one comes to hand. A local young thing from New York State went into a town bank to change some United States currency for Canadian. When the Dominion bills were handed to her she looked at them in evident confusion and confessed, "I don't think I'll know how to use your money. I've never had anything to do with these pounds and shillings before." The teller is alleged to have run for the tea water.

Possible Source Of Safety

British Scouting Interests Have Expanded Tremendously Since Founding.

Experts representing British breeding interests are at present studying Western Canada as a possible source of high quality horses, according to officials of The Saskatchewan Department of Agriculture. A number of experiments have been conducted by the University of Alberta with respect to the suitability of soils in northern Alberta and they foreshadow the growing of better feed of the required nature. It is stated that certain soils found to be unsuited for wheat produce an excellent mutton variety.

Canoe Up Dueling

Jack Canuck, Western brand, is one of the phenicest and most cheerful fellows on earth. He never loses heart. Rain, sleet, hail, drought, blizzes of grasshoppers hail, worst, rust and plagues worse than beset the Egyptians may banish all hope of profit, but he still goes on smiling and hopes for better times next year or the year after that.

"Your newspaper is upside down." "Yes, I am half-hearted."—Montreal Star.

Has Perfect Table Manners

Deerhound Believes He Properly Ate Well Trained Child

Any dog could be taught perfect table manners if people would only let him begin when he is a pup, says Mrs. Charles Cade, a 7-year-old deerhound, whose home overlooks Washington Square, and who claims the championship for having sat at the table with more conductors than any other dog in New York.

Nearly two six months old when Mrs. Cade got him, he was a terror in a flat and being still, after the manner of well disciplined Norwegian children.

After he had learned to place two block posers on the table he was taken in an entertainment from Arnold Genthe to the Strozin, and it must be some to New York did a head waiter ever refuse to let him into a dining-room.

It is because New York people are not sufficiently sophisticated to know an intelligent animal when they see one that dogs are excluded from the hotels here, according to Mr. Van Loan.

"If you take the trouble to compare a dog's logical reasoning with that of some of your acquaintances you will see no difficulty in admitting that the animal has at least as much humanity as the human for arriving at certain definite conclusions," he said.

As proof of that argument, Mr. Van Loan cited the case of a dog who was caught onto the advantages of being able to stand and walk on his hind legs.

"It WASN'T simply because he wanted to do what Augustus Mais was trying to teach him, but because he found that the higher he held the meat he could see and to more advantage," Mr. Van Loan explains.

Look Like Admirals

Gaudy Uniforms Of Belgian Hotel Porters Causing Trouble.

Though Belgium has no navy to speak of the question of naval uniforms is a cause of controversy. Complaints are heard that the regulations are not explicit enough, with the consequence that all the commissionaires, sport so much gold lace that everyone takes him for an admiral.

A commissionaire is anything the maître; He chief task is to evolve a simple yet dignified dress, with a minimum of lace. At the moment the commission is considering how to put an end to the fancy of hotel porters in the matter of costumes. Like barbers' assistants by the University of Alberta in with respect to the suitability of soils in northern Alberta and they foreshadow the growing of better feed of the required nature. It is stated that certain soils found to be unsuited for wheat produce an excellent mutton variety.

Co-Operation In Hosiery

Every Country Using Its Dependent Resources Is Prosperous.

This world has no use for hermits. We are built on the social plan. The fellow who goes along without regard for his neighbours will not get far and he finds the brick wall. The man who thinks people cut only necessity in clothing himself to. This world is a mean like a mirror—the smile at it and it will smile back at you; scowl at it and it will scowl in return. Co-operation is a great word. There isn't a created thing that does not depend more or less upon other. The beasts have to hang, yet go they forth all of them by hands." Don't be one of the "hangings" that flock alone.

Finishing Post Office

A floating post office has been established at Detroit by Frank Hoffman, Jr. It is an all-steel craft with sorting vestibule and berth. Recently the company received a contract for a suitable vessel for delivery and collection of mail to and from Detroit River traffic in transit. The new vessel is 65 feet 6 inches long over all, and is propelled by a 250-horsepower marine gasoline engine.

Canadian Pacific Olympic Wrestlers

The Canadian Pacific Railway steps into the sport limelight by providing four wrestlers for the Olympic Games at Los Angeles. These athletes are employed differently regarding their work with the railway, and will battle for world honors in their particular line of sport. Above illustration shows the men with their coach. Left to right they are: Howie Thomas, former apprentice, Angus Sheppe, for five years Provincial and Dominion Champion and British Empire Champion in 1930, 145 lb. class; Harry Madison, Canadian Pacific Express man, winner Provincial and Dominion championships two years running, 161 lb. class; and Frank Seaton, team coach; J. Stockton, Provincial and Dominion champion and three times competitor at the Olympic Games, 174 lb. class; and Harry Rowland, son of Alf. Rowland, Angus Sheppe discipleton, Dominion champion one year and Provincial champion five years, 134 lb. class.

Stolen Land Is Phone Calls

Apparently Had Value To Say Them Other Notions

Statistics by the Bell Telephone Company showed that United States used the word "hello" regularly when phone calls. They latined eight and one—half times as much as Japan, and Japan talked about one and one-half times as much as Canada.

The United States led with a total of 11,113,076 phones, followed by Germany with 1,267,418 and Great Britain with 1,632,000. Canada has 1,-402,067 and Japan 548,702, which is 1.4 per 100 population.

Canada leads the world in number of telephones in cities of 50,000 people or over. In the larger centres she has 21.7 telephones per 100 people. Toronto can boast a higher percentage of telephones than any city in the world.

The largest toll paid for a single call out of Toronto, according to A. E. Gould, district manager of the company, was $400 It was paid on a transaction involving $1,000,000, and the party putting in the call was quite pleased to pay it.

Youngest Grandmother

Manitoba Woman Becomes Grandmother At Age Of 30 Years

Mrs. Herbert Lauzon, of Cornwall, Ont., is said the youngest grandmother in Canada, as reported by the Canadian Press, July 22. That distinction belongs to Mrs. John Farrow, of Deloraine, who became a grandmother at the age of 30 years and three months, compared with Mrs. Lauzon's record of 30 years and 2 months.

Mrs. Farrow got married at Wigton-hall, Bosco, in 1903, at the age of 14. Her eldest daughter, Rena, married Alfred Lavallee, also at the age of 14, and the first grandchild, Louis Alfred was born April 18, 1930, when his grandmother was just 30 years and 3 months old, for she was born December 20, 1899.

This sprightly grandmother, who is now 41 years of age, is the mother of 11 children, the youngest of which is just five months old.

A new machine in England tells one's weight and presents a bar of chocolate for a penny.

Daily Shower For Trains

Locomotive Crews To Have Most Modern Apparatus In World

English bosses may lag behind American in bathroom equipment, but when it comes to baths for railway trains London claims to have apparatus which is "the most modern in the world." It is installed in a great steam plant at Northfields, where every morning before work the trains receive their daily dip.

At each side of the railroad track are four tall posts "from which arc-uous 'flexuels' hang down like tentacles." The plant also have nozzles. As the train passes by at a slow five or six miles an hour, water sprays from the nozzles and "the flexuels" fly round like flails, shooting many water in floods." The train passes on, clean and dripping from roof to sides. After the "wet shampoo," various steamers are turned on to finish the cleaning process.

Bathroom facilities for washing engines and coaches will be welcomed by New Yorkers who sometimes find that a train, caught in open air during a real shower, drips takly water from every ventilator.

On a hot summer day English trains must be cool as well as clean after the morning shower. In American trains are often "cooled off" on the roof to cool them before a run. The use of modern refrigeration in railway equipment for shooting them full of cooled air before they start out is still limited.

Stood Was Frightened

Sale Of Horse Turns White When Animal Sees Tractor

When an aeroplane landed in a field near Wrexham, England, it frightened a racehorse, owned by the daughter of Colonel Alfred McAlpine, so badly that its black mane turned completely white and there are streaks of grey in its tail. As the machine approached the ground the animal suddenly jumped up in fright from behind it tree and galloped in front of the plane until it landed. Four days later the mane started to lose color.

Nearly 20,000,000 acres in Alberta have been planted to crops this year.

England Helped By Conscience Gifts

Treasury Profits From $20,000 To $50,000 Every Year

It is a source of "real money" gratification to the British Chancellor of the Exchequer these days that the old England conscience, whatever may have happened to the New England brand in the United States, is still working.

Disturbed consciences are worth between $20,000 and $50,000 annually to the British treasury. Not long ago a windfall of $25,000 was received from a citizen whose conscience presumably had given him a great deal of concern. In the last few days such moneymoney gifts included four medals. When the treasury accumulates enough money, Mr. Snowden is to make it worth while a conscience sensitive is born.

Evasion of income tax is believed to be responsible for most such efforts to make belated restitution to the state. The inland revenue officials are willing to concede, however, that many of these contributions come from individuals who made genuine mistakes in their original returns.

The Attorney-General recently stated in the House of Commons that where a man voluntarily discloses that he has even money and pays it, no proceedings will be taken against him in the courts. In such cases the money is treated "ex gratia" and not the same considered to be owed by the man whose conscience has pricked him and a compromise is reached.

C.N.R. Steamer Sold

"Canadian Commander" Has Been Purchased By Italian Syndicate

The steamship "Canadian Commander," now lying in Halifax Harbor, has been sold to an Italian syndicate, Andrew Allan, general manager of Canadian National Steamships, announced. This is the first Canadian National steamship to be sold in accordance with the decision of the directors to reduce the fleet.

The sale price was stated to be approximately $22,000 The Italian syndicate is headed by Signor Manzio, who has been in Canada for some time negotiating the purchase.

The "Commander" was built by Swan, Hunter, Limited, of Newcastle, England, in 1920. She was launched in 1920 and is a vessel of 8,169 tons dead weight.

Expectation is that the "Commander" will be used in Mediterranean trade. According to the sale conditions, her name must be changed, as well as her flag and registry. She will must not be used in competition with remaining Canadian National steamships.

Seven of the steamships are for sale. Negotiations with Greek interests have been under way for some time in connection with the sale of one or more of the boats, but no agreement has been reached.

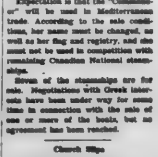
Church Slips

Western Exchange—After the collection had been taken the choir sang "It Is Enough."

Canadian church bulletin—7.30 p.m., subject, "Is Liquor Desirable?" Anthem, "O, Taste and See."

Order of services in a Brooklyn church—Sermon. "Thou Shalt Not Steal." Offertory, "Steal Away" (Negro Spiritual).

"Build" used to 22 to 40 per cent. gas.



Patient Relation: "Coming to the Exhibition?"

"No, I saw it in 1916."

"But the artists are not the same."

"No, but the pictures are."—Oster in Stockton, Mine.

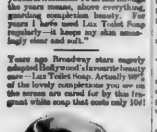
"WHY LOOK YOUR AGE?"

asks Billie Burke

"I really am 39," says the famous star. "And I don't see why any woman should look her age.

"We on the stage must keep our youthful freshness. To do this through the years means, above everything, guarding complexion beauty. For years I have used Lux Toilet Soap regularly—it keeps my skin amazingly clear and soft."

Years ago Broadway stars eagerly adopted Hollywood's favourite beauty care—Lux Toilet Soap. Actually 9 of the lovely complexions you see on the screen are cared for by this fragrant white soap that costs only 10¢!



"I'm 39"

THE HOUSE OF DREAMS—COME—TRUE

— BY —

MARGARET PEDLER

(The Beloved Vagabond of The Herald Daily Mail)

Holder & Stoughton, Ltd., London.

No one, watching Jean as she accompanied Burke to the kitchen premises and assisted him in the preparation of their supper, would have imagined that she was acting her part in any other capacity than that of willing playmate. She was wise enough not to exhibit any desire to leave him alone during the process of carrying the requisites for the meal from the kitchen into the living-room. She had noticed the sudden mistrust in his watchful eyes and the way in which he had instantly followed her, when, at the commencement of the proceedings, she had unthinkingly started off down the passage from the kitchen, carrying a small tray of table silver in her hand, and thereafter she refrained from giving him the slightest ground for suspicion. Together they cooked the chops, together laid the table, and finally sat down to share the appetising results of their united efforts.

Throughout the little meal Jean preserved an attitude of detached friendliness, laughing at many small jobs that cropped up in the course of conversation and responding gaily enough to Burke's efforts to entertain her. Now and again, as though unconsciously, she would fall into a brief reverie, apparently preoccupied with the chaste thing her before her, and at these moments Burke would refrain from distracting her attention, but would watch intently, with those burning eyes of his, the charming face and sensitive mouth touched to a sudden new seriousness that appealed.

By the time the meal had drawn to an end, his earlier suspicions had been lulled into tranquillity and over the making of the coffee he became more than the big, overgrown schoolboy and jolly comrade of his late tempestuous moments. It almost seemed as though, in placing her, to atone in a measure for the mental suffering he had thrust on her, he was endeavoring to keep the vehement lover in the background and show her only that side of himself which would serve to reassure her.

"I rather fancy myself at coffee-making," he told her, as he deftly manipulated the little coffee machine. "There!"—pouring out two brimming cups—"taste that, and then tell me if it isn't the best cup of coffee you ever met."

Jean sipped it obediently, then made a wry face.

"Ough!" she ejaculated in disgust. "You've forgotten the sugar!"

As she had herself slipped the sugar-basin out of sight when he was collecting the necessary coffee paraphernalia on to a tray, the oversight was not surprising.

It was a simple little ruse, its very simplicity its passport to success. The fatuations of R—Jean's small, screwed-up face of disgust and the hasty way in which she set her cup down after tasting its contents might have thrown the most suspicious of mortals momentarily off his guard.

"Oh, Jove, so I have!" Instinctively Burke sprang up to rectify the omission. "I never take it myself, so I forgot all about it. I'll get you some in a second."

He was gone, and before he was half-way down the passage leading to the kitchen, Jean, moving silently and swiftly as a shadow, was at the door of the long French window, her fingers groping for the catch.

A draught of cold, mist-laden air rushed into the room, while a slender form stood poised for a brief instant on the threshold, silhouetted against the white curtain of fog. Then followed a hurried rush of flying footsteps, a fitting shadow clearing the thick pall of vapour, and a moment later the wraiths of pearly mist came flitting unhindered into an empty room.

Finally Burke plunged through the dense mist that hung outside, her feet sinking into the sodden earth as she ran across the wet grass. She had no idea where she might go, but her speed desperately onwards till she reached full tilt into the bank of mud and evergreens that formed a boundary hedge against the manor. The sudden impact nearly knocked all the breath out of her body, but she dared not pause. Like a hunted thing, she fled for the hidden sugar-basin might delay Burke long enough to give her a chance of escape. But she knew very well that he might change upon it at any moment, and then, [illegible] her flight, come in pursuit.

Panting, she broke her way through bushes and [illegible] shrubs, bruised by sharp-angled stones and tripped by the numerous bushy growth of gorse, she scrambled over the wall and came sliding down upon her hands and knees into the hedge-trough that ran its further side. And even as she picked herself up, shaken and gasping for breath, she heard a cry from the bungalow, and then the sound of running steps and Burke's voice calling her by name.

"Jean! Jean! you little fool! . . . . Where in the name of goodness are you? Jean! Jean! . . . ."

But she made no answer. Distraught by fear but he should overtake her, she raced recklessly on and into the fog, heedless of the fact that she could not see a yard in front of her—even glad of it, knowing that the mist hung like a shielding curtain betwixt her and her pursuer.

The strange silence of the mist-laden atmosphere hemmed her round like the silence of a tomb, broken only by the sucking sound of the cozy turf as it pulled at her feet, clogging her steps. Lance-sharp spikes of gorse stabbed at her ankles as she trod it underfoot, and the permeating moisture in the air soaked swiftly through her thin summer frock till it clung about her like a winding-sheet.

Her breath was coming in sobbing gasps of stress and terror; her heart sounded in her breast; her limbs, impeded by her clinging skirts, felt as though they were weighted down with lead.

Then, all at once, seeming close at hand in the misleading fog which plays odd tricks with sound, as well as sight, she heard Burke's voice, cursing as he ran.

"Jean! Jean! You little fool! . . . . Where on earth are you? . . . . Jean! Jean! . . . . Jean! Jean! . . . ."

He stopped and listened. "Jean a lonely lady baby without all your children!"

She smiled up at him.

"Just a little," she acknowledged. "When I came back from those stupid committees, which are merely an excuse for half the old tabbies in the village to indulge in a squabble better the other half, I couldn't help feeling as if it would have been nice to find Jean here to laugh over them with me. Jean's sense of humour is refreshing; it never lets one down. However, I suppose she's quite right to leave Moor by moonlight, as I mostly grumble."

Blaise shook his head.

"Much moonlight they'll see!" he observed. "I rode through a thick mist coming back from Hedge Hollow, and I'll be a blanket fog on Dartmoor tonight."

"Oh, poor Jean! She'll be so disappointed."

Tormarin sat down on the opposite side of the hearth and lit a cigarette. The dancing firelight flickered across his face. He was thinner of late, his mother thought with a quick pang. The lines of the well-beloved face had deepened; it had a worn—almost ascetic look, like that of a man who is constantly contending against some thing.

Lady Anne looked across at him almost beseechingly.

"Son," she said, "have you quite made up your mind to let happiness pass you by."

He started, roused out of the reverie into which he had fallen.

"Mother, don't think I've got any say in the matter," he replied quietly. "I've forfeited my rights in that respect. You know that."

"And Jean? Are you going to make her forfeit her rights, too?"

"She'll find happiness—somehow—elsewhere. It would be a very short-lived affair with me"—bitterly. "After what has happened, it's evident I'm not to be trusted with a woman's happiness."

There were [illegible] of [illegible] in the [illegible] Blaise could not answer [illegible] instructions about the bestowal of his fishing tackle. Lady Anne spoke quickly.

"I don't think so, Blaise. Not with the happiness of the woman you love." She laid her hand on his sleeve for as she passed him on her way into the hall to welcome the truant, Jean had kissed Lady Anne, saying, "and see what she says. I think you'll find she'd be willing to risk it."

When she had left the room Blaise remained staring impassively into the fire. His expression gave no indication as to whether or not Lady Anne's words had assured him of any fresh impulse of decision, and when, presently, his mother and Nick entered the room together, he looked up rather as casually as though no emotional depths had been stirred by the recent conversation.

"Hullo, Nick! Had good sport?"

"Only so-so. We had a jolly time, though—out at Hotworthy Bridge. Yes; I had the dense of a business getting back from Exeter this evening. It was so misty in places we could hardly see to drive the car."

Blaise nodded.

"Yes, I know. I found the same. It's a surprising change in the weather."

"Poor Jean will have had a disappointing trip to Dartmoor," put in Lady Anne. "The mist is certain to be and up there."

"Dartmoor? But she didn't go—surely?" And Nick glanced from one to the other questioningly.

(To Be Continued.)

Doughs' Egyptian Liniment is remarkable in its quick, effective action. Relieves instantly burns, sprains, toothache and neuralgia. Invaluable for sore throat, croup and quinsy.

Cyclonic Wind Sweeps Through the Town

A windstorm of cyclonic proportions struck Fort Saskatchewan about 8 p.m. on Thursday, August 11th. Whilst it did considerable damage, fortunately the area affected was comparatively small. Travelling from the South-East to the North-West, it did no damage before reaching this town; at least, enquiries made have yielded no information of damage South-East of the Town. Luckily, the course the storm was such that the closely built-up portions of the town were not damaged. Had it followed a slightly different path the toll of damage would have been vastly greater. South of the railway track, a granary owned by Mr. Derocher was blown away and a quantity of wheat contained in it was scattered. The house owned by Adolph Theroux on the same side of the railway track was damaged, and, on the North side of the track, much greater damage was done. Chimneys were blown down, roofs damaged, doors torn off their hinges and carried away, telephone wires and poles blown down and electric light wires badly damaged. The house occupied by W. E. Roberts lost chimneys, as did those occupied by V. Black and F. Murray. The chimney on the roof of the garage and barn owned by P. W. Smith was carried away, as were the doors of the building. The barn/shed here was occupied by R. Gordon Fraser whose property chanced to be in the centre of the storm. His garage was lifted bodily and carried away and deposited in fragments over a large area. His house was also damaged, the gable in it's flight having struck it. Before striking the house, the garage came into contact with the pump in the yard breaking the pump and breaking even the pipes below the ground level. But for this the house would have been damaged much more. As it is, Mr. Fraser's loss will exceed that of all others combined. A large number of tools in his garage were carried away and anyone finding any of these is kindly requested to return them. Many other articles stored in the garage were damaged or destroyed and the roofs of three small outbuildings were wrecked.

Evidence of the fury of the wind and the freakishness of it is shown by several facts. A sill from Mr. Fraser's garage struck the house occupied by Jack Westover, breaking both the inner and outer walls and the wind at the same time shifted the house and stable behind it. A window from Mr. Fraser's garage crashed through the roof of a shed owned by Charlie Shaw, and, as Bigsby would say, believe it or not, the glass in the window was not even cracked! The front gable of the garage struck and damaged the roof of Gabriel Semeniuk's house. Windows generally in the path of the storm suffered badly, many being blown in, including those at Jack Westover's, Harvey Cranston's and Mrs. E. LeBlanc.

Probably the most striking illustration of the force of the wind is it's effect on the water in the Saskatchewan River. Eye-witnesses state that the bed of the River was momentarily visible and that water was sucked up to a height of 150 feet. This testimony is borne out by the fact that a boat on the North side of the River, demolishing a granary full of grain shop and flooding his yard. Then the force of the storm apparently expended itself, as there are no reports of other damage from the North side.

The Alberta Government Telephone System and the Calgary Power Co., are to be complimented on the promptness with which they repaired the damage to their lines and restored service to their customers, this being done the morning after the storm. On the night of the storm the Calgary Power Co., took the precaution of cutting off the current, in case of fire would arise through the tangled wires.

Municipal District Hold Monthly Meeting

The Council of the Municipal District of Clover Bar, No. 917, held their meeting on the 13th instant. with all members in attendance.

The Secretary reported that the applications to the Board of Public Utility Commissioners regarding the cancellations of the subdivisions Ridgeway Park, Ridgeland, Terrace Heights and College Heights had been approved, and the Orders issued. The final hearing of the applications will be heard by the Board at their offices in the 15th of October.

The matter of recommending to the Director of Surveys of Alberta the cancellation of the road diversion in the Nort West of Sec. 9-53-22-4 was left in abeyance until the next meeting in order to give Councillor Keith Mrs. Rogers, Vice-President of the Mrs. Rogers, Vice-President of the W. I. and Mrs. Price, 1st., Vice-President of the U.F.W.A gave two talks of exceptional value. Mr. Craig, Deputy Minister, closed the address with outlining the purpose and ideals that the Department had in mind concerning the Women's course. After the banquet Mr. H. F. Spencer, M.P. gave a very instructive and entertaining address on the operation of the House of Commons. This address was interspersed with many amusing incidents.

On the Thursday evening the ladies of the group delighted the staff and their friends with an impromptu concert and on Friday afternoon Mrs. W. J. Elliott, assisted by the wives of the staff members entertained the farm women at Tea on the lawn at the school. Those assisting were Mrs. Heckbert, Mrs. Whitbread, Mrs. Andrew and Mrs. Edgar.

On leaving for their homes the Farm Women were loud in their praises of the manner of the course and pleased with the determination to have 100 Farm Women enjoy the course next year.

Canada has 372,396 more males than females in its population, according to returns from the last census made public by the Dominion Bureau of statistics. The total males were 5,274,541, and females 5,002,145.

In the long run it does not pay to make, or buy, or sell trash.

George S. Hale, of Mount Royal, Que., superintendent of the Montreal branch of the Ford Motor Company, disappeared without leaving a single clue while on a fishing trip.

NO ATTEMPT TO COLLECT OVER-PAYMENT

Definite denial was made by Premier Bennett in a statement recently made at Edmonton, of rumored plans of the Wheat Pool to collect from this year's crop certain losses sustained in previous years. Premier Bennett's statement to The Edmonton Journal was as follows:

"I have been surprised to hear that these rumors are again being circulated throughout the province with respect to the Wheat Pool, to the effect that an attempt will be made to make up the losses in connection with the 1929 crop by deductions from any crop delivered to the Pool this coming crop season.

"I wish to again state, as I did last year, that there is no truth whatever to the suggestion. The agreement between the government and the Wheat Pool, as ratified by the legislature, provides for certain fixed payments for a period of twenty years. No attempt whatever will be made to collect any sum from the various growers as individuals, but we fully expect the Pool will be able to make its annual payments out of its total earnings."

FARM WOMEN ENJOY SPECIAL COURSES AT VERMILION

Forty-eight busy farm women, from the Northern part of the Province attended courses at the School of Agriculture, Vermilion These courses are under the direction of the Hon. Geo. Hoadley and are sponsored by the two great Women's organizations of the Province—the U.F.W.A. and W.I. Most of those who attended are nominated by the W.I. or the U. F. W. A. bonds, though many attend by making application direct.

In addition to the forty-eight who took the entire four days course some fourteen women attended during certain days and classes. The two main features of the course are rest and change, and in addition to these classes are given which are of special interest. The regular courses covers cooking and sewing but special features such as growing flowers, cheese-making, canning furniture, fruit growing, etc., are introduced.

On Monday evening all of the ladies were entertained at tea at the farm home of Mrs. Mable Robinson.

Wednesday evening, Miss Storey had a delightful banquet at which Mrs. Rogers, Vice-President of the W. I. and Mrs. Price, 1st., Vice-President of the U.F.W.A gave two talks of exceptional value. Mr. Craig, Deputy Minister, closed the address with outlining the purpose and ideals that the Department had in mind concerning the Women's course. After the banquet Mr. H. F. Spencer, M.P. gave a very instructive and entertaining address on the operation of the House of Commons. This address was interspersed with many amusing incidents.

Mutual Trust Must Be Re-established

One of the most interesting and thought provoking articles it has been our privilege to read for some time, and in these days of depression and pessimism it is so refreshing as a heavy shower on parched land, appeared in a recent issue of Toronto Saturday Night from the pen of Merrick Spendlove. a gifted young Russian engineer and thinker now resident in Canada. Mr. Spendlove knows his native land and has written thoughtfully and sympathetically of it, but in the articles in question we are some in matter of "the British Empire as a new Canadian sees it."

As he sees it the British Empire is not menaced so much by external enemies, by Communism or Communists, as by internal enemies within the Empire itself who insist on dealing exclusively with material, economic matters, those individuals who have abandoned the best traditions of the Anglo-Saxon race and have plunged into the abyss of materialism, greedy, corrupt politics which care nothing for duty and public service. The real enemies of the Empire are those who have cut themselves away from the vital sap of the historical, spiritual life of the Empire.

Mr. Ignatieff declares that it is not only his conviction, but the conviction of one of the foremost economists of the British Empire, Sir George Paish, that the way to general recovery does not lie so much in the field of economics as it does in the moral, spiritual sphere, which affects primarily our politics, and reflects adversely on economics. Sir George Paish points out that as long as politics are dominated by fear, suspicion, distrust and narrow self-sufficient nationalism, no economic remedy can solve the depression; and just as soon as our mental attitude is changed and gives place to a desire to co-operate, compromise and trust one another, the economic situation will solve itself. In his book, "The Way to Recovery," Sir George Paish says: "By replacing fear with confidence, injustice with justice, and antagonism with co-operation, a new and infinitely greater era would be introduced.

Continuing, Mr. Ignatieff says that what it is pointed out that one of the root causes of depression in the colleges of our present credit system, it is never realized by the crude materialist that here we are dealing practically exclusively with moral values. In the first place, the system is based on the future. It is obviously non-material; it is primarily based on trust. The general break-down of credit implies nothing more than the collapse of morals, the break-down of material trust. Industrialists, merchants, etc., are no longer trustworthy because they do not honour obligations, because they are suspicious and fearsome, unkind and greedy. Within nations, the same applies among individuals. There is general misery of credit—credit is employed largely for anti-social purposes by greedy, unscrupulous, immoral men.

The creation of the paradise of security in the midst of plenty is spiritual, immaterial. It is little thought with regard to the problem of unemployment, yet they are dubbed "platitudes" by so many worldly wise people.

Until fear is dispelled, suspicion allayed, confidence restored, there can be no real and lasting economic recovery, because, until these better conditions prevail, credit cannot be re-established. Credit is founded upon these things; trust is the one permanent foundation upon which a credit structure can be erected, and until credit is restored the world will remain economically sick. So long as fear and suspicion rule men and nations, so long as narrower nationalistic interests of each host and suspicion remains the guiding policy of the nation, so long will trade languish, so long will there be unemployment, so long will there be no absence of credit. And just so long will the peoples of the world suffer economic hardship and loss. Therefore, it can be repeated, what the world stands in need of today is a spiritual readjustment rather than economic reorganization. Given the first, the second will automatically and quickly follow. But without the one the other is impossible.

Lack Real Leadership

U.S. Public Opinion Not Yet Ready For Debt Readjustment

The New York Evening Post, agreeing that virtual cancellation of inter-debts must come, says that governmental United States "public opinion is not quite ready for the debt readjustment which the modern seaboard must recognize as inevitable." Public opinion "is not quite ready" because the United States public men and the press have persisted, chiefly for political purposes, in pretending, first, that they must have known better, that the debts were collectable. When they began to deal with the question realistically, in how the case, public opinion in the United States will accept the cancellation as not only inevitable but desirable. Those people are all right if they are given the right leadership. But what leadership they have had, in all the stifled confusion, since the war!—Winnipeg Free Press.

"Well, I've brought back the car you sold me."

"How come?"

"Well, I bought it I thought 'twas the license number, but now I realize it's the year of manufacture."

Pains in Stomach and Bowels So Bad Would Have To Sit Down

Mrs. G. Landry, Moncton, N.B., writes:—"I am certainly grateful to Dr. Pierce's Extract of Wild Strawberry for cramps or pains in the stomach and bowels.

"Last Summer I had such awful pains in my stomach, and bowels I had to sit down. I felt like I would have to die.

"When all children were small I always had a bottle in the house and it helped them wonderfully. Whenever one of them had bowel complaint,

Victorian Order Of Nurses

Has Saved Its Yth Society To Study Situation Of Whole Work

In pursuance of the new progressive programme of maternal welfare outlined on by the Victorian Order of Nurses for Canada, the Rockefeller Foundation has extended to Miss Elizabeth Bundle, its chief organizer, an invitation to visit a number of European countries within the next few months for the purpose of studying conditions of maternal welfare there.

Miss Bundle expects to sail early in September, visiting England, Denmark, Austria, Germany and Italy, and returning to Canada about the middle of December.

An Absurd Practice

One well known radio station has decided that in future the names of radio announcers will not be given, and it is said that others are likely to follow suit. The plan has always been about as sensible as it would be for a broadcaster to give his Christian and surname after calling out the next station.

Don't know bird words exactly. The mercury may be too hot.

Poor Crop Prospects In Russia

Believe Country Will Need All Its Grain For Food

Poor crop prospects in Russia are mentioned in the report by districts which the Dominion Bureau of Statistics received by cable from its London correspondent. "Grain exports," the report continues, "are dependent upon the policy of the Soviet Government and the urgency of the need of foreign currency. The country needs all its grain for food, especially in view of the continued acute shortage of other foodstuffs."

Since it was the food of Russian wheat on the market last autumn that broke the prices, the Russian crop prospects are of particular interest to Canada. Last year Russian exported, by July 31, 71,600,000 bushels, but the report indicates that it will reach nothing like those proportions this year.

The report says in part: "Vegetables are lacking for the winter months and at present vegetables constitute a large part of the food of the peasants, causing many supplies from 1929 crop, are consumed. The shortage of meat and dairy products is a tremendous discrepancy between open market and collective prices, the freedom of peasants to sell on the open market after December, and an acute shortage of manufactured goods to trade for grain, have aggravated cases of difficulties in collecting the government's share of its harvest. Reserves of grain in the towns around export outlets."

Oldest In the World

Aeolian Harp Is Found While Boring For Oil

The oldest known human skull belonged to a Londoner woman, G. Elliot Smith, professor of anatomy at the University of London, stated at a meeting of the international congress of psychiatric and psycho-therapic medicine.

"The skull is known as the Lloyd's skull," he said, "and was found in a clay 46 feet below the surface during excavations for the new bank of Lloyd's premises in Cornhill, London. "It belonged to a woman about 30 years old, who probably was a Londoner.

After [illegible] all the evidence and carefully studying all other discoveries of the kind, Professor Smith said, he decided the London skull represented the earliest genuine specimen of the human species, giving it proofs of going back to the Java man, the Peking man, and all other pre-historic finds.

The other attendants at the congress expressed great surprise over the discovery, and left the hall the hall immediately afterward to visit it and the skull and discuss the problem.

No More Asthma. Dr. J. D. Kellogg's Asthma Remedy sounds the death knell of this trying trouble. It stops the awful choking and painful wheezing. It quells nightly misery. It heals and gives renewed ability to breathe. Just the asthma might have said it claimed for this remedy, but nothing but what can be demonstrated by a trial. If you suffer from asthma try it and convince yourself of its great value.

In Times Of Peace

Germans Investing Protection Methods Against Gas Attack From Air

Classes have been established in Berlin to train women in the steps they must take for the protection of their households in the event of a gas attack from the air. Lectures are given on such subjects as how to make gas masks for small children, and the "Women's Air Defence League" are being established in several centres of the country.

Lessee a Loser

A U.S. tourist made bad complaint in Aylmer, Ontario, recently. It seems he had replenished his gas supply at a station in another town, handing out $10 U.S. bill in payment, and received the change in good Canadian money. On arriving at Aylmer he endeavored to change the Canuck money back into U.S. funds, and was most indignant when the local banker refused to accept. He learned a lesson in exchange which has been taught many a Canadian visitor in the U.S.

Exposition Of Fascism

Premier Mussolini Does Not Believe In the Possibility Of Perpetual Peace

War is exalted by Premier Mussolini in giving the soul of nobility to peoples in his concluding exposition of Fascism for the Encyclopedia Italiana which was published in his old newspaper, Il Popolo d'Italia. Perpetual peace, the premier says, is impossible.

The virtues of democracy is this "It is a failure more tyrannical than tyranny."

"Fascism, as it generally regards the future and the development of mankind and apart from considerations of present policies, does not believe in the possibility of perpetual peace," the premier writes.

The premier reaffirms the doctrine that the state is supreme.

His discussion of religion is brief. "Fascism is not indifferent to religion in general or Italian Catholicism in particular. The state does not have a theology but a morality. Religion is not only respected but defended and protected."

Improving On Nature

Soil Heated By Electricity Can Be Kept At Even Temperature

Soil heating by electric current has come to be recognized as an aid to the growers to get their produce to market earlier than the better price-as. Equipment for heating beds, installing cable and thermostats, was sold to farmers in the United Kingdom last year for the first time and several plants were set up in Canada. Both of these methods are used between sundown and sunrise, making it practically an off-peak load.

The advantage of electric heating over steam or manure is seen in the more complete control. Flowers, such as carnations, can be grown in winter and a greater percentage of growth is noted in cuttings of plants. Celery can be blanched more satisfactorily soil by the electrical current.

Premier Bailey is unrivalled for possessing more than his share of the best representative type of Irish humour. Premier Bailey's humour is always kindly and humorous words. Especially recommended to scribes and writers roughness or clumsiness caused by weather conditions. Indispensable to every dainty woman. Cool and refreshing. Dominion Fragrant Talcum Powder. Sprinkle. Never leaves a vestige of stickiness. Perhaps Baker is the one person requisite for the woman who cares for charm and elegance.

Serum For Addison's Disease Is Expensive

Fifteen Cases Are Required To Supply One Dose

Fifteen cases are required for a newly discovered treatment for Addison's disease.

Successful results of the treatment have been obtained at a London hospital.

Fortunately the disease occurs seldom. Its destructive gland action group is rare, for the expense of extracting one dose of serum from fifteen beeves is enormous.

The life of one patient was saved with this new treatment, but $1,25 was spent on him to do it, and the treatment continued to cost $7 a day.

Rub It In For Lame Back.—A brisk rubbing with Dr. Thomas' Eclectric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

Many Placed In Employment

Saskatchewan Government Finds Jobs For 5,511 Persons In Five Weeks

Jobs for 5,511 persons were found by government employment offices in Saskatchewan during the five months ended July 31, official figures show. The number of persons applying for work at the nine employment offices in the province during the period was 7,186, and the number of employers' orders received were 2,-675.

In addition to these figures there were 187 applications received from settlement officers and 48 of these were located with positions.

The oldest newspaper in Winnipeg is thought to be the one in Russian, the Farl Ander, Alexander Street, Winnipeg, Man.

W. N. U. 1928

FAT GIRLS OUT OF FASHION

Women of All Nations Slimming

All over the world Kruschen Salts is appealing to girls and women who are striving for an attractive figure without starving.

Here is the method they are following to banish fat and bring into blossom all the natural attractiveness that they possess: every morning they take a half teaspoonful of Kruschen Salts in a glass of warm water before breakfast.

They do this every morning without missing one day. It is the daily dose that takes off the fat. When Kruschen is taken daily, every particle of poisonous waste matter and harmful seeds and gases are expelled from the system.

At the same time the stomach, liver, kidneys, and bowels are toned up and the pure, fresh blood containing Nature's six life-giving salts is carried to every organ, gland nerve, and fibre of the body, and the is fulbeyond by that boisterous feeling of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity, and a charming figure.

A Warmer Climate

Scientists Predict Radical Weather Changes In the Future

Some women you hear people who lament the present constant condition of meteorological affairs express the wish that they might be living on the planet a few thousand years hence. They may be sure there will then be more cultures more altruism, more highly improved civilization and a happier state of things all around.

But, according to the recent prediction of scientists, there will be a great drawback to the enjoyment of an Eskimo existence in those future days. Not only will there be a devastating flood. Dr. W. J. Humphreys, professor of meteorology of the United States weather bureau, says that with the vanishing of the last 6,000,000 square miles of ice sheets at and near the poles and in the high mountains the oceans will be raised 151 feet.

In this dismaying prediction Dr. Humphreys is supported by Professor David, of Australia; Professor Meteorological Magical. In addition to these theory of the American scientist that it's going to be pretty warm in the [illegible] Humphreys, for as the ice melts the tropics will press upon them and they in turn will press upon the polar regions.—Los Angeles Times.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to Get-rout stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and positively, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any succeeding property.

Business Is Growing

Increase In Air Passengers Reported By Transport Companies

Air service between Germany and Russia continues to grow. Estimates are that "Deruluft," the German-Russian air transportation company, will carry this year at least nine times as many passengers as it did in its first 13 months when planes, mail, baggage and freight also have made great gains. Two services are now operated, one between Berlin and Moscow, and the other from Konigsberg to Leningrad. Scheduled flights have increased from two to seven times a week.

To Check Criminality

Scientific Treatment Of Delinquency and Crime Inaugurated In England

A significant and encouraging movement has recently been launched in England in an effort to combat crime at its source. This movement is under the auspices of the American Film Fund. Scientific Treatment of Delinquency and Crime, and has for its ultimate aim the founding of a National Institute for the prevention of crime.

There can be no question that the treatment of first offenders and of young criminally-disposed persons has much to do with the creation of the crop of criminals and the formation of habits and crime. To overcome his tendency to criminal acts [illegible] is admittedly a most difficult job, but this effort in England would appear to have in it the elements of hopefulness in that it strives to rouse the young person who is about to start out on a criminal career. Too much in the past it has been true that young people guilty of lapses against the welfare of society have been sent to prison when they might have been otherwise dealt with, and in prison have acquired confirmation and hardening of their tendencies until they have emerged as arch criminals with their hands against society and with society's hands against them in this effort to combat the facts obtained [illegible] that there exist certain criminal stations, at which first offenders would undergo physical and psychological examination and then be given treatment in clinics or re-education centres, without loss of freedom or civil upon reputation. In this way it would seem likely that many will be saved from a life of crime to useful citizenship.

Along such lines it would appear that there would be genuine likelihood of preventing the drain upon society's resources involved in the imprisonment of criminals, at least a certain proportion of whom would be re-established in good living. The experiment deserves all encouragement and is backed in England by great names of scientists and public men.

This experiment overseas should be observed by our Canadian authorities who have power to deal with the prevention of crime.—Regina Leader-Post.

Monkeys Are Rubber Heads Or Quadrupeds

Four-Handed Like Bridge Game Says London Canadian Scout

How many feet has a monkey?

The question arose when a shipment of six of the chattering primates arrived at Polkemmet from the continent. British tariff law admits quadrupeds without duty; other animals are taxed.

"Monkeys have four feet," the London firm whither the animals were consigned argued.

"No," ruled customs agents, "they have two feet and two hands"—so they were taxed as bipeds.

Pending appeal H. M. Customs agents' deficiency in zoological knowledge, the consignee appealed to the board of customs appeal.

This sage board confounded them all.

"Hens!" Monkeys, they affirmed, are quadrumana...e four-handed, like a bridge game!

So the poor monkeys haven't a foot to stand on, and neither has the appeal.

One thing that always has puzzled us is why those trick remedies that "cure" dandruff, etc., with "a single application," come in such large bottles.

"Come down, boys, I am ashamed of you."

"You needn't be. We shall reach the top all right."—Pinguin Illustrie, Munich.

Magicians Of the Past

Showmen's Business Thai Mystified Crowds Of a Former Generation

Many of the most renowned magicians, who entertained crowded theatres in the last century and the earlier years of the present one, were inventors of no mean ability. Kellar, Herrmann the Great and, later, Thurston made the machinery which they employed in the most puzzling of their illusions. Thurston spent years in perfecting the "Levitated Lady," in which a young woman appeared to be suspended in the air.

The trick of the speaking head, in which the head of a girl, severed from the body and floating in space, continued to carry on conversation, took years to bring to complete success, yet it also was of simple construction. Magicians are a clannish lot, and they keep as sacred trusts their own secrets and those of members of their guild. That these secrets become known to the world is not because they are interested in the Patent Office, but because some one else eventually proves as smart as the originators.

One of the striking features of a traveling show in the '80s was the "Talking Automaton," a wax figure in a glass case that answered questions and solved mysteries. It was the show's most successful attraction and brought down the wrath of a competing combination which referred to it as a "ventriloquistic fake." If the secret of the trick really had discovered, as he claimed the secret of "artificial speech" he might have shouted from the housetops. Since he did wan to conceal a dwarf between the two layers of the floor of the case and make him the mouthpiece of the trick.

One of the illusions of another magician of the age was the "Vanishing Wand and cause the ceiling of a theatre to blaze with "luminous stars of the heavens." He was clever enough to know the value of phosphorus as a showman's helper Magic he had also in his stock of entertainment. Science does on a grand scale what the magician did as an exhibition of mystery Compare the talking automaton with the phonograph or the radio, compare [illegible] by phosphorescent spots with touching a key that bring hundreds of thousands of lights into being and banishes cides away. The man of magic finds that he has been only to his time, and that is of short duration.—New York Sun.

Grain Storage Facilities

Establishment Of Large Country Elevators with a total capacity of 105,162,850 bushels, and two interior grain storage elevators which will hold 11,000,000 bushels. Private elevators in the province hold 4,000,000 bushels.

Calendar Is Left Behind

Fishers Time Survives Almost Six Hours Every Year

Every leap year mayors and scientists alike have the opportunity of watching the efforts of the calendar to catch up with Father Time. Once in four years our antiquated calendar must somehow gain a day to make up six hours lost each year. This it does partially by adding a day on what we know as Leap Year Still the calendar does not quite catch up in the race. There is still eleven minutes and forty-ten seconds left unaccounted for each year. Then there exists centurial leap years, where another day is added These Leap Years now almost forgotten, are those centuries exactly divisible by 400. Three out of four years, as 1600, 1800, and 1900 are common years, but 2000 is a Leap Year This plan matches the solar year within 1 in only 424 seconds.

Bootlegger Now Tells

How Rifle has been added to the already imposing list of the Prince of Wales; that of Commodore. He commenced to become Commodore of the Royal Thames Yacht Club, which is the second oldest club of its kind. Lord Queenborough retiring to make way for him.

Italian Heir Likely To Receive Fortune

Case Has Been In Courts For Sixty-Four Years

To inherit a million in money left by an ancestor 323 years ago does not fall to the lot of every man.

But this to the happy end of a case which the courts of Italy have been trying since 1567 and it seems that a certain Giovanni Trombetta, postal clerk at Milan post office gets the lion's share of the fortune after living 45 years in a very modest way.

In the year 1600 Baron Antonio Trombetta, who had vast lands at Mondebello Jonico, in Calabria, left them all in trust to neighboring Capuzzino monks, founded an abbey for them and gave them his farm buildings too. It seems that the baron had quarrelled with his family, which consisted of a mother who had married and her two sons by her second husband.

When, in 1866, the monasteries were to a great extent secularized, the baron's fortune, which had increased a hundred-fold, was confiscated by his kin, and the Italian government, according to her book possession of it.

Then the descendants of the baron's half brothers, who had grown poor, took their case down to the highest courts of society, appointed and made their claims. Of these there were 76 persons but the counts' branch died out to 40 and now the chief heir is Giovanni Trombetta.

The money will soon be handed over to him, but the state kept a considerable portion of the whole estate which was meanwhile administered by the Abbots at Montebello Jonico for the benefit of a poor postal employee

Educated In Many Places

Daughter Of U.S. Consul Has Been Much Travelled

Margit Marsh, daughter of the United States consul at Sydney, Nova Scotia, is a young lady of cosmopolitan mind. She has taken her travelling between terms at school, but not in the stereotyped manner of students on cut-and-dried world cruises Miss Marsh was born at Manila, Philippine Islands, attended grammar school at Ottawa, high school in the United States, was privately tutored in Rheims, attended a ladies' institute in Montevideo, Uruguay, and graduated from high school in Sydney She has since entered Mahoning University, for two and one-half years of uninterrupted attendance. But she will graduate from the University of Strasbourg, Germany. Her father, O. Gaylord Marsh, has been appointed to the consular post in that historic city.

Paint exposed to the weather ordinarily lasts about five years.

QUEBEC'S CLIFFS SEEN FAVORABLE FOR OBSERVATION

"This is just the kind of sky we want to observe the eclipse satisfactorily," Sir Frank Dyson, Astronomer-Royal, and other British astronomers and scientists, told reporters when they arrived at Quebec on the liner "Montcalm." They have come to Canada to observe the total eclipse of the sun at various points in Quebec and New England, and are divided into four separate parties, going to Magog and Parent, Quebec Province; and Berlin, New Hampshire, and Mattoche, Me. The celebrated astronomers are seen pausing in Quebec's city square. The group included Sir Frank Dyson, leader of the Royal Astronomical Society's Expedition (left, pointing); J. F. Comeron, Sidney Pigeion Observatory, Cambridge; Prof. J. F. M. Stratton and Prof. H. Dingle, of the Imperial College of Science and Technology.

All-Canadian Highway

Completion Is Reported In About Two Years' Time

Preaching the gospel of the vital need of good roads, everywhere in Canada, Samuel L. Squire of Toronto, chairman of the Canadian Good Roads Association's executive committee, visited Edmonton recently returning from the Pacific coast

"In two years' time Canadians will be able to travel across the Dominion on an all-Canadian highway with the exception of a short break for the lake journey, from Fort William to the Soo," Mr. Squire said. It has been a tremendous task, cutting through and preparing the highway in northern Ontario, particularly from Kenora on to Fort William But progress is being made

Mr Squire told of the great and green the association by governments to all the provincial capitals. Newfoundland has joined the organization Everywhere the necessity of having good roads, for the comfort and pleasure of the tourists is apparent, declared Mr Squire

"Co-operation is undoubtedly the big word these days. Only between the various provinces of Canada, but between the urban and rural sections." he said, like the cousin's business and to 40 and now the chief heir is Giovanni Trombetta

"Take the case of the farmer living in the city. was referred to by some as a 'hick.' At the same time when a city fellow went to the country, he was a dude.

"It's different now. With good roads leading right to the farmer's door, the farmer is just as familiar with city affairs as the citizen and the people living in the cities are just as familiar with conditions in the country."

Vancouver Grain Storage

Building Big Addition To Elevator Capacity To Take Care Of Crops

An important addition to Vancouver grain storage facilities has been decided upon and elevator capacity will be increased to the extent of 1,-[illegible] bushels. The most involved in this addition to elevator capacity will be increased by 1,875,000, and the work will be hastened so that the new accommodation will be ready to receive grain early in October. This part of it will then be able to store more than [illegible] bushels at one time

In recent years, with millions of bushels of grain pouring out of Alberta and Saskatchewan, Vancouver terminal has at times been so congested that westbound traffic has been restricted.

The movement of Canadian wheat through the port of Vancouver has been a comparatively recent development, but has proven in very large proportions Whether the opening of the new route via Hudson Bay will have any appreciable effect upon westbound shipments remains to be seen.

It is also announced that a shipment of 4 000 tons of wheat will leave this port at an early date for delivery at Vladivostok. A few months ago several million bushels of western grain was shipped from Vancouver to the Russian port

Minister Has Victory

William H Kearns Chicago, in life an obscure rag-collector, died a millionaire This was revealed when a brother and sister filed a $2,000 000 bond pending disposition of the estate Kearns, who died intestate at the age of 70, left stocks and bonds amounting to $1,000 000

WORLD HAPPENINGS BRIEFLY TOLD

The Rothesay dock, one of the largest on the Clyde, has been temporarily closed on account of decline of shipbuilding

Dividend on the common stock of Canadian Pacific Railway for the first six months of 1923 is not being paid at present.

The Church of Scotland plans to build 30 churches in Scotland in the next seven years, 10 of which will be in Edinburgh and five in Glasgow.

Representatives accompanying the Japanese Olympic team plan to buy the cattle of such athletic fame that country who wins an Olympic title.

Newton, Mass., one of Boston's residential suburbs, has nearly two automobiles for every family. There are 14,000 families and 25,000 automobiles.

Florenz Siegfeld, New York theatrical producer, who died recently in California, bequeathed his whole estate to Billie Burke, his widow, and Patricia, their daughter.

An air-taxi was chartered from Imperial Airways by a London woman for a return flight to Chelmsford, Essex, where she placed a wreath on a grave in the churchyard.

Art and agriculture are the only conscious professions in the world, says John Erskine, novelist. "By artist, I mean all craftsmen who are creative," he said, "and by agriculturists I mean all those who produce and create wealth from the soil."

San Francisco's new $6,000,000 opera house, the first and only municipally owned opera house in the United States, will be formally dedicated next month as a war memorial. It will open Oct. 15, with performances of Puccini's "Tosca."

Indicative, it is said, of an improved lumber outlook, is the protest filed with the British Columbia government by mill men against export of logs. Loggers, however, contend that they are in a position to satisfy all demands of the mill men as well as filling cans of any export trade being offered.

Britain's Unemployed

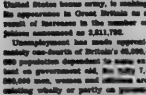
Seven and a Half Million People Depending On Government Aid

A wandering army of unemployed people, vaguely reminiscent of the United States house army, is assisted in its appearance in Great Britain as a result of increases in the number of persons summoned as 2,811,782.

Unemployment has nearly approximately one-fourth of Britain's 40,000,000 population dependent in some extent on government aid, the tally 7,500,000 persons and more who are existing wholly or partly on government or local relief in addition to the special relief of jobless.

As a result of the latest official figures, an increase of 54,439 in the month of July, and of 94,439 in the past year, the nation's relief machinery is scarcely able to cope with the situation.

A lieutenant that does not stay the thirty-minute rope from the sea, regardless of plans, and not as Prophet has been made from natural gas.



Safe-breaker at home: "I should like to open my own safe my other way."—Student, Vienna.

Carrying 578,000 bushels of western wheat, representing the product of over 41,000 acres of prairie land and the largest single cargo ever carried in any single ship on any sea, the giant S.S. Lemoyne, of Canada Steamship Lines, 683 feet long and the biggest vessel ever navigated the Welland Canal, passed through the locks at Port Colborne in the presence of His Excellency, the Governor-General, Rt. Hon Stanley Baldwin, and the delegates to the Imperial Conference in Ottawa.

Today the "Chesapeake" is the largest boat ever to have entered Lake Ontario, but compared to the "Lemoyne" she is a small freighter. Her length of 596 feet compared with the "Lemoyne's" 683 feet and her capacity is approximately 300,000 bushels compared with the "Lemoyne's 571,000 bushels.

Considered of special importance to the Empire since the Welland Canal in future will be the route used by most of Canada's grain ships, it was decided some time ago that the official opening should be on the programme of the Imperial Conference and efforts were immediately made to have the largest Canadian lake boat go through for this ceremony. Elaborate preparations were made for welcoming the "Lemoyne" to Port Colborne on her first voyage and that in addition to delegates, government officials and representatives from all parts of Canada, large crowds of people viewed the ceremony.

Testing Out New Device

Invention May Prevent Flying Machines From Freezing Controls

A new device to overcome the danger of the controls of aeroplanes and the controls of aircraft in a panic has been developed by engineers of the department of national defence and is now undergoing thorough tests.

An arrangement whereby the instructor can disengage the student's controls when he sees them unsuitable, for the purpose of taking charge himself, because the student had overcome his momentary panic it was necessary for the instructor to do so before his controls could be connected up again.

The new principle under test provides a hydraulic control clutch that becomes automatically disconnected when too much pressure is applied to it, and it is reported to function when the student's grip relaxes. The instructor in the other cockpit is provided with a normal control stick and when he takes over control of an aeroplane, by pulling on his stick he can force the student's control out of joint.

Limit To Cattle Exports

Less Than 50,000 Head May Be Shipped To England Next Year

Less than 50,000 head of cattle would be shipped to the United Kingdom from Canada next year, if the restriction now imposed against Canadian cattle landing in British ports were lifted, Hon. Charles Stewart, Minister of Agriculture, declared in an interview recently by Hon. Robert Weir, Canadian Minister of Agriculture.

Reports which have gone out that the lifting of the restrictions would result in Canada shipping from 150,000 to 600,000 head annually to Britain are regretted by Mr. Weir. These reports would lead to all the farmers going to England only to see her record broken within a few days by ships from Australia carrying 1,000,000 bushels. Both these vessels had recently been coaled to the Upper Lakes.

Less than a week after the "Lemoyne" had set her new record for grain she returned to Lake Erie and brought down to Montreal 1,200,000 bushels of coal, another Welland Canal record which will likely stand for some time. On her after trip the "Chesapeake" also shattered all records for cargo carried into the port of Hamilton.

Today the "Chesapeake" is the largest boat ever to have entered Lake Ontario, but compared to the "Lemoyne" she is a small freighter. Her length of 596 feet compared with the "Lemoyne's" 683 feet and her capacity is approximately 300,000 bushels compared with the "Lemoyne's 571,000 bushels.

Considered of special importance to the Empire since the Welland Canal in future will be the route used by most of Canada's grain ships, it was decided some time ago that the official opening should be on the programme of the Imperial Conference and efforts were immediately made to have the largest Canadian lake boat go through for this ceremony. Elaborate preparations were made for welcoming the "Lemoyne" to Port Colborne on her first voyage and that in addition to delegates, government officials and representatives from all parts of Canada, large crowds of people viewed the ceremony.

SUNDAY SCHOOL LESSON

AUGUST 21

THE TENT OF MEETING

Golden Text: "Jehovah spake unto Moses face to face, as a man speaketh unto his friend." Exodus 33:11

Lesson: Exodus, chapters 32, 33.

Devotional Reading: Psalm 5:1-7.

Explanations and Comments

The Place and Purpose Of the Tent Of Meeting, verses 7-11 - These verses describe the customary way in which Moses performed his high priestly service during the wilderness days, before the tabernacle was erected. At every new encampment he "took the tent, and pitched it without the camp, afar off from the camp. Similarly, after the Settlement in Canaan, the local sanctuaries were beyond the towns and villages. The tent was especially sacred because there any inquirer might come with his perplexities and receive an answer from Moses as priest. When his duties were over, Moses returned to the camp, but the tent was constantly guarded by his assistant, a young man named Joshua.

To this tent Moses had carried on Mount Sinai, the people had complained to Aaron that, "as for this Moses, the man that brought us up out of the land of Egypt, we know not what has become of him," and this new arrangement was better for this spot, for they could follow him with their eyes till he entered the Tent. When they saw the pillar of cloud, the symbol of the Divine Presence, hover over the door of the Tent, each man, sitting and watching at the entrance of his own tent, would rise up and worship. And Jehovah spake with Moses.

"Prayer is more than meditation. It is more than it is a dialogue, not a monologue. It is not enough that man speak to God; he must believe that God can and does hear, and may speak to him again. And one of the most welcome and surprising features of the Bible is that it is even more full of God's speech to man than of man's to God."—John E. McFadyen).

Within the "Tent of Meeting" Joshua used to speak unto Moses face to face, as a man speaketh unto his friend. The expression, "speaking face to face," has become proverbial for intimate converse. It is an interesting and profitable exercise, as Dr. John R. McFadyen reminds us, to watch how Hebrew mind gradually transforms its earlier limited conception of God. "Sometimes the higher and the lower views may be found within the same chapter. A profound view finds in verse eleven occurs as a new verses further on. 'Thou canst not see My face; for man shall not see Me and live.' A still more severely spiritual view occurs in Deuteronomy 4.12-15, where it is urged with great emphasis, as if in opposition to popular conception, 'Ye only heard a voice, ye saw no manner of form.'"

"Prayer is the psychological act by which the soul comes into conscious relation with God."—Robert F. Horton.

"We have too little praying face to face with God every day. Looking back at the end, I suspect that much of the great grief for our sins of omission—confession to God from God what we might have done by prayer."—Andrew Murray.

According To Supply

The doctor was giving a lecture to a class of girls.

"Alice," he remarked, "it has been found that the human body contains sulphur."

"Indeed!" exclaimed a pretty young girl. "And how much sulphur is there in a girl's body?"

"Oh, the usual victim," said the doctor carelessly, "according to the girl."

"Ah," remarked the girl. "That's only seven of us under fifteen stones."

Stops Summer Odors

The heavy smell which warm weather brings to many people is largely prevented by regular bathing with a few lather of Baby's Own Soap. The delicate aroma dispels all unpleasantness and the skin feels refreshed, cool a sweet. Baby's Owns sells at 25c. a cake at dealers everywhere.

"Best for you and Baby too" 2-23

Naval Armaments

Difficult To Distinguish Between Defensive and Offensive Weapons

Why all this bother about "offensive" and "defensive" naval weapons at Geneva? Is the submarine offensive? Are battleships, mine layers and bombing planes defensive?

There is one simple rule by which every case can be decided. The other is feeble. A weapon is extremely offensive your own is purely defensive

Ask any schoolboy or baseball fan. The humble pop bottle is the most inoffensive of objects, quite inoffensive. Only prejudiced persons like the umpire could possibly construe it as offensive. Again take the pop bottle. Whoever heard of a schoolboy that used this mild little weapon for attack? As any boy knows, the uses of the pop shooter, like the water-pistol, are solely for the warding off of attacks by others, especially those armed with pop-shooters.

And so it is with submarines and the like. The gentle U-boat regarded the Q-boat as highly offensive, whereas we all know it to have been purely protective During the war, scores of us harbored hard thoughts against them. Quite unjustly, it now seems, according to the French and Japanese thesis. The under-sea boat has become the Poor Nation's Armor. It is the cheapest naval weapon for frightening off offensives, according to its backers.

The end truth is quite evident. Weapons are defensive or offensive according to the uses to which they are actually put. When you have decided who is the attacker, and who is on the defensive, then, perhaps, you may decide whose weapons are offensive. Meanwhile, most nations seem to proceed on the principle that if a club is defensive, three clubs and a machine gun are twice as defensive. —Montreal Star.

Make Interesting Discovery

Canadian Scientists Gain Knowledge Of Universe Of Great Importance

How knowledge of the universe, stated to be of tremendous potential importance in the scientific world, has been gained by Prof. J. S. Foster and Dr. A. Vibert Douglas, McGill scientists who returned to the university following a month's research work conducted at the Dominion Astrophysical Observatory at Victoria.

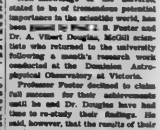
Professor Foster declined to claim full measure for their achievements until he and Dr. Douglas have had time to re-study their findings. He said, however, that the results of their work would quite likely create an upset of opinion among European scientists.

The two McGill scientists set themselves to examine the electrical fields of stars.

They conducted observations both at Victoria and at Pasadena, Cal. Only one day was spent at the latter place.

"What's that you're putting in your shirt pocket?" asked Murphy.

"Dynamite," whispered Donovan. "I'm waiting for Casey. Everything he meets he has to slap me on the chest and breaks my pipe. Next time he does it he'll blow his head off."



Hen: "They say that a miser has a sweetheart in every port."

Hen: "Yes, but the isn't port."—Boys' Mirror, Madrid.

LETTER TO THE EDITOR

To the Editor:

Dear Sir:

Before continuing my comment on Mr. Gandin's letter in your issue of July 27th., I wish to give an outline of what the U.F.A. Co-operative plan is; or, perhaps both you and a large number of your readers may know little or nothing about it.

During the year 1920 a number of U.F.A., "locals" in Convention commissioned myself to form a constituency co-operative Buying Society. This society appointed a committee and a manager and instructed them to investigate the possibilities of buying bulk commodities in carload lots direct from the producer or from the wholesaler. The committee was very successful in negotiating with several firms handling twine, fence posts, coal, oil, gas, wire and etc. The individual members of the "locals" placed their orders with the committee for their requirements and promised to pay cash on delivery of the goods. When the committee had enough orders for a carload they sent them in to the firm handling that commodity. You will see that there was no capital investment. The business was conducted on a C.O.D. basis. They got their goods at actual wholesale price and besides got a discount for quantity buying and appreciably decreased the high cost of distribution which is a factor in the purchasing power of the consumer. I quote from the report given in the 1921 U.F.A. Convention by the Secretary of the "society". "We have handled twine, coal, oils, greases, lumber, potatoes and flour, totalling $27,000 in value and have not handled one rejected claim. Our reserve account is now $600, with all accounts provided for. Our consolidated buying power has enabled us to get quantity discounts sufficient to cover operating, provide for reserve, and allow a commission to the locals. The result in increased membership has been gratifying, several locals have doubled their strength, four have been reorganized and three new locals have been formed during our ten months of operation.

This report, of which the above is only an extract, was so favourably received by the delegates at the convention that they passed a resolution instructing the central Board to further investigate the possibilities of this method of co-operative buying and to put on an energetic campaign to interest U. F. A. members and locals in organizing district and constituency co-operative societies throughout the province. Any efforts the "Board" has made along this line has been in accordance with these instructions and must be approved by the delegates at the next convention thus maintaining control from the individual up and not from the top down as Mr. Gandin infers.

Now, return to Mr. Gandin's letter, his attempt to put a false construction on the quotations of Mr. Gardiner and Mr Wood is, to say the least, puerile. Anyone who has ever listened to Mr. Wood and heard the emphasis that he places on group organization knows that he never intended to convey the meaning that Mr. Gandin infers he did. There is nothing in the merchant or broadminded men and will not censure the farmers for what they are doing themselves. I refer to where and how they can get the best value for their money

Mr. Gandin is, I understand, interested in a co-operative society based on the Rochdale plan. I also understand that in less than two years from its inception it became involved in financial difficulties to the extent of $15,000. I have reason to believe that Mr Gandin and his associates are anxious to re-attack the U.F.A. co-operative buying society.

As regards competition with the retail merchants; ninety per cent. of the merchants in the towns outside of the cities own farms and are producing farm products in opposition to the home. Milk farmers and many of the city and business men are operating farms and use the profits they make off the consumers to buy out the loss on their farms. But we are not "kicking". Why should they? The merchant here where he can get the best value for his money and the best terms. He buys in as large quantity as he can in order to get the quantity discounts. He organizes "chain stores" and pools his buying power to get a greater quantity discount. He uses his pooled buying power to beat down the prices of the farm products that he handles; such as milk, cream, eggs and butter During the present season the chain stores in Edmonton, Calgary and Winnipeg bore the price of these products down until they had almost reached the vanishing point.

Now I am not censuring the merchants for doing these things. It is good business. The most of our city with the others entirely so that the U.F.A. will absorb this $15,000 liability.

Under the U.F.A. co-operative buying plan there is no danger of getting into difficulty referred to above, as there is no capital investment and our buying activities are unassailable by competitors. If they start a price war we just take a holiday and let them go to it.

A. Lenet.

P. S. In my previous letter I said that a person who was not a member of the U.F.A can have the benefit of buying co-operatively through the U.F.A. co-operative buying society. I find this is not correct, as he must do his buying through the "local". He will, therefore have to join a "local" too.

A. L.

It has cost the Alberta department of telephones $300,000 for repairs on lines damaged by the big sleet storm of last April. About 11,000 poles were broken and 70,000 miles of wire put out of commission.

A new Canadian deep drilling record has been made in the Turner Valley oil fields. Drillers have penetrated to a depth of one mile and a third, almost 200 feet deeper than the previous depth made in the valley.

Here and There

Reports of Canadian wheat during the month of March totalled 1,988,354 bushels, of which only 1,000 bushels were shipped from the United States Atlantic seaboard ports.

Canada's butter exports in the British Isles and other countries totalled 16,650,000 pounds in 1921, as compared with only 1,196,000 pounds in 1920.

Canada's bread and bakery products industry showed a production in a value of $72,584,564 during the census year 1920, establishments of which 1,077 are located in Ontario and 503 in Quebec.

March was the year's best month, to date, for pig iron production in Canada, with a total of 17,969 tons, at a rate of 539 tons per day, as compared with 337 tons per day in February and 535 in January.

W. G. Chester, dean of Canadian railroad veterans, has just retired, in Winnipeg, after 55 years in the service of the Canadian Pacific Railway and another 14 with the Brotherhood of Railway Conductors.

Engineers run by the Canadian Pacific Railway through national parks in Eastern Canada have met with unqualified success. To date, some 17,000 passengers have been carried on visits and holidays, over different week-ends, by this means.

Complete Organization

United Grain Growers operates more than 450 elevators in western Canada. Great terminal elevators are operated at Port Arthur and Vancouver. Export offices are maintained at Vancouver and New York.

The complete organization of this company, its highly trained staff, its constant contacts with all markets where Canadian grain is sold, and its financial strength, all contribute to its ability to give good service to western farmers in handling their business.

Alberta Pool Elevators

Announcement

Alberta Pool Elevators will be operated during the current crop year in the same manner as in the crop year just passed; that is to say these elevators are free to receive delivery of grain from any person.

Alberta Wheat Pool members are given the option of disposing of their grain under any of the methods provided by the Canada Grain Act and obtaining the full current market price for same; or disposing of their wheat on pool basis, accepting the prevailing initial payment, and participating in any future payments that may accrue from pooling thereof.

Definite assurance is given that no deductions for Elevator Reserve or Commercial Reserve, or for repayment of the 1920 deficit overage, will be taken from the proceeds of any grain delivered for pooling or for immediate sale during 1922-23 crop year.

It should be clearly understood by Pool members that the statement made recently and not covering the operations of the 1920 overage must not merely for the information of the individual member. These statements are not a demand for repayment of the 1920 overpayment in any respect.

Deliver your Grain to Alberta Pool Elevators this Fall

Welcomed to Scotland

Six hundred Canadians who sail Glasgow bound, were greeted on their arrival in the Clyde city by Sir Thomas Reidy, LL.D., Lord Provost, and the magistrates of the city, when they arrived recently in the Canadian Pacific liner "Duchess of Bedford" for a re-union.

Gathered together from all parts of Canada, and transported by special train to Montreal, the Glasgow-bound party, which included a two-months stay, during which they are being entertained by the City of Glasgow, its manufacturers, and their friends. Proceedings opened Tuesday, July 24th, when the Lord Provost, magistrates and councillors held a reception in the Art Galleries at Kelvingrove.

The party, which left Montreal in the Duchess of Bedford, July 8, returns from Glasgow Saturday, August 26 in the same 20,000-ton liner.

GOV'T PROGRAM ENLARGED FOR RELIEF PURPOSES

Ottawa, Ont. Details of the Federal Government's campaign to relieve unemployment in Canada were outlined recently by Senator Gideon Robertson, Minister of Labor. Estimates $50,000,000 and $90,000,000 will be "put to work" to better distress conditions and provide work for Canadians, he said. This included the $20,000,000 supplied by parliament at the last session for immediate highway construction with the provinces and municipalities, the Minister of Labor declared. A sum of $4,000,000 would be set aside for "direct relief." The grade separation fund of the board railway commissioners would be augmented by a total of $1,000,000 for the benefit of any railway work undertaken. The government would contribute on a 50-50 basis with the provinces in building a trans-Canada highway from Sydney to Vancouver and was prepared to pay 40 per cent of the cost of general provincial highway work this winter.

There will be other angles to the government's relief program, Senator Robertson emphasized. Tariff changes made at the last session would afford someone stimulus to Canadian industry he believed, and would result in the creation of more jobs. Restrictions had been placed on immigration for the benefit of Canadian labor. It was the minister's belief that the expenditure of from $20,000,000 to $30,000,000 throughout Canada in relief work by one kind or another would reach every type of laborer, clerk or artisan.

The program of construction and improvements to be undertaken by the two large railroad companies, which has been formally approved by the cabinet, would result in the employment of 10,000 men for a year, Senator Robertson said. In addition, 3,000 teams of horses would be needed for grading purposes and this would be of benefit to great numbers of farmers. The whole programme, he stated, called for the expenditure of $25,000,000 with work to start immediately. Orders would be placed at once for rails. Nova Scotia and steel other necessary supplies. Because these orders were not usually given at this time of the year, it would be necessary for the railroads to raise the money Senator Robertson explained. Because of this, the government had decided to set aside $1,500,000 out of the $30,000,000 fund to guarantee interest and carrying charges to the railroads.

The first agreement with any of the provinces—Manitoba—has been reached and awaits confirmation by the cabinet. Representatives from Ontario have been in conference with the Minister of Labor and a start was made on negotiations with Alberta. New Brunswick representatives are in Ottawa and Prince Edward Island and some of the other provinces are scheduled to commence negotiations early this week.

Making Inspection Trip

Hon. R. J. Manion To Look Over Bay Railway and Terminals

Ottawa, Ont.—On his first inspection trip Hon. R. J. Manion, Minister of Railways and Canals, departed from the capital to make a personal survey of the Hudson Bay Railway and the terminals at Churchill. Dr. Manion will be absent from Ottawa for a fortnight.

Accompanying Dr. Manion were his deputy, D. C. Emart, Col. A. R. Dubuc, chief engineer of the department and Charles Maddow, assistant high commissioner for Great Britain.

R-101 Makes Trial Trip

Cardington, Eng.—The re-made British dirigible R-101, which is the largest airship in the world since it recently was lengthened, has made a short trial trip preparatory to a voyage to India.

Stresses Empire's Greatness

Hon. R. B. Bennett Addresses British Gathering In London

London, England.—With a brilliant gathering in attendance the delegates to the Imperial Conference were entertained at the Guildhall by the Royal Empire Society and other Imperial bodies.

"In the diversity of the peoples of our Empire, their talents and their resources, lies the real secret of the Empire's greatness," declared Hon. R. B. Bennett, prime minister of Canada, in his address.

The agents of the Canadian prime minister was greeted several times by cheers.

"Before us," said Mr. Bennett, "lies the task of Empire consolidation and more than one step we have taken in the field of trade and commerce, finance, commerce, finance and other great affairs engage the attention, to thank of our Empire in an economic unit."

Mr. Bennett was cheered when he declared the nations of the Empire were not yet bankrupt in statesmanship, development of their countries occupying a quarter of the land surface of the globe and comprising a quarter of the population still speaks, by guidance and leadership, of achieving in the future what they had not attempted, namely, the economic solidarity of the Empire which was as capable of achievement as the development of their constitutional liberties had been.

H.R.H. Prince Arthur of Connaught, governor-general of South Africa, presided at the banquet.

Won Citizenship After Long Court Battle

But Woman Refused To Take Usual U.S. Oath For Naturalization

Lima, O., Mrs. Carl Lauck, Philadelphia, refused to take oath to bear the expenditure of from $20,000,000 to $30,000,000 throughout Canada in relief work by one kind or another would reach every type of laborer, clerk or artisan.

The program of construction and improvements to be undertaken by the two large railroad companies, which has been formally approved by the cabinet, would result in the employment of 10,000 men for a year, Senator Robertson said. In addition, 3,000 teams of horses would be needed for grading purposes and this would be of benefit to great numbers of farmers. The whole programme, he stated, called for the expenditure of $25,000,000 with work to start immediately. Orders would be placed at once for rails, Nova Scotia and steel other necessary supplies. Because these orders were not usually given at this time of the year, it would be necessary for the railroads to raise the money Senator Robertson explained. Because of this, the government had decided to set aside $1,500,000 out of the $30,000,000 fund to guarantee interest and carrying charges to the railroads.

The first agreement with any of the provinces—Manitoba—has been reached and awaits confirmation by the cabinet. Have Extensive Program

Railways To Proceed With Construction and Improvement Work

Ottawa, Ont.—The federal government has been made by Senator Robertson, Minister of Labor, that the Canadian National and Canadian Pacific railways would proceed immediately with a $21,000,000 construction and improvement programme. Expenditure of $6,000 men would thereby be provided for a year, and 3,000 teams of horses would be given work for a considerable part of the time, especially for grading purposes. The employment of horses will help the farmers in many districts.

Vancouver Wheat Exports

Shipments To Date Double the Amount Of Second Year

Vancouver, B.C.—Wheat exported from Vancouver during the current crop year to date totalled 4,362,275 bushels, double the amount shipped out during the same period of the record crop year of 1928-29 from Vancouver, when total shipments reached 108,000,000 bushels. Last year at this time only 2,078,104 bushels had been shipped.

To Teach Natives

Leningrad, Russia. — Geologists, paleontologists and other scientists were sent to northeastern Siberia where 3,000 nomads live in one of the remotest corners of the world. They expect to teach the natives how to fish better, to start reindeer farms, a chemists' nursery, meat cannery and a plant to make bodies from sea weed.

Hails Home Senile Liberals

Halifax, N.S.—Angus L. MacDonald, barrister of Halifax, was chosen leader of the Liberal party in Nova Scotia in open convention here.

Staff Reduced When Resources Handed Over

Accounts Can Be Handled By Smaller Number Of Clerks

Edmonton, Alberta. — Ceremony of any kind marked the formal transfer of Alberta's natural resources from Ottawa to the province, when stenographers in the Dominion Lands office here, bound themselves out of employment, the transfer of the resources was made.

Regina, Sask. Effective reduction of staff to permit financial savings by the administration of the natural resources is forecast by Premier J. T. M. Anderson in a statement issued by the provincial government took over the natural resources of Saskatchewan.

The transfer of the natural resources involves the transfer of about 20,000 accounts for grazing leases, mining claims, timber permits and contracts, land sales and contracts and school land contracts.

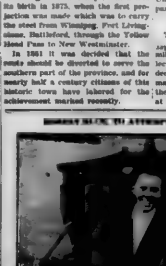
Hope Is Fulfilled

First C.P.R. Train Receives Historic Welcome at Battleford

Battleford, Sask. Another page in the history of Battleford was written when the first Canadian Pacific railway train pulled into the depot at 12:30 on the afternoon of Sept. 30.

The few citizens who crowded the station platform, it was a fulfillment of a long cherished hope, which had its birth in 1873, when the first projection was made which was to carry the steel from Winnipeg, Port Livingstone, Battleford, through the Yellow Head Pass to New Westminster.

In 1881 it was decided that the route should be diverted to serve the southern part of the province, and for nearly half a century citizens of this historic town have labored for the achievement marked recently.



Robert Buck, 16-year-old Elizabeth, N.J., lad who made his first flight eight months ago, will take off soon in his Pitcairn biplane in an endeavor to lower the junior cross-country flight record. He is a friend of Hilda Schroeder, 15, present holder of the transcontinental mark.

Maritime Ports Are Important To Canada

Only Avenues Open On Our Atlantic Coast At Certain Seasons

Halifax, N.S.—Emphasizing the important position the ports of the Maritime provinces hold in relation to the Dominion at large, Sir Henry Thornton, president of the Canadian National Railways, reminded his hearers at a luncheon given in his honor here, that, at certain seasons of the year the harbors of the Maritime provinces are the only avenues of egress and egress on the Canadian Atlantic coast.

To contemplate any separation of the Maritimes from the rest of Canada said Sir Henry "would be to contemplate economic suicide." The position of the Maritimes economically he added, was the best in the Dominion today. He pledged the fullest co-operation and support of the C.N.R. in development of the port and province.

Canada's Fire Loss Heavy

Total Of $47,000,000 Shown In Report For Last Year

Ottawa, Ont. The fact that Canada's fire loss last year $47,000,000 represented almost two and one-half times the amount of the National Government set aside to relieve unemployment, was called up by Premier John Bracken of Manitoba, to impress on delegates to the Dominion Fire Prevention Association convention the need for greater effort.

Prime Minister R. B. Bennett was named honorary president and W. H. Shapley, Toronto, is the new president.

Among the many resolutions given approval was one recommending that institutions receiving financial assistance from federal, provincial or municipal authorities be compelled to provide adequate fire safeguards.

Develop Wheat Markets

Federal Government Appropriates Sum Of Money For Practical Purposes

Ottawa, Ont. In an effort to develop the markets for Canadian wheat, the Dominion Government has appropriated a sum of money to be used in practical demonstrations of the use of Canadian flours for baking purposes.

These demonstrations will take place first at different points in the United Kingdom, subsequently expanded to European countries.

Japan Taking Cotton

Tokyo, Japan.—Japan is taking action to relieve the pressure on cotton situation in the United States. Five million cantons takers have begun collecting data in the empire's second decennial census. Preliminary estimates stated the census would show the population of the whole empire at about 89,000,000.

ARE PLEDGED TO THE CAUSE OF EMPIRE TRADE

London, England The self-governing nations of the British Commonwealth pledged themselves to the cause of Empire trade. Through out the speeches which marked the opening proceedings of the Imperial Conference the ever-recurring note was the desire to co-operate to meet the common problem with common action.

[illegible] since another parting point in the wonderful history of our people," declared Ramsay MacDonald as a radio broadcast. "Our weakness" he continued "is in our psychology far more than in our skill our material or our resources. It is a renewal of will that we need."

"What we have to consider," said the British Prime Minister, in opening the conference, "is, I would suggest, what practical means we can devise for helping one another, and thereby helping us all, always remembering the different world conditions and internal industrial circumstances [illegible]"

The conference, for the first time in many years, elected Lacroix to act the Foreign Office

"At this table," said Mr Ramsay MacDonald, "sits the descendants of many great men and of many great events which are enshrined in a history common to us all. They do not receive from all of us the same welcome or the same homage But they do receive, digested by time, their aspects and their results smoothed and mellowed by the passing of the years by the progression of the pageantry of history which is now our inheritance for good or for ill

"We will be the flesh, with fate or destiny still unwritten regarding we who have to live and plan for the future. We face a world still unsettled; beyond us a prospect of intangible fears, yet purposes, unhappy suspicions, firm convictions. Unsatisfactory experiment and yet defiant idealism, and it is our lot to try and find a sure way amidst the confusions to a way which those who will after us will gladly pursue to the goals which are to us but promises. If it be our good fortune to find that way, it is only because we have confidence in each other, because we are inspired in all our deliberations by the spirit of free association, and guided by a will to co-operate not only in settling our own difficulties but in giving an example of autonomy within unity to the rest of the world."

And the sentiments voiced by Mr. Ramsay MacDonald were echoed in the subsequent speeches of the Dominion prime ministers.

"My colleagues and I represent the people of Canada," Mr. Bennett declared. "We come to this conference not only with a message of affection and goodwill, but in the strong belief that, by the concerted action of the whole, we can advance the interests of all sections of the Empire."

Pilot's Death "Misadventure"

Fort William, Ont. "Misadventure while teaching advanced flying" was given as reason by a coroner's jury, for the death of Capt. James A. Dickie, Bishop's Field Flying Club instructor, who was killed when his plane crashed near here, September 9. Miss Marian Bruton, passenger in Dickie's Moth 'plane when it met disaster, was unable to testify. Suffering from lapse of memory, she said she was unable to remember anything of the fatal flight.

Eleven Burned In Explosion

Veloyn, Gananoque, Manitou. — Eleven persons were badly burned as 5,000 skyrockets exploded in San Miguel cathedral during the celebration of the San Miguel Saint's Day. The fireworks, which had been stored in the church for the celebration, were ignited by a skyrocket which exploded.

Fails Under Tea Cart

Dover, England.—Miss Mercedes Gleitz, British woman swimmer, failed in a new attempt to swim the English Channel. Entering the water she stayed in only about four hours, then abandoned her efforts because of the intense cold.

CANADA'S SHARE OF BRITAIN'S WHEAT IMPORTS

Ottawa, Ont.—During the calendar year 1931 Russia supplied the United Kingdom with 21.24 per cent. of its total wheat requirements while Canada's percentage was slightly higher at 20.13. These figures were contained in a special report on world trade in wheat, issued by the Dominion Bureau of Statistics, especially for the benefit of the Imperial Economic Conference. Russia's total exports of wheat to the United Kingdom in 1931 amounted to 54,910,266 as compared with total Empire imports to the United Kingdom of 94,968,576.

The total wheat requirements in 1931, of the United Kingdom, chief wheat importing country of the world, amounted to about 223,000,000 bushels. This was supplied mainly as follows: Canada, 55,963,000 bushels; Australia, 43,307,000; British India, 990,100; other British countries, 73,000, Russia, 54,910,266; Argentina, 38,701,714, United States, 15,576,000; Germany, 4,353,000; France, 25,000, and other foreign countries, 8,875,000.

Russia's upsetting invasion of the Empire wheat market came in the last two years, the total in the United Kingdom for 1930 having been only 24,920,000 bushels, while the five-year average was 10,000,000. This compares with a five-year average over the same period of 72,194,000 for Canada.

Entered third on average yearly British exports of wheat for the five years ended with 1930 amounted to 220,101,000 bushels. Canada which leads all wheat exporting countries had an average total of 257,063,000 bushels.

Estimated average world exports during the same period totalled 692,648,000 bushels. Argentine led among the foreign countries contributing to this total with an average of 149,726,000 bushels, with United States, Hungary, Algeria, Germany, Rumania, France and Russia, following next in order. Russia's average was 51,968,000 bushels.

Kaye Don Will Race Again

Britain's Speedboat Racer Has Hope Of Capturing Trophy

London, Eng. Kaye Don, Britain's speedboat racing idol and holder of a new world record upon the water, has left here for Southampton to sail on the steamer "Majesty" for Detroit, where he will race against Gar Wood for the Harmsworth trophy.

A large crowd of cheering admirers bade Don farewell.

"I am making no promises," he said, "except this — I will do the best I can against Wood's boat, which has a much greater horse-power than my Miss England III."

By promising to do the best he can, Don meant he would try to reach again on the new Detroit course the two-miles-a-minute pace he set when he doubled his abandoned power plant across Loch Lomond at an average speed of 119.81 miles an hour, with a top mark of 126.5 miles, the fastest any human has travelled over the water.

Optimistic At Eighty

Man From Ontario Quite Confident Of Finding Work

Winnipeg, Man.—Flat broke and 80 years of age, an optimistic traveller arrived in Winnipeg from Brockbridge, Ont. He visited the city hall and said he had ridden bumpers here in search of work in the harvest fields. He was not exactly looking for a meal ticket at the city hall, he said. He just wanted to look in and talk to some of the folks.

A blacksmith by trade, he said he had never missed a meal in his life and did not expect to. He was sure he'd find something to do in the land after the harvest.

Alberta Delegates

Edmonton, Alberta.—Hon. George Hoadley, Minister of Agriculture, and Dean Howes of the university, will be the Alberta delegates to the meeting called by Hon. Robert Weir, federal minister of agriculture, for August 29 in Toronto.

No Dairy Shipments

Lack Of Refrigeration Service May Prevent Exports Over Churchill This Year

Montreal, Que. Owing to the high rates that would have to be charged little hope is held out that a refrigeration service will be available out of the port of Churchill, Man., to carry butter and cheese to Great Britain, at least this year, Thomas Harding and Co., steamship agents here, stated recently.

Efforts had been made by western Canadian interests to obtain steamship service from the new northern port for dairy produce, the company stated, but it was felt the rates would be too high to attract shippers. Owing to the present long haul by the rail route to carry grain do not have the refrigeration facilities necessary.

Western Canada last year shipped a considerable quantity of butter to the United Kingdom when exports of that commodity were resumed after a lapse of several years. Certain quantities of eggs and poultry are also shipped across by the west, the shipments being made via Montreal.

Winnipeg, Man. Officials of the On-to-the-Bay Association had little encouragement to make in Montreal despatch, saying it would be practically impossible to ship dairy products from Churchill, owing to prohibitive rates. They regarded the statement as indicative of the difficulties encountered in developing the new route. Ample dairy produce was available in the west for export to ensure distribution of a more frigorated ship on a reasonable freight rate basis, it was stated.

National Research Laboratories

Two Thousand Guests Attend Official Opening At Ottawa

Ottawa. The handsome, bronze doors of the new national research laboratories swung open to 2,000 guests from the British Empire and the United States recently as the main facade light shone from half-a-hundred windows.

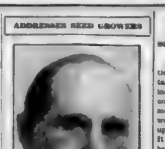
His Excellency the Governor-General faced one of the most distinguished audiences in Canada as he pressed the button that worked the building formally opened.

Hon. H. H. Stevens, Minister of Trade and Commerce for Canada, presided. Speaking briefly, he called upon the Prime Minister, Rt. Hon. R. B. Bennett, to address the assemblage. After a short address by Mr. Bennett, his excellency, upon whom fell the duty of declaring the building open, spoke.

Embargo Elevator

Winnipeg, Man.—The United Grain Growers, Limited, have awarded a $250,000 contract to the Northern Construction Company, of Vancouver, for the extension of their elevator there to a capacity of 2,000,000 bushels, the work to be completed by November 1. According to an announcement of S. S. Law, president of the firm here. The present capacity of the [illegible]

ADDRESSES SEED GROWERS



Under the auspices of the Canadian Seed Growers' Association Field Days are being held this month at various points throughout Saskatchewan Mr H. S. Vigor, Secretary of the Saskatchewan Branch of the Association pictured above, will be one of the principal speakers.

War Loan Conversion

British Plan Is Attended With Success According To Report

London, Eng. The success of Great Britain's war loan conversion is strikingly illustrated in the official report of government revenue and expenditure for last week, from which it is inferred that nearly [illegible] of the total of £2,084,000,000 was converted by July 31.

The report includes an item of expenditure "cash bonuses, £15,750,000 sterling." When the government announced its conversion scheme on June 9 there were five per cent securities could be exchanged for a 3½ per cent issue, bondholders were offered a cash bonus of £1 for each £100 if they gave notice of intention to convert before July 31

Within a week of announcement of the scheme 50 per cent of the issue had been converted. Another week passed before the government announced that 90 per cent had been converted.

Quest For Measles

Scientists Require Golden Rules For Recording Similarity

Montreal, Que.—The McGill University weatherman's quest for measles germs, which annually waists brought quick response Wednesday. Telephone calls assured him there are still wanes in Montreal that will develop [illegible] after which he will [illegible] to exercise a few hairs of it on [illegible] of science.

Dr. McGill microbiologist [illegible] the fine, sensitive, golden hairs for a hypograph, a delicate instrument used for recording humidity changes from hour to hour. The hair of brunettes is too coarse.

Shen'd Attend Twelfth

St. Thomas, Ont.—Representation of the Dominion of Canada by a composite battalion of great war veterans at the unveiling of the Canadian memorial at Vimy Ridge, which may be attended next year, was recommended by Col Hercule Barre Cannifton trade commissioner to France.

Double Taxation

Steps Being Taken To Remedy Unfavorable Situation

Ottawa. Definite recommendations from the conference of income tax officials of the four western provinces, which was held here, will go in course to their respective governments, certain general principles and working methods having been agreed upon for joint adoption if approved. It is expected that the changes will be made to apply to next year's tax

Provincial income taxes as affecting wage-earners are the chief point on which some changes in the present system are desired. The superintendents of the four provinces are trying to find a way of avoiding the taxation of the same income twice. A [illegible] were found in last year's operations of persons living in one province and working in another, and under the income tax laws as they stand at present the incomes of such persons are liable for taxing purposes in both provinces. This overlapping and double taxing will be remedied, it is understood, if the suggestions of the superintendents' meeting are adopted.

Floods Take Heavy Toll

Hundred Thousand Chinese Homeless and Many Lives Lost

Harbin, Manchuria.—An hundred thousand Chinese residents of Harbin were forced by unprecedented floods to abandon their section of the city which has become a vast inland sea.

Approximately 2,000 persons were reported drowned in the valley of the Shanghai River, which has risen far above the level in 1914, when Manchuria experienced the worst flood in its history

Harbin's Chinese residents have congregated in concentration and fields on the outskirts of the city Many of them are without food, clothing and shelter.

Cholera is spreading in the district and the people are hoarding food as prices sky-rocket.

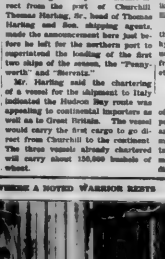
Wheat For Italy

Shipment Being Forwarded Direct Through Port Of Churchill

Winnipeg, Man.—A shipment of wheat will go to Italy this summer direct from the port of Churchill Thomas Harding, Sr., head of Thomas Harding and Son, shipping agents, made the announcement here just before he left for the northern port to superintend the loading of the first two ships of the season, the "Peony-worth" and "Servata."

Mr. Harding said the chartering of a vessel for the shipment to Italy indicated the Hudson Bay route was appealing to continental importers as well as to Great Britain. The vessel would carry the first cargo to go direct from Churchill to the continent The three vessels already chartered will carry about 150,000 bushels of wheat.

WHERE A NOTED WARRIOR RESTS



The grave of Field-Marshal Lord Plumer in Westminster Abbey, showing four cushions on which are placed his insignia. Lord Plumer's remains lie close to those of the "[illegible] Warrior." The tablet shown at the left bears the ground reals in part: "To the Glory of God and to the Memory of One Million Dead of the British Empire who Fell in the Great War of 1914-1918."

Jubilee Veterans Offer Services To Bolivia

British Soldiers Would Join In Fight Against Paraguay

London, Eng. Many unemployed war veterans called at the Bolivian legation and consulate general here in response to an announcement of the British Fascisti that a large number of British Fascists were anxious to join the Bolivian army in its dispute with Paraguay. They were courteously informed, however, that recruits were not needed at present.

The consulate-general said it had received hundreds of letters from men desiring to offer their services, in addition to a "first aid Fascist" offer of 10,000 men if necessary.

Menace To Health

Dental Authority Says Sugar and White Flour Injurious To Teeth

Toronto, Ont.—The corner candy store is a greater menace to public health than the old corner saloon, according to Dr. Martin Dewey, New York, president of the American Dental Association.

Asked for an interview during the dental convention he is attending here, Dr. Dewey said, "just say this—it has been said a million times but it will stand plenty of repetition—white flour and white sugar are the big enemies to the teeth of civilized peoples. These are the culprits which are responsible for more ill-health so far as teeth are concerned than any two articles you could mention."

PREFERENTIAL TARIFF ASSISTS EMPIRE TRADE

Ottawa, Ont.— Preferences granted by Canada to Empire countries amounted to $30,000,000 during the year ended March 31, 1931, according to the preliminary trade report just issued. This was estimated as the difference between the duty collected under the preferential tariff and what would have been collected under a general tariff. The difference between the preferential and treaty tariffs would have been [illegible] million dollars less.

Total Empire imports for the year under the preferential tariff amounted to $161,588,195. The duty collected amounted to $19,125,220, at an average ad valorem rate of 12.1 per cent. The estimated duty for this volume under treaty tariff would have been $22,847,980 and under a general tariff $49,302,030 Of the total imports goods valued at $37,151,606 entered Canada free.

The great bulk of these imports came from the United Kingdom, the total being $96,305,980, of which $18,-280,642 represented free imports. Duty collected on United Kingdom imports amounted to $13,437,744. Under a treaty tariff this would have been $23,737,003, and under a general tariff, $39,962,152

The next largest importer to Canada, the British West Indies, sent goods valued at $13,568,763, of which $8,745,705 was dutiable, bringing a revenue of $1,384,476.

Under a treaty tariff this would have been $7,073,961, and under a general tariff, $7,147,446.

Increased Acreage

Prairie Provinces Have More Than Million More Acres Under Crop This Year Than Last

Ottawa, Ont.— The prairie provinces have 1,043,278 more acres under wheat this year than last, according to a crop report issued by the Dominion Bureau of Statistics Wednesday, August 26.

For all Canada, the increase is 994,800 acres.

"The estimates of the areas sown to the principal grain crops in the three prairie provinces as shown by the annual statistics collected in June not through the rural schools are now available. The figures reveal an increase of 1,043,278 acres (four per cent.) in wheat, and 221,083 acres (2.7 per cent.) in oats, with slight increases in barley and rye and a rather drastic reduction of 26 per cent. in flaxseed acreage from 618,-961 to 443,702 acres.

A Separate Grade For Garnet Wheat Is Sought By British Milling Interests

Continuation of the policy of permitting Garnet wheat to be mixed with Marquis and Reward varieties or of marketing it as No. 1 and No. 2 Northern wheat will result sharply against all wheat sales from Canada, in the opinion expressed by William Smith, chief grain buyer and miller for the Scottish Co-Operative Wholesale Society.

The British miller, he stated, had found the Garnet variety unsuitable for milling purposes in Britain. At a recent meeting of the milling and grain interests held in London a decided stand was taken which called for the special grading of Garnet wheat as distinct from the other Canadian wheat varieties.

It is to the interest of the Canadian wheat producers, he said, that this separate grading is undertaken, stated Mr Smith. "The British buyer of wheat is determined that when he purchases grain on the Canadian market that the commodity supplied will be of either No. 1 or No. 2 Northern or Reward. Any purchases of Garnet variety made will only be caught on the chaff and discovered that it is of that variety, and at a price considerably below that paid for the other standard Canadian varieties."

Reasons given by Mr Smith for the objection of British millers to Garnet millers to Garnet were that it is lacking in protein values and also that its milling qualities are not thought much of satisfactory as compared with the Marquis and Reward varieties.

Mr Smith, however, in his address, stated that he did not wish to be construed as advocating the non-growing of Garnet. "This may be the best type of wheat to grow in certain districts, but, for its successful marketing it must be labelled what it is and not be placed at the smallest as high as grade with the super Canadian varieties."

Unless there is a separate grade for Garnet, British millers and grain buyers will be forced to divert their purchases to other countries, and there is no assurance to them that this wheat would not be the required Marquis or Reward variety.

A further factor, said Mr. Smith, which must be considered is that the continuation of a policy of not grading the Garnet wheat may result in definite lowering of the price of all Canadian wheat on the British markets.

Bad Luck For Boxer

Violently Stricken In London Ere He Fights Big Foe

Flitting a smoke with a glass eye in the fashionable operation which fooled a doctor when he broke on a boxing misadventure has in a London inn.

Some time ago this race and valiant his boss became blind in one eye. It was feared that the eye was badly damaged and causing much pain.

The offending eye was plucked out, and the sailor's recently good spirits returned.

But the sea had lost much in boxing. The sailor was a notable one, and has been selected, and will be fitted in.

New Natural Gas Pumper

A large flow of natural gas has been struck in the Kinsella field, southeast of Stettler, Alberta. The new producer is reported to have a flow of 7,000,000 cubic feet per day.

Believe Ice Spots Caused Lake Level

Professor Finds Solar's Changes Follow Solar Cycle

Sun-spots control the level of Lake Erie, according to Prof. J. J. Nissen, observatory director of Cleveland, after a detailed study in co-operation with Wilmon Koehl, graduate student.

Logging two years behind, the under level in the lake rises and falls with the 11½ year cycle of sunlessness observed.

The unusually high level of the lake in 1929 was due directly to the fact that the sun spots reached a maximum degree of intensity during 1928, the report says. The next high level will be reached, according to Prof. Nissen's observations, when conditions do so for at least two successive years.

WEDNESDAY, AUG. 17th, 1932

Here and There

Lord Nigel Douglas-Hamilton, in charge of a party of thirty Baughton Public School boys, who will arrive in Montreal August 6, under his supervision, claims that there is no better "finishing school" than a tour of this nature.

First wheat harvesting reports in the Canadian West were registered by the agricultural department of the Canadian Pacific Railway from Winnipeg, July 27, with barley and rye going under the knife in the Alida and Estevan subdivisions of the railway. The wheat was harvested in southern Manitoba.

August will see the season in the Canadian Rockies at its peak with the Prince of Wales Trophy, annual yachting golf meeting from far and near, scheduled for August 15-20 and culminating with this event the Indian Days celebration, August 18-21, which will be attended by Stoneys, Crees and Kootenays.

Conducting five French and five Swiss professional men from Paris, France, to this continent, Nicolas Rezz, of the Paris office of the Canadian Pacific Railway, is visiting Toronto, Windsor, Falls, Detroit, Chicago, Minneapolis, New York, Albany, Montreal, Quebec, and returning to France on the Empress of Britain, August 6.

Mystery crimes, so popular out of New York, Southampton and other great ports, were ushered in on the British Hebrides coast with the sailing of the coastal liner Princess Patricia, of the Canadian Pacific coastal service, to an unknown destination under sealed orders recently. Close to 200 passengers were attended by the trip.

The league formation of the season finds or Elden, with Jos Cook; Leslie Pawnday, Jean Pearn, William Calder, Jr., and Tom Howard.

This picture comes to the Empress Theatre on Friday and Saturday nights.

The first car of new wheat moved by the Canadian National from Saskatchewan was loaded at Biggar.

ANNOUNCEMENT

In order that arrangements can be made for the High School picnic, it is requested that all pupils attending in Town, who propose attending the High School, notify the undersigned either in person or by letter before the 24th. of August.

VOL. 11 No. : FORT SASKATCHEWAN, ALBERTA WEDNESDAY, AUG., 24th, 1932 $1.50 PER YEAR

What Co[illegible], is General Th[illegible] and the District

Wheat cutting in the Fort district went into full swing this week, although a number of farmers have their wheat all cut, those in a great amount still standing.

On the Simmons farm 14 binders were in operation on one field at once.

A good yield in all grains are reported as the rains of 10 days ago greatly helped the filling of the late grain crops.

USE OF LIVE DECOYS BANNED IN ALBERTA

The use of live decoys in hunting water fowl in the province will be prohibited this season.

An order-in-council, with this instruction, has been passed at the instance of Hon. George Hoadley, minister of agriculture, and is in line with orders in other provinces in the dominion.

The use of live decoys in hunting is held to be detrimental to the conservation of water fowl.

ONE-HUNDRED-AND-TWELVE ENJOY COURSE AT VERMILION

After a strenuous week spent at the school of Agriculture, about fifty of the one-hundred-and-twelve short Course students returned by bus to Edmonton on Wednesday and Thursday, and from there distributed to their homes. The balance of the group was sent across country by car.

Last spring the Department of Agriculture, through the Vermilion School of Agriculture, distributed garden and flower seeds to 16,000 boys and girls of the rural, village and country schools, of Northern Alberta. The vegetables are grown, canned and cooked, and sheep and hogs cared for, in preparation for the Fair which is held in September, and to which the boys and girls bring their exhibits. The contest is limited to the ages between 11 and 17.

The highest scoring boy and girl, from each School Fair Center is selected for a free week's course at the School of Agriculture, where practical instruction is given, in addition to say every minute of the day is organized into play, rest and work periods, so that the young people have a wonderfully pleasant time.

Out of the group gathered at Vermilion one boy and one girl is again chosen to receive a Scholarship offered by the Department of Agriculture and valued at approximately $176.00. This Scholarship covers one winter spent at the Vermilion School in either Household Science or Agriculture and includes all expenses to and from the school, with board, lodging and books. Everyone of the 112 boys and girls are keen competitors for this very handsome prize. Each year a first, second and third boy and girl is selected. The idea being that in the event of the first or winner being unable to take the course the second in line takes his or her place.

The whole group is returning to their homes well pleased with the wonderful course provided at the Vermilion School of Agriculture and the opportunity offered to associate with a widely scattered circle of new friends.

WEDDING

A quite wedding took place on Wednesday forenoon, August 17th, at the Manse of the United Church, Fort Saskatchewan, when Charlotte Cecilia Shaver, daughter of Mr. R. Field of Winnipeg and Clarence R. Shaver both of Fort Saskatchewan, were united in marriage by the Rev. D. C. Ramsay. They will take up their residence at Fort Saskatchewan.

The best advertisement for any firm is good merchandise pleasantly sold.

Partridge Bill News

Mrs. Robert Alton and son Arnold of Morinville, Alberta have been guests of her parents Mr. and Mrs. Wm. Ouhaldstein.

Misses Ona and Eileen Gordon were hosts to the members of their Sunday school class at a stepsdown party two weeks ago.

Mrs. Roy Alton and little daughters Mona and Gertrude of Edmonton, have been visiting with her two sisters, Mrs. C. H. Fitzsoff and Mrs. George Ouhaldstein.

Mrs. A. B. Whitson and daughter Doris returned home last week from an enjoyable two weeks' holiday at Vermilion.

Misses Marguerite and Bobbie Worring have had as their guests their cousins Mary and Herbert Worring of Edmonton and Louie of Gibbons.

Bess Alton and Gladys Ouhaldstein have been on a three weeks visit to long suffering relatives at Vermilion, Marwayne, and Kitscoty. They are expected home this week.

Miss Vera Gordon of the Lamont Hospital staff was home for a holiday last week.

We are glad to hear that Mrs. Robert Smith is home again somewhat better after her illness and stay in the Royal Alex. Hospital.

Mr. and Mrs. George Campbell and family of Edmonton were guests of Mrs. Jos. Smith last Sunday.

Mrs. Wilmot Alton is entertaining her Sunday school class this Wednesday afternoon.

Mrs. Raymond Wallis and son Margaret are holidaying with friends at Hughenden, Alberta.

Rev. Std. Pitts of Lamont, Alberta, who had been attending the school of Religion at St. Stephens College, Edmonton, was a welcome visitor here last Sunday.

We are all enjoying the services of Rev. Mr. Forster of Airdrie, who with his family is supplying for Rev. Hodgins during the latters absence.

Tom Todd and Herb. Oxley are engaged on repair work at the school, which reopens Monday, August 29.

Norman Lumsby is expected back from the coast this week-end to resume his duties as teacher.

The crops in this district are very good and wheat cutting is in full swing.

Tennis Tournament to Be Held Next Monday Night

The Fort Saskatchewan Community Tennis Club will hold it's first annual tennis tournament beginning Monday evening, August 29th., to determine the winner in Ladies' and Men's singles. Two cups are to be given in these events.

The entry fee will be 25cents per person entering, and entries must be handed in to Dr. Calhoun or at the Bank Office, not later than Monday night, when the draws for Monday night will be made.

The winners will play against the winners of the St. George Tennis Club and teams of the Fort Garrison.

All members of the Fort Saskatchewan Tennis Club are asked to play in this tournament and make this the closing event of the season.

It was the intention of the committee to give one cup to the Ladies' single winner and one to the gents, three cups to be given at a dance to be held sometime in October.

We would like to see every tennis player in town to play in this big

World's Grain Exhibition To Be Held 1933

Here and There

Practically an egg a day is eaten by every man, woman and child in Canada. The average per capita yearly consumption of eggs in the Dominion is 361, the highest of any country, according to an official computation.

Canada's gold production in 1931 reached the new high total of 2,562,776 ounces valued at $53,487,900. This is 27.6 per cent above the 1930 production. Of this total the province of Ontario accounted for 1,079,742 ounces valued at $45,902 236.

New Brunswick can now claim the rare distinction of producing a white squirrel. The animal was caught by Jack Young of Penobscot, and who trapped it near the village of Lincoln. It has been bought by the government and will be mounted and placed on exhibition.

Hon. Carrine Wilson, Canada's only woman Senator, arrived recently at Quebec on board the Empress of Australia, from a trip through Europe. While in London she visited the House of Lords, but could not make comparisons with the Senate since the House was not in session.

Western points have been given a boost by the rains of the last few days of April and farmers of the prairie provinces are elevated by the seeding conditions and good prospects of crop success, according to information summarized by the Canadian Pacific agricultural department crop report.

Following the announcement of reduced ocean rates on Canadian Pacific ships on the Atlantic, one of the largest parties ever to leave Toronto at this time of year for the Old Country sailed recently aboard the Duchess of York. There were 276 in the party drawn from all parts of eastern Ontario and from Toronto.

The first catch of fresh, red cherries from Prince Rupert City, Port Mann, Surrey, Langley, arrived recently. They are from Chemainus, Prince, the pride of the apple city of that town. Chemainus is one of the places in Prince Rupert that the Canadian National visited the Grand Pre expedition.

Four strokes of three Prince Rupert fish trust and fishermen's unions were sold at the Department of Fisheries' auction sale of confiscated salmon totalling 16,084. The sale was for a term of 110 years and on the Metlakatla, Kaigarnie, Skidegate, Masset, Naden Harbor, Queen Charlotte and Jag Bay Sounds Rivers and Inlets paid are the terms of the contract.

Daylight saving time, commencing in Canada and Dominion May 1, complicated train schedules on Canadian Pacific travel. Travellers have nowadays to remember that the railways keep on standard time and govern themselves accordingly. The railways announced a number of years ago that thereafter prior to the introduction of daylight saving.

From Belle Norfolk Island in the South Pacific, one of the most remote points in the British Empire, a native maiden is coming to the exhibition at the World's Grain Exhibition and Conference to be held at Regina July 1933, has just arrived. Norfolk Island is the home of the descendants of the mutineers of the "Bounty" in 1800 and it has long ago changed from a penal to a peaceful settlement.

LETTER TO EDITOR

To the ones who signs Himself "A Resident".

First of all I want to say how sorry I am for the unfortunate mistake that was made in the publishing of my class results for June. The note which I added to my return "best to be omitted" was intended for the publisher only. My intention was that those who were not to go into Grade 5 in September should have their names omitted from the list entirely. I had no intention of

rating these pupils as "failures" realizing that the majority of these were pupils who had attempted to complete Grades 2 and 4 in the one term. I regret deeply that I did not make this clear to the publisher and sincerely hope that this definitely straightens the matter out.

M. Stevenson.

The secret of a permanent business is to get and keep goodwill of as many people as possible.

"Fresh from the Gardens"

Help Our Youth Now.

Within recent weeks daily newspapers throughout the Dominion have printed columns, and sometimes solid pages, of names of young men and women who have graduated from universities and colleges or passed the final examinations of their Normal, technical, collegiate, high school or business college courses. The total number of these young people in Canada runs away up in the thousands every year, and last year and again this year has been no exception.

In the case of the University and college graduates they have, with a few exceptions who will go on with post-graduate work, come to the end of one phase of life. The same is true of the vast majority of those who have completed Normal, technical, collegiate, high school, and business college courses. A certain number of these will go to university, or take up some special course of further training, but, generally speaking, these students have ended five days of their academic preparation for life.

In a word, this great army of youth, who in their teens and early twenties have been studying and undergoing training, has completed this first stage in life's journey. They have been preparing for work. They are now ready to go to work, and are eager to begin, bubbling over with enthusiasm and keyed up with energy for the work ahead, and stirred with ideas and ambitions of what they expect and mean to accomplish.

And right at the outset they are met with relief, with crushing disappointment. In an overwhelming majority of cases there is no work for them to do, no positions open for them to fill, no opportunities knocking at the door to which they can respond. True, there is the odd case where through family or other influence a position is made available, but, by and large, inability to secure work is the experience of this army of today's youth, trained, eager and ready to work. They find themselves in a world which offers them little or no opportunity to use their hard won knowledge and training.

Herein lies the greatest tragedy of present day conditions, herein is to be found the greatest menace not only to the future lives and usefulness of these young people, but to the future of our country. At the close of one period in their lives, they are confronted with a blank wall; they cannot retrace their steps, they cannot go forward. What are they to do except "mark time" for the present, and, while marking time, wait in the hope that on their enthusiasms, their energy and initiative, their ambitions,—in a word, on their character? They must fill in the time in some fashion. During this trying period of enforced idleness, are they going to be content to mark time, consume, slip into evil ways, weaken morally? In the close, straight thinking developed in their student days to become twisted, and the strong endeavors deeply imbedded in the wisdom and experience of the past which have been instilled in them to be uprooted?

These are questions to be answered not only by present-day youth, but by the more adult generation. The elders of today have survived other depressions, other periods and crises, and they know that the evils of today will be overcome and pass away. They have confidence that there are just as good, even better days ahead; that the future holds just as great opportunities, greater in fact, than the past, and that these opportunities will come to the youth of today as they came to them. But, youth, lacking the experience is not sure of this. It has had its golden visions of immediate activity and usefulness in the world of work dimmed, if not shattered. They are hurt and bewildered. They are not at all sure of the future, and are in a questioning state of mind. They do not know where to turn. Parents and friends are absorbed in their own difficulties, worried and apt to be impatient.

The elders of this generation require to develop an understanding of their children's problems and present outlook on life, to cultivate in them a deep sympathy, and to cultivate a divine patience with them. Parents can, perhaps, do more in these days to make or break the future lives of their children than was possible for the case in other years.

And what is true of the parents is likewise true of those who are the leaders of and responsible for the life and activities of the communities in which they live. Youth must be served, and if active remunerative employment for a time cannot be provided as an outlet for their energies and enthusiasms, then other provision must be made.

Students of the problem confronting youth at present suggest two forms of activity for them in the absence of other employment. One, that in each and every community adequate means and forms of recreation be provided to engage the interest of and provide an outlet for the energies of youth,—in all departments of sport, in properly supervised dances, in the organization of orchestras, glee clubs, amateur theatricals, debating societies, in libraries containing books on inventions, explorations, science, etc.

Second, in the arousing and developing of an interest among young people in the welfare of the community in which they live. If remunerative occupation cannot be provided for the youth of the community, give them the opportunity to serve themselves through some form of recreation and to serve others and the community at large until the opportunity to realize their ambitions returns. The elders of the community can develop such programmes where is always a need, and probably more so now than ever before,—and by the application of the enthusiasm and energy of youth they can be carried through. It will keep them out of mischief, and give them something to think about besides their own problems. Instead of becoming morose, selfish and bitter, such an interest will broaden their outlook and such activities will sweaten their lives. They will discover much to be thankful for; that in many ways they are not so badly off after all; hope will be revived, confidence restored, new, and possibly better conditions created.

Suffered A Severe Attack Of Dysentery

Mr. P. L. B. Bleiler, Vernon, B.C., writes:—"Last October I suffered from a severe attack of dysentery. I tried nearly everything on the market, finished getting sick relief, until a friend told me to use Dr. Foster's Blend of Wild Strawberry, which I did, and I got immediate relief. Now I am using it as a rule to always keep a bottle of it in my medicine chest.

"Wild Strawberry is sure relief for dysentery, colic and diarrhoea, but I always say I get the genuine with Dr. Foster's."

Food Prices Decline

Cost Of Food Half Of What It Was In 1921

Cost of food today over the store counter is considerably less than half what it was in 1921, and has shown a marked decline since 1929, a report issued by the Dominion Bureau of Statistics shows.

The whole-time members of the Dominion Bureau of the retail prices of food 11 years ago stood at 141.1, in 1929 at 101.4, 101.4 being the average for the year 1926, and in July this year it was 61.4, a drop of 39.6 points in seven years.

The index number of clothing, fuel and rents has also declined, and on the whole the changes in the cost of living is shown by a drop in the total index from 99.9 in 1929 to 80.5 last month.

Practically every item of food shows reductions, including meats, butter, milk, bread, sugar, potatoes and tea. Vinegar is a lone standout, showing little change. It was 7.8 cents per pint in 1929. Today it is 7.5 cents.

WHOLE FAMILY WITH INDIGESTION

A mother of four writes: "Myself and family of four all seemed to suffer from acidity, pains in the back, and other forms of indigestion. I suffered more than I can tell. But since we have been taking Kruschen (for the last three months) we can eat what we like, and all enjoy our food much better. We never have a trace of acidity or pain now. I think it is wonderful.—" Start taking results. Whatever you may have to go without, we could not afford to be without Kruschen."—(Mrs.) M.E.

Kruschen Salts swiftly neutralizes acid, takes all the torment out of it, and gently expels it from the system. And by stimulating your organs of elimination to perfect regular action, Kruschen will prevent the harmful acid from ever accumulating again. After that you'll experience no more suffering—only health. Kruschen will keep your inside clean and serene. Get a bottle of Kruschen today! It is most counting in every part of your body. You'll feel wonderfully energetic and well. As healthy and beauty as it is humanly possible to feel.

Receipts From Radio

Receipts From Radio Licenses Exceed Cost Million Dollars

Receipts from radio receiving licenses in the fiscal year already exceed $1,000,000. This means 500,000 owners of sets have taken out licenses. The aim is to be about half of these receiving sets. It had been planned to prosecute those who did not take out licenses voluntarily but it has been decided to first make a house to house canvas. Commander C. P. Edwards will have charge of organizing this Canada-wide undertaking.

A Converter Of Poisonous Toxins Into Harmless Substances

Many testimonials could be presented showing the great efficacy of Dr. Thomas' Eclectric Oil in correcting disorders of the respiratory process, but the best testimonial is experience and the Oil is recommended to all who suffer from disorders dealt with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

Old Coin Survives Fire

Was Imbedded In Stove Of Others That Melted

A coin 1,150 years old, dated A.D. 780, has been found at Corning, Illinois, among the possessions of John Bittner. It was found after a fire was a coin collector, but when his home burned the coins were melted. The metal was thrown in a heap. Going out recently with his eye toward culling the silver metal, the man revealed one coin imbedded in the silver. Made of complete, it had not melted.

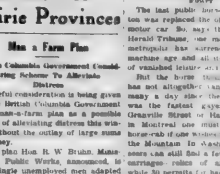
Will Not Shovel Snow!

J. D. Amos, retired marine engineer, of Houston, Texas, has turned his hobby into a money-making industry, in spite of the present economic difficulties. Amos makes small slugs and inserts them in parcel bottles. He will not reveal his secret of construction, the media in the slug, but he has to able to call at he can hold.

Out in the cattle country according to a Western paper, it is not unusual to see a boy astride on a $50 horseback. Huh! Around here you've always running into—or being run into by—$5 cars owning $15 licenses.

"WOMEN CAN BE CHARMING AT ALMOST ANY AGE"

says *Frances Starr*



"Of course I am 39," says Frances Starr, famous stage and screen star. "Years matter so little nowadays if a woman knows how to guard complexion loveliness.

"Every actress knows that regular use of Lux Toilet Soap will do wonders for her skin. I use it regularly."

Of the 694 important Hollywood actresses, including all stars, 686 use this fragrant toilet soap! 7 of us will want to try it—as just 10c. a cake!

"I'm 39—"

An Important Industry

Demand For Lobsters From Canadian Waters Is Growing

The lowly lobster has climbed to a high place of importance among Canadian industries and offers one of the brightest spots on the Dominion's business horizon, according to a bulletin just released by the Department of Immigration and Colonization of the Canadian Pacific Railway.

"Both in the United States and Great Britain, demand for lobsters from Canadian waters has been growing and the industry is in a healthy state," the bulletin stated. "Lobsters now are second only to salmon as the most important fishing enterprise in Canada, the salmon industry being centered largely in British Columbia and the lobsters coming chiefly from the Atlantic coast near Halifax, N.S."

The bulletin told of a new record for a single shipment of canned lobsters which recently was made to Great Britain. The shipment contained 18,000 cases and was valued at $300,000.

Protect the child from the ravages of worms by using Miller's Worm Powders which destroy them. It is a standard remedy, and years of use have enhanced its reputation.

A Token Of Gratitude

German Soldier Pays Tribute To Humanity Of American Doughboy

A little silver coin bracelet to commemorate the humanity of an unknown "doughboy" who saved the life of his enemy was recently deposited in America's war museum at West Point.

August Ulfrich, lats of the Kaiser's armies, sent the trinket from his death-bed and with it this note:

"Before I will have to depart, I intend to fulfill the promise I gave to a soldier of the American army, who saved my life in 1918.

"I therefore lay in your hands a bracelet made out of old German coins as a sign of appreciation for a brave whose soldiers even in war treated their enemies with great consideration."

Soft cores and warts are ugly, painful and irritating. Remove them quickly and surely with Dougles' Egyptian Liniment.

Only two British women, of the 300 women pilots licensed in this country, have been killed while in charge of an aeroplane, states the Royal Aero Club.

Erect Higher Buildings

Permission Granted To Construct Buildings In London To Height Of 160 Feet

An upward advance in the height of buildings permitted to be constructed in London has been allowed by the County Council. Henceforth structures may rise to a height of 160 feet. The previous limit was 80 feet. Risk of fire has been the principal factor in limiting the upward extend of London's buildings, but under present methods of steel construction the risk is considerably lessened. It is doubtful, however, whether the subsoil would bear structures of skyscraper proportions, though heights of 200 feet are anticipated.

Many infants are infested by worms and cause great suffering, and if not promptly dealt with may cause constitutional weaknesses difficult to remedy. Miller's Worm Powders will clear the stomach and bowels of worms and will so act upon the system that there will be no recurrence of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

Hoved Up For Theft

Japanese Army Machines Search For Active Volcano

Japanese army 'planes were put to the travel use of scouting for an active volcano. Reports came to Harbin that an extinct volcano in the Hinggang range in the west had suddenly become active. Rumblings were reported as heard in a place 35 miles away from Harbin. The 'planes failed to locate any evidence of eruption. Russian scientists reported 13 volcanoes in the Hinggang range back in the 18th century.

Dragged Down By Asthma

The poor woman who is continually subject to asthma is unfitted for his or her life's work. Strength departs and energy is taken away until life becomes a dreary existence. And yet this is needless. Dr. J. D. Kellogg's Asthma Remedy has brought a great change to an army of sufferers. It relieves the restricted air tubes and guards against future trouble. Try it.

Using Canadian Ports

Canadian ports are being used by Canadian shippers to a greater extent than possibly ever before, and the routing of the Dominion's grain to the United Kingdom via the all-Canada route is increasing. Formerly, United States ports got the bulk of Canadian grain for shipment overseas, but this situation has been changed in the past year.

Heat is Hard on Babies!

But Mothers Find Protection and Relief for Them in BABY'S OWN TABLETS

"When my children are overtired and restless in warm weather, I give them their dose of BABY'S OWN TABLETS at night, and in the morning they are happy and contented children and are a pleasure to care with," writes Mrs. Mary Moore, Halifax, N.S.

Mrs. George H. Walker, Tweed, Ont., says: "I have found BABY'S OWN TABLETS the best of all children's remedies for Summer Complaints, Colic, Teething and Constipation."

"BABY'S OWN TABLETS are cost-

Make and Keep Children Well — As Mothers Know

Tree Planting Car Is Performing Very Valuable Services For Farmers Of Prairie Provinces

The tree planting car of the Canadian Forestry Association, which left Regina on May 20th, for its annual tour of the Prairie Provinces completed that part of its itinerary covering points in Saskatchewan on August 9th with a splendid turnout of farming people at Humboldt and on Wednesday. August the 10th, proceeded west on the Canadian branch of the Canadian Pacific Railway to Alta to, where the first stop of the present tour in Alberta was made.

Since the tour commenced, 36 towns in Saskatchewan have been visited, 140 lectures held, with a total attendance of 19,942 people. Apart from the large number of people who called at the car during the day to take questions, the staff visited 160 farm homes, where belts are either well established or a good start made Two hundred and nineteen town plantings were visited, and 253 letters of inquiry into various phases of the work answered from the car.

After two, and in many districts, three years, of the very hardest conditions against the successful growth of trees and shrubs, it is most encouraging as well as interesting to note the favourable reaction in tree planting this year. With the coming of a season of a good amount of moisture, preparations are under way this year by both farmers and townspeople, for a great advance in the protecting and beautifying their homes, and next spring, it is safe to say, will see more trees set out than in any previous one in the history of western tree planting.

The years of drought and high winds have taught us the vital necessity of trees, and have also showed us the kinds which are able to withstand these severe conditions. Except for quick results, the willows, poplars, and maples have had their day as shelter-belt trees, though their ability for rapid growth will always be made use of, both for protection, fuel, and fence posts. The future planter will use caragana, ash and elm, our permanent deciduous trees, and most important of all the evergreens, the spruces in particular being adaptable to any and all prairie conditions, and of course, like the pine, affording twelve months protection and beauty.

Not only do trees furnish protection, to the family, the stock, and buildings, as well as giving beauty, permanence, and increased value to the farm and home, but it is now definitely proved beyond any doubt, that their protection, and ability to hold and conserve moisture will assure us a good garden every year. Even in the worst drought areas during the past two and three years, the farmer who had his garden inside shelter-belts received returns from it, while the man who depended on the garden in the open prairie in nearly every case received nothing at all when harvest time came around. Such side lines as bees, poultry, and small fruits, become a success with tree belts to lend protection, and with the great need for the southern farmer raising and growing more of the stuff he needs for himself and family, trees will be greatly used to insure success to this most important step towards independence. In using trees for the protection of field crops, those who have grown in a thorough trial state that taking five year periods, the well protected field will yield one third more, than one without any protection. There are many districts where field belting will never become necessary, but over large areas of our southern plains the next few years will see extensive field belting undertaken.

"Poor man! You have no coal."
Carpenter: "What?"
"You have to protect yourself with a piece of wood."—Pages Geins, Sweden.

Man a Farm Plan

British Columbia Government Considering Scheme To Alleviate Distress

Careful consideration is being given by the British Columbia Government to a man-a-farm plan as a possible means of alleviating distress this winter without the outlay of large sums of money.

The plan Hon R. W Bruhn, Minister of Public Works, announced, is that single unemployed men adapted to farm life be placed with farmers throughout the province. The men would receive their shelter and board and possibly a small allowance for their own use The farmers would receive services, and special courses of instruction would be carried out by the government

Horse Holding Its Own

Farmers In These Difficult Times Find Horses Support Group Powers

The last public horse sale in Boston was replaced the other day by a motor car Boasts the New York Herald Tribune, one more American metropolis has surrendered to the machine age and all its implications of vanished leisure and simplicity

But the horse though vanishing has not altogether vanished It is many a day since the famous cab was the fastest known vehicle on Greenville Street or Hastings But in Montreal one must still take a horse-cab if one wishes to drive round the Mountain to Cartier Square sight seers can still find a few open horse-carriages ranks of another day while 30 permits for hacks are issued each year in New York

In the cities, it is true that the horse is giving ground that those that remain linger superfluous on the stage But in the country it is different Hard times have given a definite setback to the mechanization of agriculture, and the horse appears to be holding his own Dobbin's brand lasts little Hay and oats can be grown on the farm But the tractor's fodder must be bought and cash is scarce

A recent census bulletin issued from the Bureau of Statistics shows that there were 3,129,058 horses in Canada in 1931, as compared with 3,451,769 in 1921 The decrease was 322,711, or 9.35 per cent, not a surprising decrease when one considers how rapidly mechanization has come to the business of light and heavy trucking in the towns and cities, which now contain more than half the people of Canada The number of horses, according to the census report, has fallen off in every province, the decrease ranging from 18 11 per cent in Nova Scotia to 4 64 per cent in Saskatchewan British Columbia's horse population fell from 61 345 in 1921 to 56,779 in 1931, a decrease of 8.16 per cent. The bulletin notes, however, an increase in the number of horses in these districts in which a great number of occupied farms is recorded, an indication it is taken, that the horse remains essential in the new poorer of the country

What a world! To be valedictorian and they got a job working for a fellow who dropped out at the eighth grade.

"Her clothes are cut by the best people in town."
"And so is she."

Borglars Rob Jail

During Thieves Take Bedding From Unoccupied Cell Cots

Instead of keeping the city jail at Pittsfield, Illinois, locked to keep dishonest persons in, officials are resolved to bar all windows and doors to keep crooks out.

Somebody broke into the unoccupied "house-gow" and took all the bedding from the cell cots. Future prisoners cannot be guaranteed the usual accommodations as a result of the theft.

Manchuria contains over 56,000,000 acres of forest, 1,700,000,000 tons of coal and 400,000,000 tons of iron. The annual output of Japanese ore mines at Fushan and Yensi is about 7,000,000 tons.

Empire Marketing Board Operations May Be Extended If Dominions Will Assist

Seasons and Health

Weight Can Be Controlled By Right Food and Exercise

It will surprise no one who has attentively watched modern developments to learn that men are more and more adopting the practice of slimming They are, in fact, following the lead which their women-kind has given, and with good reason Since slimming became fashionable women have greatly gained in health and in looks, and their expectation of life has become longer

Though certain famous statesmen notably Bismarck and the late Lord Salisbury—have tended to adiposity most great men have had a horror of being fat Byron, the poet, was among the earliest slimmers. Indeed he boasted that in two years he had brought down the weight from 14 stone 7 pounds to 10 stone 8 pounds, which is astonishing enough.

But he lived with an eccentricity that is not demanded of our slimmers. A diet is suggested for them which is much more reasonable than his draughts of vinegar and champagne of tobacco and mastic. With the right food and proper exercises under medical advice (which should never be neglected) man can control his weight, and he is all the better for doing it Overseas Daily Mail.

STORIES NOBODY CAN READ

COOL SLEEVELESS DRESS WITH A JAUNTY TRAY PROVIDES SMARTNESS AND CHARM

Here's a distinctive model for the woman of heavier build, who realizes the importance of slenderizing features.

The jabot revers of the bolero jacket ending just above the waistline, minimize the bodice breadth. The inverted plait at the centre-back of the skirt imparts a suggestion of height and narrowness.

A small patterned printed crepe silk is an excellent medium for this slimming model.

For more summery wear, you can make it of a linen tweed, polka-dotted voile or a novelty lacy cotton fabric.

Style No. 499 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 4¼ yards of 39-inch material with ¼ yard of 35-inch contrasting.

It's simplicity itself to make it. And you'll be surprised at the small amount it will cost you.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Business and Health

Continuation and expansion of the work of the Empire marketing board of the United Kingdom as a result of the Imperial Conference, is now suggested. It is possible that the work of the board, heretofore largely concerned with pushing the sale of Empire products in the markets of Great Britain, may be extended It may be enlarged so as to include the advertising of United Kingdom commodities in Canada and the other Dominions.

The future of the Empire marketing board, it is intimated, has been the subject of careful consideration by the important Imperial Conference committee on methods of economic co-operation. This matter, with a number of other questions requiring further discussion, may be considered by a special committee, with representation from all Dominions as well as the United Kingdom, which will continue its work in London. Such a committee would report as speedily as possible, probably within six months, to the various governments interested.

The view of the various delegations is that the Empire marketing board has done excellent work. It was established for the benefit of the Dominions, but the United Kingdom has found herself unable to avail herself to any preference to them in British markets. However, the position is somewhat different. The United Kingdom has established certain preferences and will probably, as a result of the conference, extend that principle. Consequently, it is intimated the raison d'etre of the board has vanished.

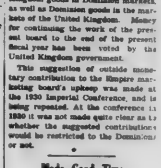
On the other hand it is intimated that the work performed by the board is so valuable that its continuation is considered desirable It is not felt to be equitable, however, that the British taxpayers should be asked to bear the entire bill, as has been the case in the past Consequently the question arises as to whether or not the board shall be continued, and, if so, in what form. It might be put on as it is, with the dominions who benefit sharing in the cost of maintenance. On the other hand, it might be expanded so as to have representation in the Dominions and push United Kingdom goods in Dominion markets, as well as Dominion goods in the markets of the United Kingdom. Money for continuing the work of the present board to the end of the present fiscal year has been voted by the United Kingdom government.

This suggestion of suitable monetary contribution to the Empire marketing board's upkeep was made at the 1926 Imperial Conference, and is being repeated. At the conference in 1926 it was not made quite clear as to whether the suggested contributions would be restricted to the Dominions or not.

Made Good Time

Bottle Containing Message Floated In Sewer Then Inspected

Thrown overboard from the First Class Liner "France" in mid-Atlantic last September, a bottle containing a message has been picked up on the North Devon coast, 1,500 miles from its starting point. "I predict," says the writer, "that when it will be found Jerome will be a well-to-do-lawyer and then a physician." But he did not think the bottle would travel so fast, for the information was added that Jerome was eight years old at Samoad 14.



"My husband does not know deceiving him!"
"Aren't you pleased at that!"
No. I hate ignorant men."
Trudeau. Rome

WORLD HAPPENINGS BRIEFLY TOLD

The will of the late King C. Gillette, safety razor manufacturer, leaving his widow an the sole beneficiary was protested at Los Angeles. Attorneys said the estate would be in excess of $1,000,000.

Believed to be the last survivor of the Sixth Regiment, which took part in the Riel Rebellion at Cut Knife Creek and Fish Creek in 1885, Sergeant-Major Uzebe Beaudoin, 68, is dead at Lashine, Que.

Two thousand five hundred dollars for an individual prize for the best sample of wheat shown at the World's Grain Exhibition next year at Regina, is the largest of its kind ever offered.

Final payment to farmers for all wheat pooled during the 1931-32 season has been made by the Alberta wheat pool, it was announced by R. D. Purdy, general manager. Total payments amounted approximately to $800,000.

Automobiles on farms in Canada have doubled in the past 10 years and there is now a car for every 1.37 farms, figures issued by the Dominion Bureau of Statistics show. There are 758,623 farms in the Dominion and on them 321,200 automobiles.

There are 5,591,411 single persons in Canada and 8,971,136 married, it is revealed in census figures on conjugal conditions released by the Dominion Bureau of Statistics. Of the population of 10,570,798, males number 5,376,451 and females 5,562,355.

Another Scotchman died on a request of a broken heart in Edinburgh last week. It seems that his doctor insisted that he give up smoking just after he had had his cigarette lighter refilled.

SUNDAY SCHOOL LESSON

AUGUST 28

GOD'S FOR BUILDING THE TABERNACLE

Golden Text: "Honor Jehovah with thy substance, and with the first-fruits of all thine increase."—Proverbs 3:9.

Lesson: Exodus 35:4 to 36:7.

Devotional Reading: Psalm 84:1, 2, 5-12.

Explanations and Comments

The Call For Contributions For the Sanctuary, Exodus 35:5-29. Moses commanded the people and volunteers came, probably from a related plan-ning. He responded them that it was God's desire to have a sanctuary where his might meet them and they might offer Him their worship. He called for voluntary contributions of materials and labor for the sanctuary and its equipment and for the vest-ments of the priests. There was one restriction; the givers of gifts must be "willing-hearted," and the inherent "wise-hearted." The people listened and quietly went home to their tents.

"Ten might have wondered whether they would return; nines on 10118 and been said to touch their emotions and arouse their enthusiasm. How different this must to the methods in use today to collect money from re-luctant hearts!

"An Old Subscription List," verses 21-29. "The leading in the hearts stir up, and every one whom his spi rit made wise, leaden with gifts neces-sary for the building of God's house and for "the holy garments," the gar-ments consecrated for use in the sanctuary.

"The world asks, 'How much does he give?' Christ asks, 'Why does he give?' John 3:16.

They were religious. They were living in the wilderness where there were no stores or workshops. Materials for the tabernacle must come from their private hoards. From Exodus 12:35, 36 we learn that the children of Israel on leaving Egypt asked of the Egyptians "jewels of sil-ver and jewels of gold, and raiment; and Jehovah gave the people favor in sight of the Egyptians, so that they let them have what they asked. And they despoiled the Egyptians." Those treasures now the people poured out for Jehovah's use. Every girl was a moulder. It could not be replicated.

Eliminating Noise

Milk Concern In New York Is Doing Its Bit

A large milk concern serving New York City has actively entered upon a noise abatement campaign. By equipping its horses with rubber cushions for their shoes, and preventing its drivers' milk bottle baskets with rubber sheet-whoreon, it plans to lessen the din of early morning milk delivering.

"What is a paradox, Mister?"

"Two wheels side by side, sir."

A Prime Favourite

Man who "roll their own" have made *Ogden's fine cut* cigarette tobacco a favourite it makes better cigarettes more quickly—this brand has always sold on its merits.

Free "Chanticler" cigarette papers with every package.

OGDEN'S
FINE CUT
CIGARETTE TOBACCO

Your pipe loosens Ogden's cut plug.

Utility White Whales

Hides May Be Used For Manufacture Of Fancy Leather Goods

The two white whales brought to Winnipeg from Hudson Bay by the Industrial Development Board of Manitoba have been rendered at the St. Boniface abattoirs and they pro-vided 35 per cent. of their total weight in excellent quality oil, bear-ing a slight odor, and being only slightly stronger than olive oil. The board hopes to develop a new industry on the northern water body.

The hides are now in process of tanning which will take some time, but leather workers believe it will prove suitable for the manufacture of ladies' handbags, and other fancy leather goods. Minute study of the outer skin reveals a mottled effect with alternating patches of smooth and rough skin. Blubber almost two inches thick adheres to the hide, but comes off readily.

Artificial Lighting For Office Buildings

Would Provide Uniform Glow Which Is Kinder On Eye

Some authorities on illumination contend that the office buildings of the future will be built without win-dows and will employ artificial venti-lation, also artificial lighting through-out in such effect to secure uniform glow which will not tire the eyes An instrument has been invented which tests accurately the effect of various lights on the eyes

CANADIAN WOMEN FIND DUSTING DISTASTEFUL

Dust cloths going into discard; Unpleasant to use; a bother to Wash

MOPPER OF THE FUTURE HAS GREAT VOGUE

Of all household tasks, that of dusting is the least appealing to the majority of women.

However, this confession, like many an-other confession, which honors the truth, is bringing radical change. In a great many Canadian homes the women are discard-ing dust cloths entirely, and are using Applefood Wonder Paper instead, because it actually cleans—as it cleans—as it polishes, doing a better and much quicker job than the old dust cloth ever did.

This new, and extremely modern Wonder Paper, is made from clean rags, and soft paper pulp, treated in a scientific way with a high-grade furniture polish, and absorbs dirt instead of spreading it.

Applefood Wonder Paper comes in handy-size packages twenty-five large sheets for twenty-five cents. You crumple a sheet into a soft wad and go over the surfaces requiring attention. Then when one side is soiled or worn, turn the Wonder Paper inside out. Soon you have given a quick and lasting finish to furniture and wood-work, you can still use Wonder Paper on the floors, if you wish.

And when you are through, there's no old duster to shake out or wash. Throw the soiled Wonder Paper away and you've completed the most irksome part of housework in half the time and with half the effort.

Wonder Paper is made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box.

Special Offer

Most grocery, hardware and department stores have Applefood Wonder Paper in stock. If yours hasn't, we'll be pleased to supply you from the factory. Just fill in and mail the coupon.

Applefood Paper Products, Ltd., Hamilton, Ont.

Enclosed find 25c for which please send me one full-size package of *Wonder Paper* and your 100 pages for "Left-overs."

Bennett with two members of the Indian delegation at the canal ceremonies. Left centre: the giant 625-foot S.S. Lemoyne passing under one of the canal 120-foot electric lift bridges. Right centre: marking the inauguration of a new ocean deep-water terminus for grain at Kingston and the fact that only 300 miles of river navigation now remain to reach the export port of Montreal.—Mayor G C. Wright, of Kingston, conferring the freedom of the city on W. H. Coverdale, president of Canada Steamship Lines aboard the freighter on arrival. Bottom: "The practical consummation" of the ceremo-nies.—S.S. Lemoyne prepares to unload her cargo of 532,000 bushels, shipped by James Richardson & Sons, Ltd., of Winnipeg, at Kingston's new elevator which has already, for 1932, handled 4,000,000 more bushels than it did in the whole of the preceding year.—All photographs by Canada Steamship Lines.

NEW DEEP WATER ROUTE FOR WESTERN WHEAT OPENED BY WORLD'S GREATEST GRAIN VESSEL

In two years, a load of grain over 100,000 bushels greater than had ever been shipped through the lowest lakes in history. The Governor-General, dele-gates to the Imperial Conference, Rt. Hon. R. B. Bennett and members of the Cabinet all attended the opening ceremonies at Thorold.

Most fittingly, the vital new link in the Great Lakes' system, Canada's $130,000,000 new Welland Canal, was opened, officially, by none other than the great grain-carrier eiffel, S.S. Lemoyne of Canada Steamship Lines, through the eight locks in Kingston with the biggest cargo of western wheat moved

CONSIDER PLANS FOR FINANCING DIRECT RELIEF

Winnipeg Man. Special sessions of the three prairie legislatures may be called this fall to consider a plan to finance direct unemployment relief if the Federal Government does not continue arrangements made last fall, according to reports in official circles here

Under an agreement the Federal Government, province, and municipalities each were to pay one-third the Dominion Government in addition agreeing to assist the province to finance its share The Dominion Government later notified the province that it did not propose to continue this arrangement after April 1.

Each of the prairie governments now is confronted with the situation of being unable to borrow for relief purposes except on bank overdraft, and under the circumstances that is not possible

Calgary, Alberta. Representatives of the four western provinces and cities may meet Premier R. B Bennett to discuss unemployment relief when the Prime Minister comes to Calgary about the end of August.

Provincial delegates had planned to meet the Prime Minister at Ottawa, but following a report that Mr. Bennett would be in the city in less than two weeks, it is expected representatives will seek an appointment here.

Mutual Preferences

Committee On Foreign Relations Makes Recommendations

Ottawa, Ont.—The Imperial Conference committee on foreign relations is understood to include in its report recommendations that:

(1) No treaty obligations into which the empire countries might enter in the future should be allowed to interfere with any mutual preference which the governments of the commonwealth might agree upon.

(2) "The empire countries will free themselves from any existing treaties as might interfere with mutual preferences which may be agreed upon.

The United Kingdom has trade pacts giving most favored nation treatment to Soviet Russia and Argentina. No treaties, though, are specified in the report.

New Shotgun Device

Youthful Inventor Claims Weapon Can Fire 240 Shots a Minute

Chicago.—A 20-year-old junior college student is inventor of a device which he claims will convert an ordinary shotgun into a death-dealing device capable of shooting its cust om-ary ammunition at the rate of 400 shots a minute—and has pledged himself to keep it from gangsters and criminals.

The inventor, Charles A. Michal of suburban Riverdale, and the device can easily be attached to any shotgun. It has been submitted to local police departments for thorough tests.

Britain Would Tax Road Users Heavily

Railway and Highway Authorities Propose Higher Levy

London, England.—Heavy additional taxation on users of the public highway is proposed in the report of a joint conference between railway and highway authorities in Great Britain, issued recently.

"Mechanically propelled vehicles" should pay $240,000,000 a year to-ward the cost of roads, the report recommends. Of this commercial vehicles should pay $94,000,000 and others $146,000,000. The report urges a much heavier tax on commercial vehicles, particularly the larger type.

African Explorer Dead

New York.—A special cable to the New York Times, reported the death at Bournemouth, England, of Capt. Foulet Weatherby, geographer and Africa explorer, who discovered the source of the Congo at the age of 72.

W. N. U. 1986

Braving Ocean In Canoe

Two Scandinavian Sailors Leave Montreal For Vancouver

Montreal, Que Braving the dan-gers of the Atlantic and Pacific oceans, two experienced Scandinavian sailors left here August 16 in an 18 foot canoe en route to Vancouver via Cape Horn. The navigators Helge Horup, 42, Danish sailor and news paper editor, and Harold T Jensen 38, a veteran ship s officer expect to complete the journey in about two years.

The craft, an Ontario product, is equipped with a sail, outrigger and rudder and will carry the two men, who weigh about 200 pounds each together with 200 pounds of equip-ment made up of a tent, clothing fishing lines, camping utensils and modern navigation instruments.

The two plan to sail down the St Lawrence River, through the gulf and along the coast of the Maritime provinces and New England states to Boston and New York, where stops are planned. Then, Panama Canal will be taken them to Key West and thence to Vancouver.

From the Pacific Coast they intend entraining to the Thunder Bay district for an inland water voyage back to Montreal.

They have navigated the Amazon River alone from its source to the sea in 1921.

For National Bank

Native Sons Of Canada Want Revision Of Canadian System

Quebec, Que.—The Native Sons of Canada want revision of the Canadian banking system

After lengthy discussion, the organ-ization convention here adopted a resolution embodying the following points.

(1) Creation of a national bank ing commission having discretionary powers over all matters pertaining to the Canadian banking system.

(2) Creation of a Canadian national bank, to serve as a reserve bank:

(3) Greater protection for bank depositors together with stricter gov-ernmental surveillance of banking practices.

Lack of interest shown by Canadians in Dominion Day, and refusal of some commercial and business houses to declare a holiday on that day was deplored in another resolution adopted by the convention.

Estate Will Be Auctioned

Large Property Of Earl Of Egmont To Be Sold

London, England.—Calverton estate, a property in Buckinghamshire belonging to the Earl of Egmont, is to be sold by auction, it was announced recently.

The youthful "Rancher Earl," who succeed to the title on the death of his father four months ago, has re-turned to Canada and is living on the Alberta ranch at Priddis, where "My Percival" farmed until he became the 10th earl in 1929.

Calverton estate covers about 461 acres, with a small residence, three farms, 42 country cottages and some valuable building land.

Grant Provided For

Money For Grain Show Will Be Available As Required

Ottawa, Ont.—The balance of $146,-000, which remains of the Dominion grant for the world grain show, to be held in Regina next year, will be made available as required.

A vote was put in the estimates last year for $150,000, and $16,000 of this has been paid over This has been announced at the Department of Agriculture.

The management of the fair is in the hands of an executive committee headed by Hon. W. C. Buchs, Minister of Agriculture in Saskatchewan.

To Test New Airplane

Berlin, Germany.—An aeroplane which will retrace the steps of Zeppelin to study the flight of birds is awaiting a trial at Tempelhof Aerodrome. It has a wing construction approximating the wings of a seagull and the aim is to secure greater stability in the air. Hans Richter, pioneer glider flyer, is the designer

CALLS FOR MORE TREES

Hon James F Bryant, Commissioner of the Saskatchewan Unemployment Commission, is planning the farm-ers of that province into the forest at the time to go to cut a year's supply of fuel in the province. His campaign is to have particular stress upon the use of Saskatchewan hedges to stop soil drifting.

Mounties May Police B.C.

Would Bring Whole Of Western Canada Under Federal Force

Victoria, B.C.—Consideration of turning over to the Royal Canadian Mounted Police the policing of British Columbia is under consideration of the department of the attorney-gen-eral, it was definitely learned here The development is one of the results of the Kidd report on British Columbia finances, it was stated

The arrangement proposed provides the abolition of the British Columbia Provincial police and 20 municipal police forces, all of which cost $1,700,-000 annually. City police forces of Vancouver and Victoria would be con-tinued as at present

Completion of an agreement for policing British Columbia by the Royal Canadian Mounted would bring the whole of western Canada under the federal force Saskatchewan turned over its policing to the Royal Canadian Mounted Police almost four years ago, while Alberta and Manitoba provincial forces were absorbed this spring.

Irish Tariff War

President De Valera Showing Little Interest In Question

Dublin, Ireland.—If fresh overtures are made for negotiations to end the tariff war between the Irish Free State and the United Kingdom, they must come from London. This is the general understanding in official circles here

Concentrating on internal problems, President Eamon de Valera has shown little interest, so far in the question of reopening negotiations. He is said to be well aware of the difficulties confronting his new policy, and retaliatory tariffs on both sides have discouraged trade across the Irish Sea. Default of Free State land annuities to Britain caused the ill-feeling.

Retrenchment Programme

Manitoba Government Plans Drastic Cut In Expenditure

Winnipeg Man. Government members of the Manitoba legislature met on the first caucus since the election, to pass on a retrenchment programme planned by the government of Premier John Bracken, involving a saving of somewhere between $500,-000 and $1,000,000.

Previously, Hon. D. G McKenzie, Minister of Agriculture and Hydro, had announced for purpose of economy his department will not send an exhibit to the Royal Winter Fair at Toronto this winter, this move will result in a saving of some $3,000.

Falling revenues since the estimates were submitted in the legisla-ture last spring have made necessary drastic curtailments in Manitoba gov-ernment expenditures. For instance, more than 8,000 fewer passenger cars are being operated in Greater Winnipeg this year, and 12,000 fewer passenger cars for the whole province, according to figures on motor vehicle licenses obtained by the Manitoba tax commission.

Lancaster Is Acquitted

British Flyer Is Freed On a Charge Of Murder

Miami, Fla.—Captain W. M Lancaster, British flyer, was freed on a charge of murdering Haden Clarke, young writer and his rival in love, Wednesday, August 17, by a verdict which precipitated a court room demonstration that threatened to go beyond the control of bailiffs.

The 12-man jury deliberated four hours and 48 minutes before acquit-ting him on one complete ballot.

He had been on trial since August 2 in one of the most sensational hear-ings in the history of South Florida

a trial that brought out the secret love lives of himself, Haden Clarke, and Mrs. Jessie M Keith-Miller, Aus-tralian aviatrix in full detail.

S.S. Pennyworth Arrives

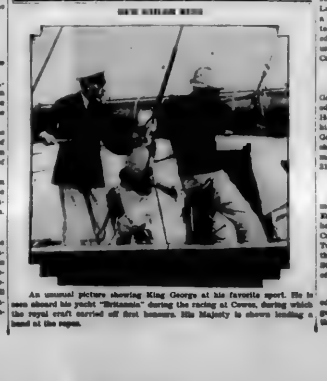
Docks At Churchill With Miscellaneous Cargo

Churchill, Man With a miscellaneous cargo in her holds consigned to western Canada points, the British steamship "Pennyworth" docked here after an uneventful voyage from Liv-erpool. Unloading operations are al-ready under way Later she will be loaded with 250,000 bushels of grain for the return voyage to the old country.

Six freight steamers will call at Churchill, the new Canadian ocean port of Hudson Bay, during the present season of navigation, it was announced Wednesday, August 17, by Hon. Dr. F. J. Manion Minister of Railways and Canals.

The Russian Method

Chelyatsk, Russia.—The first sentences of death under a new decree providing the extreme penalty for persons who steal goods in shipments on the railroads were meted out on two gang leaders by the transport court here. They must die before a firing squad.



An unusual picture showing King George at his favorite sport. He is seen aboard his yacht "Britannia" during the racing at Cowes, during which the royal craft carried off first honors. His Majesty is shown landing a trout at the rapes.

ITALY PLANNING TO SCRAP THIRD OF ENTIRE FLEET

Some, Italy.—One hundred and thirty thousand tons of Italy's fight-ing ships practically one-third of the entire navy—will be retired under a programme beginning August 28. The purpose is to save money

When the programme has been completed, Italy will be without a single battleship. The "Andrea Doria," 22,700 tons, and her sister ship, the "Duilio," which were rushed to completion in 1915 when Italy en-tered the world war, will be placed out of commission. Under the Wash-ington treaty, Italy has the right to 175,000 tons of battleships, but she has elected to disregard this category in favor of heavy and light cruisers.

A report presented to the disarma-ment conference showed that the whole Italian navy totals 604,005 tons, including 20 ships still under con-struction

The need for economy was noted-ed by the fact that some new ships are intended for retirement. These are four of the 12 2,000-ton destroy-ers of the newest Italian type

German Political Situation

Hitler Says He Will Not Use Storm Troops To Gain Power

Berlin, Germany —Chancellor Franz von Papen has received announ-cements Adolf Hitler will not use his storm troops to attain the chief power, but in any event he will not hesitate to suppress any revolt by force of arms.

The chancellor made this assertion in an interview in which he vigor-ously reiterated Germany's demand for equality in armaments with other nations, declaring the fatherland no longer could submit to being treated as a second-class nation.

Although the cabinet situation still is in a state of flux and there is no ruling who will rule Germany af-ter the new Reichstag has been called into session late this month, the chan-cellor appeared serenely confident his government would stay in power.

Asked whether he expected to be chancellor next Christmas he said: "We shall be in office for a long time."

Export Flour Unloaded

First Shipment Arrives At Churchill For Overseas

Churchill, Man.—In the presence of several Canadian National Railway officials the first Canadian flour ever shipped out of the north was unloaded from a special train in the new freight shed

The shipment comprised 31 cars from Robin Hood Mills, Saskatoon and Moose Jaw, destined overseas.

Explorer Will Be Honored

Toronto, Ont.—Etienne Brule, French explorer, who came down the Humber River here in September, 1613, the first white man to look upon Lake Ontario, will be remembered in a memorial to be unveiled here Sep-tember 17. Plans have been complet-ed for the unveiling, which will be under the auspices of the Women's Canadian Historical Society.

Not Afraid Of Weight

Toronto, Ont.- Life guard Tom Mc-Clarry is not afraid of size when call-ed on to rescue some one in distress. Hearing cries for help as he patrolled his section of the lakefront here, Mc-Clarry responded and brought to shore William Cuppy, 47, whose esti-mated weight in his bathing suit was 315 pounds.

Faithful To Duty

Toronto, Ont. Faithful to the last minute of a quarter century's service, Engineer Dave Martin fought off a heart attack as he brought his fast Canadian National freight train into Toronto from South Parry Sound As the locomotive pulled into the Union Station, Martin fell dead on the floor of his cab.

The Greek Government has order-ed that after October first, all canned goods sold in the country must bear the date of packing.

Wheat Situation

Many Factors Leading To Accumulation Of Heavy World Surplus

The marketing of this year's wheat crop, which is unofficially estimated at from 620 to 630 million bushels, will present a problem of large proportions. In addition to this year's crop there is a carryover of more than 300 million bushels from last year. This is a reduction from the stocks on hand in Canada a year ago, but world stocks, estimated as at July 1st by the U. S. Department of Agriculture at 640 million bushels against 636 million bushels in 1931 are heavy Argentine and Australian supplies, as well as Canadian, are smaller than last year, but these decreases are partially offset by an increase of 60 million bushels in the United States.

Conditions in the United States have been unfavourable in the winter wheat area and the outturn of this crop was officially estimated at 632 million bushels as at July 1st, against 759 million bushels in 1931, and a five-year average of 549 million bushels. Acreage sown in spring wheat were increased over 1931 and the outlook for this crop is much better. The indicated production of all wheat is placed at 737 million bushels against 864 million bushels last year and a five year average of 830 million bushels. Domestic requirements, practically approximate the total wheat crop. Exports from the United States since 1929 have never failed to exceed 125 million bushels a year. These conditions suggest a substantial reduction in United States stocks during the coming crop year.

Crop conditions in Western Europe have been favourable, but unfavourable in the Danube Basin. The total acreage sown to wheat is somewhat less, but for the whole of Europe harvests are expected to be about the same as last year. Whole wheat production in France, Germany, Spain, Belgium and Holland is estimated at 287 million bushels as compared with 346 million bushels in 1931, the crops in Roumania, Hungary, Bulgaria and Jugoslavia are unofficially placed at 268 million bushels against 264 million bushels a year ago. Unfavourable weather has since been reported in Italy and France, but the outturn will be large. The wheat crop in the United Kingdom is officially reported as below average. In Russia, sowings of winter wheat were larger than in 1930-31, but spring operations were hampered with difficulty and the total area sown is estimated at 4 million acres less than last season. Production is expected to be about 1,000 million bushels. Home consumption or whole bread is being encouraged and it is said that it is unlikely that Russia will be able to increase wheat exports. Shipments during the current season to July 23rd have amounted to 71 million bushels as compared with 97 million bushels to the corresponding date last year.

Persisting surplus has characterized the world wheat situation during the past four years. Available supplies have continuously exceeded current requirements, even after large diversions into lower price outlets, such as increased use as animal feed, heavier consumption in India and greater exports to China. Imports into China in 1931 amounting to 50 million bushels, were the largest on record—eight times greater than in 1930, and four times those of 1929. China's imports, United States 15 per cent., and Australia 65 per cent. The bumper wheat crop of 1928 was mainly responsible for the emergence of these huge surplus supplies. Economic depression since 1929 has contributed to the persistence of the problem, but widespread foreign restrictions upon imports have been the major influence tending to hold down total consumption. Russian exports, the outcome of the Soviet policy, have been important during the past two years. Measures of other nations have caused contraction of consumption or restricted its expansion, stimulated home production and increased the burden of the surplus. Since the solution of the problem of wheat surpluses seems to be dependent upon increased consumption rather than upon a general decrease in production, the delayed balance may have to await a restoration of a more normal state of international trade. Donald H. Mar-vin in Royal Bank of Canada News Letter.

Slavery Still Exists

Great Britain Taking the Lead To Stamp Out This Evil

The popular idea in that there is little or no slavery left in the world in these days. Most people imagine that slavery was abolished many years ago. But that is quite a fallacy, and the fact that 100 years have passed since every slave always was abolished in the British Dominions prompts reflection upon the immense task that remains to be overtaken before slavery is stamped out all over the world and no man or woman is in physical thraldom to another.

A recent decision of the League of Nations to pursue a relentless campaign against the the continuance of slavery anywhere in the world is said to involve the estimate freeing of 1,000,000 slaves. Sir Arnold Wienhold, Governor of Sierra Leone, has declared that slavery reading is as terrorizing today as it ever was. Missionaries tell of practices that accompany the owning of slaves in many parts of the world, notably the interior of Africa, which includes "torturing to death," selling young poured down stewed fowls, and "breaking them with red hot irons." Slavery in various forms exists today in China, Arabia, Persia and Abyssinia. In China especially there is hope that public opinion will bring about the abolition of the practice of the buying and selling girls. But there is a great deal of effort needed before present-day slavery is stamped out. In some cases slavery is embedded in the economic of the countries implicated, and century-old conservatism will need to be overcome to fight task.

It is encouraging to know that Great Britain has taken the lead in the campaign against this evil, as evil so obnoxious that it cannot be contemplated with anything but repugnance by any human civilized person. Forty million have agreed to join hands in the effort. Surely every man or woman with heart in the right place will wish that success in this noble cause and the voice of people approved be heard on behalf of the millions of those who strive to uproot this age-old repugnant humanity.—Regina Leader-Post.

Not Afraid Of Work

Ninety-Year-Old Winnipeg Woman Still Busy Knitting

"Isn't it awful that I have no work to do," is the plaint of Mrs. Christina McMillan, who celebrated her 90th birthday in the spring.

Mrs. McMillan came to Winnipeg with her husband in 1883 from Watertville, N.S., and since then made 5,- 000,000 yards of yarn have passed through her fingers as she plied her spinning wheel. In the intervening years of every year she still spins, knitting the yarn she hands into gloves and mittens for her family.

In her early days Mrs. McMillan did weaving as well as spinning, using her own wool to make the family blankets and even the material from which the men's suits were made. But of late, she has accepted nearly 3,000 yarn mitten, looks depressingly at the gloves she is rubbing and says: "This isn't work; this is only passing the time."

An instrument has been invented that measures to the 2,000,000th of an inch it should be useful to a motorist trying to find a place to park his car.

With a view to lessening the early morning noise of milking machines, a rubber company has devised rubber-covered milk cutters.

FAMILY TO ATTEMPT OCEAN HOP

The flying family of Hutchinsons in front of their new twin motored Bilkovsky amphibian plane, in which they will shortly attempt to fly the Atlantic. Col. George Hutchinson with his wife and two daughters Kathryn, eight, and Janet, six. Bud has left from Washington with London as their destination. They plan to stop at Labrador and Greenland and will be accompanied by a radio operator and a co-pilot.

The Mystery Of Stonehenge

Scientists Feel To Throw Any Light Upon Its Origin

The ghosts who inhabit Stonehenge must have chuckled in their transparent sides—or whatever it is a ghost wears to keep cool the cold—as they listened to 100 of the world's leading archaeologists wrangle over the origin of the strange monument of stone, ithe that rears itself in the centre of Salisbury Plain. The day formed the climax of an international congress of scientists, and the theme was one that provoked violent argument. Said to no avail. As one eminent gentleman put it at sessions' end: "All our evidence is insufficient."

So Stonehenge joins the Sphinx, the Mayan Men of Java and a few other ageless marvels concerning whose origin man has no actual knowledge. Druids may have carried upon the huge horizontal stone; goblins of the English forests who peered from the undergrowth when Rome was young may have used it as a meeting-place; but who built it, when and why — these questions remain among the magical riddles of time. And that will not prevent the scientific gentlemen from continuing to conjecture. Indeed, they will regard Stonehenge with more fervor now than ever, since it is something about which they can plunge again—and never agree. — Montreal Star.

Folly Certified

Frenchman Has Various Papers To Prove His Legal Entity

One of the things that the French find most difficult to understand about ourselves indeed, they never quite do it—is that we can go through life without any "papers." From birth to the grave a Frenchman is shackled; starting with entry in his father's "carnet de famille," at the age of 18 he gets a "carnet militaire," to be followed by a "carte d'electeur." When married he himself receives a "livret de famille," and those wishing to pass he must keep reluctantly or rich, in extreme cases losing his legal entity. His can, if he likes, get a "carte d'identite," and is, in any case, accustomed to carry three or four documents having the same effect and certified by the police. — London Saturday Review.

Carrier Pigeon Aids Police

Releasing a pigeon from an aeroplane, policemen of Frankfort-on-Main, Germany, followed the bird and located the neighborhood of a black-mailer who had demanded a large sum from a member of the consular staff. The pigeon had been given a hot with a blackmailing note in that it could carry back the money. On the return of the bird the black-mailer wrote the consul a threatening letter. He was traced definitely by it, and now is serving a term in prison.

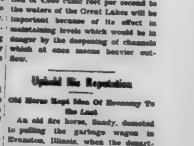
Uphold His Reputation

Old Horse Kept Idle Of Economy To Be Lost

An old Sire Horse, Sandy, demoted to pulling the garbage wagon in Evanston, Illinois, when the department was motorized, lived up to his reputation to the last. During his 30 years of service, Sandy seldom ate more than a pint of oats and one forkful of hay. When his old age and feeblemess made him too costly of a burden he was taken out to be shot—but saved the city a bullet by dropping dead at the incinerator.

Explorer: "From the Chinese frontier we pushed into Tibet."

Sympathetic Lady: "We had a car like that."



The New Television. "This is a wonderful apparatus, you can hear your drafts for outstanding debts progressing."—Lampe Blanker, Berlin.

Proposal To Divert Northern River Waters

Channel Of Ogoki River In Ontario May Be Changed

The proposal to divert the waters of the Ogoki River from their natural course flowing to the sea at James Bay into Lake Superior, which will lead them to the Great Lakes by way of the Nipigon River has, because of its unusual engineering nature, received much public attention in the past few days.

Ontario has made announcement on the additional horse-power that will be provided, the total being estimated at some 200,000. The horse-power that is to be made available is not, however, at the present time an important item because there is no market for it in the district. Northern Ontario has so much potential horse-power now undeveloped that a little more or less makes no difference. The diversion of the addition of 4,000 cubic feet per second to the waters of the Great Lakes will be important because of its effect in maintaining levels which would be in danger by the deepening of channels which at once means heavier outflow.

A New Market For Flax

Ireland May Get Supply From Canada Instead Of Russia

Canada may become a serious competitor with Russia in the sale of flax to Ireland says the Hamilton Spectator. Lewis Gray, a member of the Northern Ireland delegation to the Economic Conference visited the flax-growing district in Ontario to ascertain the possibilities of the Canadian product. Flax for fibre has been cultivated in Canada since the first days of New France. It is grown by the Doukhobors of the West, who learned the art of its cultivation and harvesting in Russia. It has been grown successfully in Nova Scotia and New Brunswick has been shipped to Ireland from Quebec and flax fibre seed sold in most country by Ontario. About of the Canadian flax is grown in Western Ontario, hence the visit of Mr. Gray to that district. He addressed the growers there and from the discussions which will result Ireland and Canada may mutually benefit. The reason why flax has not been grown more extensively in this country is the number of processes required to prepare the fibre for spinning which makes the cost of labor high. The Russian peasant has here the advantage, perhaps, but if some flax can be sold in Ireland, as it has been, it is hard to see why the trade cannot be extended. The quality of Canadian flax is good. Energy, initiative and good management on the part of the Ontario grower may enable him to compete successfully with the grower in Russia. Opportunity would seem to be knocking on the door of the Canadian flax-grower.

If you must wean baby to a bottle and you are anxious to know if he will thrive, use Eagle Brand and protect him from digestive troubles. Eagle Brand has proved safe and reliable for seventy-five years. Babies grow and thrive on it. Write for "Baby Welfare," using coupon below.

CONDENSED MILK

THE HOUSE OF DREAMS—COME-TRUE

— BY —

MARGARET PEDLER

Author of
"The Splendid Fool," "The Herald Rodder & Scrapiron, Ltd., London.

CHAPTER XXIX—Continued.

And then Jean found herself resting against the curve of Blaise's arm, with the man's powerful shoulders firm and solid as a rock beneath her.

"All right?" queried Blaise, gathering up the reins in his left hand. "Lean well back against my shoulder. There, how's that?"

"It's like an arm-chair."

He laughed.

"I am afraid you won't say the same by the end of the journey," he commented ruefully.

But by the end of the journey Jean was fast asleep. She had "leant well back" as directed, sometimes, as she felt the firm clasp of Blaise's arm, the consciousness of security and well-being. The reaction from the strain of the afternoon, the exhilaration consequent upon her flight through the mist and the full relief that had succeeded it, all combined to lull her into a state of rhythmic bent of Olive's heels all combined to lull her into a state of absolute relaxation. It was so good to feel that she need fight, and scheme, and plan no longer, to feel utterly safe . . . to know that Blaise was holding her. . . . . .

Her head fell back against his shoulder, her eyes closed, and the next thing of which she was conscious was of being lifted down by a pair of strong arms and of a confused impression of a large, comfortable room which she hazily distinguished Lady Anne's beautiful. "Thank God you've got her safe!" and then, more clearly, Blaise's voice with the particulars of her experience at the bungalow. She had been very unwilling to confide the whole story to him, fearing the consequence of the Tormarin temper as applied to Jean, but the confidence between the two men could no good, she reflected, and would only in brought more unpleasant results to all concerned—probably, in the end, securing a painful publicity for the whole affair.

Fortunately Blaise had been out when Judith had rung up earlier in the day to enquire if Jean had returned to Staple, or he might have fired off a few candid expressions of opinion through the telephone. But now there was no evading his searching questions, and he had quietly but determinedly insisted upon hearing the entire story. Jean, or Irene in ejaculation of intense anger broke from him as he listened, but, beyond that he made little comment.

"And—and that was all," wound up Jean. "And anyway, Blaise"—a little anxiously—"it's over now, and I'm home the worse enough for the acquisition of a little more worldly wisdom and a seasoned scribe."

"Yes, it's over now," he said, standing looking down at her with a curious gleam in his eyes. "But that sort of thing shan't happen twice. You'll have to marry me—do you hear?"—imperiously. "You shall never run such a risk again. We'll get married at once!"

And Jean with a quiver of amusement at the corners of her mouth, responded meekly:

Yes, Blaise."

The next minute his arms were around her and that first kiss met in the first supreme kiss of love at last acknowledged—of love given and returned.

There is no gauge by which those first moments when two who love confess that they are lovers may be measured. It is the golden, timeless span when "unborn tomorrow and dead yesterday" seem to been us round about and only love, and love's ecstasy, remain.

To Blaise and Jean it might have been the Garden of Eden created purified ticked off by the little silver clock upon the chimneypiece—or half eternity before the former broke to the recollection of things mundane. When they did, it was across the knuckles of the hand

Blaise laughed out suddenly and boyishly.

"It's preposterous—" he exclaimed. "I quite forget to propose."

"So you did! Supposed"—smiling up at him importunately—"suppose you do it now!"

"Not. I! I won't waste my breath when I might put it to so much better use," he declared, and proceeded to do so.

Jean was silent, but her eyes answered him. She had made room for herself against his shoulder, and her head was pillowed upon the edge of the Chesterfield, holding her in his arms. She did not need to speak. That still, serene happiness which lies deep within the heart is not provocative of garrulity.

It was Blaise who remembered that he had tarnished her triumph all the long months since she had first captured his heart, and finding her, found its way to her lips.

"Why didn't you tell me before, Blaise?"

His face clouded.

"Because of all that had happened in the past. You know—you have been my enemy, Jean."

"Ah, yes! Don't talk about it, Blaise," she broke in hastily, seeming to see the shadow of a cloud upon his.

"I think we must a little, dear," he responded gravely. "You see, Nesta has been my friend almost ever very much, as I'm sure"—with a half-laugh—"my mother tried hard to make you believe."

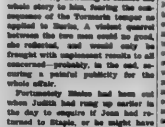
Jean nodded remorsefully.

"She did. And I expect she was perfectly right."

He shook his head.

"No," he answered. "The fault was really mine. My initial mistake was in misjudging you, Jean, and everything, and finding it impossible to make it easier for her, trying to understand her and to lead her into more appropriate results to all concerned—probably, in the end, securing a painful publicity for the whole affair.

Fortunately Blaise had been out when Judith had rung up earlier in the day to enquire if Jean had returned to Staple, or he might have fired off a few candid expressions of opinion through the telephone. But now there was no evading his searching questions, and he had quietly but determinedly insisted upon hearing the entire story. Jean, or Irene in ejaculation of intense anger broke



Those she loves . . . are first to suffer when painfully pass shorter her grow. Lydia E. Pinkham's Vegetable Compound could ease that awful spring.

W. N. U. 2005

Jean leaned up and, with a slender, detached finger on each side of his face, turned his head towards her.

"Quite sure?" she demanded seriously. Then, without waiting for his answer: "Blaise, I do love your chin—It's such a nice, square, your-money's-on-your-life sort of chin."

Something light as a butterfly, warm as a woman's lips, just brushed the feature in question.

He drew her into his arms, folding them closely about her.

"And I—I love every bit of you," he said hoarsely. "Body and soul, I love you! Oh! Heart's beloved! Nothing—no one in the whole world shall come between us ever again!"

CHAPTER XXX.

The Gateway

August seemed determined to justify her claim to be numbered amongst the summer months before making its exit, for throughout the period of her of having recently veiled the country in a mist that might have been regarded as a very creditable effort even on the part of November; for today the sun was blazing down out of a cloudless sky and scarcely a breath of wind moved the motionless, heavy with golden grain.

Jean, her strained ankle now practically recovered, trod lightly down the narrow footpath through the cornfield, following in Blaise's footsteps, while Nesta brought up the rear of the procession. She had not seen Claire since her engagement had been announced, but Judith, through a characteristically warm-hearted little note from the latter had found its way to Staple, and this morning Jean had declared her inability to resist another day without a "heart-to-heart" talk with Claire."

Hence the afternoon's pilgrimage across the cornfield which formed part of a short cut between Staple and Charnwood.

At first Jean had feared lest her new-found happiness might raise a barrier of acrid hatred between her and Claire. The contrast between the respective hands that Fate had dealt them was so glaring; and the rose and gold with which hers had suddenly decked Jean's own life seemed to make the bleak tragedy which unveiled Claire's appear even darker than before.

But Claire's letter, full of a quiet, beautiful rejoicing in the happiness which had fallen to the lot of her friend, had somehow smoothed away the little uncomfortable feeling of

Margherita Valdi told me in the letter announcing Nesta's death, on the eve of her marriage to Blaise Tormarin, that she must have lost heart. So you see, morally I am responsible for that poor, reckless child's death."

"Oh, no, no, Blaise! I don't see that"—pitifully.

"Don't you? I do—very clearly. And that was why, when I found myself saving for you, I tried to keep away."

He felt in his pocket and produced a plain gold wedding-ring. On the inside were engraved the initials "B. T. and N. F.," and a date.

"That was my talisman. Margherita sent it back to me when she wrote telling me of Nesta's death. Whenever I felt my resolution weakening, I used to take it out and have a look at it. It was always quite effective in thrusting me back into my proper place in the scheme of things—that is, certainly any other woman but Nesta." There was an inexpressible bitterness in his tones, and Jean drew a little closer to him, her heart overflowing with compassion. His loathed dower at all her sad ended a thought instinctively, and she looked up at him, a little lips brushed her hair. "I'm glad to be better, beloved. . . . I know, then day at Monkshall—when you might come to mean to me. And I intended never to see you again, but then to take that one day for memory's sustenance. I felt that, having made such an utter hash of things, having spoiled one woman's life and been, indirectly, the cause of her death, I was not fit to hold another woman's happiness in my hands."

Jean rubbed her cheek against his shoulder.

"I'm glad you thought better of it," she observed.

"I don't know, even now, that I'm right in letting you love me——"

"You can't stop me," she subjected. He smiled.

"I don't think I would if I could—now."

Billions For Days At Time Until She Took Vegetable Pills

Constantly, Mrs. C. writes: "The first dose of your wonderful Carter's Little Liver Pills gave me great relief after every medicine I tried failed."

Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels, Dr. Carter's Little Liver Pills are without equal for correcting Constipation, Acidity, Headaches, Poor Complexion and Indigestion. 25c. & 75c. at all druggists. Ask for Carter's by NAME.

Jean's own life was not to be without its comparison which, to anyone so sensitive as Jean, had been a very real embarrassment. Nicie's fabulously extravagant wedding and honeymoon, and then her return to Staple and the old life, with the added perception that had enormously contented the sting of individual pain which the contrast could hardly failed to have induced.

So it was with a considerably lightened heart that Jean, with her arm linked in that of Nesta, passed between the gates of Charnwood and, avoiding the lengthy walk entailed by following the windings of the drive, struck off across the velvety lawns—smooth stretches of close-cropped sward which, bounded only by branching trees and shrubbery, and underlaced by the dreamlike formality of symmetrical flower-beds, merged right up to the graceful terrace forming the base of the house itself.

The two were lettered in silence the points of a couple of young spaniels rollicking together on the grass, but Jean, eager to see Claire, anxiously inclined to wait for them, and, speeding on ahead, she mounted the short flight of steps leading to the terrace from the lower level of the lawns.

Peerless Beauty Secret and Glamorize the skin. Fragrance as a flower. Used morning. Refreshes and beautifies the most delicately-textured skin. Creates complexions of exquisite charm. Adds a subtle touch to the daintiest women. Invaluable for softening the hands and making them flawlessly white. Cool and refreshing. Delightfully fragrant. Delight of beautiful women unbeatingly by all women who care for feminine distinction.

Things Not Needed

Rt. Hon. Stanley Bruce would exclude from the Empire "certain foreign products." An exchange suggests that the list include German measles, Chinese puzzles, Russian Reds, Spanish 'flu, French leave and Dutch treats.

A Time For Careful Thought
Unless he formulates and follows a new commission it is only a question of time until the farmer as a self-supporting business will take his place in the museum of vanished types. In this new commission the principles of co-operative action will play a decisive role.
If the farmer is to cease being the broken and buffeted victim of modern industrial civilization, if he is to become the master of his own commercial and cultural destiny, he must organize as the rest of economic Canada has organized. If he does not he will be lost in the shuffle.
The Alberta Pool Elevators represent the finest step in the co-operative efforts of Alberta farmers. Every Alberta grain grower should see that the Alberta co-operative organization is assured the greatest possible measure of success.

LOCAL NEWS

Mr. Fleming, United Grain Growers agent here for the past season has been transferred to an elevator on the Grose Lake line.

Mr. Harvey Galloway and family have moved to Acme, Alberta where he will manage the Pool Elevator at that point.

Miss Dorothy Hunt is visiting at Josephburg for a week with Mr. and Mrs. Philip H. Mohr, and with Miss Matilda Unterwasser.

The Annual Parish picnic and open air service of St. George's Congregation was held at the Sturgeon River on Sunday evening last.

There was a good attendance and an excellent meal was served in connection at 5:30 p.m. Evensong was held at Mr. Quin's home with half the people inside with Dr. Mason at the piano and the pastor's folk soloist.

A most enjoyable meeting was held.

We respectfully call the attention of subscribers to the address label on your copy of the Record, and if you are in arrears it would be appreciated indeed if you would call or send the amount due, as, that we in turn, may be in a position to meet obligations.

Mrs. A. C. Metcalfe, Miss Ruth Metcalfe, Miss Gertrude and Mr. D.H. Campbell of Calgary are spending a few days with Mr. and Mrs. F. Murray.

Mrs. Chas. Magee spent a few days last week-end with Mr. and Mrs. S. Whitson of Edmonton.

Mrs. F. W. Smith and Mrs. G. Meade are spending a week's visit with Mr. and Mrs. H. Savage of Clyde.

Miss Evelyn Masterson of Edmonton spent the week-end with Miss Lollie and Jean Prater.

Mr. and Mrs. R. A. Brown returned home Tuesday after spending two weeks vacation at Banff.

The Domestic Animals Act
(Municipalities)

Public notice is hereby given that there has been introduced in the Council of the Municipal District of Clover Bar, No.317, Bylaw No. 33, an amending bylaw to Bylaw No. 23, of which the following is a short synopsis:

That Township 53, Ranges 23 and 24, West of the 4th Meridian, an hitherto exempted area, be brought under the provisions of the Domestic Animals Act (Municipalities), and on and after the passing of the by-law domestic animals will be prohibited from running at large within the described area, and that a copy of the bylaw may be seen at each of the following places: Post Office, Ardrossan; at the residence of J. Day, S.W. 15-53-23-4; A. Harvey N.E. 15-53-24-4; W. Attewell, N.E. 21-53-24-4; J. B. Cameron, N.E. 22-53-24-4, and at the office of the Secretary-Treasurer, Fort Saskatchewan, and further that unless within thirty days from the publication of this notice at least five ratepayers of the described area petition the Council to submit such bylaw to the vote of the resident electors of the described area the Council will proceed to pass same.

Dated at Fort Saskatchewan, Alberta, this twenty-second day of August, 1930.

D. ROBERTS,
Secretary-Treasurer,
Municipal District of Clover Bar, No. 317, P. O. Box 69, Fort Saskatchewan, Alberta.

COMING EVENTS

The regular meeting of the United Church Ladies Aid will be held on Thursday, September 1st., in the classrooms at 3:30.

The doctor of a country village had two children who were subscribed by the inhabitants as being the prettiest little girls in the district.

While the children were out walking one day, they happened to pass quite near two small boys; one lived card is sufficient.

In the village and the other was a visitor.

"I say," said the latter to his friend, "who are those little girls?"

"They are the doctor's children," replied the village boy; "he always keeps the best for himself."

One thing that's impossible for The Record is to keep track of your visitors during the holiday season. Do them honor by announcing their visits through our news columns. They look for it. A phone call or a post

Fort Saskatchewan Record

VOL. I [illegible] No. 33 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, AUG. 31st., 1932 $1.50 PER YEAR IN ADVANCE

School Board Inspects School Building

Minutes of a regular meeting of the Fort Saskatchewan School Board held in the school on Monday, 29th. August, 1932.

Present:- Mr. F. Atkinson, Chairman, Trustees—Mr. A. R. Brown, Dr. Grenert and Dr. Calhoun.

The minutes of the last meeting held were read and adopted on the motion of D. Calhoun.

The Board inspected the School, outbuildings and grounds, and gave certain directions to the caretaker for work to be done before school opens.

15 Applications for admission to High School were considered by the Board and accepted on the motion of Dr. Grenert, provided fees were paid in advance, in accordance with our regulations.

The matter of beautifying the School grounds was discussed at some length. It was finally moved by Dr. Grenert and adopted, That, in the first instance, the Secretary be instructed to write to the Provincial Government for advice as to preparing ground etc., and also as to supplying the necessary sarsgrass seedlings to make a hedge round the grounds.

The results of recent High School examinations received from the Department were noticed to the Board. Mr. Anderson, the Principal, was present, and gave particulars regarding same.

The following accounts were passed for payment on motion of Dr. Calhoun: The Record, $7.25 for 100 application forms for High School to be signed by Sec. Treasurers of outside Districts and 100 forms to be signed by Guardians or parents; Record $1.50 for advt. R. Buchanan $8.00 for repairs and members' prizes and words; F. Ribstein 20c carriage.

Hodgins, Lawrence	4	3
Hopper, Doris	4	4
Kennedy, Walter	4	3
Kolterborn, Margaret	4	4
O'Brien, Muriel	4	3
Williams, James	4	3

Note:- Included in these results is an appeal granted to Muriel O'Brien.

Results of supplementary examinations now being written by some of the senior students will be published later.

These later results may of course add to the number of credits of some of the students.

UNITED GRAIN GROWERS TO PAY DIVIDEND ON SEPT. 1

United Grain Growers Limited have announced the payment of a dividend at the rate of five per cent. on the paid up capital stock of the company out of earnings for the fiscal year ending July 31st, 1932. In making the announcement during the course of a directors' meeting held at Calgary, S. R. Law, president of the company stated that the earnings of the company had been sufficient to pay bond interest, to provide full depreciation, and after payment of the dividend to permit of a satisfactory addition to the surplus accounts of the company.

Dividend cheques will be mailed from the office of the company on September 1st., to shareholders of record at July 31st, 1932.

LOCAL NEWS

Misses Alice McLellan and Peggy Graham returned last Sunday from the Sturgeon, where they have been camping for two weeks.

Miss Dawson Rimble from Edmonton was also camping with them for a few days.

Mr. H. Oxley returned to Forestburg last week after spending last week-end with his family here.

Many people were noticed viewing the Eclipse through smoked glasses today between the hours of 11:30 and 1:00.

THE ALBERTA PACIFIC GRAIN CO. OPERATES 275 ELEVATORS

The Alberta Pacific elevator in this district is part of a system of 275 country elevators; coal sheds and flour warehouses located in principal grain growing areas throughout Alberta, Saskatchewan and Manitoba, and operated by The Alberta Pacific Grain Company, Limited. Terminal elevators of the Company at Vancouver have a capacity of more than 6,000,000 bushels. In addition to "A. P." has terminal elevator connections at the head of the Great Lakes and an office forces in Calgary Winnipeg and Vancouver.

The Alberta Pacific and producer-co-operative commenced business in 1931 in territory now part of the Province of Alberta. Wheat growing in that area was then in its infancy. What was to develop into the "A. P." system was brought into being by John I. McFarland, then a young man yet to earn his reputation in the grain trade. His record of fair-dealing with all farmers and customers who came in contact with his earned for him an enviable reputation which he carried throughout his progress andconnexions in the Trade The Company has since expanded to all the principal grain growing areas of Alberta, and into Saskatchewan and Manitoba.

The Alberta Pacific Grain Company Ltd.
COMPLETE business in the North-West Territories in 1870 was years prior to the birth of the Province of Alberta—The Alberta Pacific Grain Company, and predecessor Companies, carries in its name the spirit of service to the farmers of Alberta.
ALBERTA Grain Company, Limited, under the able management of John I. McFarland, continued business in 1931. That production of wheat in Western Canada in 1931 was the largest in the history of the country, is a matter of record. Under Mr. McFarland's guidance of fair dealing with all farmers, the growth of its Company kept pace with increasing wheat production in the West. In 1931 Alberta Pacific Grain Company, Limited, with head office in Calgary, established 275 elevators, and completed arrangements for the amalgamation of Alberta Grain Company and Alberta Pacific Elevator Company, Limited.
THE "A.P." organization continued to grow. Its elevators followed the railway construction into the undeveloped areas of Alberta and extended its operations into Saskatchewan and Manitoba.
With the completion of the building of the Pioneer Canal the "A.P." took a pioneer in the movement of grain to import markets through the Vancouver terminals, having a capacity of 6,000,000 bushels have been acquired by the Company on the Pass of Vancouver.
THE "A.P." system has been developed through the financial storm of 1930-31, the worst the continent has known, and the Company has replaced in the past three years—a period of years, many of which have been lean and filled with losses and uncertainties. In all the three decades of dwelling and building operations carried on by the Company in all kinds of grain, the Company has never failed in an obligation to any client. Among its customers today are pioneers of Alberta who drew the first handful of grain they disposed in the Province to an "A.P." elevator.
FAIR-DEALING with its customers, courtesy to employees and field staffs efficient physical grain handling equipment and desire and ability to return to the grower the most that can be obtained for his grain, has brought the "A.P." system from its humble beginning in 1930 to its present position in the grain trade of Canada.
THE policies of the "A.P." today are and will continue to be, those of the founder of the "A.P." system.
GENERAL MANAGER

Council Meeting News

A regular meeting of the council of the Town of Fort Saskatchewan was held in the Council Chambers last Thursday night. Present Mayor Montgomery, Councillors Simmons, Gauf, Lalonde, Smith and Fillmore.

The minutes of the last meeting held were read and adopted. His Worship the Mayor fittingly referred to the loss the Council had sustained through the death of Councillor Leschied, and a motion was passed instructing the Secretary to write a letter to Mrs. Leschied on behalf of the Council expressing keenest sympathy to herself and family on their sad bereavement.

A motion was passed instructing the Secretary to proceed with the work of cancelling the "Time" tax collection as regards sub-divided lots, and an application will be made to the Board of Public Utility Commissioners for an order cancelling same as provided in Part 8 of the Public Utilities Act 1923.

As a result of a letter received from Mrs A. H. Rogers, Convener of Committee, The Women's Institute, a motion was passed granting $75.00 to the Fort Saskatchewan Women's Institute, to go towards the upkeep of the Cemetery.

200 yards of gravel were delivered recently by parties in town with same, payment of same at the rate of $1. per yard, to go towards payment their taxes.

Ten per cent discount will be allowed on Taxes if paid on or before the 5th of September. All taxes not paid before the 1st of January following year in which they are levied are subject to a penalty of 6 per cent. on that date and an additional 3 per cent every 6 months thereafter for as long as they remain unpaid.

The council school tax of $4.80 is now due. This is payable by every male resident of the full age of 21 years, who is not paying school taxes here or in any other part of the Province. The employer of any person liable for this tax, can, by authority of the Town Act, be called upon to pay this tax, and deduct same from the next payment made to such employee.

TENNIS CLUB NEWS

Some of the results of the Tennis Tournament now in progress at the Fort Saskatchewan Tennis Courts, played on Monday and Tuesday.

Saralie Oxley defeated Miss Truby 6-3, 6-3.

Muriel O'Brien defeated Mrs. Lonbo 6-2, 6-3.

Mrs. Calhoun defeated Mrs. Henry 7-5, 6-4.

This was long sets, but should have been short sets.

Earl Lane defeated Two Henry 6-3, 6-0.

As Tuesday evening was very cool and a slight wind, it was decided to hold the tournament off until Wednesday. By Saturday we hope to have the third round of this tournament in progress.

We are wondering what happened when the score ball on Tuesday rang at 12:15.

COMING EVENTS

The regular meeting of the United Church Ladies Aid will be held on Thursday, September 1st., in the classrooms at 3:30.

Are You Going To Build!
You still have time to take advantage of the low prices for lumber. When you finish cutting, you will still have time to build your Gram Bin. It will only cost you about one third more than the price of hauling by truck, and then you have your Bin for future years.

The Holding Of Conferences

The holding of conferences has become such a common practice since the close of the Great War, and, considering the magnitude of world problems still calling for solution, so little has apparently been accomplished, that many people are inclined to question the utility of such gatherings and to be critical of the comparatively heavy expense which they entail. Within recent months, for example, there has been the international conference on disarmament held at Geneva, the Lausanne conference on peace terms and reparations, the Imperial Economic Conference at Ottawa, on preferential trade within the British Empire, and very shortly a world economic conference is to assemble at London, England. Are they worth while, and have they really accomplished anything, despite all the talking?

Then, of course, certain types of people who belittle all attempts to remedy evils and achieve reforms by way of negotiation and compromise. They predict failure for each conference in advance of its meeting, perhaps. In many cases, the wish being father to the prediction, because they hold to the view that the existing financial and economic system of the world cannot be remedied but must be torn up root and branch, and entirely destroyed, and replaced by an entirely different system founded on new principles. Others, less radical, have seemingly lost confidence in the ability or willingness of the nations to settle their extremely subtle nationalistic politics and programmes and work together for the common good of all.

While progress has been slow, and many of these conferences have failed in the tangible results accomplished, it would be a great mistake to regard them as failures. For instance, while the world still has a long way to travel along the road of total disarmament, it is travelling in that direction, as witness the real advance made in the limitation in the number, size, and power of naval craft to be maintained by the leading maritime nations. Disarmament can only be brought about by a restoration of confidence and trust among peoples, it is a matter of education and each conference held in a helpful factor in enlightening people's mind and stirring their conscience. Even the conference which ends in nothing but disagreement and appreciation each conference helps each nation to more clearly understand the viewpoint of other nations. And this is an essential first step to definite action.

Complete failure was predicted in advance for the Lausanne conference on war debts and reparations. Of course it did not achieve wholesale cancellation of the war debts, but it did secure a drastic reduction, and, as we have already remarked, the world

FORT SASKATCHEWAN RECORD

WORLD HAPPENINGS BRIEFLY TOLD

Peter Veregin has resigned as president of the Christian Community of Universal Brotherhood.

Wilson Lackaye, 69, for almost 40 years one of the best-known actors on the United States stage died at his home in New York, of a heart ailment.

Recommendation has been made that Admiral Sir David Murray Anderson, C.B.E. (agency to His Majesty, be appointed Governor-General of Newfoundland.

The Soviet secret police and home authorities in a decree issued by the government were ordered to adopt energetic measures to stamp out private speculation in foodstuffs.

Word has been received of the death, in Karlsruhe, Japan, on August 19, of Dr. John G. Dunlop, noted Canadian missionary, who for the past 18 years has been in Japan.

Royal cattle have been sold to Colonel Bustin, it is understood, two shorthorn bulls, contested by King George at the recent Royal agricultural show, were purchased by the Soviet.

Madame Slade, fortune-teller of Montreal Chemin, the Indian Mahmedist and civic disobedience leader, has been sentenced to one year's imprisonment for defying government ban against her appearance in Bombay.

London jewelers now use smoke screens to save their diamonds from window-smashing thieves. "Diamond-Grab" raids have grown so chronically that insurance companies have raised their burglary rates.

Members of the Irish Republican army have warned managers of Dublin moving picture theatres not to exhibit films showing members of the royal family, or any films which they regard as containing "British propaganda."

For Unemployed Families

Seven Provinces Have Signed Agreement Under Unemployment Plan

Seven Canadian provinces have signed agreements under a relief settlement plan by which the Dominion Province, and municipality concerned each contribute one-third of a sum not exceeding $600 per family to cover the cost of modest establishment on the land and substituting $1,200 for the land and subsistence for the first year's crops. The relief settlement plan is for unemployed families resident in the provinces, who are in receipt of relief, and who are qualified and physically fit to undertake life on the farm.

This relief settlement plan is principally an unemployment measure—not a colonization scheme. The underlying principle of the plan is to help people to help themselves by enabling families to contribute to their own maintenance and eventually become self-supporting. Public moneys that would otherwise be spent in the form of direct relief to maintain families in comparative idleness will be expended instead of assisting qualified families to get a modest start on the land.

Recognition Deserved

A "Long Service" prize was presented to an old woman of Bologna, Italy, named Francesca Felicetti, for having been employed by one family for seventy-seven years. She had entered their service at the age of fourteen. Twenty-nine other servants have also been presented with prizes for over forty years' service with one family.

Seven-tenths of the railway mileage in the Netherland East Indies is in Java.

New Equipment For Homes

Air-Cooling System Will Be Part Of Modern Home

The day is coming when "a modern home" will mean not only one equipped with a bathroom and a furnace, but with an air-cooling system. The device is still too high priced, and more or less in the experimental stage, but it will become perfected and less expensive by a few years and we shall not be able to live one day in our air-cooled and air-drained rooms with the house windows and doors shut to keep out the hot air, and incidentally, the disturbing noises of the streets.

Helped To Make History

Man Who Surrendered Jerusalem To British Died Recently

The man who surrendered Jerusalem to the British recently died in the Government hospital at Hebron at the age of 65. He was Ahmed Shareef, and was an inspector in the Turkish Government in Jerusalem when it was captured by the British in 1917. In company with the late Mayor of Jerusalem, the inspector walked out the outskirts of the city carrying a white flag on a long bamboo pole and delivered it to the British commander.

GUIMPE IDEAS REFLECT YOUTH-FUL TREND IN CHOICE OF COLORS AND FITTINGS

For this model which is adorable a navy linen crepe silk with the guimpe and collar of white pique, with flares are unobtrusive combination.

It can be fashioned from ivory cottons of the sort woolly type, cotton or silk plques, a sports linen in tan, white, green or blue, depending upon this woollens and many rayon novelties.

It will take the very minimum of making. The two-piece skirt is finished at the top and joined to the two-piece waist. You'll also find the two-piece waist very easily put together. It can have short sleeves, if you prefer them.

Style No. 426 is designed for sizes 14, 16, 18, 20 years, 36 and 38 inch bust. Size 16 requires 2¾ yards of 39-inch material for dress with ¾ yards of 35-inch material for blouse.

Price of pattern 20 cents in stamps or coin, (coin is preferred). Wrap coin carefully.

Riverbend School For Girls

Manitoba Institution Devoted To the Educational and Aesthetic Development Of Young Canadian Womanhood

Prepared to provide instruction from Grades 1 to 12, Riverbend School for Girls Winnipeg will receive the autumn term on September 15th, according to an announcement made by the Principal, Miss Jean Foster, M. A.

Since 1920, when Riverbend the former home of the late Sir James Aikins, became through his bequest under the aegis of the United Church of Canada, a boarding and day school for girls, it has reached an academic standard approved by the Department of Education, by which it is regularly inspected. Eight acres of beautifully treed property; skirting the Assiniboine River have proven an ideal location for an institution devoted to the educational and aesthetic development of young Canadian womanhood.

Two years ago, the original building was augmented by a new modern structure of cut stone and brick containing assembly hall, dining room, science and gymnasium, all with ample accomodation for 190 pupils. Undeniably attractive as an objective, but to meet the needs of those who go to Jerusalem Chapter, more particularly to the study of literature, history music and art, a course is offered leading to the Riverbend Diploma, given upon completion of Grade XII.

Miss Foster, who is a graduate of McGill and Oxford, is assisted by Miss Laura Call, as head of the junior school, and the more recent acquisitions to the teaching staff include Miss Marian Macdougall, science, Miss Mary Chestnut, Classics, Miss Beatrice Wilson director of religious education; Miss Barbara May Brith, English; and Miss Gwen M. Bowman, physical education.

Miss Macdougall, a graduate of Dalhousie University, comes to the Winnipeg school as a qualified teacher of the science required for senior high school work, and training in University and the Ontario College of Chemistry. Miss Chestnut, Manitoba Education has taught successfully in Manitoba high schools. Miss Wilson in addition to her course at United College, Toronto has studied at Emmanuel College and the United Church Training School and has taken on the regular normal school training course with subsequent success as a teacher. Miss Erith comes from London University with honors in English. She holds a London teacher's diploma and has had experience in England and America as a coach.

Thoroughly qualified to teach corrective gymnastic dancing and swimming as well as apparatus work, Miss Bowman is a graduate of the Margaret Eaton School of Physical Education, Toronto, and has had previous experience in a girls' school.

Due to the fact that the Winnipeg city schools are this year discontinuing the teaching of Grade XII increased emphasis has been placed upon this grade at Riverbend, the members of the teaching staff are all fully qualified, and are specialists in the subjects taught.

The school's representative Board of Governors includes James A. Richardson, LL.D Isaac Pitblado, K.C., G. N. Aikins, K.C., Rev. J. A. Coutts, D.D., D. C. Coleman, LL.D., Principal John Mackay, D.D., W. M. Kerr, Rev. J. W. Aikens, D.D., Lawrence F. Falk, Mrs. David Watt and Mrs. R. F. McWilliams, Honorary Secretary.

On its Advisory Council are many names familiar in the church and cultural life of Winnipeg, and the following from other points in western Canada, from which many of its pupils are drawn: Mrs. C. F. Armstrong Moose Jaw, Mrs. Robert Forke, Pipestone; Mrs. (?) F. Adams, Calgary, Mrs. A. F. Laird, Yorkton; Mrs. B. C. Wallace, Edmonton; Mrs. J. E. Brownlee, Edmonton; Mrs. W. C. Murray, Saskatoon; Mrs. T. A. Nesbitt, Edmonton; Miss Alice Fitt, Kenora; Mrs. Douglas J. Thom, Regina; Mrs. A. W. Scott, Calgary.

Bequest For Planned

The Canadian Department of Agriculture reports a good demand in Ireland for Canadian pedigreed fanwood for moving purposes. The demand of the Irish linen industry for Canadian flax fanseed is attributed to the quality, germination and purity of the seed obtained by the system of government inspection which is in effect.

Bulgaria plans to spend $6,200,000 on its state railways.

Times Have Changed

An old farmer after paying his bill for a new reaper and binder was asked by the cashier how it went.

"Well, yo see, this time last year I sat on the fence with a cigar in my mouth and watched thirty men reaping my field. This year I reaped it myself, and thirty men sat on the fence and watched me."

Canada was an old British corn measure, containing four bushels.

SUNDAY SCHOOL LESSON

SEPTEMBER 4

EVILS OF INTEMPERANCE

Golden Text. Lvrah no wine nor strong drink Leviticus 10:9

Lesson: Isaiah 5

Devotional Reading: Psalms 24:1-6.

Explanations and Comments

The Evils Of Intemperance. verses 11-23. Woe unto them that rise up early in the morning, that they may follow strong drink. The prophet Isaiah. Woe to them that continue drinking late into the night till wine inflame them. Woe unto them that call evil good, and good evil. Woe unto them that put bitter for sweet, and sweet for bitter. Woe unto them that are wise in their own eyes, and prudent in their own sight. Woe unto them that are mighty to drink wine, and men of strength to mingle strong drink. Which justify the wicked for reward, and take away the righteousness of the righteous from him. Therefore as the fire devoureth the stubble, and the flame consumeth the chaff, so their root shall be as rottenness, and their blossom shall go up as dust, because they have cast away the law of the Lord of hosts, and despised the word of the Holy One of Israel. Therefore is the anger of the Lord kindled against his people, and he hath stretched forth his hand against them, and hath smitten them: and the hills did tremble, and their carcasses were torn in the midst of the streets. For all this his anger is not turned away, but his hand is stretched out still. And he will lift up an ensign to the nations from far, and will hiss unto them from the end of the earth: and, behold, they shall come with speed swiftly. None shall be weary nor stumble among them; none shall slumber nor sleep; neither shall the girdle of their loins be loosed, nor the latchet of their shoes be broken: Whose arrows are sharp, and all their bows bent, their horses' hoofs shall be counted like flint, and their wheels like a whirlwind: their roaring shall be like a lion. They shall roar like young lions: yea, they shall roar, and lay hold of the prey, and carry it away safe, and none shall deliver it. And in that day they shall roar against them like the roaring of the sea: and if one look unto the land, behold darkness and sorrow, and the light is darkened in the heavens thereof.

RAIL PROBLEM REPORT TO BE SUBMITTED SOON

Ottawa, Ont.—The report of the royal commission on transportation will be ready well in advance of the opening of parliament. Whether or not it will be given out before the opening or held until the members can have the first look at it, is for the government to decide. The commission prepares the report and presents it to the government. Then its duties are complete.

The actual writing of the report has not yet commenced, it is understood. The commissioners, under the chairmanship of Mr. Justice L. P. Duff, are gathering day after day, weighing the facts collected in sittings throughout Canada and considering possible remedies for the situation as presented to them.

The instruments which had been dedicated to the worship of Jehovah's harp and the lute, the tabret and the pipe as well as wine were in their feasts. "The harp consisted of a sound-box at the base with wooden arms and a resonant connected by the strings with the box below. The lute was a guitar. The tabret was a small hand drum unlike the modern drum; the parchment was probably rigidly fixed, and thus incapable of being tightened or loosened so as to regulate the pitch. The pipe seems to have been the wind instrument in most common use. It may have been a simple flute a mere tube with holes, played by blowing either into or over or into a hole in the side. It is possible that it was a reed instrument with a double and vibrating tongue, or with a single tongue." Hastings Dictionary.

"Pleasure-loving people forget God. His counsels, His work . . . love of drink and dissipation blinds their eyes, dulls their ears, so that they have no quiet moment to reckon: their Maker These verses are exactly true nowadays of many. They never have time to reflect, they enslave themselves to drink and a passion for amusement, till duty, charity, compassion, divine truth, have all faded out of their minds."—Edward King.

The Ways Of Lightning

Scientists Have Discovered Many Facts Regarding Its Fascinating Power

Just as if we have nothing to worry about, scientists now tell us that lightning can strike upward just as well as downward. They have 150 photographs to prove that lightning bounces. You may be quick enough to see the bolt descend on its way down, but what's the use? You'll be caught on the rebound, though it probably doesn't make any difference to the person struck whether lightning hit an uppercut or delivered a rabbit punch.

In fact the whole thing oughtn't to make any difference to anybody struck or not struck. The great majority of us have survived hundreds of thunderstorms just by taking care that lightning did not fall on us from above. It wouldn't have saved many persons had the newly discovered facts been household lore a century ago. In the same breath the scientists announce that negative lightning is the deadly variety; positive lightning won't do any worse than melt the filling in one's teeth. How to tell whether an approaching bolt is negative or positive is not included in the information.—Newark Evening News.

Egg Powder Plant

An egg powder plant, which will consume 150,000 eggs a day has been opened at Saskatoon, Saskatchewan. During recent years China has had practically a monopoly of the egg powder business, a share of which will now be sought by the Saskatchewan industry.

South Africa has a movement to stop hoarding among farmers.

C.N.R. Retrenchment

Discussion Expected To Effect Saving Of $700,000 Annually

Montreal, Que.—Economies of almost $750,000 annually are expected to result from further reductions in personnel and salary ratings announced by S. J. Hungerford acting president of the Canadian National Railways. In August, 1931, salaries of officers and supervisory forces were cut 10 per cent. The continuing decline in revenues, Mr. Hungerford said in a statement, has necessitated further retrenchments.

The programme of curtailment of staffs is believed to abolish about 55 positions, while the cuts in salaries are in connection with higher paid men at least, expected to run as high as 60 per cent.

Action was taken, the statement said, after a careful examination of the duties performed by the many officers. Wherever it appeared positions could be abolished or consolidated without lowering efficiency such a course was adopted. The salary cuts will be receiving $5,000 a year or more.

Besides the matter of economy alone the statement continued, special consideration was given to the assistance which has required more men of executive type. These were not now necessary in as large numbers and in some cases their positions might be abolished.

A Retaliatory Measure

Dean Corbett Refers To Effect Of Economic Conference On U.S. Trade

Williamstown, Mass.—The Imperial economic conference at Ottawa was described largely as a retaliatory measure initiated for the most part against the United States, by Dean E. Corbett of McGill University.

Dean, as chairman of a special symposium on the conference, in connection with the Institute of Politics here, declared Corbett agreed however, with Prof. John Henry Williams, United States economist, that the Ottawa agreements would not seriously disturb United States trade.

Prof. T. E. Gregory, of London, England, distinguished British economist, also attended the Ottawa agreements represented the victory of "raw material countries over an old industrial country."

Cholera Raging In China

Deaths In Shensi Province Total 500 a Day

Hankow, China.—Reports from various districts of Shensi Province said cholera is raging throughout the province with increasing intensity, the deaths totaling 500 a day, scores of villages have been wiped out, it was said.

Cholera is more virulent throughout China this summer than at any time in recent years, and even foreigners living where sanitary conditions are good, and clean food is obtainable, have been stricken.

The disease continues unabated throughout the Yangtze Valley province despite cooling weather, which usually puts an end to it.

Hundreds are dying daily in Honan, Anhwei, Hupeh and Shensi, the provinces which are hardest hit. The disease is sweeping towns, villages, and the countryside alike.

Free Trade For Denmark

Canadian Business Men Hoping For Large Portion Of Market

Montreal, Que.—Adoption by Denmark on September 1, of a sweeping free trade policy was announced by the Montreal Board of Trade on the basis of "authoritative" information.

The council-general for Denmark in Montreal was unable to confirm the announcement although it had been unofficially reported to him officials of the foreign exchange department of the Danish National bank in Copenhagen had issued a statement to this effect.

All cattle, fodder, coffee, rice, raw tobacco, seeds and fruits for oil-pressing purposes, pigiron and raw metals would be admitted free to Denmark under the new policy, thus creating one of the most important free markets in Europe. Canadian business men, it was stated by officials of the Montreal board, are monitoring forces to obtain as large a portion as possible of this market.

Russia Not Optimistic

Capetown, South Africa.—"Concessions granted South Africa cannot be expected to bring about any material improvement in the country's economic position at the present time or for many years to come." This was the comment of Gen Jan Christian Smuts on the work of the Imperial Conference.

Enter Military College

Ottawa, Ont.—Thirty-eight recruits, including 24 from the east and 13 from the west, have been selected to enter the Royal Military College of Canada, Kingston, Ont., for the term commencing August 26, the Department of National Defence announced.

W. N. U. 1997

Former White Army

Dr. Gilliganne, of the Irish Free State, President of the volunteer division of the Ex-Total Army Club, who announces the formation of a new "white army which will stand between the people and the menace of secret organizations, to support lawfully constituted government and maintain law and order."

Anglo-Canadian Treaty

Premier Brownlee, Of Alberta, Sees Benefit To Western Canada

Ottawa, Ont.—Western Canada should benefit from the wheat and livestock provisions of the Anglo-Canadian trade treaty. This opinion was expressed by Premier J. E. Brownlee, of Alberta, who is conferring with the Dominion Government on the financing of the 1932 wheat crop.

The six-cent preference in the British market, said Mr. Brownlee, should benefit the western farmer and the removal of the restrictions against Canadian cattle should prove an added boon.

S.S. Pennsylvania Sails

Capt. Monnet Expects To Make Second Inward Trip This Season

Churchill, Man.—Following a race against time when extra shifts worked throughout the night the S.S. Pennsylvania sailed away at 11 25 a.m. Wednesday, August 24, for London, England, carrying 283,700 bushels of No. 1 Northern wheat and 880 tons, or 21 cars of flour and feed. The last minute rush gave Capt. W. Monnet a chance to clear out on the high tide with a ship low in the water, and filled to capacity. He will make first time to England in the hope of making a second trip this season.

Thanksgiving Day October 10

Ottawa, Ont. Thanksgiving Day will be celebrated this year on Monday, October 10. An order-in-council fixing the day has been passed. Following legislation passed by parliament, Armistice Day, November 11, and Thanksgiving Day are no longer celebrated simultaneously.

Drowned In Arctic

S. S. Wallden Was One Of Britain's Distinguished Explorers

Angmagssalik, Greenland. —It G. Wallden, one of the most distinguished of younger British explorers, was drowned when his kayak—a one-man Eskimo canoe—upset in the sea. He was only 35 years of age.

Wallden rescued Augustine Courtauld from the Greenland icecap last May after Courtauld, a member of Watkins' expedition, had been marooned for several weeks.

Details of the accident were not available. Wallden was leading an expedition investigating possible sites for air bases on an Arctic air route between Great Britain and Canada.

Despite his youth he had established himself as a distinguished explorer. He held the Royal Geographic Society's medal. Shortly before he set out on this expedition he became engaged to marry Miss Margaret Rose Graham.

The kayak is a difficult craft to operate. The Watkins' expedition had several especially made, and the members went into training to learn how to use them.

Curfew Law Enforced

Nine O'Clock Means Something To Children In Aylmer, Quebec

Aylmer, Que.—The long, mournful blast of a siren sounded in Aylmer on a recent night—it was the 9 o'clock curfew but it meant nothing to the children on the streets, who continued to play.

Suddenly, Chief Delbert Dumouchelle and his force swept along in battle array. Thirty-seven boys and girls were taken into custody by the officers of the law, lodged in the town cells, and, despite the protests of indignant parents, remained there until their release one hour later, at 10 o'clock. The "prisoners" included 26 boys and nine girls, ranging in age from nine to 16 years.

For the first time in eight years, since it was placed on the statute books, the curfew law had been enforced. "And from now on," Chief Dumouchelle explained to the irate parents, "it will be enforced."

Script For Tax Payment

Calgary, Alberta.—Issuing of script valued at $1,150,000, which represents one-third of the annual tax revenue, to be returnable to the city for payment of taxes only, has been recommended to the city by the Unemployed Married Men's Association, as a means of saving bank interest and exchange losses totalling about $74,000.

Prince May Visit Sweden

London, England.—It was learned on high authority that the Prince of Wales intends to visit Sweden some time in October but that no definite date for the trip has been fixed. The information recalled frequent rumors in the past that Princess Ingrid of Sweden might become the prince's bride.

ROYAL SUSSEX REGIMENT TAKE OVER GUARD DUTIES

When the Brigade of Guards who normally furnish the guard for the Royal Palace left London on Field Training the 1st Battalion Royal Sussex Regiment took over the guard duties. The Royal Sussex men are shown with their regimental flag passing Buckingham Palace. It is considered a great honor to be given the duties of guarding the British Royal Palaces.

BACK TO THE LAND PLAN TO BE ENCOURAGED

Ottawa, Ont.—Although the time has been too short to indicate the general reaction, the opinion has been set, stated in many official sources that the provisions in the agreements reached at the Imperial Economic Conference would result in a stimulation of the movement "back to the land."

"All that is wanted is a tangible hope that the farmers may get a return for the labor even to an extent only approaching what they could expect from industry in the urban centres—to restore the equilibrium to a more healthy state," declared one official here.

Since 1901 there has been a steady decrease in the rural population and a corresponding increase in the growth of urban population. In 1901 the percentage of heads of families earning their living direct from the land was 66. In 1931 this percentage had fallen to 46.

A constant stream of provincial and municipal officials has been passing through the colonization offices of the Minister of Immigration since the inauguration of the "back to the land" movement early this summer, and every province in the Dominion is now actively interested.

Manitoba Reducing Civil Service Salaries

Government Wages Cost Economy Program Under Budget

Winnipeg, Man.—Determined to cut some $750,000 from its expenditures for the present fiscal year, the Manitoba Government will reduce the salaries of all its employees by another seven per cent, beginning September 1.

The cut, together with one effected previously, brings the total reduction to 15 per cent. on lower salaries and 25 per cent. on higher. It affects everyone from cabinet ministers down.

Faced with declining revenues and increasing expenditures on relief, Premier John Bracken and his ministerial colleagues announced the economy programme which is designed to keep the budget balanced.

Besides the salary reduction, amalgamation of various government services, elimination of a number of grants and reduction of the grants to the University of Manitoba are forecast. Mr. Bracken said there would be curtailment of grants to public schools.

Will Aid Canadian Ports

Grain Formerly Shipped Via U.S Now To Go By Route Canada

Montreal, Que.—As a result of the six cents a bushel preference granted Canada by the United Kingdom in the agreement signed at the Imperial Economic Conference, all of bushels of Canadian wheat that has formerly been shipped via the United States will now be exported from Canadian ports, J. H. Rainville, president of the Montreal harbor commission, stated here.

He declared that the agreement would result in a great increase in the handling of grain in Montreal, Saint John, N.B., and Halifax.

An Unrealized Ambition

Montreal, Que.—General Sir Arthur W. Currie, commander-in-chief of the Canadian corps in France, and now principal of McGill University, confessed his unrealized ambition to have been a member of one of Canada's Rhodes Scholars. The admission came during a luncheon to a contingent of British cadets, who arrived here following their shoot at Connaught ranges, Ottawa, against the pick of Canada's young rifle shots.

Boycotting Japan

Shanghai, China. The "Blood and Iron" society, an organization formed to promote an anti-Japanese boycott, is becoming increasingly active with threats against merchants handling Japanese goods.

U. S. Foreign Population

Canadian Exodus Continued Strong Decline In Recent Years

The bald comment in Canada that most of the Canadians living in the United States migrated southward in recent years is contradicted by a bulletin on the 1930 census issued by the commerce department at Washington.

It is disclosed in the bulletin that of the 1,270,421 natives of Canada enumerated in 1930 in the United States, 925,386 or 39.5 per cent settled here in 1890 or earlier. Between 1900 and 1914 inclusive, 303,211 or 13 per cent, entered. Then there are 737,777 Canadians in the United States, 57.5 per cent, of the total, whose migration dates from the pre-war period. The percentage is probably still reduced only concrete two years after the census by immigration from Canada to the States since 1930 has been negligible.

The war-time and post-war movement from the Dominion to the States is in the bulletin: 1915-1919, 82,-271, or 7.5 per cent of the total; 1920-1924, 166,-386, or 16.2 per cent; and 1925-1930, 241,356 or 19 per cent. There was a steady decline in yearly immigration from Canada during the last five years until in 1930 the lowest total for several generations was recorded.

The bulletin distinguishes between "French" and "other" Canadians and shows that the French-Canadian living here have, on the average, a longer term of residence in this country. The total of 1,270,421 Canadian-born persons in 1930 included 370,-892 French -Canadians and 907,529, or 71 per cent, entered in 1900 or earlier, and 64.5 per cent in 1914 or earlier.

The 1,270,421 persons here, living in the United States, according to the bulletin, are the 3,144,643 natives of the British Isles, the Irish making the largest contribution. Next in order came 1,766,436 Italians, 1,686,814 Germans, 1,646,197 Poles, and 1,153,294 Russians. Of all these groups including the British and Irish, the bulletin shows about 70 per cent were previously resident in the United States.

The Planet Venus

Fred West Sends's Twin Sister Has Atmosphere Thought To Be Our Own

Astronomers of Mount Wilson Observatory have found indications that the atmosphere of Venus contains carbon dioxide, which is one of the essentials of life as we know it, Dr. Walter Sturk, The Carnegie Institution, which is one of the most important gases in the air we breathe. The Carnegie Institution, which is one of the most important gases in the air we breathe. The Carnegie Institution, which is one of the most important gases in the air we breathe.

FORT SASKATCHEWAN RECORD

Published Every Wednesday
G. Neale, Editor and Publisher

WEDNESDAY, AUG. 31st., 1932

Davey Ayton and Henry Thomas have the honor of having the first load of wheat into the elevator in this district last week-end. In the next few days, if the present weather conditions hold, threshing will be general here.

Mr. Ayton reported that his wheat graded No. 1 and went between 28 to 29 bus. to the acre.

The wheat of this district according to reports, will grade high, but in most cases run small in plump.

CARD OF THANKS

Mr. Otto Abram, Mr. and Mrs. D. Simmons and family and brother Archer wish to thank their many friends, doctors and nurses of Lamont hospital, Rebekah lodge No. 83, Onward Rebekah lodge, No. 113, and Partridge Hill W.M.S., for kindness and sympathy received during their recent bereavement, also for the beautiful floral tributes rendered.

UNITED GRAIN GROWERS LIMITED

A dividend at the rate of five per cent has been declared on the paid-up capital stock of United Grain Growers Limited, for the financial year ending July 31st, 1932.

Cheques will be mailed on September 1st, 1932, to shareholders of record at July 31st.

By order of the Board of Directors.

R. S. LAW,
President.

Winnipeg, Manitoba,
August 25th, 1932.

SUPPORT THE ADVERTISERS

"They say that it's on ill wind that doesn't blow somebody good". One of our advertisers who ran the coloured ad of this paper to tell the people what they sell, recently inserted an advertisement for Cyclone hammers and has so far have done a land office business.

It all goes to show, that if you have what the public wants when you advertise you are bound to sell.

Mr. Dave Simpson of Wetaskiwin, Alberta passed away, Aug. 26th. He is survived by his wife, three daughters and one son.

Why Not Pool Elevators?

Alberta Pool elevators are now operated under public license and are in a position to handle any grower's grain on the open market basis.

The excellent patronage extended to these Pool elevators during the immediate past crop year, by many growers who were never members of the Wheat Pool, is testimony to the favorable reputation enjoyed by this co-operative elevator organization.

The Alberta Pool elevators are being operated on a basis of no discrimination between customers and with the definite policy of extending fair and equable treatment to all persons using its facilities. Why not give the Pool elevator a trial?

Arrangements can be made to pool any proportion of a member's wheat that he may desire. Information regarding this can be furnished by your Pool agent.

LARGE

UME OF WORDS OVER TELEGRAPH

a National Telegraphs 500,000 words sent out by two of the company's offices in Ottawa during the Imperial Economic Conference. One office was located in the Chateau Laurier and the other in the Parliament Buildings. At the hotel a special press room was at the disposal of newspapermen, and a staff of 23 employees was kept busy. In many cases direct wires were maintained from Ottawa to New York, Washington, Vancouver and other cities. In all the material telegraphed from Ottawa represents about 1,250 newspaper columns in volume, enough to fill the news section of an average daily newspaper for one month.

CAT PICKS ELECTRIC CAR FOR A HOME

Cat which was the pet of the roundhouse of the Canadian National Railways at Calgary decided to have her family in the centre of a battery coming back on all-electric cars.

She and her kittens were carried to Edmonton where the mother cat left the car presumably in search of food. Unfortunately she missed the train when it left on the return journey and was not able to rejoin her family until the car returned again to Edmonton. Her mewings attracted attention and the kittens were discovered. They had travelled nearly 1,000 miles and had been away from their mother for thirty-six hours, also with fatal results.

TENNIS CLUB NEWS

Results of the games played during the last week at the Fort Saskatchewan Community Tennis Club in the Ladies and Gents singles tournament.

M. Holt defeated G. Neale 6-3, 6-0, 6-4.

E. Lane defeated A. Simmons 6-3, 6-2.

T. Lane defeated Colborn 6-1, 6-2.

M. Holt defeated T. Lane 6-2, 6-4.

Mary Holt and Earl Lane will play off the deciding game this week-end. If possible the ladies singles will be played off the same time.

NEW ROAD MAP

A new road map of Alberta has just been issued by the Provincial Government and is now on sale throughout the province at 25 cents each.

THE ROLLING STONES

Genius is sophisticated nine times out of ten by the plumber who makes more of his stops. The man who goes about on what he considers a clear track accomplishes something; but follow the dodges from one enterprise to another or from one method to another usually winds up with fringe on the tops of his trousers. It's not been a good thing since it is. Don't try to keep a dozen irons at working heat at once. Ninety per cent of the successful men in life are common plodders. The genius are not a feeble lot, yet they make their homes in the rocks".

Mr. and Mrs. Chris. Edwards of North Cooking Lake was a visitor in town on Wednesday.

Another Oil Scandal

Girl: "Could you fix me a dose of castor oil as the oil won't taste?"

Druggist: "Certainly! Won't you have a glass of soda while waiting?"

Girl: "Oh, thank you." (And drinks the soda.)

Druggist: "Something else, Miss?"

Girl: "No, just the oil."

Druggist: "But you just drank it."

Girl: "Oh, dear! I wanted it for my mother."

Duck Shooting Season Opens September 15

Farmers do not need a shooting license to hunt game birds this season provided they stay on their own land. Such is the wording of the 1932 game Act. Farmers no doubt will be interested at this new section in the game act.

In the past they have been allowed to shoot game birds without any license.

The new 1932 Game Act is not exactly so wholesale in its exemptions.

Section 8, reads as follows:—

No person is exempt from the necessity of purchasing a license to hunt game birds, or to trap fur-bearing animals, except resident farmers or ranchers or members of their households, who may hunt game birds or trap fur-bearing animals without a license on land occupied by them only.

The season for ducks opens in this part of the province on September 15th.

The bag limit for geese is 10 per day and 25 for the season, and ducks 15 per day prior to October 1, 10 per day thereafter and 100 for the season.

Sharp-tailed grouse bag limit is five per day in the area both north and south of the Edmonton-Kervobert railway branch boundary line, but the season limit in the south is 25 and in the north 50.

Hunters may take 15 Hungarian partridge per day, with a limit of 200 for the season.

LOCAL NEWS

OBITUARY

Mr. Alex. P. Gagnon of Fort Saskatchewan passed away on Sunday, August 28th, at the age of 80 years, after a lengthy illness.

He is survived by his wife, one daughter, Mrs. A. W. Mathieu of Cervenda, and three sons, George and Joseph of Opal, Alberta, and Joseph of Spirit River, Alberta.

The funeral service was held on Tuesday, August 30th, at the Roman Catholic Church, Fort Saskatchewan, and interment in the cemetery at Lamont.

Mr. Gagnon left Quebec in 1904, coming to this district where he took up a homestead, later moving into town where he lived an active life until his death.

CARD OF THANKS

Mrs. A. W. Mathieu and brother George wish to thank their many friends in Fort Saskatchewan and district for the kindness and sympathy shown during their recent bereavement, also for the beautiful floral tributes received.

STOP USING SODA!

BAD FOR STOMACH

Much soda disturbs digestion. For sour stomach and gas, Adlerika is far better. One dose will rid you of bowel poisons which cause gas and last sleep. F. W. Smith, Druggist.

There is Business Today, But Advertising Must Act For It.

THRESHING TO BE GENERAL END OF PRESENT WEEK

Threshing will be general in this district by the end of the week if present weather conditions hold.

A few farmers are cutting barley and oats, but this will be cleaned up in the next few days.

A number of threshing rigs started on Monday and Tuesday, with wages being offered at $1.50 per day.

Some of the men who have drifted into town have been known to turn down jobs at that price and have been holding out for $.50 per day.

COMING EVENTS

The regular monthly meeting of the Fort Saskatchewan Women's Institute will be held at the home of Mrs. A. H. Rogers on Thursday, September 15th, at 3 p.m.

At this meeting the Grand-Mothers will be guests of honor. A cordial invitation is extended to all.

*****

The Ladies Aid of United Church will hold a Moose Tea and sale of Home Baking at the Fort Candle-dowry store on Friday, Sept. 9th, from 3 to 6.

Check Your Home for Fall

It's time for an inspection. If it needs fixing in any way, do it now before it becomes too expensive to fix. Lumber and building supplies are now offered at the lowest price in twenty years. They offer you just the opportunity you've so long waited. For advice and prices, Phone 33 or call in and see us.

Jones, Graham & O'Brien

Initiative Wins.

When Marshal Foch was given command of the French army during the World War, one of the first things he is reported to have said was: "Fine—I with a history and principles! What is the problem?" Though Foch was perhaps the world's greatest student of military strategy, he was no slave to it. He tackled each problem with initiative and vim. This method won for Foch.

The Review of Reviews magazine declares that a study of recent reports will show that those industrial organizations that exerted vim and sustained vim and initiative profited more than those which stood pat wonderfully unilling, or clamored for help against the inevitable. In business, the more it tends to become standardized. System and routine often kill initiative and stifle progress. This explains in part why a good organization will so often place a new, out-of-the-ordinary product upon the market, something for which a real need has long existed but which no one previously appeared to have recognized.

Safety glass, now used on widely for windshields and bank cages, is the result of abortions and initiative. Non-shattering glass was discovered accidentally by a French chemist who knocked over a test-tube that had been used for months. Stooping to pick up the pieces, he discovered that the paste substance in the tube held the broken glass intact! Mentality alert, the chemist remembered that the tube contained a mixture of trinitro-cellulose, ether and acetone. Experiments followed and safety glass was the result.

Rear Admiral David Watson Taylor is credited for having been able to reduce the cost bill of the United States Navy by "one half, utilizing the bow wave for ship propulsion. A biscuit company making only erratically saw its sales rise enormously by fashioning cookies in the shape of dogs, animals, and similar enticing forms. A manufacturer of tarvels was able to build up sales enormously by introducing towels in colors to harmonize with the bathroom tiles. Children's towels were created. Complete ensembles were worked out: towels, washcloths, bathmats. That plant is reported to have maintained full capacity throughout the depression.

Foods have undergone marked development because of research followed by initiative. It was discovered that tomato juice is rich in vitamines A, and C, and in three years, tomato juice has changed from pabble's fancy Progressive manufacturers of canning machinery were alert to their opportunity. In two years the sales of canned tomato juice have a gain of 620 per cent, and bottled 177 per cent.

Today there is no paucity of opportunities. But there is paucity of vision, initiative, and courage to capitalize them. As Charles Kettering, vice-president in charge of research, General Motors Corporation, says, "Business will come back when we get products that people want to buy. If one-tenth of the energy was spent in getting such products instead of striving up the road, we would get along better."

The task of leaders is to lead. There is not an industry or a line of manufacture but affords unappreciated opportunity for initiative. Today, as during the days of the World War, sometimes might think to advantage as Marshal Foch was thinking when he said, "To hell with history and principles! What is the problem?"

Mine Taken Over By Workers

Interesting Experiment In Under Way in Nova Scotia.

For a quarter of a century the people of Inverness, N.S., have been working for somebody else. Now they will be in business for themselves, directing and operating the coal mine that is the only industry in the town, and marketing its products.

Their co-operative plan, approved recently by the government of Nova Scotia, is expected to banish the threat, long dreaded by the town's 2,000 inhabitants, that the mine would be closed.

Under the agreement with the government, operation and control of the mine has been transferred to a new company, the Inverness Coal Co-Operative Company, Limited, members of which are the miners employed in that mine and taxpayers of Inverness.

Feeder Purchase Policy

Designed To Encourage Wider Feeding Of Cattle and Lambs

Renewal of the Feeder Purchase Policy designed to encourage the widest feeding of cattle and lambs of suitable type and quality is announced by the hon. Robert Weir, Federal Minister of Agriculture. Under the terms of this policy, formerly in part, the Federal Department will pay the reasonable travelling expenses of a farmer or his agent to the Stock Yards for purchase, the feeder sales, or nearest station to range point at which feeder stock is purchased. To insure the benefits of the policy at least one car of stock (30 head of cattle or 60 lambs, or a combined car, figured on 2 lambs as the equivalent of one head animal) must be purchased. Stock purchased is subject to approval as to type and soundness by the official representative of the Dominion Live Stock Branch serving the point of purchase. Special provision has been made to extend the benefits of the policy respectively to farmers of Eastern Canada, and to those in Provinces, and of British Columbia. Complete details and information about the policy and the benefits can be secured by writing the nearest stockyard agent of the Dominion Live Stock Branch, or direct to R. S. Hamer, Chief, Cattle Division, Dominion Live Stock Branch, Ottawa. The policy is operative for a period of five months from and after August 1, 1926.

Asthma Sufferers Hope! Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to develop. It breaks the cause. Our experience with the relief-giving remedy shows how actual and positive is the success it gives. It is the result of long study and experience and was not submitted to the public until its makers knew it would do its work well.

Says He Knew Wilips

After an absence of more than 60 years, William McGregor, who left his home in Lathecurrhead, Caithness, Scotland, to seek his fortune in Australia, has returned to become the owner of his native village. As a boy he was employed in herding cows. Director of avowed Australian companies, he came back to visit his sister, Miss Jessie McGregor, who still lives in the cottage where they were born. He bought the village when it was placed on the market recently. It has about 120 inhabitants.

EATS DIRT

Stock Exchange Seats Up

Unlimited Value Shown Big Increase in Short Time

With the recent sale of a seat on the New York Stock Exchange for $130,000 the value of the 1,375 seats went up by $5 per cent. The estimated worth of the seats is now placed at $180,000,000, an increase of $41,250,000 over the total of a week before.

The traders in Wall Street are preparing to pack up where they left off a few years ago. It is getting on for three years since the crash on October 29, 1929, when 34,600,000 shares changed hands.

People have been hoarding their money for a long time. They are beginning to feel the itch to spend. The stock exchange is one of the barometers, even if it is in a place where many lose their savings. And the exchange is giving itself fair play up to its business.—London Chronicle.

Grow Seedless Grapefruit

Secret Was Originally Discovered By South African Plowman

South African planters have mastered the secret of growing seedless grapefruit, and bud supplies are now beginning to be exported. A careless plowman discovered the secret originally. His blade came in contact with a grapefruit root and a small tree, growing from the incision, produced sterile (seedless) grapefruit. South African growers experimented and found that similar fruit could be produced only under special conditions.

Motion Without Motive

Chinese Description Of Western Civilization Fits Speed Maniac

Judging by the number of conversations in recent weeks, the Ontario motorists are to be earnest in their determination to make the highways of that Province safe for the average motorist.

There is rarely any intelligent reason for driving a car beyond a reasonable speed. Occasionally, in an emergency, fast driving may be justified. For the most part it is merely crimin-ous.

One of the most frequent causes of fast driving is the desire merely to put some one on the way to nowhere in particular. Which gives point to the Chinese observer's description of Western civilization as "motion without motive." The speed maniac might just as well be driving around the enclosed motor speedway as on the public highways. Perhaps something of the kind may eventually be provided for those infected with the speed virus.—Winnipeg Tribune.

Worms

**Remarkable Fly Indestructible, It Is Good, —When a worm is killed by brisk rubbing, Dr. Thomas' Electric Oil restores the power instantly. Worms cause, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing, and will relieve all portions of the bronchial tubes and respiratory organs. Try it and be convinced.

Mix Velvo

Norwood was showing an office friend over the young couple's new house.

"All this luxurious furniture is my wife's idea, you know," he explained.

The friend nodded approvingly.

"Very nice, I'm sure," he replied; "but surely you had a voice in the matter."

"Yes, the invoice," said the young husband.

Canadian Radio Programme

Broadcast From There

Concert Will Be Given From Station CKCO, Ottawa

An advertising stunt that proved of some scientific importance was accomplished here recently when Arthur Holt, well known radio artist, and Sydney M. Mesbitt, aeroplane club official, successfully established communication with a personal radio station while flying 2,000 feet over the city. Both men gave short addresses which were clearly received by many wireless fans. W. G. Smith and J. M. Imlach, wood investigators of the Dominion Forest Service, Ottawa, George Godell, W. G. Smith and J. M. Imlach, wood investigators of the Saskatchewan Department of Agriculture, the Alberta Department of Agriculture and the Canada Committee on Weed Control respectively, are the joint authors of the report entitled, "Weeds and Their Control."

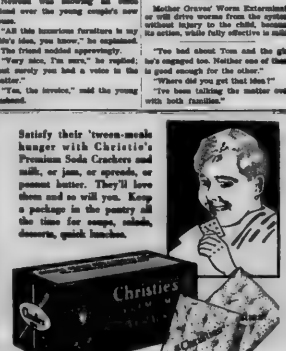
The origin of the Committee is described in these terms:

"No such body of knowledge exists about weeds as about animal and plant diseases and insects, and until very recently no adequate investigations were under way to obtain such knowledge.

"In recent years the exploitation by commercial firms of various chemicals as herbicides has provoked a revived interest in this old, but never widely used method of weed control. The National Research Council, in response to requests from numerous organizations, called a conference in Edmonton in the fall of 1929, on the destruction of weeds by means of chemicals. At this conference it became clear that the whole field of weed control was urgently in need of investigation. The Committee then appointed an Associate Committee on Weed Control, with representatives of the chief institutions concerned in the general problem and the committee undertook the task of developing a co-ordinated programme covering all aspects of weed control investigation.

Having regard to the practicability of organizing the work, it was agreed that the initial activities should be confined to the prairie provinces. Mr. J. H. Hunter, of the University of Alberta, was engaged by the committee to make a reconnaissance survey of this area in order that the committee might have a better picture of the situation with which it was confronted. The results of the survey are set forth in this report."

Satisfy their 'tween-meals hunger with Christie's Premium Soda Crackers and milk, or jam, or spreads, or peanut butter. They'll love them and so will you. Keep a package in the pantry all the time for soups, salads, desserts, quick lunches.



Crisp, light, flaky and slightly salted. Delicious.

Christie's PREMIUM SODA CRACKERS

First Results Obtained In Scientific Attack On Weeds In The Prairie Provinces

Weeds stand pre-eminent among the causes of agricultural losses in Canada and oddly enough they have been the last of the pests of agriculture to occupy the serious attention of scientific investigators, states a report entitled, "Weed Survey of the Prairie Provinces," issued as the first publication of the National Research Council's Associate Committee on Weed Control.

In a popular account, entitled, "Weeds and Their Control," prepared under the auspices of the Committee for general distribution and issued simultaneously, it is declared that the worst weeds are widely adaptable as to soil and climate and even recently settled areas such as the Peace River district are being gradually invaded and will eventually be overrun unless more effective defensive measures are adopted.

An estimate of the losses sustained is made:

"The committee's experiments have shown the utmost yield of weedy plots to be reduced by 10 to 44 per cent. Taking 15 per cent. as a conservative estimate of the crop loss due to weeds in the prairie provinces, this would run, at current prices for wheat, oats and barley, a total over forty million dollars for an average crop. To this must be added the high cost of the additional cultivation done to keep weeds within bounds, the cost of threshing, handling and shipping to Port Arthur and Fort William annually the equivalent of 96 train loads of dirt, each of weed seeds, the direct cost of dockage, and many other kinds of losses due to weeds."

Dr Robert Newton, Director of the Division of Biology and Agriculture, National Research Laboratories, and the chairman of the Committee, states in a foreword that cultural methods of control must be mainly relied upon, since the application of chemical herbicides is practicable only for small areas. Dr. Newton says:

"For most of the weeds fairly successful cultural methods have been developed, and we may expect great improvement along this line when we have available the results of the exhaustive studies of the growth habits of weeds now being carried on by members of the committee. Previous progress has been achieved largely by the method of trial and error, now it can be based on accurate knowledge of the effect of different treatments on the development of various weeds. It would appear that general control may in time be achieved in proportion as educational campaigns are successful in inducing farmers at large to co-operate in the application of the best methods. Community effort is essential, as with many weeds reinstatement from farm to farm takes place readily.

"Weed inspection systems might be improved by centralizing within each province the responsibility for both the appointment and supervision of inspectors, and by extending the legislation to require the cleaning of the seed. Municipal appointees are often poorly qualified and ineffective. The education aspect of the work should be emphasized.

"This report goes out as the first publication of the Associate Committee on Weed Control. A second, dealing in a popular way with weed control, in the light of the new information already available in the committee, is being published simultaneously. Other papers, based on the large volume of investigation work under way will follow in due course. It is confidently expected that these will be recognized as important contributions to the solution of a problem of the first importance to agriculture."

C. P. McKnight, Professor of Agronomy, University of Manitoba; L. E. Kirk, Dominion Agrostologist, Dominion Experimental Farms, Ottawa, George Godell, W. G. Smith and J. M. Imlaach, weed investigators of the Saskatchewan Department of Agriculture, the Alberta Department of Agriculture and the Canada Committee on Weed Control respectively, are the joint authors of the report entitled, "Weeds and Their Control."

The origin of the Committee is described in these terms:

"No such body of knowledge exists about weeds as about animal and plant diseases and insects, and until very recently no adequate investigations were under way to obtain such knowledge.

"In recent years the exploitation by commercial firms of various chemicals as herbicides has provoked a revived interest in this old, but never

Belgian Memorial Stamps

Dedicated To Infantrymen Who Fell On West Front

Special postage stamps have been issued in Belgium dedicated to the glory of the Belgium infantrymen who fought and died in the Yser at Nieuport Dunmude and other sectors of the Western front.

The design consists of both of the two commanding remembrance of a gigantic figure of an infantryman, clothed in great coat, steel casque, and full equipment striding amidst a blaze of light through the ruins of a village.

A total of 40,000 pairs was printed, and the stamps were sold at a premium. Each value is odd of the creation of a memorial monument in Brussels. Their values and issues are as follows: plus 2 c., red and 1 c. The plus 4 of 25c. They make a notable addition to the many issues of stamps associated with the world war and its consequences.

New Type Of Building

American Labor-saver Is Constructed On Lines Of Thermos Bottle

A big laboratory recently built in America has been made on the lines of the thermos flask. Its walls are constructed to prevent heat from leaking either in or out. It is built of concrete with not a single door or window. Outside is a thick coating of cork with an outer layer of bricks. This is in a way to maintain and maintain an unaided temperature of 70 degrees. It would take a month in the depths of the severest winter for it to fall to 60 degrees. The purpose of the laboratory is to study the light given out by atoms at certain temperatures.

Dog Accepts Challenge

Carriers with three banknotes Miss Peggy Tyson of Winchmore Hill, England waved them playfully before her pet terrier. The dog accepted the challenge and showed up the money. Miss Tyson was able to collect and snatch enough of the pieces to have the bills cashed at the local post office.

If Australia could be placed in the Atlantic Ocean, it would fill up all the space between the United States and Great Britain.

CARSON'S POINTS ABOUT THE SMART DRESS HAVE BEEN THOUGHT OUT FOR MATRONS

For instance, the one-sided ruffly falling rever cuts the bodice breadth. Still more helpful perhaps is the unbroken line, created by the new petal belt arrangement, which gives height to the figure. The bust panel of the centre-front, also does its bit toward slenderness.

Printed crepe silk is a lovely medium. The vestee is here.

No. No. 638 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 38 requires 4½ yards of 35-inch, with ⅝ yard of 10-inch lace

Cutting Guide: Allow ½ inch for all seams.

Pattern may be obtained in shoe bands or lacy novelty weaves. Shoe woolens are also suitable.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

STAND OF DOUGLAS FIRS

Stand of Douglas Fir on Vancouver Island, British Columbia. There are 127 billion feet of this timber growing on Vancouver Island.

When somebody said that trees were a thousand friends in one to man they did not exaggerate. It is for this reason that Mr Frank D. Barnjum is carrying on a campaign to wide crusade for the conservation of our Canadian forests. The above picture shows a handful of Douglas firs near Victoria. There are estimated to be over 130 billion feet of this tree now growing on Vancouver Island. Mr Barnjum has already bought a tract which is to be preserved for the public in his fight for the conservation of our timber.

Mr. Barnjum says: "Trees protect and beautify our farms and gardens, protect our drinking water supplies, our water powers, fish, game and birds life, provide lumber and fuel, pulp and paper, labor and transportation, taxes and dividends; are our greatest

promotor of health, beautify our city streets protect our highways and check the ever increasing menace of dust storms and hail, provide shelter from the scorching days of sun in summer and the icy blasts of winter, prevent cyclones, damaging floods, erosion and loss of fertility of the soil, provide recreation and a tourist industry which, without cost to the country, ranks second in its importance, hence, including lumber and pulp, our four greatest industries are absolutely dependent upon our forests, and in fact 'nothing that we use or eat or wear can be produced, manufactured or transported without the aid of wood.'

"No other element of the universe, save water, is so many sided (6,000 in number), or is of such vital importance as trees."

Vancouver Now Claims To Be The Largest Grain Shipping Port In The Dominion

One-Third World's Sheep Within Empire

British Dominions Produce Large Portion Of New Wool

Nearly one-half of the world's raw wool and over two thirds of the wool entering world trade are produced within the British Empire. Exports of home-grown wool from Canada have developed rapidly since the war, these exports now amounting to a yearly average of 7,000,000 pounds, about 40 per cent of the entire Canadian production.

The world's sheep population is estimated at nearly eight hundred million head, of which about one-third are in the British Empire. They produce between 3,500 to 4,000 million pounds of wool yearly, and of this amount about 1,500 million pounds, including much of the best wool, comes from the Commonwealth of Australia, South Africa and New Zealand. Outside the Empire the important producing areas are the South American countries, the United States and Russia. Of these invitiorly only South America has a surplus for export.

Thousands Use Them For Channel Crossing

Demand in Greater Than Accommodation According To Report

During June 4,311 travellers flew by Imperial Airways between London and Paris, as compared with 3,396 in the corresponding month of 1925. This increase is notable and it is reported that the demand is greater than the accommodation. When Louis Herlot, the French flying aviator, made his pioneer flight across the English Channel, from Calais to Dover, a distance of 21 miles, in 37 minutes, on July 25, 1909, he had visions of the future of flying, but he could hardly have imagined that the science would make such tremendous progress in less than a quarter of a century.—Montreal Gazette.

The surprising growth of Vancouver's grain trade during the past ten years was summarized and clearly illustrated by R. C. Mclvey retiring president of the Grain Exchange division of the Vancouver Merchants' Exchange. The occasion was the annual meeting of the division.

For the fourth successive year Vancouver has exceeded Montreal in exports of Canadian wheat. Three years ago Vancouver exported 6,000,000 bushels, while Montreal shipped 34,-000,000 bushels of Canadian wheat. Last crop year, 1925-26, Vancouver exported more than 78,000,000 bushels of wheat and Montreal 54,000,000.

Ten years ago Vancouver's elevator accommodation was 1,500,000 bushels. Today, including additions now under construction, the port has the largest ocean grain elevator accommodation including much of the best wheat. Montreal is second with 15,163,000 bushels.

In 1921-22 Vancouver exported 6 per cent. of the Canadian wheat crop. In 1925-26 this port exported 44 per cent. of the Canadian wheat crop. Montreal and other eastern Canadian ports 27 per cent., and United States ports 19 per cent.

Ten years ago Vancouver's oats export was 250,000 bushels, last year it was 7,000,000 bushels.

Ten years ago this port's grain export to Europe was 4,860,000 bushels, last year it totalled 71,000,000 bushels.

Last year's export from Vancouver was 84,000,000 bushels of all grains, second highest movement in history of the port. Records were made in quantity shipped to Europe, in movement of oats, in total percentage of Canadian crop exported.

Something New For Chicago World's Fair

Various Stages Of Manufacturing Taking Place Of Completed Exhibits

Chicago World's Fair in 1933 will be built on the theory that the "will be built on the theory that the "will be exhibit of previous expositions is out of vogue. Every exhibit will be in "motion." Instead of completed products on display, the public will be shown the various stages of the manufacturing. Because of this policy there will be thousands of employees working on regular shifts in temporary factories during the six months period of the Fair. It is expected that 30,000 persons will be on the payrolls of the various commercial concerns, exhibitors and educational displays.

Fresh Water Leviathans

Larger Boats Make Faster Time On Lake Trips

In only a few years the century Welland locks have grown from 110 feet long to 250 feet, because Canadian business requires to handle the boats that have grown from 100 feet to 250 feet. Moreover these freshwater leviathans that we have made to carry our wheat and ores can no longer spare the time to dawdle as a 25 hours between Erie and Ontario as they have had to do. Speed goes with size nowadays and our newest and biggest carriers with their 23,000 tons under hatches can pass from lake to lake and clamber up or down the cliffs in a third of the time.—Montreal Star.

"Lend me five pounds."

"When I return from Paris."

"So you are going to Paris?"

"No."—Outlook, Madrid.

WORLD HAPPENINGS BRIEFLY TOLD

Robert Moodie, 67, who had been for nearly 60 years connected with the circulation side of the "News of the World," being its senior representative to the South of England, is dead.

Dr John Stanley, junior research investigator on the staff of the National Research Laboratories, formerly of Vancouver, B.C., has resigned. He has accepted the post of assistant professor of biology at Queen's University, Kingston.

A royal "code of manhood, ornamental with ermine, to be worn on state occasions only, has been ordered by His emperor of Ethiopia from a firm of Montreal furriers. His majesty insisted the order be placed "within the empire."

The order of the Red Star, the highest decoration of the Soviet government, has been awarded to Col Hugh L. Cooper, United States engineer, for his work on the huge Dnieprostroy power development in southern Ukraine.

Having kept a census of horses since the World War, the British War Office will start one of automobiles.

Apartments built in Ursuler Copenhagen, Denmark, last year, totalled 6,833, the largest number ever recorded in any 12 months.

No change is to be made in the size of Canadian one dollar bills, the finance department stated recently. Recent rumor said the Canadian bill would be cut down in size, much after the style of the smaller United States bill.

British Columbia's oldest pioneer, Alexander MacLean, aged 81, who came to British Columbia 74 years ago and whose memories went back to the days when the site of Vancouver was dense forest, is dead. He was born in San Francisco.

Lime Cord-Sharpers Have Lost Occupation

Practice Is Almost Unknown Now On Atlantic Route

In many of the world's big cities today, including London, England, are the scattered bands of clever and well-educated men who at one time were expert card-sharpers on the great luxury liners.

The depression, which brought almost a scarcity of easy money, helped the police in their vigorous campaign against these men, who specialize in card-sharping aboard ships.

Their expenses were high, and the stakes at most of the games were too low to produce any profit after paying their fares as first-class passengers.

Card-sharping on the Atlantic lanes is today almost unknown.

Why argue? If you are right, you know nothing. And being wrong makes you so mad you don't want to learn.

Visitor says American schoolgirls are too fond of gum. Part of their chewition, no doubt.

SUNDAY SCHOOL LESSON

SEPTEMBER 11

ISRAEL JOURNEYING TOWARD CANAAN

The Short Press Story, verses 11-35. The children of Israel had left Egypt an undisciplined rabble. Now they are an orderly host—they set forth according to their journeys. In due order they advanced, first the camp of Judah, and then the other tribes in their prescribed order, the ark and the tabernacle and all its furnishings in the care of those appointed for this service. They were on the way to "the place of which the Lord said, 'I will give it to you'," otherwise as yet that more than thirty-eight years would pass before their journeying ended. They themselves, would enter that Promised Land.

"The path of life we walk today
Is strange as that the Israelites trod;
We need the shadowing rock as they;
We need, like them, the guide of God.

The Proposal To Hobab, verses 29-32. Hobab was himself brother-in-law, according to Judges 4:11, the son of Jethro, who had visited Moses at Rephidim and returned to his home in Exodus 18:27 Before starting on the march Moses besought Hobab to go with them. Leave them with us, and we will do them good," he said with confidence, assured that God would be with them, and that the good which would come to them from God they would share with Hobab. Moses was right in telling Hobab that they would do him good. The ungrateful, and in the way of the great movements of humanity, nothing so great, nations went by, but simply repudiating the habits and treasuring the beliefs of their fathers, Hobab's Arab tribe had no prospect, no future Compared with that poor outlook how good it would be to share the noble task of establishing on the land of Canaan a nation devoted to truth and righteousness, in league with the living God, destined to extend His kingdom, and make His Name to become of blessing to all."—Robert A. Watson.

One yes truthfully say to others that if they come with you, you will do them good? Are you happy yourself and true, so that your association with others will help to elevate and ennoble them?

Indications More Favorable

Better Tone Said To Pervade Business Circles

Although no definite improvement has yet appeared in the volume of Canadian trade, a better tone pervades business circles and greater activity is the general impression, says the summary of the Bank of Montreal.

Fall average crops are assured, says the report. Wheat crops in the prairie provinces will run 108,000,000 bushels more than last year and her harvesting is going to help the farmers and all branches of business. Except for hay, crops in other provinces are excellent. Livestock prices are low but marketings are large and the dairy industry maintains a normal output with recent advances in the price of cheese and butter.

Most manufactures continue slight but shipping is better than last summer; more pulp has passed through Montreal; more British coal is being imported and a stronger autumn business is expected.

The report points to the general hardening of commodity prices as an encouraging sign. Export trade for July was better than in any month since December. Imports were down, increasing Canada's favorable trade balance.

More confident feeling with a rise in commodity prices is reported for both the United Kingdom and the United States.

Ontario Relief Organization

Public Welfare Board For Each Municipality To Handle Direct Relief

Organization of a public welfare board for each municipality to administer direct relief is recommended in the report of the advisory committee on direct relief to the Ontario Government, and announced by Hon. Dr. J. D. Monteith, Minister of Public Works and Labor. Where possible, it is also suggested that an inclusive body or league of organizations interested in public welfare should be organized to act in an advisory capacity and arrange for the conduct of campaigns in connection with the raising of funds, etc.

Increase Shown In Canada-Empire Trade

Statistical Review Issued By Department Of Trade and Commerce

Canada is showing more ample consumers in her purchases.

A statistical review issued by the Department of Trade and Commerce, showed that nearly 50 per cent. of the Dominion's imports in July came from empire countries as compared with only 43 in the corresponding month last year.

The percentage of foreign imports dropped from 73.7 per cent. in July to approximately 70 per cent.

Compared with the preceding July, Canadian imports last month from foreign countries registered a drop of $10,621,245, while those from empire countries decreased by only $2,000,000.

In July Canada wrested from the Netherlands second place amongst countries in the world in regard to the cheese market of the United Kingdom. British trade figures, the Dominion Bureau of Statistics reports, show that the leading importations were: New Zealand, 16,603,200 pounds; Canada, 13,286,896 pounds; and the Netherlands, 12,000,000 pounds.

There was a sharp advance in the importation of Canadian canned salmon by the United Kingdom in July. British trade figures give the amount as 1,736,928 pounds as compared with 468,872 pounds a year ago. The United States supply last month was 685,504.

Iceland has 1,606 automobiles.

BRITISH PARLIAMENTARIANS

Hon. Sir Phillip Cunliffe-Lister, and his private secretary, Captain T. L. Dugdale.

Distinguished Visitors Enliven Administration Circles In Ottawa

By the achievement of the Imperial Conference we have shown how a great group of nations can organize for trade purposes along right lines, is the opinion of the Right Honorable Sir Philip Cunliffe-Lister, P.C., M.C., M.P., Secretary of State for the Colonies, expressed during a brief stop in Winnipeg on a tour over Canadian Pacific Railway lines to the west coast.

Sir Philip was accompanied by a group of keen British parliamentarians eager to see western Canada in the harvest season. Among them were his own private secretary, Captain T. L. Dugdale, M.P. for Richmond and Yorkshire, one of the largest agricultural constituencies in England; J. F. L. Thomas, M.P., private secretary to the Secretary of State for Dominion affairs; Geoffrey Lloyd, M.P., private secretary to the Lord President of the Council, and Viscount Stansfordshire, private secretary to the Right Honorable Stanley Baldwin.

"The Right" and the Right, genial Philip," as he is known to his friends, is a Bible class worth keeping tucked back somewhere in your mind. Remember that it is always a good plan to remove the spots from the rash in the rear or out of the feeder well before jacking up the car to take off the flat Otherwise, in getting the spare loose the car may be shaken enough to cause it to slip off the jack

Hon. Simon Fraser Tolmie, premier of British Columbia, has been appointed minister of agriculture in the Dominion Government, succeeding the late Hon. Robert Weir.

Secure Animal Pictures

American Nature Association Party Met With Success In Rockies

After four weeks on the trail along the northern boundary of Jasper National Park and the adjacent mountains of British Columbia, the American Nature Association party returned to Jasper Park Lodge with several thousand feet of big game motion picture films.

Under the leadership of Arthur N. Pack, Princeton, N.J., president of the association, the party included Lawrence S. Rockefeller, Tarrytown, N.Y., son of John D. Rockefeller, Jr.; Mrs. Pack, Mr. and Mrs. Robert W. Johnston and Mr. and Mrs W. B. Bryan, Jr., all of Princeton.

Some novel stalking won a number of fine shots for the camera crew. Wearing white costumes with hoods, Mr. and Mrs. Pack aroused sufficient interest amongst the ordinarily suspicious goats to approach within a few feet of them on one occasion. In the Tonquin Valley the party discovered a herd of more than 100 caribou and acquired some fine close-ups. Later, in the Smoke Indeon River country, they ran across practically every kind of game in the Canadian Rockies.

"I got one fine billy," said Mr. Pack, "by dropping on hands and knees and imitating him when he lowered his head and stamped his foot to show anger. We exchanged hoots and compliments until I had crawled to within ten feet of him. Then he took to his heels and it all made a fine picture."

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

MANY PEOPLE AFFLICTED SOMEHOW HURRY

With so much inventive thought being given to eliminating unnecessary housework, it is only natural that a worthwhile substitute for the musty dust cloth should be sought.

Now it has been found! Appleford Wonder Paper which actually does—as it shows—as it pictured is receiving a hearty welcome from Canadian women who detest dust cloths and all they stand for. Wonder Paper is made from clean rags and soft paper pulp, thoroughly impregnated with a high-grade furniture polish, and absorbs dirt instead of spreading it.

Appleford Wonder Paper comes in handy-size packages, twenty-five sheets, each as large as a duster. You merely crumple a sheet into a soft wad, and go over the furniture requiring attention.

You'll be amazed at the quick and lasting finish Wonder Paper gives. When one side is worn and soiled, simply turn the Wonder Paper inside out. After the furniture or woodwork has been gone over, you can still use your Wonder Paper on the floors.

And when you're through—throw it away. No duster to shake out or wash. No bother at all. The most obnoxious part of housework done in half the time and with half the effort. Doesn't the idea appeal to you?

Special Offer

Wonder Paper is made by the makers of the famous FARA-SANI heavy waxed paper in the Green Box. Most grocery, hardware and department stores sell Appleford Wonder Paper, If yours doesn't, just send the coupon and we'll give you a new and unique booklet entitled "Leftovers," containing one hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd.,
Montreal
Enclosed find 25c for which please send me one full-size package of WONDER PAPER and your 100 recipes for "Left-overs."

Bad Constipation And Sick Headaches Ended By Vegetable Pills

Formerly a wreck from Constipation, Sick Headaches and Indigestion, Mr. V. H. writes: "It was a red-letter day for me when a friend recommended Carter's Little Liver Pills. Results have been marvellous. Since then they are PURELY VEGETABLE, a gentle, effective pill—both liver and bowels. Dr. Carter's Little Liver Pills are without equal for correcting Acidity, Biliousness, Poor Complexion and Indigestion. No. 2 Size, red pkgs. Ask for Carter's by NAME.

St. John's College Will Remain Open

Bishop Gets Have Been Voluntarily Accepted By Staff

Winnipeg, Man.—An endowment funds of St. John's College and school, designed almost entirely for the teaching work of the Church, nearly wiped out, but the historic college and school, the first institution of its kind established west of the Red River, will remain open, it was announced recently, according to announcement of the college council.

Continuing the work of St. John's College and school has been made possible by voluntary acceptance by the teaching staffs of stringent salary cuts, the council stated, and the hope was expressed that Church of England people in Winnipeg would give full support to this undertaking by sending their young people to the institution.

The bursar's fund and scholarship funds, it was pointed out, were used to help needy and worthy students to get their education at college, and these will be kept out of college this year through impairment of college assets.

Economy Move

Abolition Of Eleven High Positions In C.N.R. Announced

Montreal, Que.—Abolition of 11 high positions in the traffic department of the Canadian National Railways is announced here. The abolition of positions and economies thus brought about are effective September 1.

These changes and economies include reorganization of duties and the retirement of former officers of the traffic department whose combined service to the Canadian National system and its component parts totals 117 years.

The positions abolished include: Assistant freight traffic manager, Winnipeg. J. M. Horn, hitherto assistant freight traffic manager, Winnipeg, is now appointed general freight agent, Winnipeg, with S. W. Haisly as assistant general freight agent, and F G. Adams as chief of traffic bureau.

Flyer Sets New Record

Floyd Bennett Field, N.Y.—A new speed record for United States transcontinental flying was set when Capt. James G. Haislip, winning the cross country derby in Cleveland, flashed on to New York in an elapsed time of 10 hours, 19 minutes from Los Angeles. Right on his tail was Captain Roscoe Turner.

Tariff Out of Politics

Dominion Government And Ottawa Conference Are Guilty Of Blunder

Tariff out of politics and put it into business, making it an entirely business proposition. The tariff has to be adjusted to what the producers need and no more Recognition of that fact by all the agreements that were reached at the conference. Everything was approached from the point of view of getting the equilibrium between supply and demand, so that all would get the fairest prices."

Sir Phillip felt that British manufacturers would devote more attention to developing the Canadian market as a result of the concessions made by the Dominion Government and that the situation and the market possibilities were already being studied. He had every confidence in the ultimate results.

The Secretary of State for the Colonies and his party spent a week-end in Banff as guests at Banff Springs Hotel and the surrounding resorts, through which they motored. Proceeding to the Pacific Coast are Phillip addressed several meetings under Canadian Club auspices and also spoke at Winnipeg on his return trip at a reception and luncheon at the Royal Alexandra Hotel.

EXPLORE WAYS AND MEANS TO AID THE FARMER

Toronto, Ont.—Hon. Robert Weir, told the national conference of agricultural officials here that the United Kingdom had decided at Ottawa to protect her own farmers against competition in the poultry and dairy products from European countries, and to give the Dominions and Colonies an advantage.

At present said the Federal Minister of Agriculture, Empire countries supply only 30 per cent of the eggs consumed in the United Kingdom and less than 20 per cent of dressed poultry

The present "spread" between what the consumer pays and the milk producer gets can be reduced, declared Dr. J. S. Brock, commissioner of agricultural economics, Ottawa. In his opinion a 35 or 40 per cent spread was too much. At present, he added, "that work of the distributive agencies does which almost 75 cents out of of the consumer's dollar is a fund in setting such distribution.

Elaborating judging will probably be added to the competitions. Preliminary campaigns has interested as many boys in advertising their products that Mr Buckle felt the show had already justified itself

Elaborate arrangements have been made to provide special excursions to Regina, including Canadian parliamentaries and delegations of Australian and United Kingdom farmers.

World's Grain Show

Twenty-Eight Nations Are Expected To Take Part

Toronto, Ont. Twenty-eight nations are expected to take part in the world's grain show at Regina in 1933 Hon W C Buckle, Saskatchewan Minister of Agriculture told the national conference of agriculture officials here.

"The crop in western Canada this year is the second largest we ever grew," declared Mr Buckle With anything like a fair price I am confident the support to this show will assure its complete success."

Mr Buckle pointed out that Canada would have a chance to meet all the prices offered except those for rice The show has been financed on a contributory basis by the Federal Government the Saskatchewan Government and the city of Regina. Already $200 000 has been spent on a building to house the show and a prize list of $103,700 has been prepared Other provinces will be asked to make some contribution towards the expenses. The whole country is asked to benefit from a show of world-wide importance, which was the largest of its kind in the world before Kreuger's suicide bared its strands.

Ejnar Fryit, Stockholm industrialist, who has been selected by creditor concerns to be president of the International Reconstruction of the Swedish Match Company, of which the late Ivar Kreuger was head. He will attempt to settle up the affairs of the concern which was the largest of its kind in the world before Kreuger's suicide bared its strands.

Prefers Northern Port

Steamship Captain Says Churchill Finder Port To Montreal

Churchill, Man.—"I have hundreds of friends and associates in Montreal, but in fairness I must tell you that I much prefer to sail into Churchill than into Montreal You can sail in here without fear or worry and that's more than you can say for Montreal. We had a wonderful passage. We are glad to get the business."

This was the statement of Capt. O Blackbeck, commander of the S.S. Silkworth, Newcastle, who arrived here to load wheat for the United Kingdom.

Canadian Author Drowned

Raymond Knister Widely Known As Successful Writer

Windsor, Ont.—Raymond Knister, 32, of Toronto, was drowned near Stoney Point in Lake St. Clair. Knister was swimming and it is believed suffered a heart attack. He was a son of the late Robert Knister and widely known as a writer.

He wrote two novels, "White Narcissus" and "The Star Triumphant," a novelized life of Shelley which won the $2,000 prize offered by an Ottawa publishing firm in 1923.

Economy Board Cuts Down Expenses

Commission Reduces Staff And Salaries By Ten Per Cent

Ottawa.—Reduction of staff and salaries by 10 per cent, effective September 1, has been announced by the Economy Board, which was appointed by the Government to investigate the expenditures of the Civil Service.

The reductions will affect all employees receiving $1,200 a year or more, and will be applied to the salaries of the Governor-General, Ministers of the Crown, members of the Senate and House of Commons, judges and officials of the Supreme Court.

Market For Wheat

Revival Of Bumbleye's Wheat Sales To France Is Reported

Paris, France—Fifty thousand bushels of Manitoba wheat imported into France during the past week will be milled and re-exported to the French colonies, thereby evading the maximum tariff applied to Canadian wheat since the expiration of the Franco-Canadian commercial accord

Normally, this wheat would cost the importers $2 a bushel in customs duty in addition to the depreciated currency tax of 11 per cent However, because French millers guarantee its re exportation to the colonies, they pay only the Winnipeg market price

It is stated that additional similar orders are being placed for Canadian wheat, which means a revival of the Dominion's wheat sales to France at a time when the French maximum tariff seemed to have killed the grain trade to this country.

The French colonies import millions of quintals of flour annually, and in this connection it is forseen that Canada may secure a rich market on account of the superiority of the Manitoba wheat over the Plata native which the colonies have previously imported.

Review Of Empire Naval Defence Urged

Australian Premier Is In New Opposition

New York.—A despatch to the New York Times from Melbourne, Australia, says "Sir George Pearce, Commonwealth Minister of Defence, commenting on the suggestion that former Premier Stanley Bruce, while in London, England, would discuss naval defence with the British authorities, said the time was opportune for a review of empire naval defence.

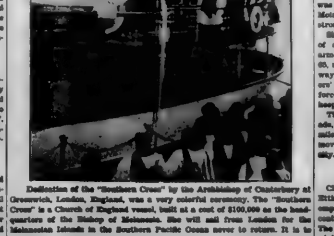
"He declared the Ottawa conference had laid down a basis for empire trade which must be carried by seaborne traffic, therefore the question of empire naval defence called for a new consideration.

The present defences, Sir George said, could not by any stretch of the imagination be said to be satisfactory for such a widely scattered empire.

Clever Surgical Feat

Vienna.—Rudolf Dateimaier, 11-year-old boy whose heart was pierced by three bird shots in a hunting accident was reported recovering after a remarkable surgical feat by Dr. Gustav Fabeyerich of the University of Vienna. The surgeon sewed up the wounds in the still beating heart and later removed the shot from the wounded lad's other organ.

A SHIP THAT WILL NEVER RETURN



Dedication of the "Southern Cross" by the Archbishop of Canterbury at Greenwich, London, England, was a very colorful ceremony. The "Southern Cross" is a Church of England vessel, built at a cost of $100,000 as the headquarters of the Bishop of Melanesia. She will sail from London for the Melanesian Islands in the Southern Pacific Ocean never to return. It is to work among the sick and suffering in the islands. Above is a general view of the ceremony in the stern of the boat.

EMPIRE TRADE HAS RECEIVED A NEW IMPETUS

Fort William, Ont.—Had it failed, the Imperial Economic Conference would have assumed the proportions of a catastrophe Instead, its successful consummation marks a tremendous step forward toward increased trade and prosperity with a the British Empire, for it has laid the foundations of a commercial structure upon which the nations now have the opportunity as they never had before to build an enduring monument to progress and prosperity.

Addressing nearly 1,000 of his constituents here on the probable results of the economic parley, Hon. Dr. R. Manion Minister of Railways and Canals, and Ralson officer of the conference, summed up the agreements made by the representatives of the British nations at the historical deliberations at the Canadian capital.

Expressing complete confidence in the ultimate advantages to increased Empire trade as represented in the Ottawa agreements, the minister commented against expectation of immediate results The trade trend upward will be gradual, he said, but sure like and endless.

Partly as the result of the conference and partly the result of an apparent improvement in economic conditions in Canada, optimism is increased again in this country for the first time in three years This changed psychology is a most encouraging and hopeful sign he said, indicating that Canada may not have long to wait for a pronounced movement along all lines toward prosperity.

Conference Starts Work

Agricultural Experts Get Down To Business At Toronto

Toronto, Ont.—Devoting into committees for intensive work, Canada's first conference of agricultural experts, federal, provincial and agricultural, summoned by Hon. Robert Weir, Minister of Agriculture, grappled with the farmer's greatest problem—how to make farming pay when prices are low.

A national advisory council to continue the work of co-ordination was advocated by Mr. Weir at the opening session, and possibly provincial councils to deal with problems of purely provincial importance. Agricultural organizations, he contended, should join forces rather than work separately on the same problems.

S. E. Todd, secretary of the Industrial Council of the Canadian Meat Packers' Association, announced that henceforth packing houses will permit government inspectors to inspect hog carcasses on the rail in the abattoirs. This course, he said, is expected to help Canada in the United Kingdom market against competition from Denmark, where bacon producers have for some time enjoyed the advantage of government inspection in the killing plant.

Plan Has Collapsed

Iowa Farmers Allow Produce To Remain Here Rotting

Des Moines, Iowa. Farm produce was brought unheeded into De Moines with the collapse of the la strong farmers' holiday pchet Line.

Sheriff Charles F. Bowling, a force of deputies, and truck drivers, ar armed with clubs, massed on highway 69, north of the city, and forced their way through members of the Farmers' Holiday Association, who seek to force higher agricultural prices by keeping product from the markets.

The "big push" against the blockade, after starting at a point five miles from Ames, resulted in the free movement of produce into the capital city.

Doughnuts Get Bronze

Chicago.—The brokerage firm of Stifinger and Brand announced that employees would be paid a 10 per cent. bonus for the month of August. The plaid' earned it, officials announced, because business was so good they had to work overtime.

A Model Mining Camp

Only Well Equipped Mine Yet Into Rabbit Hill

While the rush to Cwmyoor's May gold strike continues unabated there are probably between 75 and 100 men on the ground now - Cameron Bay and the area immediately surrounding it does not lack excitement. Despite records made on the floating population of the main settlement by the gold fever, the number of permanent residents continues to soar and every day sees the community rushing itself deeper on the wooded foreland that three months ago was entirely undeveloped.

Uniformed law and order has come to the shape of a Royal Canadian Mounted Police detachment, the officers arriving when the Squad 11 made her second trip across from Port Franklin. Rabbit Hill, unlike most mining camps, has failed to produce any "real men" to date, this no doubt being due to the fact that it is accessible only to well-equipped men with stout hearts in th. There's in a real place in the life of the field for the pallet, however. Hunter's satisfaction is only one item in the complex duties of the Royal Mounted.

Cameron Bay's first white woman landed July 27 in the person of Mrs. J Gerhard. Wearing a coat of tan such as no bathing beauty could produce and dressed in masculine attire, she reeled a journey of 2,000 miles in which her husband and two other men from Berwyn, Alberta, brought a couple of power-driven canoes from the waters of the Peace to Rabbit Bay. With two months of river, lake and rapid behind her, she emerged in the conventional garb of civilization. But the all-male world known for many long months has collapsed. So far no incidents have been heard.

J. J Byrne, head of the Great Bear Lake mines, was a recent arrival by aeroplane and, donning the regulation fall clothing and high boots of the area, he has plunged into the activities of the field with the zest that marks one from Cowper to Hunter Bays. Mr Byrne reported that when he was at Fort Resolution traffic was still headed toward the Mackenzie, the Bear and the lake. Obviously there is to be no pottering out of the first surge of boats which has already descended on Great Bear, but the rush to the field will continue throughout the period of open water.

Many of the early arrivals and the majority of the late ones intend remaining over the winter and have brought well-stocked outfits to make this possible. In most cases, however, cabins building is being left until a later date. The main idea at the moment is to get to Cwmyoor like while there is still open ground.

Find Free Gold

Important Discovery Reported In Great Bear Lake Mineral Field

" Free gold, the first ever found in the field, was picked up on the Ore Group, staked in the spring of 1931, by Charles Sloan, veteran prospector, according to word received from Cameron Bay in the Great Bear Lake mineral field.

This group adjoins the Bidorado group and Labine Point; and work in proceeding feverishly to tap the discovery and ascertain its extent. The find is quite coarse and appears in particles about the size of wheat grains in the quartz.

There are only about 40,000 Eskimos in the entire Arctic region.

Cho: "All is over, I have nothing to say to you."

He: Well, make it brief."—Boston Herald.

UNIQUE SERVICE COMMEMORATES EIGHT HUNDREDTH ANNIVERSARY OF ABBEY

A special service was held in the wonderful ruins of Fountains Abbey, Yorkshire, England, to commemorate the eight hundredth anniversary of the founding of the famous monastery. Hundreds flocked to the beautiful silver-grey ruins of the famous Cistercian Abbey, to take part in the reefless mass, including the Duke and Duchess of York. The picture on the left shows the arrival of the popular Duke and Duchess, while the photo on the right gives a general view of the service inside the Abbey.

Russell Hard To Beat

New Jersey Man Has Been Consecutive Daily Golfer For 20 Years

Addison H. Day, who will be 63 years old in November, has begun his thirty-fourth year as a regular commuter between Chilchester, New Jersey and New York. When he stopped aboard the train the other morning at his home to go to his desk in the office of the Marine Midland Trust Company, at 120 Broadway, where he is an official, he started on his thirty-ninth consecutive trip around the world, figuratively speaking. Officials of the Lackawanna railroad have estimated that in sixty-three years Mr. Day who has earned the title of champion commuter of the nation, has covered a distance equal to journeys to and from work, equivalent to thirty-eight times the circumference of the earth.

Oddest Of Odd Jobs

Current Flapper Assists In Young Musical Acts Here

The odd jobs around factories where automobiles and automotive parts are made are among the oddest of all human undertakings. For instance, there is the job of the corner player one of the plants maintains a very special and expensive motor car here. When a finished item comes from the production bench, the corner player tests an arrangement of four notes. An assistant with a musical ear then lifts the horn. If they decide it is pitched correctly, it is sent on to the market place. If not, it goes back for further tuning.

Strike At Price Cutting

Canadian Retail Druggists May Ask Aid Of Parliament

Canadian retail druggists may ask the Dominion Parliament to amend the Combines Act so as to permit retail distributors to fix reasonable prices upon trade marked goods. Dr. R. S. Stanbury, secretary of the Canadian Pharmaceutical Association, stated in Toronto.

His statement followed discussion at sessions of the Canadian Association and the Ontario Retail Druggists Association where delegates deliberated upon possible legal ways of fixing prices so as to strike at price cutting.

Banned By Experts

Two experts, each with a costly outfit, fished for a whole morning without catching anything. They were about to pack up when a little girl threw out a line and pulled up a two-pounder—a beauty.

"What kind of a fish is that, my child?" asked a passer-by.

"Three gentlemen," she replied, "call it a 'combine'."

The Zoo needs to be more sharply drawn between careful and reckless dying on the part of sorrowful pleas, is the conclusion of a university professor, who has made flight tests to study eulogy.

The Oath Of Allegiance

Has Been Cause Of Trouble With Irish Free State

The fuss in Ireland over the oath of allegiance is not the first time the oath has caused trouble in Great Britain and Ireland. Both Sir David Cameron and Baron Lucas de Tottle-ditch objected to the oath containing the phrase: "True faith of heart I declare." In 1909 these words were deleted for all members of non-Christian religions.

Later, Charles Bradlaugh, atheistic lecturer and writer, who was strongly republican in sentiment, objected to taking any oath at all. He had to be ejected from the House of Commons.

Then it became optional with the oath taker to affirm or swear, omitting or an oath of allegiance. Occasionally some member balks at the oath and affirms his allegiance. Indeed, however, most of the members are sworn in by the old-time oath.

Never since 1066, British history has been replete with such objections. There have been constant ripples on the waters of government. Each one plays its part in the program of democracy. The good points of the objections are made part of the constitution, and the bad are just discarded.

Advertising Does Pay

A young actress one day lost a string of pearls, and she advertised the fact in a weekly journal. Afterwards, when asked if she had recovered the lost property, she answered succinctly. "Yes! And isn't advertising wonderful? The pearls I lost were only imitation, but those that have been returned to me are the real thing!"

Inspect Canned Salmon

All Importations In Future Must Pass Rigid Inspection

All canned salmon imported into Canada in future must undergo an inspection similar to that now required in the case of salmon packed in British Columbia, and no import shipment may be released until it has been so inspected. This is the purport of an order-in-council passed at Ottawa. As all importations of canned salmon come from the Pacific side, the order-in-council also provides that all shipments "imported for sale in Canada shall enter through a British Columbia port only."

The importation of imported salmon will be carried out by the permanent board of inspection in British Columbia.

Receive Legacies

Lord Inchcape Leaves Bequests To Officers Of Steamship Line

Legacies totalling more than £40,000 were bequeathed by Lord Inchcape to about 600 officers of the Peninsular and Oriental and British India Steam Navigation Lines, it was learned in London, England.

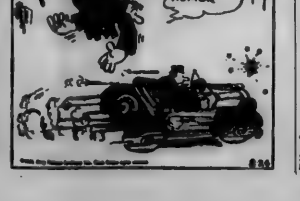
Lord Inchcape, noted British financier and shipping magnate, died last May, and his will described the gifts to the officers as a "slight acknowledgement of their loyalty and fidelity" to him.

Two hundred and two captains will receive £100 each, while 300 chief officers and the same number of chief engineers will receive £50 each.

Black: "What did her father advise when you told him you loved his daughter, but only had a hundred dollars saved up?"

White—"He advised me to invest it all in a one-way railway ticket with no stopovers!"

◆ FANCIFUL FABLES ◆



"What would you do if I became deaf and dumb?"

"I should put out the light when you started arguing with me."—Karlskrona, Oslo.

A Priceless Possession

Flower Fancier Thrives If Tells Flower Bed Its Troubles

Valued at $25,000,000 and made in India is the thirteenth century for the flower fanciers the exquisite Persian Throne, writes Penelope Beasley in the Illustrated Weekly of India, was taken from Delhi to Delhi to Lahore by Nadir Shah, and when in Persia last year I was lucky enough to be able to see this magnificent piece of workmanship.

As we arrived at the Palace gates, the sentries saluted and the soldiers approached to conduct us through the Royal precincts. We crossed the first courtyard, where fountains played in a long marble basin, and went through an archway into the inner garden. Tiled paths arched bridges [illegible] the artificial lakes and limpid streams, and tall poplars were reflected in the clear cool water.

Two more soldiers and a high official of the court met us at the entrance to the Throne Hall. The walls of which are covered by colored tiles of various designs. To the right two turn square towers denoted the "Harems" or women's quarters.

We entered the Shah's residence by a triple doorway, supported by four pairs of marble columns, mounted a [illegible] staircase and were conducted up through a succession of magnificently carpeted rooms till at last we reached the Throne Room. In the presence of the Shah's officials and soldiers the seat of the back was broken, and a moment later the door was thrown open. At the far end of the long gallery stood the priceless "Takhte Tavous" or Peacock Throne.

The throne itself is about six feet high at the back with arms and a platform for the feet, covered with a plating of pure gold, chiselled and enamelled with embossed and open-work designs. The gold is encrusted with precious stones of every color, as varied as the hues in a peacock's tail, diamonds, emeralds, turquoises, rubies some nearly an inch across. Until recently they had been a fringe of enormous emeralds hanging from each arm of the throne, but these - owing to their immense value—have been removed and locked up separately.

Besides the throne there is a couch of similar workmanship, about eight feet by five, and standing some three feet from the ground. Each of its six legs is carved to represent a peacock's breast, and there is a pair of steps for His Majesty to ascend. On this the Shahs used to recline when holding their audiences, but now the present Shah uses the "Throne Saloon," a white marble throne, beautiful too—though not to be compared with its counterpart. At the back of the couch is a scintillating circular star of large diamonds, about a foot across, which a mechanical contrivance behind it revolves on state occasions.

The Treasure Room is lined with mirrors which reflect each other over and over again. In cases along the walls were Sevres and Chinese porcelain, daggers with carved and jewelled handles, gold cups and plate, mosaic pictures, a terrestrial globe in precious stones and treasures of every description from every region of the world.

Once more the door is locked and sealed, the officials bow to each other, the soldiers salute, the keys carried away; we descend by another staircase, and our visit to the Shah's dwelling is over.

All Her Children Were Troubled With Diarrhoea

Mr. J. J. Bickel, B.S. 1, Enderby, B.C., writes:—"Last Summer all my children were troubled with diarrhoea, and were so bad I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry, so I got a bottle, and after a couple of doses you should have seen the change. The children were soon well again, and I can very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."

THREW AWAY HIS STICK

When Sciatica Yielded to Kruschen

There can be no doubt that this man has for shed walking with a stick, for it is now four years since he discarded it.

He writes:—"For 16 months I suffered with chronic sciatica and rheumatism, and was unable to walk without the aid of a stick. But after taking Kruschen Salts for a short time, I was able to throw away the stick. It is now four years since this happened, and I have had no return of the complaint, and have not lost a day from work. I shall never be without Kruschen Salts, as they are worth their weight in gold. You can use the letter as you please, as I can honestly recommend Kruschen Salts to any sufferer."—C. F.

If the eliminating organs become sluggish, they permit harmful uric acid to accumulate and deposit itself in the tissues, muscles and joints in the form of needle-pointed crystals, which, piercing the nerve sheaths, cause excruciating pains of sciatica. The six salts in Kruschen stimulate the eliminating organs to healthy, regular action. Mischievous uric acid is then given no chance to collect.

THE HOUSE OF DREAMS-COME-TRUE

"The Splendid Folly," "The Shrewd Of Fer Ends," etc.

Hodder & Stoughton Ltd., London.

CHAPTER XXII.—Continued

She made no pretence at mourning the man who had turned her life into a living hell for nearly three years and who had aimed his dagger to wrist her and the happiness which might have been hers had she been free. But the conventions, as well as her own feelings, dictated that a decent interval must elapse before she and Nick could be married, and this would be for her a quiet period dedicated to the readjustment of her whole attitude towards life.

The length of that period was the subject of considerable discussion. Nick protested that six months was simply long enough to wait—too long, indeed!—but Claire herself seemed disposed to prolong her widowhood into a year.

"It isn't in the least because I feel I owe it to Adrian," she said in answer to Nick's protest. "I don't consider that I owe him anything at all. But I feel so battered, Nick, so utterly tired and weary after the perpetual struggle of the last three years that I don't want to plunge suddenly into the new duties of a new life—not even into new happiness. It's difficult to make you understand, but I feel just like a spent fish, newly scooped up all it can and simply can't absorb any more of anything. You must let me have time for the past to evaporate a bit."

But it required the addition of a few commonsense observations on the part of Lady Anne to drive the nail home.

"Claire is quite right, Nick," she told him. "She is temporarily worn out—mentally, physically and spiritually spent. Her nerves have been kept at their utmost stretch off and on for years, and now that release has come they've collapsed like a fiddle-string when the peg that holds it taut is loosened. You must give her time to recover, to buy herself up to normal pitch again. At present she isn't fit to face even the demands that her happiness brings in its train."

So Nick had perforce to bow to Claire's decision and it was settled that the first month or two, at least, of her widowhood Jean should remain herself and her belongings from Staple and bear her company at Charnwood. And meanwhile Nick and Claire would spend many peaceful hours together of quiet happiness and companionship, while Claire, as she herself expressed it, "rebuilt her soul."

To Jean the issue of events had brought her nothing but pure joy Her belief had been justified, and the grim gateway of death had become for them two friends of here the gateway of happiness.

She had neither seen nor heard anything of Burke since the day she had fled from him on the Moor, although indirectly she had discovered that he had quitted the bungalow the day following that of her flight from it and had gone to London.

Judith sent her a brief, rather formal letter of congratulation upon her engagement, but in it she made no reference to him nor did she endeavour to explain away or palliate her own share in his schemes to force Jean's hand. Probably an odd kind of loyalty to her brother prevented her from clearing herself in his exposal, added to a certain dogged pride which refused to let her extenuate any action of hers to the daughter of Glyn Peterson.

But none of these things had any power to hurt Jean now. In her newborn happiness she felt that she could find it in her heart to forgive anybody anything! She was even conscious of a certain tentative understanding and indulgence for Burke himself He had only used the "primitive man" methods his temperament dictated in his effort to win the woman he wanted for his wife. And he had failed. Just now, Jean could not help sympathising with anybody who had failed to find the happiness that was hers.

She reflected that the old Gypsy on the Moor had been wonderfully correct in her prophecy concerning Nick and Claire. The sun was "shining" between them at last, and he had assured them that it would.

And, with the same, came a sudden clutch of fear at Jean's heart, like the touch of a sinister hand. The gipsy had had other words for her—harsher, less sweet-sounding.

"For you darkness reside' . . . . black darkness."

She shivered a little. She felt as though a breath of cold air had passed over her, recalling the words that ran so joyously in her veins.

CHAPTER XXXI.

An Unwelcome Visitor

Blaise was seated at his study table regarding somewhat dubiously a letter which lay open in front of him. It was addressed to Madame de Varigny, foreign hand and expressed with a quaintly stilted, un-English turn of phrase. The writer was a foreign manager upon which it was inscribed was that of a hotel in Exeter.

"Dear Mr. Tarmaric," it ran. "You will, without doubt, be surprised to receive a letter from me, since we have met only once. But I have something of the greatest importance to divide in you, and I therefore beg that you will accord me an interview. When I add to this that the matter is of especial very closely the future of your fiancee, Miss Peterson, I do not doubt to myself that you will appoint me this time I may call to see you."

The letter was signed M. de Varigny."

Blaise had received the thoughtprovoking epistle two days previously, and had been impressed by an unconfortable conviction that it foreshadowed something unpleasant. He could not imagine in what manner the affairs of Madame de Varigny impinged upon his own, or rather, as she seemed to imply, upon those of his future wife, and this very uncertainty had impelled him to fix the interview the Countess had demanded at as early a moment as possible. Disagreeables were best met and faced without delay. So now he was momentarily awaiting her arrival, still unable to rid himself of the impression that something of an unpleasant nature impended.

He glanced through the open window at the garden. Afterwards, he was always able to recall every little detail of the picture upon which his eyes rested; it was etched upon his mind as ineffaceably as though cut upon steel with a graver's tool.

Although the sunlight of September flooded the lawns and terraces, that indescribable change which heralds autumnal had already begun to manifest itself. Not that any hint of chill as yet edged the balmy atmosphere or tint of russet reddened the gaudy waving foliage of the trees. It was something less definite—a suggestion of maturity, of completed ripening, conveyed by the deep, rich green of the grass, the strong, woody growth of the trees, the full-blown glory of the roses nodding on their stems.

To the left, in the shade of a stately cedar, Lady Anne and Jean were encamped with their sewing and writing materials to hand, and the rays of sunshine, filtering between the widespread branches above them, woke fugitive gold and silver lights in the dark-brown auburn and golden crowned heads. Further away, in the valley below, the brown smudge of a wide-bottomed boat broke the smooth expanse of the lake whereon the mingled laughter of Nick and Claire came floating up on the breeze.

It was a peaceful scene, full of fortunate happiness and tender promises, and Blaise watched it with contented eyes. The voice of Benton, formal and urbane, roused him from a pleasant reverie.

"Madame de Varigny," announced the functionary, flattening open the door and standing aside for the visitor to enter.

Blaise rose courteously to greet her, holding out his hand. But the Countess shook her head.

"No, I will not shake hands," she said abruptly. "When you know why I am come, you will not want to shake hands with me."

There was something not unattractive about the outspoken refusal to sail under false colours, more especially softened as it was, by the charm of the faintly foreign accent and intonation.

Madame de Varigny had passed a

Here and There

Popularity of Canadian sports pictures has notably increased, and last year again exports to Europe from the Canadian Canvas Board a new high record of 1,174,000 boxes, as compared with 500,000 boxes in 1930. Fruit growers are anticipating an even larger crop this year.

R. Y. Dashwood, formerly Travelling Passenger Agent, Canadian Pacific Railway, Winnipeg, was appointed District Passenger Agent, Alberta District, North Bay, Ont., effective August 16th. Mr. Dashwood has had a long and successful career with the Company, and is now receiving congratulations on his most recent promotion.

Numbers of anglers returning from the Ottawa and Montreal report having experienced exceedingly good fishing. This was the experience of a group from Cleveland, Ohio, who recently visited the bass fishing waters of the Gatineau River, north of Maniwaki, according to A. G. Seymour, General Tourist Agent, Canadian Pacific Railway.

This is evidently the peak year with partridge, one would judge from the reports coming in from various parts of the Laurentian and Gatineau districts of Quebec, according to A. G. Seymour, General Tourist Agent, Canadian Pacific Railway. In almost every bountiful partridge, to the ruffed grouse and Franklin grouse are best known, are also plentiful. Most flocks reached this year are nearly full grown.

New freight rates on live stock with low minimum weights to meet the competition of motor trucks in the transportation of animals to market have been put into effect by the Canadian Pacific and Canadian National Railways covering shipments from stations within a radius of 100 miles of Toronto, and from very extensive areas beyond 100 miles. The new rates are being tried out at an experiment, and it is expected they will result in a very substantial increase in the movement of cattle, sheep, and hogs.

One of the most interesting exhibits arriving at the Exhibition by the Canadian Pacific on Thursday is the famous locomotive No. 1 of the "Mike Haggard 127", the world's fastest steam-locomotive. The International comes with the Wood's boat at Detroit, Mayo Fun will take "Mike Haggard 127" to Toronto, where visitors at the Canadian National Exhibition will be able to see an attempt by the powerful vessel to break her own or any other new world's record. The big speed boat has been constructed in the Dashwood Shipyards at Detroit, and is owned by E. E. Gardner, who is known as "Mayo" to many of his friends.

Municipal District Holds Busy Council Meeting

The regular monthly meeting of the Council of the Municipal District of Clover Bar was held on Saturday last.

Mr. H. B. Peters was re-elected as Deputy Reeve for the ensuing six months.

The matter of the District erecting their prior rights for taxes on seizure made within the District was discussed at some length. It was finally decided to authorize the Secretary to interview the debtors in such cases and ascertain from them if they wished the Council to assert their prior claim for taxes.

It was decided to hold a tax sale on the 12th of December. The terms and conditions of the sale to be arranged later.

The Secretary advised that Mr. C. E. Morris was prepared to purchase the proposed consolidation portion of the sub-division of Ridgeway Park at a price of sixty dollars per acre cash, when the District obtained possession of the land by a consolidation order of the Board of Public Utility Commissioners.

At the request of the Weed Supervisor, Department of Agriculture, it was decided to instruct the Weed Inspectors to interview all threshermen to see that they had a license in accordance with the Noxious Weeds Act.

Mr. Keith made his report concerning his investigation of an appeal against the claim by an Inspector for damages sustained from an impounded animal. The Secretary was instructed to forward a copy of the report both claimant and appellant together with the amount awarded.

An annually large amount of outstandings in connection with hospital accounts was left over until the next meeting so that more definite information could be obtained.

With the passing of resolutions and accounts the meeting adjourned.

C.N.R. TRAFFIC CHIEF PRAISES WESTERN FARMER'S SPIRIT

The individual farmer of the Canadian west, due to his own industry and resourcefulness, is in a stronger position today than he was a year ago, according to R. L. Borsay, Montreal, vice-president of the C.N.R. in charge of the traffic, who has returned east from an extensive business trip through the west. This is because the farmer has succeeded in cutting down his production costs and is, therefore, doing business on a more sound economic basis, Mr. Borsay, convinced that the individual farmer has succeeded in improving his prospects through his own efforts, said this year's crop was more and is being harvested at less cost than any previous crop.

He declared, "I have great admiration, for the spirit that was shown by the western farmers in meeting the very difficult conditions that confronted them." They set to work to cut down their production costs and aided by the members of their families, they succeeded in doing so.

It is too early, of course, to predict any very noticeable improvement in general conditions; much will depend upon the price at which this year's crop is marketed. The farmers, however, are doing everything possible to meet the present conditions and have tackled their problem with a truly wonderful spirit.

The result, I think, is a feeling of encouragement in many sections of the west. I talked with machinery men who are predicting that next year there will be a renewal of demand for farm machines." Mr. Borsay travelled over the Hudson Bay line to Churchill. He expressed himself as much impressed with the facilities that have been established at Canada's new northern port.

Wren's Wife: "Ah, Mrs. Hiles, on behalf of the world is ignorant of how the other half lives."

Cottager: "Not in this village, ma'am."

YPRES VALLEY

Mr. and Mrs. Walter Armstrong and family of Westlock, were visitors at the home of Harold Armstrong on Sunday.

We are glad indeed to welcome Rev. and Mrs. Hodgins back amongst us once more, after their trip east.

Threshing is in full swing out here, though held up today on account of high winds.

Mr. Dave Gunn threshed a thirty acre field of wheat which went over 50 bushels to the acre.

Miss L. Lemke of Three Hills, is our new school marm out here.

Mr. and Mrs. Jos. Brandy are home from their trip to Banff.

Mr. and Mrs. Dave Gunn and family have returned home from their trip to Vancouver.

Mrs. Thomas of Edmonton is a visitor at the home of Mrs. W. H. Pearce.

The ladies aid will meet on Wednesday, September 21st., at the home of Mrs. Norman Latimer.

LOCAL NEWS

Rev. G. Heuer of Edmonton will take the service at the Josephburg Reformed Church on Sunday, Sept. 18th. Everybody is invited.

Rev. A. Wienbrandt of Josephburg will replace Mr. Heuer at the Morinville Church for this Sunday.

See The Record for your PERSONAL XMAS CARDS

Doctor Dodgee — Better Greetings Lower prices

Cards with your name and address printed on for $1.00 per doz. and up.

The two wheels that were taken from the school last week, were returned to their rightful owners on Thursday morning.

Rev. and Mrs. E. J. Hodgins, Evart and Lawrence returned last Thursday from an enjoyable six weeks motor trip to Ontario.

Quite a number of the young women folks motored along the Saskatchewan banks Tuesday evening. An unfortunate incident occurred when the coffee pot overturned upon Miss West's foot. The result was a bad scald which necessitated her absence from school for a number of days.

Miss W. Bullock is likely filling in her place during the absence.

Last Wednesday evening the teachers of the Lamont Inspectorate met in Lamont and formed an executive in view of preparations for the coming convention to be held in Edmonton Oct. 6 and 7. Mr. Kemsley was elected president of the association with Miss Cuthbert of Lamont as secretary. The executive was also elected, Miss Dixon representing the Fort. Arrangements have been made for an excellent program.

Miss M. Kolterbern has made arrangements to attend the winter sessions of the Edmonton Normal this year.

The Edmonton prospects are looking good again this year. Anticipating this, racquets and shuttles are being taken out of cold storage and renovated.

Taxes—Who Is Responsible For Them?

It is an old saying, and true, that there are at least two things which no person in the world can escape,—death and taxes. So far as the former is concerned it is inevitable; it may be postponed by rational living, by observance of the laws of nature and hygiene, by the exercise of "safety first" principles, but, in the end, it cannot be avoided.

Taxes, too, are inevitable if orderly government, a properly organized community life, and essential public services are to be maintained, but, and this is the important thing, the taxpayers have it within their own power to determine the time and extent of the last taxes paid each year.

Begin a discussion of the subject of taxation and the chances are that into out of every ten persons, yes, ninety-nine out of every one hundred, will at once lay the blame for their unduly high taxes at the doors of the various other Federal, Provincial, Municipal, or all three combined, Governments, of course, are partly responsible, but the taxpayers themselves are even more responsible, and it is high time Mr. and Mrs. Taxpayer realized this fact of their paramountcy.

In the first place, the taxpayers are responsible for creating the Governments. It is their vote which placed the Governments in power. It is by virtue of the votes of the taxpayers that Governments continue in office by which they exist, impose taxes, and spend the proceeds of these taxes, or, contra, are ejected from office. The taxpayers control enough this primary responsibility.

Secondly, Governments are constituted of groups of human beings, with all the failings of human beings. Placed in office they naturally desire to stay there, while opposing groups out of office just as naturally desire to get in. All these groups, therefore, angle for the support of a majority of the taxpayers, who are the final arbiters.

If one group promises an attractive programme of public works, involving large expenditures, much employment, and consequent free spending of public moneys, contrasted with a more modest but conservative and economical programme advocated by the opposing group, and the people endorse the former and reject the latter, then, again, it is the taxpayers who are responsible for the ensuing large borrowings on the public credit, the creation of a large public debt, and the resultant heavy taxes to pay the charges on that public debt. The group in office may be responsible for proposing an unwise policy, but the taxpayers themselves set the seal of their approval to that policy and issued instructions that effect be given to it.

In the third place, there has never been a government entrusted with the duties of administering the business of all the people which has not been connected with demands from the people that it do this or that, provide this service or refrain from that work, extend this assistance or withhold that assistance to this organization or that project. The cabinet of ministers, or municipal council as the case may be, may feel that the action urged upon them is unwise, but if the clamour is loud enough, and the demands of the taxpayers insistent long enough, they will, in representatives of the taxpayers and depending upon their support, yield to such demands. The result is more and heavier taxes. Governments must accept some responsibility for such expenditures, but the taxpayers themselves must bear the ultimate responsibility.

Governments, as their judgement ordained, have on times when it be the duty of Government to resolutely resist public clamour and refuse their demands, even when it means the defeat of the Government and the placing in office of that group which will carry out those demands, but how few major responsibility rests upon the taxpayers, the voters.

Then there self-same taxpayers make bitter complaint because their taxes are heavy. They discover they cannot pay the interest charges and principal upon the huge expenditures which they themselves instructed their Governments should make. When it is too late, because the money has been borrowed and cannot be met, they demand that loans be floated to meet the interest charges, and when the Government, entrusted with the preservation of the credit of the Dominion, a Province or a Municipality, declines to do this, because it cannot be done honestly, and if done dishonestly would result in the further increase of taxes to pay the interest charges, the taxpayers make the further mistake of listening to, and being guided by, other groups which promise to do what is being refused. In his difficulty Mr. and Mrs. Taxpayer is willing to jump out of the frying pan into the fire.

When the taxpayers make a mistake, either as individuals or collectively as a community, they must pay the penalty. If a child puts its hand in the fire it will suffer pain. There is no escape; it cannot undo its rash action. So, too, the taxpayers cannot tear up and repudiate the folly they have done at their Governments, noting for them and all too frequently upon their own urgings, and with the approval of the majority, have done for them. They must abide by the consequences.

What they can do, and should do, is set to work to remedy the mistakes made in the best way they can, and sternly resolve not to commit the same mistake again. A little more thought and judgement before placing their committees and debt in the interest method to reduce taxes and keep them down.

Where English Snow Likes

An enterprising housekeeper has just discovered that the postoffice department of England will let you send a letter addressed by means a "Snowman" or a "Snowhound," but it is against the rules to call him a "Softhead."

Royal Hindrapathon

There is currently a member of the Royal Family who does not carry a camera on holidays. From the King downwards all members of the family are fanatical interest in snapping, and not only in that, for they also like to develop their films. The Duke of York is the champion photographer of the Royal people, and is the proud possessor of a dark room in which he performs dazzling the Duchess and the two little Princesses.

Summer Wine Combine

A resident of old Fort Erie was telling how he had received a visit from Governing and Fort Abbie.

"I saw the fellow away out and heard him cry for help," he said. "I rowed out to him and found him floundering free downward. I turned him over to make sure it wasn't the current and then I towed him ashore."

Program Of Silk Industry

Do Not Encourage Inexperienced Persons Into Trade, Is Advised

Film Mentioned

The silk industry of Canada has so far evidently not been affected by any economic disturbance. In 1931 the value of production of this industry amounted to $16,187,692, an increase of $270,894 or 2.1 per cent. over 1930. There has been an increase in the Canadian silk industry from 1917 to 1931 of 500 per cent. in the production, of 1,340 per cent. in capital invested, and in the number of employees 631 per cent.

The silk industry of Canada is divided into two distinct branches, real silk and artificial silk. The industry is located entirely in the provinces of Quebec and Ontario, thirteen of the 15 establishments being in the former named province and ten in the latter. The principal items of production are broad silk or piece goods of real silk, of which 6,057,613 yards were made in 1931. From yards of artificial silk were measured 4,073,624 yards, real silk ribbons measured 2,889,266 yards and 4,585,200 yards of artificial silk, artificial silk, yarns and threads and their utilizers were produced.

Who To Shadow

Sleep Seems To Be Controlled By Amount of Sugar in the Blood

A new idea of what causes reality is—discovery that it seems to be controlled by the amount of sugar in the blood—was reported to the British Association for the Advancement of Science.

Thyroxin, the iodine-containing secretion of the thyroid gland, apparently is the sleep-controlling substance, said Dr. G. S. Carter. It does not bring on sleep immediately, like artificial sleep-producing drugs, however. Sleep seems to come when the supply of thyroxin in the blood is decreased, not increased.

The winter-long "sleep" or hibernation that is habitual for many animals is also controlled by the thyroxin, Dr. Carter said his experiments showed.

The thyroid glands are frogs, which have a different temperature and pulse rate in winter while hibernating than in summer when they are active. When thyroxin was added to the heart of the hibernating frog, its temperature and pulse increased to summer levels. Thyroxin was the vital gland secretion that had this effect.

A Shrunkhit Medicine.—They that are acquainted with the shrinking powers of Dr. J. D. Kellogg's Dysentery Cordial in the treatment of many ailments would not be without it in the house. It is truly a household remedy and as it is effective in dealing with many ailments, it can be kept in readiness for use. So, keep it at hand, as you will for it may come most unexpectedly.

Prince For Royal Ranch

Prince Of Wales Is Whence At C.P.R. Station In Vancouver

Royal Highness Likes the Prince of Wales, joined the ranks of the big winners at the Canada Pacific Exhibition in Vancouver.

Besides showing off the grand championship bull and female awards, animals from the H.R. ranch at Pekisko, Alberta, won the reserve championships there. The prince were for carrying ages.

MINARD'S KING OF PAIN LINIMENT

Invention and Idleness

Warning Is Sounded In Connection With Mechanical Progress

Sir Alfred Ewing, president of the British Association for the Advancement of Science, sounded a note of warning to mechanical progress as he opened the 101st annual meeting of the association at York, England.

"I must admit that there is a minister side even to the peaceful activities of those who in good faith and with the best intentions devise labor-saving business to adapt the resources of nature to the use and convenience of man," Sir Alfred said.

Telling of the great progress of the "mechanical age," Sir Alfred declared "men are ethically unprepared for so great a humanity. The command of nature has been put into his hands before he knows how to command himself." He declared that man had lost the joy of craftsmanship because of the machinery of mass production.

"In many cases unemployment is the result of invention, not idleness," he said. "It is more saddening than any drudgery. And the world," continued the association president, "finds itself glutted with competitive commodities, produced in a quantity too great to be absorbed, though every nation strives to secure at least a home market by erecting tariff walls."

Sir Alfred could not name a remedy for the situation, but declared he refused to think that man is destined to atrophy and come through cultivated what after all is one of his most God-like faculties, "the creative ingenuity of the engineer."

The president spoke with enthusiasm of the discovery of electrical communication which, he said, had brought distant parts of the earth's surface into close contact and sympathy with one another.

Persian Balm is irresistible. Fragrant as summer flowers. Cool as a mountain spring. Wonderfully invigorating. Softens and whitens the hands. Makes skin soft-textured and youthful. Used by women as a powder base and as a poreless aid to lovely complexions. Used by men as an effective hair dualive or shaving lotion. And for children, nothing soothes and relieves chafing, sunburn like the delicately cool Persian Balm.

Increasing Revenue

Quebec Reports Deficit For The First Time Since 1926

Decreasing revenues in Quebec were reflected in the annual financial statement of the province which was made public. A deficit of $564,705.01 was reported, the first time since 1926 that Quebec has not wound up its fiscal year with a surplus.

The annual statement shows ordinary revenue was $38,941,020.36 while expenditures amounted to $37,697,752.97. The decrease in the revenue as compared with the previous year was $4,350,626.35. Expenditures for partly by economies effected in various departments of $3,913,234.39.

Don't Submit To Asthma. If you suffer without hope of relief, let the makers of Dr. J. D. Kellogg's Asthma Remedy tell you about it. Just write another day the purchase of Dr. J. D. Kellogg's Dysentery. A trial will serve to prove as much as to its efficiency. The sure relief that comes will convince you more than anything that can be written. When help is so sure, why suffer? This meritorious remedy is sold by dealers everywhere.

Wanted To Be Friendly

Ian Attempt Proved Embarrassing For Service Club Member

It happened at a service club luncheon. The visitor was being introduced at the door. And the usual attempts were being made to make him feel at ease.

"Say, haven't I met you before some time? Maybe in business. What's your line?" asked a club member.

"Well, maybe you have met me in business," said the visitor, rather hesitatingly. "I'm with a detective agency."

Then there was a general laugh as the visitor's embarrassment pushed his way through the crowd.

Mother—"Your boy, how old you last your friend's?"

Son—"With a hammer, just a little while ago."

Mother—"But I didn't hear you cry."

Son—"I thought you were out."

DOES OWN HOUSE-WORK AT 70

With the Help of Kruschen

"For nine years now I have used Kruschen Salts and could not do without them. I take a third of a teaspoon in a cup of water as hot as I can drink it after breakfast. My head aches now. I am 70 years of age in April, and just with taking Kruschen Salts am able to do all my housework during the week; I recommend Kruschen to all my neighbors. Before I began taking it I was never away from the doctor, but now I never need him. I used to have new sensations and then was not able to do anything. But now it is different. Kruschen is wonderful."—(Mrs.) J. G.

Kruschen keeps the organs of the body working actively, cleanses all clogging impurities from the system, and sends clear, vigorous blood coursing through the veins. And the result? As end to all Life's minor ills! Get Kruschen! 'Nuff more health, brightness, energy, nerves," or constipation. Instead, a sensation of real health—a feeling of sprightly, happy vitality—in short, sheer good health!

All Empire Soldiers Now Commemorated

Hens Thats With No Known Grave Named In Memorial

When the British war memorials were unveiled recently at Thiepval and Arras, France, by the Prince of Wales and Marshal of the Royal Air Force, Lord Trenchard, respectively, every empire soldier—officer and man—who was lost in the world war and never found was commemorated by name.

The Thiepval monument to carve with 73,367 names of men "with no known grave." Arras with 1xd ot Arras records 35,000 names.

In 1804 the New Jersey legislature abolished slavery.

NEW INVENTION DOES AWAY WITH COOKING ODORS

Even fish and cauliflower now down to Canopar Cookery Parchment

BETTER, CHEAPER AND EASIER COOKING.

Fishiness on cauliflower, cabbage and onion odor vegetables are, they say, banished in Canopar cookery. Fish is steamed in their own juices and comes out delicately cooked there. Not to mention that the whole house is free from cooking odors during the dinkiest product. The whole dish is equally free of fish.

Canopar Cookery Parchment, a very inexpensive invention, does away with the old-fashioned pot and pan. Simply wrap the food in Canopar Cookery Parchment, and it steams in its own juices. Then you have delicious flavor and full nutrition. Canopar Cookery Parchment is available in the famous French method of steaming food and cooking food and is sold by dealers everywhere.

You buy Canopar in a large package of 40 sheets for 25c. Each sheet is 15 inches by 15 inches, and you can use them over and over again because they are tough, elastic sheets. When you have finished with them you put the Canopar in the garbage pail and it is ready for use in a cooking bag. If you wish to make a cooking bag, fold each sheet in half, and then, on the open edges, crease four times and fasten with paper clips. Then fill with food, and fold each corner of the bag over to prevent steam from escaping. Lastly, put into a pan of boiling water and cook the same as in the oven method. Then you have cooked the food and still not overcooked.

Steamed or boiled, fish comes out firm, solid and delicious in its own juices. No odors. No watery messes or messes in clean up afterwards.

Line your roasting pan with Canopar, then the fats and juices can't burn. Then it is more succulent and there is no removal or scraping of the pan afterwards.

Many women use Canopar for a thick cloth cover, to go on quickly, and cloth doesn't spread fast.

You'll never be without Canopar once you have used it. It saves time and money and makes the cooking of all foods a PARAGON. Sold by Woolworth Peoples 5 and 10c Stores Inc.

Special Offer

Send coupon, druggists and department stores sell Canopar, but if yours doesn't, just send the coupon and we'll put you in touch with a store and prepay both packages. Canopar and the interesting new handbook recipes up to date for your trouble.

Canadian Paper Products, Ltd., Montreal, Que.

Enclosed find 25c for which please send me one full size package of Canopar and your 160 recipes by "Parkenham."

National Advisory Council To Direct Co-ordination Of Agricultural Services In Canada

Dominion and provincial agricultural officials at Toronto conducted an in a study of the livestock industry to find ways of making it pay better dividends to the Canadian farmer.

The conference, called by Hon. Robert Weir, Federal Minister of Agriculture, also considered the establishment of a national advisory council to direct co-ordination of agricultural services throughout the Dominion. Such a council would co-operate with the provincial council already in existence, explained Mr. Weir.

Samuel H. Todd, secretary of the Montreal Chamber of Commerce Beef Packers' Association, had the 100 delegates that henceforth the packing houses of this country will permit government inspectors to inspect hog carcases "on the rail" in the abattoirs. This practice will help Canada meet Danish competition in the United Kingdom market, it is expected. For some time Danish bacon producers have had the advantage of government inspection in the killing plant, while inspection in Canada has been made "on the hoof."

The job of agricultural officials and farmers, it was agreed, is to take full advantage of the 280,000,000 pounds bacon quota offered Canada by the United Kingdom, a quota much greater than the total annual production of Canada for 1931.

The conference also tackled the problem of marketing beef. Dean A. H. Hare of the University of Saskatchewan, called attention to the market for finished beef in the United Kingdom, and pointed out that wheat is an ideal finishing feed for cattle. "There is just as much opportunity for—the sale of comparatively poor quality cattle in the British market as there is for the highly finished animal preferred in the big London stores," he added.

Some form of cheaper continuity of supply was an even more important requirement than quality in the United Kingdom market, Mr. Hare declare supplying the trade three cattle not sifted as cheapest or best their condition.

Irish Free State competition is at a standstill for the moment, said Dean Hare, but he felt sure Irish cattle would come to the fore again sooner or later.

The conference set up a special committee to consider beef marketing, with the following members: Dean Hare, Prof. J. C. Shrackley, of the Ontario Agricultural College, Guelph; J. H. Strong, Deputy Minister of Agriculture for Manitoba; R. S. Hamer and F. R. Light, of the Dominion Experimental Branch, Ottawa. Hon. Robert Weir suggested that provincial agriculturists form advisory committees of their own to discuss their own problems from an administrative standpoint and from the standpoint of consumers. "They are the men," he declared, "who are in touch committees questions of further research into the difficulties and problems affecting the progress of agriculture in that province."

In many cases, however, said Mr. Weir, other provinces might have functionally the same problems. "Are they going to endeavor to solve them themselves or co-operate with other provincial and federal interests?" he asked. "There must be some one to whom they submit it to see if the problem is really provincial or national, also to ascertain what information in respect to it is already available. That is my idea of what the national advisory council should do."

A Perfect Driver

"My wife runs our new machine splendidly; never speeds on fast she can't stop within a foot or two; always pays attention to her wheel; never starts one way, and then without reason turns off in another direction; thumbs her way around corners perfectly."

"What make is the car?"

"Car? It's a sewing machine."

Advice To Agriculturists

Says Man On The Land Fails To Grasp Real Methods Of Farming

Leading speakers before the national agricultural conference in Toronto, declared that agricultural services should render more direct assistance to the Canadian farmer.

Co-ordination of extension efforts were being made to whip into shape definite recommendations to the Federal and provincial governments for co-operation of governmental and other services. The indications were that every proposal would be debated by the conference as a whole.

Farmers are not doing "half as well as they know how," the conference was told by Dr. G. S. Cartier, president of the Ontario Agricultural College. They fail to grasp the idea that there is a best method of farming, he said, but should hold fast desperately that agricultural officials must find more effective means of giving them expert assistance.

Damp and Tough Grain May Now Be Dried Without Damage To Its Milling and Baking Qualities

Canada need not again suffer the losses occasioned when the percentage of tough and damp grain in the crops of 1928 to 1930 reached unprecedented heights ranging from 36.6 to 52.3 per cent., and when thousands of Canadian farmers totalled millions of dollars.

Artificial drying of wheat was one of the first problems to which the National Research Council's Associate Committee on Grain Research set its hand. In 1928 a report was issued which set out the conditions of correct artificial drying that practically all causes of complaint against Canadian grain on the score of damage incurred during drying were removed. There has now been issued a comprehensive document of 104 printed pages, which contains the specifications laid down in the first report, clears up a number of additional points and demonstrates what conditions contribute to the efficiency of commercial driers. Damp and tough grain may now be dried without damage to its milling and baking quality.

Included in the present report are discussions of a small-scale experimental drier designed for the study of the limits of safety in drying with regard to air flows, air temperatures and extent of drying in both continuous and batch types of wheat. Other aspects of the problem discussed are factors in continuous drying, drying in cold weather, drying in two stages, drying with humidified air, accurate drying, invisible loss in drying, atmospheric humidity in relation to drying, drying weight of kernel in relation to drying and the nature of injury caused by heat drying.

In these investigations are discussions of observations made in commercial dryers in Vancouver with suggestions for improvement, discussion of the investigation on the hygroscopicity of wheat (drying by natural ventilation), drying by forced, unheated air and "overdrying" and the influence of heat treatment on the baking quality of flour, both determined by different baking formulae.

Copies of the appendix containing the review of the literature on the subject of drying of wheat have been made available separately.

In making the investigations, the committee has also developed a system of dividing all samples of grain tested into three or four parts and submitting the moisture and baking results independently in three or four laboratories, using methods which were carefully standardized for free comparison and comparison. It was considered important not to draw any far-reaching conclusions which might mean millions of dollars

Here is a complete photographic record of the great show put on by the two great celestial stars, Old Sol and Luna. Many astronomers who came from all parts of the world were denied a view like this owing to the presence of clouds. But our high-flying cameraman at Fryeburg, Me., went above the cloudbank into the very wings as it were. At the top left is a picture of the complete eclipse while various phases are shown in the rest of the picture. The picture at the lower left shows Colonel Lindbergh shower as he watched the phenomenon from the portico of the White House. The picture at lower right is an interesting shot made during totality. It shows the top of the cloudbank illumined by the light from the corona. The earth was in darkness, then.

In these investigations are discussions of observations made in commercial dryers in Vancouver with suggestions for improvement, discussion of the investigation on the hygroscopicity of wheat (drying by natural ventilation), drying by forced, unheated air and "overdrying" and the influence of heat treatment on the baking quality of flour, both determined by different baking formulae.

Copies of the appendix containing the review of the literature on the subject of drying of wheat have been made available separately.

In making the investigations, the committee has also developed a system of dividing all samples of grain tested into three or four parts and submitting the moisture and baking results independently in three or four laboratories, using methods which were carefully standardized for free comparison and comparison. It was considered important not to draw any far-reaching conclusions which might mean millions of dollars

one way or the other to the grain growers and the grain trade, without verifying results in more than one laboratory. The system inaugurated in this, the first large co-operative undertaking of the Associate Committee on Grain Research, has been followed in all later work, and has had the effect of imparting confidence in published conclusions of the Committee.

The summary of the report now published over E. Stansfield, Chief Chemical Engineer of the Research Council of Alberta, and Dr. W. H. Cook, Junior Research Biologist, National Research Laboratories.

While it is believed that the two reports published cover most of the important problems of drying, study in detail under certain conditions is said to be important of bulk-ay quality. These studies will be published in due course. The present report points out many easily help in unexpected ways in handling the practical problem of wheat drying to still better advantage. Dr Robert Newton, Director of the Division of Biology and Agriculture, National Research Laboratories, Ottawa, is chairman of the committee to assess in advance the value of fundamental research. All we know is that the more completely we understand the nature of the drying process the more we will be able to guide it to suit our own ends most effectively."

Bounty Paid

Province In British Columbia Has Spent Over $1,000,000

Since Its Coming

Now even the salmon are getting skinned! An invention by W. F. Robichaud and his brother James, of Ketchikan, Alaska, simplifies preparatory to canning them. Little information on the machine has been given out by the brothers operating in Ketchikan. Alaska, since records of his bailing process in the form of films. The camera hunter has the double satisfaction in knowing that the subject might have fallen an easy victim to his modern high-powered rifle, but still lives, free to enjoy life in its chosen haunts.

WORLD HAPPENINGS BRIEFLY TOLD

Construction of a Canadian legation building in Tokyo has been suggested to the Dominion government, but no decision has been reached.

Hugo Bergeron, 55, pioneer mechanical engineer, inventor, manufacturer, economist and oldest member of the Phoenix Institute, is dead. He invented the first gear generating machine.

Sir William Grenfell, medical missionary to Labrador, believes Newfoundland should tender an aluminum chimes dispose of her Labrador territory.

A total of 194 wartime ships lost up to various ports of the United States have been returned withdrawn from registry by the shipping board pursuant to a request them.

Rumors that Japan was increasing her naval strength at Shanghai, as reported in Chinese newspapers, brought a denial from Shanghai from the Japanese consulate.

The Acro Club of France has recognized Maryse Hilsz as the holder of a new altitude benefit for women. August 19 she rose to a height of 32,500 feet.

Up to the end of July importations of United States anthracite for the seven months of the calendar year had declined 20 per cent. compared with the corresponding period last year.

Intimation that a new trade agreement between Canada and Belgium is being considered by both countries was given at Quebec, by J. Van Rinkhout, consul general for Belgium at Vancouver.

The Transient Problem

Four Expressed That It May Produce a New Criminal Class

At the movement of a transient problem there is plans to be altered in existence. It will produce a new criminal class from which Canada has hitherto been practically free. This is one of the findings of the committee of the Canadian Bar Association on the administration of criminal justice, and forms part of the committee report.

To cope with the transient problem, the committee recommends uniform treatment of the vagrancy sections and other portions of the criminal code "which seem to have been held in abeyance."

Legislation which would impose on every community responsibility for the maintenance of indigents, produced in that community, should be passed without delay, the committee urges.

Despite prevalence of conditions which might be expected to lead to crime there was no marked increase in criminality in Canada, during the past year, the committee finds, Commerce had remained low-ebbing.

A hen-pecked man was informed that a Bengal tiger had escaped from a menagerie, and was chasing his mother-in-law.

"Why should I worry about what happens to a Bengal tiger," he sarcastically.

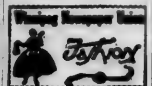
World Court Is Fair

Hundred Nations Always Have Or Getting Justice Here

The history of the World Court and the League of Nations is that each nation has an equal say in the affairs, and equality carries of a square deal in any controversy. This was exemplified by the decision of the World Court handed down recently in a dispute between the small republic of Lithuania, and the mighty powers of Great Britain, France, Italy and Japan.

On the main point, which had to do with whether Lithuania had the power to such a particular state of affairs, the Court decided in favor of the republic.

It is a great thing that the International tribunal got a chance to show their impartiality sometimes, because it is a lesson to the world at large, and an assurance to the small nations that their interests are properly taken care of and no favors shown the big fellows.—St. Thomas Times-Journal.



(By Ruth Rogers)

End Lonely Vigil

Four Soviet Scientists Return From British Arctic Station

Four Soviet scientists have ended a lonely two-year vigil in the bleak Arctic wastes of Northernland, during which their only contact with civilization was by radio. They have been relieved by four other observers, one of them a woman.

A brief wireless despatch from the icebreaker "Sibiriakov," now engaged in Arctic exploration, reports that the party of four, headed by the geographer, Ushakvis, were taken aboard after the relief party, sent out aboard the icebreaker, had taken over.

The woman member of the replacement party is Iri Rosinova, who although she is only 26, is a veteran of many expeditions. With three male colleagues she will spend the next two years at the four outposts, where only human inhabitants will continue their explorations and mapping of Northernland.

The four men who are returning were reported to be in excellent health, despite the difficulties of their assignment.

Air Transportation

U.S. Pilot Congratulates Canada On Port Played In Establishing Service

Air transportation and radio communication will play a great part in carrying out the policies agreed upon at the Ottawa Imperial Conference, according to William P MacCracken, Jr., of Washington, D.C. He urged Canada to promote aviation to its utmost.

Speaking before a service club meeting in Calgary, Mr. MacCracken, who is honorary secretary of the American Bar Association, declared aviation and radio would play an important part in the world's future.

Mr. MacCracken is a pilot of distinction and was in Calgary attending the annual convention of the Canadian Bar Association. He paid tribute to the Canadian government in establishing civil aviation and to the aid which Canada rendered the United States when it started organizing civil aviation six years ago.

THE REPORT OF THE SPIES

Golden Text: "Jehovah is the strength of my life, of whom shall I be afraid?" Psalm 27:1

Lesson Numbers 13:1 to 14:45

Devotional Reading Psalm 90:1-7

Explanations and Comments

Twelve Spies Sent To Canaan, verses 1-20. When our encampment was made at Kadesh Barnea, near the border of the Promised Land, Moses sent twelve spies over the border to ascertain the nature of the land, whether good or bad, whether wood ed or not, and to gain information about the inhabitants' strength. They were numerous or not, whether strong or weak, and also facts about how they lived, whether in cities, camps, or strongholds. He also directed them to bring back specimens of the fruit they found.

"The land was ready for the people, but were the people ready for the land? The report to the Lord, and his company was to bring was to decide, not a question of geography, but a question of philosophy. It was to test the present capacity of the people of God, to determine whether the heart of Israel was ripe for its inheritance." —George Matheson

"What we do in the crisis always depends upon whether we see the difficulties in the light of God, or God in the shadow of the difficulties G Campbell Morgan

The Journey Of The Spies, verses 21-24. The spies went up from Kadesh and into the Valley of Eschol They cut down a branch with a single cluster of grapes so heavy that two men carried it on a staff between them Rimbel means a cluster. It received its name from this incident. Pomegranates and figs were also found. The spies also brought back pomegranates and figs.

The Majority and Minority Reports, verses 25-33 —On their return to Kadesh, the spies reported to Moses and Aaron and all the congregation They showed the fruit they had brought back and declared the land to be exceedingly fertile, for that is the meaning of the expression "it floweth with milk and honey." Honey was of great importance to the Israelites, for it took the place of our sugar "Honey-cow" (Hervorland), the spies happened to add, for they were far more inclined to dwell upon the difficulties in the way than upon the attractive parts of the land, "the people that dwell in the land are strong; and the cities are fortified, and very great; and, moreover, we saw the children of Anak [giants] there."

What a difference it would make if all the facts of life could be changed to ends! The cities were great, and the land was greater, the giants were strong; and yet God was stronger.

The Perfect Dinner

When the Prince of Wales attended the recent medical conference banquet at Albert Hall, London, Kingdom he ate what world experts in dietetics chose as the perfect dinner. Of course, he had been judged by the results of the menu, soup, boiled salmon, mutton, quail with salad and an ice.

"DO I DREAD MY NEXT BIRTHDAY? NO!" says Anita Stewart

"I'm 29"

says Anita Stewart, charming screen star. "I'm often asked if I dread my next birthday. I'm glad to say I don't. Nowadays it's possible for a woman to grow even more charming as the years go by. No one needs to look old who is willing to take regular, sensible care of her complexion."

Anita Stewart is only one of countless lovely actresses who use Lux Toilet Soap. In Hollywood, actually nine out of ten stars guard their precious complexions with this fragrant white soap. It has been made official for dressing room in all the great film studios.

Appointing Salads

This Healthful Addition To Menus Best Beginning In Early Season Days

The very appearing—one could almost say "beautiful"—salads which are served today had their beginning in early times. Greens grown and cooked vegetables were eaten with salt sprinkled over them. Cress was brought to Rome from Persia and eaten with bread, and celery was raised by the Romans because its medicinal green looked well in garlands. The ancestor of our modern lettuce and endive grew wild on the banks of the Mediterranean in almost times.

Salads fell into disfavor for a time and many people gave up eating them entirely, thought of salads as "rabbit fodder." There is nothing difficult about the preparation of a salad which has "appetite appeal." A salad, to be at its best should always be cold, for the dressing carefully blended with the ingredients, and the whole served in a cool place. The salad bowl should be rubbed with a cut clove of garlic, if the flavor is desired, and then the ingredients placed in the bowl in the order named: Tender greens, cooked vegetables, fruits, meats, fish, eggs, cheese, nuts, and last the dressing. Toss lightly with a fork and spoon and serve immediately.

The rules of salads are applicable for the main course. A fruit salad may be served in the form of salad, and a vegetable salad is best served with meat, fish or cheese.

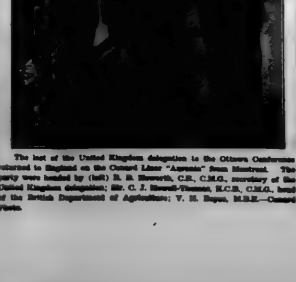
The importance of all is the salad dressing. While there are other types of dressing, two of the most popular are mayonnaise and French dressing. These two recipes can be made with a reasonable degree of success by the inexperienced and by the busy housewife. Mayonnaise is widely used in many ways quite are not needed.

MAYONNAISE

½ teaspoon salt.
½ teaspoon dry mustard.
½ teaspoon paprika.
½ teaspoon powdered sugar.
Few grains cayenne.
1 tablespoon evaporated milk.
¼ cup salad oil.
1 tablespoon vinegar or 1 tablespoon vinegar and 1 tablespoon lemon juice.

Thoroughly mix dry ingredients. Add evaporated milk and blend thoroughly. Beat in salad oil gradually. Add vinegar, or vinegar and lemon juice, beating until mixture is smooth. Makes one cup.

DELEGATES RETURN TO BRITAIN



The last of the United Kingdom delegation to the Ottawa Conference returned to England on the Canada Liner "Aquania" from Montreal. The party were headed by (left) R. B. Bennett, C.H., C.M.G., secretary of the United Kingdom delegation; Mr. C. J. Howell-Thomas, K.C.B., C.M.G., head of the British Department of Agriculture; V. H. Rogo, M.B.E.—Canad photo.

UNION CABINET PLAN MAY SOLVE B.C. DIFFICULTIES

Victoria, B.C.—Premier Tolmie of British Columbia stepped out upon the traditionally treacherous ice of "union government" with the supporters of such a move confident that the footing has been made more secure by the frigid exigencies of the times, and with the confident march of the National Government in England in some limbs.

The premier said he would shortly issue a statement which will become a climax favoring the establishment of a union government composed of "men, who, regardless of other considerat ons, appear to be able to render the best service to the state," and "along the lines of the National Government in England," as the best method of meeting present conditions.

The announcement is the first break in the hazy atmosphere of political rumor that has enveloped the province for many months. Those who have stood undecided as to what would happen and what they would do when it did happen, must soon declare themselves, and the electorate will presumably have an early chance to say whether they have done well.

Though events may be expected to move rapidly, some little time will probably be necessary to clarify the situation. It is not thought that Premier Tolmie's plans are clear-cut as yet. He is conferring with W. J Bowser, K.C., former Conservative premier, who is regarded as playing an important role in the situation.

In all probability the premier will go ahead with his plans regardless of who joins or who stays out. In the ordinary course of events the legislature would be called together, the new government's programme presented, and an appeal made to the people on it.

Every possible combination of public men has been suggested as the likely members of the new government, but beyond the presumption that certain members of the present government will go out, and certain Liberals will come in, forecast is futile.

Men Return To Work

C.P.R. Shop Department Employees Commencing On Short Time

Winnipeg, Man.—Nearly 1,300 employees of the Canadian Pacific Railway's locomotive department here, returned for 13 days of work in September, in addition to the 700 men of the car department who were taken on again on September 1 to work for 21 days, according to an announcement of the company.

All men will continue to be employed on the basis of six-hour work and a reasonable week in both branches of the department will be put on, the announcement added.

The employees of the car department worked 21 days in August, a considerable increase over the previous month, made possible by the economy of preparing additional grain cars to take care of the large grain crop expected this year.

Bad Fortune Ride

Mccleston, Wyo.—Unknown to Pilot Bill Monday, Young Jerry O'Leary grabbed the tail of Monday's plane and rode short 1,000 feet, hanging on grimly as the ship wavered with its rear-end weight. When the pilot flamed out what was wrong he hauled without injuring O'Leary.

Manitoba Aviators Sale

Cormorant Lake, Man.—Flying Officer R. A. Cordon and Aircraftsman John Fortey arrived here after a record-breaking flight to 21,000 feet in the air carrying scientific instruments designed to reveal facts in connection with the cosmic ray.

Tariff Helps Canada

Ottawa, Ont.—Considerable benefit to Canadian trade with Australia is seen in the tariff amendments introduced in the commonwealth's budget according to the Canadian trade commissioner at Melbourne, D. H. Ross.

Study British Markets

To Take Advantage Of Trade Agreements Recorded At Conference

Ottawa, Ont. At the coming session, parliament will likely be asked to take steps to enable Canada to better participate in the advantages offered by the trade agreements entered into at the Imperial Economic Conference A careful study of the markets in the United Kingdom is being made by the Department of Agriculture in Ottawa. A campaign for increased hog production in one of the projects under consideration.

One of the surprises has been the low prices for live cattle in the United Kingdom Canada shipped no cattle to British last week and up to the present the department has received no information of any being shipped this week. The chief reason is that Canadian domestic prices have advanced above United Kingdom prices when shipping costs are taken into consideration.

Despite the 20 per cent. duty on Irish cattle, beef prices in Britain are low Bacon is exceedingly cheap in Britain, and in great abundance so that its consumption has materially increased Lamb and mutton also in great abundance.

A heavy movement of western cattle to the Ontario farms this fall is expected. The live cattle market is likely to be best in Britain in the spring and with so great an abundance of feed in Ontario this year, plans are being made to buy western cattle, fatten them during the winter and have them ready for export in the spring.

Relief For Veterans To Be Equalized

Will Be On Same Basis As For Others

Ottawa, Ont.—Relief to war pensioners, whose loss has been granted to relieve by municipalities, will be placed on the same relief basis as that granted by the municipalities, the department of pensions and national health announces, in confirmation of the principle announced at Calgary by the Prime Minister.

Mr. Bennett was quoted as having said that the unemployed veterans would have their pensions increased to conform with the relief rate paid by municipalities. This, the department officials explained, was technically incorrect. Not the pension rate but the relief rate would be raised, they said.

Veterans, receiving small pensions, were barred from receipt of relief if received less than other unemployed. The attention of Premier Bennett was drawn to the situation by a resolution sent him by the Winnipeg Legion command.

Woodlee Hill Project

Ontario Power Head Discusses Hill in Calgary

Calgary, Alberta.—Dr. A. Oliver, chairman of the hydro-electric power commission of Ontario, is in Calgary, Alberta, R. H. Webb has been appointed chief engineer to take care of the large grain crop expected this year.

Bad Fortune Ride

Mccleston, Wyo.—Unknown to Pilot Bill Monday, Young Jerry O'Leary grabbed the tail of Monday's plane and rode short 1,000 feet, hanging on grimly as the ship wavered with its rear-end weight. When the pilot flamed out what was wrong he landed without injuring O'Leary.

Manitoba Aviators Sale

Cormorant Lake, Man.—Flying Officer R. A. Cordon and Aircraftsman John Fortey arrived here after a record-breaking flight to 21,000 feet in the air carrying scientific instruments designed to reveal facts in connection with the cosmic ray.

Tariff Helps Canada

Ottawa, Ont.—Considerable benefit to Canadian trade with Australia is seen in the tariff amendments introduced in the commonwealth's budget according to the Canadian trade commissioner at Melbourne, D. H. Ross.

Bombarnois Project

Plans Approved For Expenditure Of Fifty Million Dollars

Ottawa, Ont.—Plans for the general works of the Hudson Bay Development Commission in connection with the Hudson Bay railway, the first section of which is now under construction between Lake St. Louis and Lake St. Francis near Montreal, which will shortly be conveyed by the company to the Dominion.

Passing of the order-in-council sanctioning the plans removes any obstacle in the way of the Hudson Bay Railway Company's contract with the Ontario Hydro commission on October 1. According to the terms of this contract the company will make 30,000 horse-power available on that date for the use of the railway.

This amount is to be increased gradually until a total of 250,000 horse-power is placed at the disposal of the Hydro authorities at the end of five years.

Signing of the agreement by the Dominion and the company for the transfer of the canal to Canada is expected to take place shortly.

Population Of Vancouver

Greater Vancouver Population Now Given As 258,550

Ottawa, Ont.—Population contained within the area designated as Greater Vancouver, according to the census of 1921, is placed at 258,550, it is reported by the Dominion Bureau of Statistics. The distribution by locations is:

Burnaby district municipality, 28,586; New Westminster city, 17,524; North Vancouver district municipality, 4,788; West Vancouver district municipality, 4,786; North Vancouver city, 8,810; University endowment area, 575; Vancouver city, 244,886.

POPULAR REAR ADMIRAL

It is understood that Rear Admiral Evans, "Evans of the Brake" fame, is to succeed Vice Admiral H J Tweddle as Commander-in-Chief of the African Station of the British Navy The popular Rear Admiral is pictured here.

Loading Wheat At Churchill

Fifth Ship Arrives At Northern Port To Load Cargo For Cardiff

Churchill, Man.—After battling gales, fog, and ice in the North Atlantic, the steamship Hazel Dollar, of the Dollar Steamship Line, arrived on September 7th, and 30 minutes later began loading 324,000 bushels of wheat for Cardiff.

The "Greyhound" is the fifth ship to load grain here this year. She expects to discharge her cargo in Cardiff in two weeks.

Capt. Thomas Griffiths, of the Hamilton Lines, said he was bothered somewhat by ice in the strait. This ship does not carry a Gyro compass. Officers said such a compass was necessary in Hudson Bay. The M. S. Lady Logan, carrying a party of government geologists of Ottawa who have been working in Chesterfield, is reported off Cape Holmes, en route here.

Western Wheat Production

Estimate For This Year Places Crop At 458,815,000 Bushels

Winnipeg, Man.—The wheat fields of western Canada will produce 458,815,000 bushels of wheat this year, according to the annual estimate of grain crops compiled by the Winnipeg Free Press. Saskatchewan's production is placed at 217,602,000 bushels, Alberta's at 108,170,000 bushels, and Manitoba's at 41,990,500.

Although the Saskatchewan wheat acreage is the largest of the three, the estimated average yield in that province is lower than in the others. It is placed at 14 bushels to the acre.

Estimates on coarse grain crops place the set yield in the three provinces at 307,191,000 bushels; barley at 66,445,500 bushels; rye at 9,578,000 bushels, and flax at 3,140,500 bushels.

It is with regret that Canadians learn of the resignation of Col. MacDiller, United States Ambassador to the Dominion, who will return to Washington. Col. and Mrs. MacDiller have become very popular at the Canadian Capital. The Ambassador is pictured above (left) with a close-up of Mrs. MacDiller.

Evils Of Waste

Lord Beaverbrook Ascribes To Economic Troubles Of The World

Vancouver B.C Evil of waste waste of substance, of opportunity, and most important of all, waste of energy and human effort through lack of co-ordination that, in the opinion of Lord Beaverbrook, governor-general of Canada, is the worst of all evils from which the world is suffering.

He he expressed himself in an address here recently before a gathering of city service clubs.

"It is a very fashionable amusement nowadays to try to diagnose maladies from which the world is suffering Nearly all of us fancy our selves as doctors and like to think we could put things right if we were allowed to administer our own particular economic pill, our own financial tonic," said his excellency.

"Though we may differ about the right cure, though we are by no means agreed about symptoms there is one general principle on which I think we are agreed—that is. One of the worst evils we have to fight is waste."

Loading Wheat At Churchill

Fifth Ship Arrives At Northern Port To Load Cargo For Cardiff

Churchill, Man.—After battling gales, fog, and ice in the North Atlantic, the steamship Hazel Dollar, of the Dollar Steamship Line, arrived on September 7th, and 30 minutes later began loading 324,000 bushels of wheat for Cardiff.

The "Greyhound" is the fifth ship to load grain here this year. She expects to discharge her cargo in Cardiff in two weeks.

Capt. Thomas Griffiths, of the Hamilton Lines, said he was bothered somewhat by ice in the strait. This ship does not carry a Gyro compass. Officers said such a compass was necessary in Hudson Bay. The M. S. Lady Logan, carrying a party of government geologists of Ottawa who have been working in Chesterfield, is reported off Cape Holmes, en route here.

Western Wheat Production

Estimate For This Year Places Crop At 458,815,000 Bushels

Winnipeg, Man.—The wheat fields of western Canada will produce 458,815,000 bushels of wheat this year, according to the annual estimate of grain crops compiled by the Winnipeg Free Press. Saskatchewan's production is placed at 217,602,000 bushels, Alberta's at 108,170,000 bushels, and Manitoba's at 41,990,500.

Although the Saskatchewan wheat acreage is the largest of the three, the estimated average yield in that province is lower than in the others. It is placed at 14 bushels to the acre.

Estimates on coarse grain crops place the set yield in the three provinces at 307,191,000 bushels; barley at 66,445,500 bushels; rye at 9,578,000 bushels, and flax at 3,140,500 bushels.

TO INVESTIGATE SHORTAGES IN COLLEGE FUNDS

Winnipeg, Man.—Investigation by a judicial committee of facts surrounding shortages in University of Manitoba endowment funds was unofficially promised by Hon. R. A Hoey, Minister of Education and acting premier Mr Hoey also stated he would recommend restoration of university funds.

The government will undoubtedly make restitution of the funds at some time in the future," Mr Hoey said, "but they cannot, of course, do so until after the matter has been thoroughly threshed out in the courts and by a judicial commission, if, as I understand it, it is the intention of the government to appoint such a commission to fix the ultimate responsibility for the losses."

"The matter is purely one of government policy," Mr. Hoey continued. "It is not a question for decision by any one member of the cabinet, it will entail the decision of the cabinet as a whole.

The inquiry in connection with the university monies will have an bearing on the matter of payments to the Anglican church. This will be dealt with by church authorities. Rev Canon S. Gould, Toronto, general secretary of the missionary society of the Church of England in Canada, held a conference with His Grace John Matheson, J. O. Stringer of the diocese of Rupert's Land. He will also spend some time in the west discussing the matter in connection with bonds of the missionary diocese.

Commissioner Of Excise

Toronto Investment Banker To Succeed G W. Taylor, Who Has Resigned

Ottawa, Ont.—Hugh D. Scully, investment banker, Toronto, will be appointed Dominion commissioner of excise. He will succeed G. W. Taylor, who has resigned.

Mr. Scully will bring to his new duties a wide experience in finance and business. For some time he was associated with his father, Manufacturers' Association, occupying the position of assistant secretary in that organization. He was also active in commercial and business industry, and since 1919 has been a member of the firm of Stewart, Scully, Company, investment bankers.

Mr. Taylor retires from his post of commissioner of excise on October 1.

Manchester Cotton Strike

Employers Have Expressed a Willingness To Arbitrate

Manchester, England.—A ray of hope appeared in the Lancashire weavers' situation when employers expressed a willingness to arbitrate.

During the meeting, lasting half an hour, the Cotton Spinners and Manufacturers Association central committee drafted its reply to the offer of Sir Henry Betterton, Minister of Labor, to sponsor a meeting with union leaders. The decision said it would attend such a meeting, if invited.

A union representative commented that the action was a surprise and the employers had gone further toward settlement of the issues than was expected.

Police Veteran Retires

Ottawa, Ont.—Headquarters of the Royal Canadian Mounted Police announced the retirement of Inspector Robert Humby after a long period of service. Inspector Humby served most of his time in Western Canada, and was lately stationed at Prince Albert, Sask. He had been inspector since 1914.

Londons To Visit London

Simla, India.—Native leaders of British India are to visit London once again and, with the king-emperor's ministers, attempt to complete a settlement of their country's political future.

Real Trail Blazers

Grants Flights Have Done Much To Advance Aviation

Why count flights? They are like saying the same speech over and over. They prove nothing. They discredit aviation by the deeds they stove up on the trees and in the bushes.

So it is said. But the perpetrators of other scams to cheer the contrary

Actually the trans-ocean flights — and likewise the non-ocean ones — except such obviously foolhardy flights as the Dole Derby

They have given courage for increasingly great transcontinental programs on land as well as on sea. The public has a short memory for the failures and tragedies and a considerably longer memory for the successes, which, moreover register themselves subconsciously and permanently in terms of confidence in flying.

The reckless and incompetently planned grilled trans-ocean flights have tended to discourage repetitions. They have tended to make all pilots more careful, to offer their own safety and for the good name of aviation.

Captain Medlicott's east-west flight in particular has proved that a small low-powered plane of the last variety can master the most treacherous of all routes, the North Atlantic, southward. This will mean increased confidence in the small plane and prove a boon to aviation, which must depend for its commercial growth upon widespread use of smaller and smaller planes.

The flight, as its recent predecessors, notably that of Post and Gatty, has also again shown the remarkable recuperative power of human organisms. Each such demonstration advertises the safeness of flying.

Trans-ocean flights, finally, are valuable reminders of fortitude and of human endurance.

Salutations to Captain Medlicott.

Found Use For Snapshots

U.S. Health Service Makes Records For Treatment Of Diseases

Caring for the pests as if they were ailing babies, the public health service is succeeding at Colmesneil, B.C., in making progress needed for treatment of dread parents.

Savouring truthfully enough—the ado of mosquito breeding, preventent scientists, co-operating with authorities of the state hospital for the insane at Colmesneil, have made complete questionnaires and snapshots of participants, two of the species which transmit malaria, respond to kind treatment.

Cashew, date, breadfruit and ice boxes have been set up in the Colmesneil bacteriology and the mentality among the young is so much that the majority of the insects used in experiments are hand-reared.

Health service officials regard the "farm" as an important stride forward in the treatment of parents, otherwise known as refreshing of the brain.

The Indispensable Zipper

All kinds of ways have been found to do away with hanging pajamas to forestall evening gown is to zip. A style show exhibited pajamas with a zipper down the vice, which, when pulled, closes the trousers legs so that the garment becomes an evening frock with full circular skirt. The zipper is fastened inside the room, out of sight. A long cape completes the outfit.

An American citizen does not need a passport for direct travel in Mexico and Canada. A certificate of identity will serve instead.

"Your cough is better today."

"Yes. I have practised it all night."—Boys' Home Journal.

Windmill Forest Reserve

Trans-Canada Highway Opens Way To a Manitoba Lakeland

Tucked away near the southeast corner of Manitoba is a holiday region of lakes, streams and forests, soon to be visited in ease only by the opening of the Winnipeg-Kenora section of the Trans-Canada Highway. A motor run of about one hundred miles east from Winnipeg, or forty-five miles west from Kenora takes the tourist to the heart of this region, one that is one quarter mile south of Caddy Lake. A road has been cleared through the bush to the shore of the lake which is the cross roads of canoe routes over which trips may be taken that last for a day, a week, a month or longer.

To the north of Caddy Lake, or Cross Lake as it is sometimes called, lies the Whiteshell River, which leads to Little Whiteshell, Whiteshell Lake, Crow Duck Lake and the Winnipeg River South of Caddy Lake the highway skirts the south and west shores of West Hawk Lake, and side trips may be taken to Star Lake and Pinney Lakes. These three lakes are worthy of mention for their beauty and scenic grandeur, but the traveller passing through the main route of this highway will also find much that is picturesque and interesting.

Between Caddy Lake and Lac du Bonnet the entrance and exit are wooded, green depths that delight the driver. Pinling is hardly a spot, as in some of the lakes the sand bottom is visible under the water are it is raised by a deep warrior The motorways are not interrupted by these open spaces, which run smooth by the mechanical feet of Indians, and waterfalls that are a delight to see at with mirage. The many beautiful camouflage blooms, deer and bear wander in the woods or drink from the streams, and game birds and songsters enliven the daylight hours, while after evening the nighthawks and whip-poor-wills advertise their presence.

This region, known as the Whiteshell Forest Reserve, has been set aside by the provincial government as a permanent playground. Here, with its magnificent growth and subdivisions for summer homes and camps, the white settler and city dweller is urging for other sites is still underway Further plans include the logging out of only those trees that limit the excellent playground region may be readily accessible to the summer tourists, and to all who enjoy life out-of-doors.

Deputies In Waiting

In Sometimes Stressful Simple Duties Of U.S. Second Of Journalists

There was forwarded to this office a booklet dealing with a certain course at a school of journalism in the United States. An accompanying letter stated there would be members of the staff of this paper interested in the "unique" course in "Deputies Duty" "Deputies" and "advance their style."

On one page we read something of the rules followed at this school some of which appear to be thorough and proper. In one place we read this:

"Avoid repetition. Your readers have no desire to see the same word in print twice in one line. Use a thesaurus to your work by much use of one word or phrase. No writer can have a vocabulary that will not answer against the habit of repetition."

It is not possible to quarrel much with the above, and yet it is possible to present a word verse which does on all the rules of this school of journalism. It is taken from Philippians 4:8—

"Finally, brethren, whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things."

In that short, authoritative the word whatsoever is said six times, and the sentence word "things" finds an element in the thought of seven. We have never heard it urged that it was not good writing. It is considered remarkable in its form and width of territory and its dynamic power of suggestion. We do not know of any other being who is producing work of equal quality.—Stratford Beacon-Herald.

AT WORK UP IN THE AIR

Strange as it may seem, these men are now walking on air They are a couple of skilful men who are paid to walk between the tall rows of hops in the hop fields in Kent, England, to train the ends of the hop plants over the highest wires, which are many twenty feet in the air. For the past hundred years, stilts have been used by men in the hop fields, and it is a remarkable sight to see these men walking on the tops of long poles with the ones of a man whose feet are on terra firma.

Time For Action

National Plan For Broadcasting Should Be Launched Soon

It would seem desirable that the Radio Commission should be named with little more delay and active steps taken to launch the national plan which has the blessing of all parties in Parliament. As the matter stands, private owners of broadcasting stations are carrying on as best they can under the suggested lasts of appropriation—needed now for two or three years. They are not encouraged to spend money on improvements, on expensive programmes, and unless the commission is formed the listeners of Belmore are likely to suffer.

The season of long evenings and winter entertainment is now upon us and near for distant, and if we are to enjoy the promised advantages of national broadcasting in the coming winter it is time something effective was done in the matter.—Ottawa Journal.

In All Dispatch

When a young man says, "I'll take that matter up with the directors," he may have been with his firm as long as a week.

When he says, "How my experience in some of this kind has been . . ." he has been there longer—maybe six months.

But when he says, "I dunno, but I'll ask the old man," he's probably an old-timer there, and the boss thinks the world of him.

" A Canadian has invented a propeller for ships that has grooves cut in each blade for air to escape to reduce vibration.

Huge Telescope For University Of Toronto

Second Largest In World Will Cost Nearly Quarter Million Dollars

Details of the erection near Richmond Hill, north Toronto, of the second largest telescope in the world, at an estimated cost of $500,000, have been made public.

Officials of the University of Toronto to which Mrs. Jessie Dunlap is donating the David Dunlap Observatory in memory of her husband, announced that construction would start at once on the two main buildings of the plant.

On a circular platform, 200 feet above sea level, a round building 61 feet in diameter will be built to house the huge telescope, nearly all parts of which are being made in England. Larger than the one in the Dominion Government Observatory, Victoria, B.C., the telescope will be of the reflecting type and will have a mirror weighing 8,000 pounds.

The telescope building and an administration building to be erected at a cost of $125,000, will be located in the centre of a 177-acre plot which will be known as the David Dunlap Park.

Remembrancia (Chemist)

A medical journal reports a case of a man who became exasperated because a chemist forgot to send him medicine that special promote sleep.

"Bring him up," he ordered his nurse, "and ask him if he expects me to remain awake all night waiting for that medicine."

Canada Has Lots Of Space

Average Of Square Mile For Every Three Persons

The recent census returns figures show that the Dominion has a population of about the same size as that of the New York metropolitan area—10,376,786, as compared with 10,901,-551. Here we have the two extremes. Canada has a land area of more than three and a half million square miles, an average of a whole square mile for every three persons. The metropolitan area, with only 2,314 square miles of land, can allow only a sixth of an acre to each inhabitant.

There are a few spaces on the face of the globe occupied by civilized man that are still more meagerly settled than Canada Iceland, Greenland, Mongolia, South Australia, Queensland and the Falkland Islands among them. The Dominion, with a density larger than the United States (exclusive of our possessions), has a population as great as that of England in and about one of our cities. All our economic problems would seem simple if our ten millions could be spread over such boundless area as stretched away toward the west along the lines of latitude for our forefathers.

With man's continuing conquest of land and cold there will be a movement northward and southward widening the zone of habitability. More especially do the concentrated regions to the north invite to adventure and to investment. They may yet be the salvation of a congested civilization of the temperate zone, helping it to keep its health and to recruit from the stasty pioneer type for its own difficult tasks of social and political life in a democracy. — New York Times.

Ancient Church At Tiberias

Spot Where Jesus Multiplied Loaves and Fishes To Feed Multitude

Church archaeologists believe they have found at Tiberias, on the lake of Galilee, the spot where Jesus multiplied five loaves and two fishes to feed a multitude.

According to tradition a church was built at the scene of the miracle and church ruins have been uncovered by a German Oriental Institute at Jerusalem.

In an article to be published in the Rivista storica Vaticana, a Jesuit, Father Chrysologus Spolisot, announced that the discovery corroborate to all known religious history.

Mosaics in the ruins depict seven baskets, ears birds, plants and lotus flowers, while behind the altar are shown loaves of bread and two fishes beside a cup of wine, presumably referring to the miracle in which Christ told his disciples to gather the remains of food after the multitude had been fed.

Islands On Pounds

Indians Handsome Or Softness Of Land They Contain

The intimate H.B., H.H., B.B., and so on, news on pounds, indicate the nature of the land they contain. It appears from her, thing (as clay; B for black—or soft—meaning the graphite used in the making of lead pencils) and H.B. (hard black), pencil is rarely the standard by which other pencils are graded. Harder pencils will be marked H.H., H.H.H. and so on, according to the softness of hardness, while softer pencils will obviously be marked with B's. The more clay there is in the mixture, the harder the pencil.

EAGLE BRAND CONDENSED MILK

THE HOUSE OF DREAMS-COME-TRUE
— BY —
MARGARET PEDLER
Author Of
"The Splendid Gift," "The Shrewd Bidder & Dissolution, Ltd., London.

CHAPTER XXXI—Continued.

A brief silence followed this announcement. Blaise was thinking concentratedly. So Madame de Varigny, despite her French name and her French mannerisms, was an Italian! He might have guessed it had the possibility ever definitely presented it. Certainly he had noticed in her those broad, high cheek bones, those liquid, southern-dark eyes, and the coarse, blue-black hair. Yet, except for conferring moment at Montaven, the Miss had never occurred to him, and it had been awfully dissipated by Jean's explanation that the impressive-looking Cleopatra was the Countess de Varigny and her chaperon for the time being.

Italian! Blaise felt more convinced than ever now that Madame de Varigny's visit portended unpleasant developments. Something, a voice from the past, was about to break stridently on the peaceful present. He braced himself to meet the encounter, whatever might be coming. Vaguely he foresaw some kind of blackmail, and he thanked Heaven for Jean's absolute understanding and complete knowledge of the past and of all that appertained to his first unhappy marriage. There would be little football here for an attempt at blackmail, however skilfully worked, he reflected grimly.

He therefore responded civilly to Madame de Varigny's statement, appropriately accepting it at its more than value.

"I am surprised," he told her. "You have altogether the air of a Parisian."

The Countess smiled.

"Oh, I had a French grandmother," she returned carelessly. "Also, I have lived much in Paris."

"Ah! that explains it," replied Turmarin, leaning back in his chair as though satisfied. "It's the influence of environment and heredity, I suspect."

He was fencing carefully, waiting for the woman to show her hand.

"I have also Corsican blood in my veins," pursued Madame de Varigny. Then, as Turmarin made no answer, she looked forward and said intently: "Do you know the characteristic of the Corsican, Monsieur Tor-ma-rin? They never forget—never!"— her foreign accent increasing, as usual, with emotion of any kind. "The Corsican always repays."

"Yes? And you have something to repay? Is that it?"

"Yes; I have something to repay."

"A revenge, in fact?"

She shook her head.

"No. I do not call it revenge. It is punishment—the just punishment decreed by the man who married Nesta Freyne and brought her in return nothing but misery."

Turmarin rose abruptly.

"What have the affairs of Nesta Freyne to do with you?" he asked sternly. "As you are obviously aware, she was my wife. And I do not propose to discuss private personal matters with an entire stranger." He moved towards the door. "I think our interview can very well terminate at this. I do not wish to forget that I am your host."

"You are more than that," said Madame de Varigny suavely. "You are my brother-in-law."

"What?" Turmarin swung round and faced her.

"Yes?" The suavity was gone now, replaced by a curious deadly precision of utterance, enhanced by the foreign rendering of syllable rules: "I am or was, until my marriage — Margherita Valdi. I am Nesta's sister."

Turmarin regarded her steadily

"In that case," he said, "I will hear what you have to say. Though I don't think," he added, "that any good can come of raking up the past. It is better forgotten."

"Forgotten?" Madame de Varigny seized upon the unlucky word. "Ta-ta — it may be easy enough for you to forget you who took Nesta's young, beautiful life and crushed it, you who came like a thief and stole from me the one creature in the whole world that I love, my bambina, my little sister . Oh, you—you—her voice emotionally "easy enough when there is another woman—a new love—with whom you think to start your life all over again! But I tell you, you shall not! There shall be no new beginning for you, no heart-broken, lonely Mrs. Peterson to whom you are now fiance. I forbid it—I—"

Blaise stemmed the torrent of her speech with an authoritative gesture.

"May I ask how the news of my engagement reached you?" he asked, his cool, dispassionate question falling like a hailstone dropped into some molten stream of lava.

"Oh, I have kept watch. I have the right—will purchase—to know my sister's every movement

LOCAL NEWS

Mr. and Mrs. W. R. Maddison and Jean Denton, of Rochester, spent a day in town last week at the home of Mr. and Mrs. A. A. Williston on their return trip by motor from Cheshem, New Hampshire.

Mrs. W. P. Reynolds and sons Louis and Allen, of "The Highlands", Edmonton spent Saturday at the home of Mr. and Mrs. A. A. Williston.

Mr. and Mrs. Ed. Kolterborn and family returned Sunday from Belvedere, Ontario, where they have spent the past two and half months.

Mr. Kolterborn and family left here on June 28 by motor to Ontario. Mr. Kolterborn reports having made a very good trip and a beautiful time.

Mr. and Mrs. Alec. Frost and family of Edmonton were visitors in town Monday afternoon.

The Edmonton Scout Brass Band gave a very fine concert in Hose Sunday afternoon, before holding their usual service at the Provincial Hall.

A large number of exhibits are expected at the Athabasca School Fair, which will be held on Friday of this week.

So far, this is the first School Fair to be held in this district and no doubt it will be well attended.

Heavy wind and dust storm coming from the North-West stopped all threshing rigs in this district today.

Our phone number is 93. Any item of local interest will be appreciated.

Heavy Rains Delay Threshing Operations

Threshing operations will be delayed considerably as a result of the heavy rains on Saturday night and Sunday and again early Tuesday morning.

Hail and rain was reported south of town on Tuesday afternoon, and rigs do not expect to thresh before this Friday or Saturday.

The rain driven by a strong wind beat into the grain in the sheafs pretty badly and in some cases soaked them through.

If rain and wind come during the next day or two, the wet grain will quickly dry.

Rain or Frost during the harvesting season is quite expected every year, and although the present rains means delay, it is early in the season.

Good Hope

Mr. and Mrs. J. Clancy paid a flying visit to their sister Mrs. D. Cranston on Sunday, they were on their return trip from Port St. John, after spending two weeks at the home of Irvin Pomeroy.

Mr. Clancy reports the Pomeroy family are quiting along fine and that Pat is a nice nursery, he was greatly interested in the "home mobile" which conveys them around and also serves the purpose of a bed for our worthy friend Irwin.

Mr. and Mrs. Clancy paid a visit to Mr. and Mrs. Ira McClellan, Mr. William Pomeroy accompanied them down and is going to spend the winter visiting among his many friends here.

Lloyd Bennett's house was burned and nothing was saved.

Mr. Charles Thomas left today for Rochester.

Mr. Donald Fulks is visiting in Good Hope and the attraction is so great that he is thinking of spending the winter.

FURTHER EXAMINATION NEWS

Fort Saskatchewan High School
The Supplementary Departmental

High School Examination results are now out.

John Gibson passed in 3 units.
Two Henry passed in 1 unit.
Jack Rogers passed in 1 unit.
This is in addition to their credits in the June examinations.
The Principal wishes to apologize for not crediting Rose Berg with 4 units out of 4 in the early report instead of 3 units.
It is only justice to state, also that Penny Brown actually took 5 units throughout the year, although owing to a previous credit she only had to write 4.

COMING EVENTS

The St. George's W. A. will meet at the home of Mrs. Bd. Graham on Thursday, Sept. 29th, at 3 o'clock.

ANNUAL SUBWAGE SALE

Under the Auspices of the Women's Institute.

The annual Bazaar-age Sale will be held in the "Furniture Store" on Saturday, Oct. 1st, opening at 2 p.m. Will citizens please help to make this sale a success by looking up any clothing, furniture, home furnishings, dishes, kitchen utensils etc. that they can spare and have their contributions ready to be called for on Thursday and Friday, Sept. 29th and 30th.

CEMETERY FUND

The following additional subscriptions have been received for the Cemetery Fund.

Mr. R. Pollard Sr.	$5.00
Mrs. C. Walker	1.00
Town of Fort Saskatchewan	$75.00
Parkdale Hills U.F.W.A.	5.00
Mr. W. Spencer	5.00
Mrs. Geo. Hanley (Penhold)	1.00

Doctor's Wives Are Feted Here

Mrs. Henry hostess to Conference Visitors.

On Tuesday afternoon the wives of the doctors attending the Medical Conference in Edmonton were guests of Mrs. T. W. E. Henry, wife of the President of the Alberta Medical Association, for tea at the home of Mr. and Mrs. J. D. McLean.

Upon their arrival the guests were conducted by the Warden Mr. J. D. McLean through the grounds and the beautiful gardens, and they expressed their delight at the comforts and congenial surroundings in evidence everywhere.

At the Warden's home, which was most tastefully decorated with autumn flowers, the guests, numbering about 60, were received by Mrs. T. W. E. Henry, Mrs. J. D. McLean and Mrs. A. H. Gibson.

In the dining-room, which glowed with quantities of Marigolds and colored candles, Mrs. S. O. Jones and Mrs. A. H. Rogers presided at the tea-table. The table covered with lace over Pilot-lace, gleamed with silver, and was laden with everything to delight the eye and gratify the palate. At a side-table Mrs. C. H. Stewart cut the tea. Assisting in the dining-room were Mrs. W. P. Colburn, Mrs. F. W. Smith, Mrs. L. M. Taylor, Mrs. F. R. Truby and Mrs. F. H. Walton.

Among those present were Mrs. B. R. Mooney, Miss Margaret Mooney, Mrs. Adam, Miss Archer, Mrs. Young, Mrs. Harold Brown, Miss Bryanter, Mrs. Hoskin, Mrs. Newburn, Dr. Margaret Worrall, Mrs. Orr, Mrs. Frost, Mrs. Revell, Mrs. Shaw, Mrs. Emerson Smith, Mrs. Vargo, Mrs. Washburn.

Former Local Boy Flys Own Plane

Flying his Gypsy Moth plane from St. John N.B. Mr. Bede Grant and Mr. John Brown companion, made a short stop over in Edmonton where he visited his brother, Mrs. F. S. Grant.

"Bede" as people remember him in the Fort, worked in his father's hardware store in Fort Saskatchewan for about one year, since then he has travelled far and had many thrilling experiences.

At the present time he is working for the Interwest Flying Co. with head offices at Vancouver, where he can out for in his plane from St. John N. B., with a companion on August 25th.

Bede Grant and a flying companion in planes recently visited by thousands were the two last Generals Capt. Morrison, into St. John Airport after he had crossed the Atlantic and was forced down in a field just outside of St. John unharmed.

On Thursday morning Bede flew his Moth over the Fort passed three, but due to carrying a heavy load of gasoline and high winds prevailing at that time he did not land.

Mrs. Bert Armstrong, sister to Bede had a glorious ride in his plane on Saturday afternoon to Edmonton.

Mr. Grant and Mr. Brown left on Saturday for Vancouver, making their first stop at Cranbrook.

WOMEN'S INSTITUTE NEWS

Thirteen Grandmothers were guests of honor at a hugely attended luncheon of the Fort Saskatchewan Women's Institute last Thursday at the home of Mrs. A. H. Rogers. After the business of the meeting the guests were entertained with an elocution contest provided by the President, Mrs. F. H. Walton, the prizes going to Mrs. Jos. Graham and Mrs. R. Dickson.

Handsome Tricky, Bead, Heads, and Wicks were handsome during the social hour.

St. George's A.Y.P.A. Hold First Meeting of Season

The first meeting of the season was held at the Rectory with a very good attendance. After opening, the programme for the year was discussed, and with a few alterations, adopted.

Finances were in satisfactory condition, though a few were a bit behind with dues. It is hoped that all will pay up promptly this term.

Two new members were present but the ceremony of admission was put off to next meeting.

Afterwards music and games, with a nice little supper finished a very pleasant evening.

"Delicious" starring Janet Gaynor, Charles Farrell and El Brendle will be shown at the Empress Theatre on Friday and Saturday evening.

We assure you that it one of the best pictures that will be shown this season.

See our Christmas Card samples before you buy elsewhere. Three different books to pick from. Cards with your name and address printed on from $1.00 per doz. up.

Beaver Hills

The Beaver Hills Ladies' Aid will hold a Thanksgiving Supper in the Beaver Hills Church on Wednesday, October 12th.

Coalition Governments.

The question of coalition, or union, governments has been brought very forcibly to the attention of the people throughout the Western provinces of Canada within recent months. There is undoubtedly a very considerable body of public opinion which favors the reorganization of governments at the present time upon a non-partisan basis, that is, the formation of cabinets of ministers inclusive of representatives of all existing political parties, with the strongest men chosen from each to constitute the Government as a whole.

But the average elector has but a hazy idea as to how this can be brought about. Many people entertain the view that all present parties are equally responsible if such coalitions are not effected, if an official editor of coalition is made by the head of the Government in office, and it is rejected by the other party, or parties, then, of course, the latter must accept full responsibility for their decision. There is, however, only one person in each Province who can take the initial step leading to coalition. That is the Prime Minister.

Under the British system of parliamentary government the King, or his representative, invites the leader of the party having a majority in the House of Commons, or Legislature, as the case may be, to form a Government. He becomes Prime Minister. It is then his sole prerogative to select his own ministers. He may entrust as many people as he thinks will fit and he alone names his ministers. Nobody else has any rights in this matter, except, of course, that such ministers must be approved by the people themselves by election to the Legislature. Having chosen his ministers, the Prime Minister also can demand their resignations from the Government.

It was Premier Ramsay MacDonald who proposed the formation of a National Government in Great Britain; it was Premier Sir Robert Borden who proposed Union Government in Canada during the war in 1917; it was Premier Bracken who proposed coalition in Manitoba last year. It is Premier Tolmie who recently proposed coalition in British Columbia. Nobody but the Prime Minister has any right to do so. For a leader of an opposition party to propose coalition would be to infringe on the prerogatives of the Prime Minister.

Once a Prime Minister does propose coalition to the leaders of other parties then a large measure of the responsibility for the realization of such in a form of administration is shifted on to their shoulders and it becomes a joint responsibility of all to so compromise their differences as to make a union of their forces effective.

Coalitions in the past, both in Canada and elsewhere throughout the Empire, have been brought about in times of emergency in order to carry through certain policies deemed by all to the interests of the country but which it would be extremely difficult, if not impossible, for a government representative of only a section of the people, even of a majority of them, —to do by itself. Therefore, when conditions are formed the exact nature of the emergency to be met, and the policies by which it is to be met, most of necessity be clearly stated, and it is on the basis these are set that coalition takes place. This was true in the case of the present National Government in Great Britain, and also when Union Government was formed in Canada in the war time and enforce conscription.

Much of the opinion in favor of coalitions today is founded in the idea that party politics and party Governments are a mistake; that the whole citizenship should be united in one party and one Government; in a word, that Provincial Governments should be run as a business by a municipal council, or board of directors of a company. Whether such an ideal is practical is another question. There are divergent groups in many company directorates, controlling majority and a dissentient minority. The same is true in municipal councils, although the members may not be definitely classified under any group name or as Government and Opposition. But the parties or groups exist just the same.

In fact when any two persons unite for force to bring about any given result a party is formed, and the same is true when two persons unite to oppose any given policy or line of action. In fact, coalitions become necessary when because of a multiplicity of parties no one party can command a majority and thus form a Government. Coalitions, therefore, are not the solution of the party system, and it would appear that there will continue to be parties just so long as everybody does not think, see and act alike on public questions.

Finally, a union government is not created through a joining of forces by a few individuals, but a union of parties. Only by a merger of parties for a given purpose can the required strength be gained to carry it out. One or two individuals might enter a Government to add strength to that Government, but it would not be a coalition. Parties must unite to bring about a coalition.

Old Cedars Still Used

Some of the standing cedars still in force in the House of Commons are over two centuries old. An old Norman French phrase is still in use in certain instances, notably "Le Roy le veult" (the King wishes it) in giving the Royal assent to a bill.

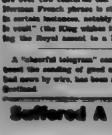
Two Historic Documents

The death warrants of Charles I. and Mary Queen of Scots, are among the bequests in the will, published recently, of Miss Margaret Penelope Clegg, of Boston, Lincolnshire. She left the two death warrants and other historical relics to the Guildhall Museum, London, England.

Cheerful Telegram

Four things some not bust: the spoken word, the aged arrow, the past life, the neglected opportunity.

Suffered A Severe Attack Of Dysentery



Mr. F. L. D. Medford, Vernon, B.C., writes:—"Last Summer I suffered from a severe attack of dysentery. I tried nearly everything on the market, without getting any relief, until a friend told me to use Dr. Fowler's Extract of Wild Strawberry, which I did, and I got relief almost at once. Now I am telling it to all those I hear suffering from any of the troubles it relieves. There should always be a bottle of it in the house."

"Wild Strawberry is sure relief for dysentery, cholera and diarrhoea, but I always say I get the genuine "Dr. Fowler's"."

One Well-Managed City

Louisville, Kentucky, Town Simple Way of Financing Economies

Louisville, Kentucky, will face its new fiscal year, September 1, with a cash surplus of more than $400,000, the majority of its employes will be on a full salary basis and another reduction in taxes is promised.

Closures are being estimated for $140,000 to pay back a 10 per cent. salary cut which went into effect on January 1. At the same time the tax rate was dropped from 28.4 mills to 22.5 and assessed values have been cut 7 per cent.

The explanation is simple. In the closing days of 1931 Mayor Harrison, of Louisville, announced a 10 per cent. salary cut for civic employes, and at the same time promised them that should they effect sufficient economies despite the reduction in the tax rate and assessment, they would be given the back pay.

The effect was instantaneous. Economies were effected in every department. The savings came from positive acts of the employees, such as curtailing gasoline supplies, cars in driving trucks and other vehicles, substituting of materials in short, from thrifty vigilance.

The taxpayers showed an improved tone On July 30, 60 per cent. of the taxes had been paid, leaving only $987,946 unpaid of a total $2,-620,945 receivable as of January 1, 1932.—Winnipeg Tribune.

HAS LOST FAT FOR THREE YEARS

68 lbs. Gone Altogether

A woman writes "For nearly three years I have been taking Kruschen Salts every morning in hot water, and have lost 68 lbs. of fat. My weight before taking them was 196 lbs., and it is now 128 lbs. Compare the difference — it is marvellous! My sister and sister-in-law also taking Kruschen and lots of our friends think they are wonderful. As regards diet, it is not necessary to starve. Eat what you fancy, in my case I have never denied myself anything since I started taking Kruschen Salts. I walk about 'day, and do not eat many potatoes or much sugar. I don't think I shall ever be grateful enough to Kruschen Salts for the great help they have been to me, and shall never stop taking them, for I recommend them to people I think need them."—(Miss) K. T.

Taken every morning, Kruschen effects a perfectly natural elimination of undigested food substances and all poisonous matter's waste matter. Unless this wastage is regularly expelled, the system will eventually store it up out of the way in the form of ugly fat.

Wooden Rims Vanished

Loch Lomond, Scotland, where Kaye Don made his world speed-boat record, has lost wonders which attracted tourists. Its floating island has disappeared, and scientists have explained that its "waves without wind" are no longer the result of natural peat, and that the "fish without fins" are really vipers which travel from one island to another by swimming.

Aerial Ambulance Attendant

Aerial Ambulance Attendant.—Is there a member of your family who is in the habit of falling out of aeroplanes? If so, we can put rubber bibs with quoit handles on the attendants of Dr. J. D. Kellogg's Aerial Ambulance. This humanitarian service rounds its reputation upon what it has done for others. It has a truly wonderful record, covering years and years of service in almost every part of this continent, and even beyond the seas.

Awarded Scholarship

John L. Cathie, bread-and driver, of Toronto, has won one of the high general proficiency standing at Meds, University of Toronto, last year, has been awarded a $200 scholarship by 1885. Cathie was elected secretary-treasurer of his class for the next year by the Freshmen prior to the holidays, during which he has been employed on a bread route in order to earn funds to put him through the engineering class.

The Oil For The Throat.—A bottle of Dr. Thomas' Eclectric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on each bottle. There should always be a bottle of it in the house.

LAYERBILT

LOW PRICES

Now—EVERADY LAYERBILT, the most powerful, longest lived radio battery ever made, at a price that makes it the most economical "B" battery you can buy

Packed with more power-producing, active material than ever before been put into a battery of giving smooth, full power for an amazingly long time—three batteries offer a new conception of radio battery economy. Large size $1.95 Medium size $1.60

With Of Indian King Strikes Sitting On The Floor

After his visit to Europe the Emir Faisal arrived in Jeddah, The Royal King of the Hedjaz, to buy automobiles for the entire royal family The result was a $150,000 order The coachwork of the cars is polished silver. The one for the Emir's mother is completely closed in and has no seats. Instead its floor is spread with thick carpets. Overhead are electric lamps to cost the inmate of the Arabian desert.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are usually recognizable in a general unhealthiness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Bay Persian Pig

Apparatus for projecting an invisible ray that penetrates fogs has been installed on two new German liners. The beam is said to increase by twenty times the distance through which the human eye can see and is as efficient by night as it is by day.

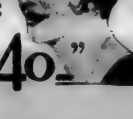
A City Of Churches

The City of London, England, has more churches in proportion to the number of residents than any other part of the world. There are forty-seven churches to 10,000 people.

Worms in children, if they be not attended to, cause convulsions and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

Sixty-five per cent. of the manufactured products used in Argentina are imported from other countries.

"Birthdays needn't make you Old!"—*says Irene Rich*



"A screen star never worries about birthdays," this lovely star says, "as long as she doesn't look old. To look old for public she must keep the fresh loveliness of youth.

"That is why in Hollywood we guard complexion beauty above all else."

Of the 694 important Hollywood actresses actually 693 use Lux Toilet Soap! You, too, will find this white fragrant soap the perfect complexion care! Buy several cakes and begin to use it today. Only 10c, a cake!

"I'm 40."

DR HAMILTON'S PILLS
FOR HEADACHE INDIGESTION BILIOUSNESS CONSTIPATION

Should Make Fur Contentment

The entire State of Montana, it is estimated, will have a wheat crop of 56,000,000 bushels. The Lethbridge district of Alberta, some farmers predict, will have 40,000,000 bushels. Comparisons in this instance should make us feel contented with our prospects says the Lethbridge Herald.

Persian Rules is Alluringly Fragrant.

Adds a charming refinement to the most finished appearance. Creates and preserves complexion of surpassing loveliness and texture. Softens and whitens the hands. Cools and dispels all irritation caused by weather conditions. Swiftly absorbed by the tissues leaving never a vestige of stickiness. A peerless toilet requisite. Invaluable to all women who care for elegance and distinction.

Arranging For World's Fifth Poultry Congress

Early Making Great Preparations For Show Next June

Prof Alexander Dingle, director-general of the 1933 World's Poultry Congress, was in Ottawa recently in connection with the fifth congress. Prof Dingle interviewed the Federal Minister of Agriculture concerning Canada's participation in the congress which takes place in Rome, Italy, June 1933 In addition to this he discussed with the Canadian members of the World's Poultry Science Council details of the congress

According to the congress director-general, Italy is making great preparations for this event The show will take place in the ancient market of the Trojans The market is a circular gallery, and is very high, with an old Roman Road leading to each tier From these roads open dozens of rooms in which the exhibits will be placed The King of Italy is the Royal patron and will probably open the congress in person Mussolini has recently endorsed the congress and it is expected will be present some time during the exhibition to meet the delegates

Farms in Canada

Enjoy Increase In Number Of Farms In Last Ten Years

There were 17,351 more farms in Canada at the time of the 1931 census than in 1921, according to figures issued by the Dominion Bureau of Statistics. The total for 1931 was 728,564, and for 1921 it was 711,666.

There were decreases in the eastern provinces form Ontario to the sea, but increases in all the other provinces Saskatchewan showed an increase of 17,021 in the decade Alberta 14,434, British Columbia 4,106, and Manitoba 941. There were 41 farms in the Yukon.

Prince Edward Island had a decrease of 836, Nova Scotia, 2,886, New Brunswick, 2630; Quebec, 1,662, and Ontario, 3,478

There was a total of 586,239 farms owned by their occupants, 74,383 tenanted and 67,943 partially owned. Full ownership of farms decreased 6 per cent. in Canada, while tenant farmers increased 33 per cent.

Empire Trade Ship

May Sail From England For Canada Next Spring

Responsible shipping manufacturers and exporters in the United Kingdom to an invitation to display their goods for the benefit of Canadian buyers at Montreal in May, 1933, a proposal has not been sufficient to justify the sailing of the vessel on October 1.

Enthusiastic replies received they are awaiting publication by the United Kingdom and Canadian Government the decision arrived at during the Imperial Conference at Ottawa before exhibiting their goods

As these decisions will probably not be made so far before the end of October it is hoped the empire trade ship will sail for the Dominion next spring.

Should Eat More Cheese

Cheddar cheese could do much for a great industry as well as contributing to their own sustenance s the use of a cheap and nutritive diet by a greater consumption of cheese. It should be made a staple food and be found on the table at all times.

Persons: "If, why aren't you getting on with yer washing?"

Workman: "Well, somebody dyed the suit in the laundry basket, but it'll be ironed again in half an hour."—The Humorist, London, England.

Survey Results In Better Picture Of Weed Problem In the West And Points To Possible Remedy

Intelligence and Ability

Are One and the Same Thing, Is Scientists Say

Intelligence and ability are the same thing, and both are unknown, the British Association for the Advance of Science was told

The man with the highest intelligence is the man with the greatest number of brain cells, Prof. W. McDougal noted psychologist, said The difference in intelligence between man and the lower animals is really a difference of brain cells.

Intelligence, he explained, is a sort of outgrowth of instinct, and both are based on two things propensities or natural desire, and attention, which is a case making up of a natural bent with some particular ability This close combination of the two governs activities of lower animals

The secret of the ability of migrating birds to find their way accurately over long distances probably has its source in eyesight, enabling them to note landmarks Prof C. G. Patten told the scientists.

He suggested that birds have an instinctive "sense of direction." Young birds are guided by older birds who have been over the route before.

Facts About Tobacco

Weed is Grown In Nearly Every Province But Has Small Acreage

Here are some interesting facts about tobacco growing in Canada supplied by the Department of Agriculture at Ottawa:

Tobacco growing was introduced by French settlers in the early colonial days.

Government assistance was first given in 1725;

In 1871, the year of the first decennial census, production was estimated at 2,804,276 pounds for Ontario and 1,-190,945 pounds for Quebec;

In 1931 there were some 7,200 farms producing tobacco in Ontario and Quebec, and approximately 78,-000 persons were engaged in the production or manufacture of tobacco and its products;

Tobacco is grown in nearly every province in the Dominion.

Canada's production of commercial tobacco for 1931 was estimated at 31,000,000 pounds.

Support Is Promised

Canadian Provinces All Interested In Success Of Grain Show

All Canadian provinces are enthusiastically supporting the World's Grain Exhibition and Conference according to reports from those who attended the recent gathering of Federal and Provincial representatives called together at Toronto by Hon. Robert Weir, Federal Minister of Agriculture.

During the meeting, Hon. W. C. Buchis, Minister of Agriculture and chairman of the exhibition and conference, conferred with representatives of the provinces and technical men of the Federal Department of Agriculture upon matters in connection with the show at Regina next year.

Chocolate Lovely's delicious CHOCOLATE LOAF CAKE

½ cup butter
1 cup sugar
2 eggs
1 teaspoon vanilla extract
1 cup milk
2½ cups pastry flour (or 2 cups and 2 tablespoons of bread flour)
2 teaspoons Magic Baking Powder
½ teaspoon salt

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and flavoring; add flour, sifted with salt and baking powder, alternately with milk. Fold in stiffly beaten egg whites. Bake in 2 greased layer cake pans in moderate oven at 375° F. about 20 minutes. Recipe for Chocolate Icing and Filling is in the Magic Cook Book.

Why Magic Baking Powder is used exclusively at this

Montreal School of Domestic Science

"We teach our students only the *finest* methods," says Madame R. Larrois, Assistant Director of the Provincial School of Domestic Science, Montreal. "That's why I always use and recommend Magic Baking Powder. Its high leavening quality is always uniform. You get the same satisfactory results every time you use it."

And Magic Baking Powder is the unquestioned choice in the majority of cooking schools throughout the Dominion. Cookery teachers and housewives, too—prefer Magic because of its consistently better results.

Free Cook Book—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ontario.

Jimmy Oates, first man to cross Canada by motorcycle, now plans to motorcycle from Ottawa to Churchill.

Switzerland used 2,200,000 pounds of silk and rayon products in Great Britain last year.

Thirty more Doukhobor men have been sent to Piers Island. There are now about 100 men on the island.

Three Chinese boys have left Calgary for their homeland to join the Nationalist army air force. They were trained locally.

The report to the League of Nations on Manchuria advises establishment of Chinese authority under Japanese advisers.

The British Government has received no intimation from the United States regarding postponement of the world economic conference, expected to begin in London in October.

Lord Wakefield, owner of "Miss England III.," fastest speed boat in the world, announced he would take no further part in motor boat speed contests.

Population contained within the area designated as Greater Vancouver, according to the census of 1931, is placed at 288,340, it is reported by the Dominion Bureau of Statistics.

Plan World Cruise

Canard Cruiser "Carinthia" To Make Cruise Of Southern Hemisphere

The Southern Hemisphere will be encircled for the first time by a pleasure cruiser when the Canard cruiser "Carinthia" makes her world cruise next January, leaving New York on the early 7th. The entire cruise will be made under the Southern Cross. The duration of the cruise will be 130 days with a distance of approximately 36,- 501 miles, calling at 25 ports.

After leaving New York the "Carinthia" will visit Bermuda, Jamaica, then through the Panama Canal to California, Hawaii, down to the South Sea Islands, visiting in rapid succession these exotic of fabulous beauty and fascination, Tahiti, Rarotonga, Samoa and the Fijis, continuing to New Zealand and Australia, New Guinea, the Dutch East Indies, including Bali and Java, the Straits Settlements, Ceylon, making a stop for the first time in the history of any cruise at the famous Seychelles Islands, (Port Victoria), down the coast of sunny East Africa from Mombasa to Cape Town, across the South Atlantic to Montevideo (for Buenos Aires), Rio de Janeiro, and back to New York. Practically all ports of the itinerary have seldom been visited by Canadians or American.

The cruise will be particularly interesting to Canadians in that a large number of the Dominions will be visited, including Jamaica, New Zealand, Australia, the Strait Settlements, Ceylon, British East Africa, Rhodesia, Union of South Africa and Barbadoes.

The ship is due back in New York on the afternoon of Thursday, May 28th. The "Carinthia" is the newest steamer in the Canard fleet, was especially constructed for cruising and is of 20,000 tons gross. The shore arrangements of the cruise are being managed by Thos. Cook & Son.

Sounds Of The Skies

Rhinelander Astronomical Observatory To Be Set'd In Alaska

Pending resources, the University of Chicago and the University of Toronto plan a co-operative new astronomical observatory—surpassed only in size by the Mount Wilson Observatory —to search out the secrets of the skies.

Announcement of the project was made by Vice-President Frederic Woodward, of the University of Chicago. The observatory, he said, would house an 80-inch reflecting telescope. It is expected the observatory will be completed by July 1, 1935, at a cost of about $375,000.

Fullness in flight more than their wings in nature, taking their best from the leader and keeping time with him.

Sweeter, More Fragrant In Your Pipe!

Any pipe tastes better, from the time you first load the bowl with Ogden's cut plug — it's sweeter, richer, cooler and more fragrant.

If you "roll your own", use Ogden's fine cut cigarette tobacco.

SUNDAY SCHOOL LESSON

SEPTEMBER 25

MOSES HONORED IN HIS DEATH

Golden Text: "Precious in the sight of the Lord is the death of His saints." Psalm 116: 15.

Lesson. Deuteronomy 32 45-52; 34: 5-8.

Devotional Reading Psalm 116 12-19.

Explosives and Chemicals

Simon Lorne, Q.C. (the Approachable Beath, 32 45-52.—Moses' work was over in the plains of Moab he was in sight of the goal of his forty years' pilgrimage. He could behold the Land of Promise, for that which will lead us into an infinitely larger, happier life. Dr. Henry van Dyke's beautiful prayer breathes the true spirit: "Steady me to do my full time—it won't be well as I can; and when that is done, stop me, pay me what wages Thou will, and take me to the rest of a quiet heart, a grateful Amen."

The Call To Pisgah, 34: 1-4.—To Joshua, his minister, Moses turned over the reins of his authority. He climbed to the summit of the ridge overlooking the Plain of Moab. Before him lay the whole land of the people whom he loved, for whom he had labored. To the West lay the land which he had ever had in view; its attaining had been the constant hope throughout all the wilderness life. Long and earnestly he gazed. "And then he quietly turned away to take his journey to a fairer land of promise than that upon which his eyes had been fixed. No finer close to a great life could be imagined. Any description of the peparatory of a royal funeral would be tawdry in comparison with the dignity and grandeur of those closing scenes To leave the grand old warrior alone with God on that mysterious summit overlooking the land which in after years would in every event of its glorious spiritual history witness to his service—the imagination could not devise of an end more august and splendid."

New Anti-Aircraft Gun

Claimed To Have Range Of Seven and Half Miles

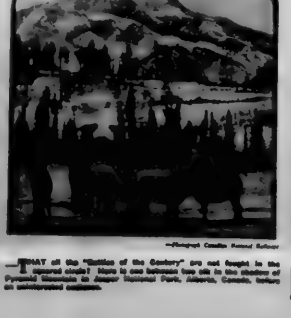
That a new anti-aircraft gun now being down an attacking bomber several and one-half miles up in the air is the claim to those conducting tests on the Riviera coast near La Seyne, France. The secret of the gun's construction is jealously guarded by the firm whose engineers planned it. Anti-aircraft guns have previously proved effective at a height of about three and one-half miles, but modern aircraft can attain much greater altitudes. In the experiments off La Seyne an aeroplane with pilot and mechanic, ascended seven and one-half miles leaving, suspended 1,000 feet beneath it, a target on which the anti-aircraft gun opened fire with live shells. Aviation, military and naval men of Europe are watching the tests.

Honored For Survey Ship

Government Vessel Sets Mark For Fur North Sailing

Completing what is said to have been a new record in far north sailing, the S.S. Ocean Eagle, government survey ship, in command of Captain William Pendall, returned to Churchill after a 17-day voyage into the Fuse Basin regions. The "Eagle" steamed near the southern extremity of Cockburn Land where the slightly south of the magnetic pole. It is stated that no steamer of the proportions of the "Eagle" had sailed so far north in that area east of Baffin Island.

Do You Know?



—Photograph Canadian National Railways

TODAY all the "Battles of the Century" are not fought in the 11 square miles! Here is one between two oils in the shadow of Pyramid Mountain on the Jasper National Park, Alberta, Canada, before an audience of thousands of tourists.

Ontario Is Interested

Province Expects To Be Well Represented At World's Grain Show

Ontario will be adequately represented at the World's Grain Show in Regina, July 24 to August 5, 1933, Hon. T. A. Kennedy, provincial minister of agriculture, said at a meeting of the show's Ontario committee at Toronto recently.

The minister advised the committee Ontario should be represented in the intercollegiate and junior grain judging competition. Plans are being completed for holding grain judging competitions at several strategic points throughout the province to select representatives for a final competition at Guelph. There three Ontario representatives will be chosen.

Consideration was given the preparation of an educational exhibit at the show, representing the natural resources of the province.

No more dusting for me!

at least not with old-fashioned dust clothes. I've found a better way.

Thousands of Canadian women know that her "better way" is the Applebird Wonder Paper. Made from clean rags and soft paper pulp and scientifically treated with high-grade furniture polish, it dusts—as it cleans—as it polishes.

Wonder Paper is changing the old-established order of household dusting. One neat package of it supplies more to women than yards of old rags that spread dust and constantly need washing to be sanitary.

You get twenty-five sheets of Wonder Paper for a quarter. Simply crumple a sheet into a soft wad, go over the furniture, woodwork, and the floors. The results are a delight. In half the time and with half the effort, you get a thoroughly dust clean for more satisfactorily.

And when you're through, throw away the piece of Wonder Paper. No shaking out, or washing, of dusters. Certainly you ought to try Wonder Paper.

Special Offer

WONDER PAPER is made by the makers of the famous FLY-SAME, the Heavy Waxed Paper in the Green Box. Most grocery, hardware and department stores have Applebird Wonder Paper in stock. If yours hasn't, just send this coupon and we'll give you a booklet entitled "Leftovers", containing one hundred recipes, as a bonus.

Applebird Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25c for which please send me one package of The Wonder Paper and your 100 recipes for "Leftovers".

OTTAWA SESSION LIKELY TO MAKE NEW HISTORY

Ottawa, Ont.—Canada's parliament convening on October 6 will make new history.

Signs portend a four weeks' sitting of parliament at the fall devoted almost entirely to intra-empire trade. Perhaps even three weeks may suffice To some extent opposed on members will be a determining factor And from that quarter there has been no official expression of views on the results of the Imperial Conference.

But in any event, approval of the trade pacts will probably take place in time for adjournment on or before November 15. A recess until January 15 is expected.

The legislative programme when parliament reassembles in January will probably comprise

(1) Legislation on the report of the transportation commission, headed by Mr. Justice Lyman P. Duff, of the supreme court of Canada.

(2) Approval of the Canada-United States St. Lawrence seaway treaty providing ratification has been already given by the United States senate.

(3) Amendments to the Finance Act.

(4) Introduction of redistribution bills.

From present indications, the budget will probably be brought down late in February. Like the National Defence estimates will not be tabled until early next year Preliminary work on the estimates will likely be under way shortly.

A bill for redistribution of Dominion constituencies always follows the completion of Canada's census every ten years. From the viewpoint of suggesting an election the measure consequently has no significance whatsoever.

Usually contentions amendments to the redistribution act go through a committee before being submitted to the Commons for enactment. This course will be followed during the coming session, it is stated.

The Finance Act in all its ratifications will likely be reviewed by a special committee. Amendments to the act are presented for early next year.

Slayer Pays Penalty

Russian Who Shot French President Dies On Guillotine

Paris, France.—Paul Gorguloff, half-mad Russian adventurer, died on the guillotine at Santa prison for the assassination of President Paul Doumer of France. The knife of the guillotine fell at dawn 4 05 a.m.

The Russian fanatic's last hope of escaping the razor-edged knife of "The Widow" passed when President Albert Lebrun, who succeeded Doumer, rejected his appeal for a commutation.

Dr. Gorguloff was not told of the president's decision until a half hour before his execution, in accordance with French law and custom. Then he was awakened by his guard and lawyers, informed of the appeal's failure, and led unceremoniously to the guillotine.

Remembrance Day

War Veterans Favor Shorter Service For Observance

Vancouver, B.C.—Believing that the importance of "Remembrance Day"—November 11 is not fully realized by the Canadian people, the eleventh annual convention of Amputations' Association of the Great War passed a strongly worded resolution favoring stricter observance of the anniversary.

"We pledge ourselves to do all in our power to see that this day shall be marred in our national life," the resolution declares. "We further appeal to the industrial and commercial life of Canada to follow the splendid example set by dominion, provincial, and municipal governments in closing down all but necessary work on "Remembrance Day."

Says Empire Threatened

British Islands Of Industrial Strength Are In Danger

Toronto, Ont.—Suggestion that the very civilization Great Britain had created might destroy her in the end was made here by Dr T. E. Gregory of London, one of the world's leading economists, at the additional financial ministers, professors, bankers and outstanding business men were in his audience.

Dr Gregory questioned whether the British system of international trade and congresses would win out, or whether the economic spirit of free enterprise in international trade and finance in mechanization of production would prevail in the next two decades.

"Do we want civilization of the kind my country has created, and which may destroy my country in the end, or the kind America has created and may carry to a very triumphant conclusion?" Dr Gregory questioned.

There was going on in the world a revolution in raw material that would not be checked, said Dr Gregory The raw material producing areas were going to resort to manufacturing in order to keep those busy who were be ng driven from the land

Aviators Burned Alive

Pilot and Pupil Meet Horrible Death At Montreal

Montreal, Que Two men were burned alive in an aeroplane here as the machine went out of control and crashed to the ground. They were Captain Blaise A. Lebeouf, chief instructor at the Montreal Light Aeroplane Club, and C. W. Chambers, also of Montreal, a student pilot.

Lebeouf had taken Chambers up for the latter's first experience in "flying" and "dives." The machine was seen to falter when about 1,000 feet up and then to crash. Flames suddenly appeared about the engine and swept back over the occupants

The planes then dived into a farmer's field near St. Hubert airport. There was an explosion as the machine struck the earth. So intense was the heat, an efforts at rescue could be made.

Captain Lebeouf was one of the most proficient flying instructors in Canada. He learned to fly in Windsor, Ont., and later joined the Royal Canadian Air Force. At Camp Borden he was regarded as one of the three outstanding instructors there.

A coroner's jury investigating the mishap returned a verdict of accidental death on both victims.

No Fall Session

No Early Sitting Of Alberta Legislature Is Expected

Edmonton, Alberta.—A fall session of the Alberta legislature is not likely, it is stated by Premier Brownlee, and the action of the Dominion Government in calling parliament for October 6 should not have any effect upon the situation in this province so far as its own house is concerned.

Unless some unexpected emergency arises, it will not be necessary to call a sitting of the legislature before Christmas, said Premier Brownlee. If however, other conditions should become sufficiently serious, it might be found desirable, but there does not appear at present, the premier said, any reason for such action this fall.

Mr. Brownlee intimated however, that in any case no early a date as possible after the new year will be arranged for the regular session.

British Motorists Pay More For Gasoline

Price Has Been Increased Nearly Twenty Per Cent.

London, England. British motorists were hit by an increase of nearly 20 per cent. in gasoline prices, raising the standard grade to 39 cents a gallon.

The London Gasoline Company announced the rise would increase its expenses more than $1,000,000 a year. News of the increase caused a sharp rise in oil shares.

The growing army of small car owners had hoped the oil war which has given them cheaper gasoline would continue indefinitely but the inclusion of Roumania and Russia in an agreement ended the price cutting.

Freight Rate Bay Route

War Shortly Discontinues Solicitation Of Freight For 1933 Season

Ottawa, Ont.—While the government takes no part in the operation of the Hudson Bay Railway and the Port of Churchill, the information that the Canadian National Railways will shortly discontinue the freight solicitation service for the new route is unofficially confirmed here.

The railway has been pushing the Hudson Bay route strongly in the past few months, but this effort will be stopped shortly prior to the closing of the Hudson Bay navigation season. The chief motive in discontinuing the service is to economize but it is pointed that there is little purpose in soliciting freight for 1933

Pay Roll Robbers

New Type Of Taxi Gun Gun Is Demonstrated

Chicago.—Pay roll robbers are going to shed a lot of tears.

A new type of taxi gun gun, so small it can be concealed in a coat sleeve and reputedly of sufficient power to route a whole gang of pay roll robbers was demonstrated at the Northwestern University Crime Detection Laboratory here. It is fastened to the forearm by a strap watch. A fine wire leads from the trigger to a ring in the middle finger. All one needs to do is lift up the arm and flick the finger and the trick is done.

Support Is Withdrawn

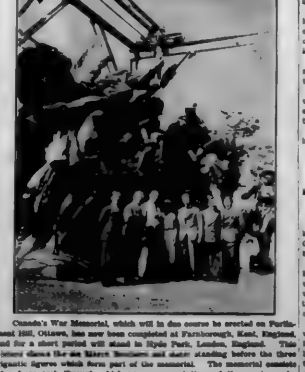
Says Don Lemon Sponsor Is Opposed To Social Reading

New York—May 29th, British speedboat driver and holder of the world record with Lord Wakefield's "Miss England III.", said he knew of no one in England who might take the former backer's place as sponsor of speed boat racing.

Lord Wakefield withdrew his support of Don and said he planned to withdraw entirely from further speedboat ventures.

Lord Wakefield is said to have spent at least £1,000,000 in the last few years promoting automobile, speedboat and airplane speed ventures.

COMPLETION OF CANADIAN WAR MEMORIAL



Canada's War Memorial, which will in due course be erected on Parliament Hill, Ottawa, has now been completed at Farnborough, Kent, England, and for a short period will stand in Hyde Park, London, England. The picture shows the six Sisters Sculptors and sister standing before the three gigantic figures which form part of the memorial. The memorial consists of a huge arch through which pass representatives of the services who responded to the call for men during the World War.

CONSIDERED BIG WORK

James Purves, Canadian artist of London, Ontario, who has been given the task of inscribing some 60,000 names in the Book of Remembrance, which will be placed within the cashet of the Altar in the Memorial Chamber of Ottawa. The names will be written by hand on fine calfskin vellum.

United States Farmers Buy Manitoba Land

More Than Two Hundred Families Coming To Canada

Winnipeg, Man Over long distance telephone from Des Moines, Iowa, Senator L. E. Francis confirmed his association with W. J. Whidden, Winnipeg, in the purchase of 10,000 acres of farmlands in Manitoba for United States farmers.

Mr Whidden, who telephoned Senator Francis when shown a despatch from Des Moines quoting Mr Francis as saying "nothing to it," showed the Canadian Press reporter the title to the property and his contract with the United States senator.

With other parties Mr Whidden is negotiating for 30,000 more acres in Manitoba. More than 200 United States farmer families will settle on the land acreage, he said. These farmers are coming to Canada, he said, because of higher prices received for farm products in Canada and the fertility of Manitoba soil.

Dairy Barn Destroyed

Fifteen Head Exstimated By Farmer Near Moose Jaw

Moose Jaw, Sask The huge barn of Fred H. Jones, prominent dairy farmer living two miles north of the city, was completely demolished by fire, causing a loss estimated at $23,000 Starting either from spontaneous combustion or from a short circuit in the electric wiring of the barn, the fire blazed uncontrolled for three hours.

The barn, measuring 370 feet by 36 feet, was valued at close to $30,000, the feed which was stored inside was valued at $2,000, milking machine equipment was valued at $1,000, and 12 sets of harness were valued at about $600. All these were a total loss.

Farmers Hold Wheat

Alberta Farmers Show Tendency To Wait For Higher Prices

Calgary, Alberta.—Alberta farmers are showing a tendency to hold their wheat until higher prices appear, according to grain trade heads in Calgary. Farmers are being given an average price of 32 cents per bushel No. 1 Northern.

Alberta wheat pool officials state farmers' fall grain should be held as all places where facilities are available. Storage places, however, are lacking in some centres and it is feared congestion may result in many districts.

Some farmers are urging that coarse grains be held until fall price improve. They point out that present prices made delivery hardly worth while as No. 3 C.W. oats brought only 13 cents per bushel, No. 2 C.W. barley 13 cents, and No. 2 C.W. rye 12½ cents.

Fuel heads strongly denied farmers in some districts were forming organizations for the purpose of holding all their crops.

Sees Better Times

Speaker At Chamber Of Commerce Gathering Looks For Improvement

Halifax, N.S.—Declaring Canada is "on the threshold of the upswing," President W. L. McGregor, of Windsor, Ont., gave a keynote of optimism to the seventh annual convention of the Canadian Chamber of Commerce.

"I am glad to be able to state that it is not only my opinion, but the opinion of many leaders that we are on the threshold of the upswing," he said.

But Colonel McGregor wished to make it clear he was not suggesting the advent of recovery.

"How could anybody seriously forward the idea of the advent of recovery with 11,000,000 unemployed on this continent alone?" he asked.

He was wary of the spectacular rise in stock prices.

Gandhi's Threat

Effort Being Made To Prevent Hindoos From Shooting Themselves

Simla, India. Powerful efforts are being organized to deter Mahatma Gandhi from carrying out his threat to start a hunger strike.

The viceroy talked for an hour with Rao Bahadur, representative of the untouchables class in the assembly, who appealed to all classes to strive to save the life of "the greatest Indian of our time."

The Pandit Malaviya, Hindu leader, was summoned to a conference at Delhi in the hope of reaching an early agreement regarding representation of the untouchables, the issue which influenced Gandhi to threaten his campaign of starvation.

FREE STATE STILL CONCERNED OVER LAND ANNUITIES

Dublin, Irish Free State.—Both governments continue to maintain the strictest silence concerning the terms of the latest note from the Free State to the United Kingdom in the dispute over the land annuities, but it was reported that President Eamon de Valera had declared that in event of failure to reach an agreement on the method of arbitration, he would use the monies so far withheld for the "relief of sufferers from the economic warfare."

The Free State so far has withheld payments of about $10,000,000 on account of failure to reach agreement on the form of arbitration of the dispute the Free State holding out for an international tribunal and the British government for an impartial arbitral board.

President de Valera is expected to visit London for a day or so, and leave a final interview with J. H. Thomas, Secretary for Dominion Affairs, before leaving for Geneva to attend the sessions of the league assembly.

Heroes And Jobs Needed

Position Of Young Men On Board Rail Trains Tax

Comments from railway travellers about the large number of boys commuting on freight trains have been substantiated by conservative authorities who estimate that between 200,000 to 300,000 youth from twelve to twenty years of age are now on the road. Another "young army" of jobless people is reported in Great Britain. Russia has been troubled by bands of children wandering about the country stealing what they could find.

The wanderers have represented a new type. They are neither lazy nor adventurous. They are not criminally inclined. In fact, some of them are fairly well educated. Broken homes reduced family incomes and unwillingness to remain a burden to an already large family are responsible for their wanderings. Their lot is not a happy one. Last winter a west-ern city reported taking from freight trains thirty-five men and boys who were seriously ill. One railroad has reported fifty young men and boys killed and a hundred others injured during a winter as the result of dropping trains. The best the wanderer can hope for in a town is two meals of bread, tea and beans and the admonition to "move on."

Although a publicity campaign is planned to give warning of the dangers of "riding to the rear" it can hardly be expected to prove a complete remedy. Both homes and jobs are needed to keep these young men off the road.—New York Evening Post.

Toll-Bridge Keeper Collects Rare Coins

Man Has Unit Dollar Which Is Century Old

Collectors of old and rare coins are advised to take jobs as collectors on toll bridges, if they can get them, in order to augment their collections.

The experiences of employees of the toll bridge at Sunbury, Pennsylvania, justify the advice.

R. A. Wheeland, one of the collectors here, reported his latest find was a half-dollar coined in 1831. The coin was larger than the present 50-cent piece and caused Wheeland to hold up the motorist who gave it to him until the money could be examined. On one side was a head of "Miss Liberty" and on the other a spread eagle. On edge were inscribed the letters "Fifty Cents." Convinced of its authenticity, Wheeland gave the motorist 60 cents change.

Other curious coins recently taken in by Wheeland included an English piece of silver, a Cuban coin and other foreign money.

Endowing the Migratory Birds Act

Officers of the Royal Canadian Mounted Police, acting for the National Parks Branch, Department of the Interior, which administers the Migratory Birds Convention Act in Canada, assisted at Ottawa recently three live bobolinks (goglins) which were being kept in captivity as cage birds. The birds were taken in Rockcliffe Game Preserve and released in congenial surroundings. Practically all wild birds are protected by Dominion and Provincial law and may not be kept in captivity. Persons violating these laws are liable to heavy penalties.

"Dad, lend me your pocket knife."
"What for, son?"
"To carve my name on the dining room table."—Sandgarten-Stein, Stockholm.

W. N. U. 1909

PEACOCK IN FULL DRESS PARADE IN BEACON HILL PARK, VICTORIA, BRITISH COLUMBIA

Four Royal Golfers

Sons Of King George Are Enthusiastic

The Prince of Wales's enthusiasm for golf has secured another royal convert, the Duke of Gloucester. The Prince was the first to catch the golfing fever, and he was very quickly followed by the Duke of York, who when he is in practice makes a very level match of it. Not long ago Prince George took to the game and had lessons from Arthur Havers. He shows the same keen desire for practice as the Prince of Wales. And now the Duke of Gloucester has been playing golf while at Cowes with members of the Royal Yacht Squadron, and is planning to join a club in Berkshire. That means that all four brothers are now golfers, and I imagine that before long there will be some pretty interesting battles between them. If they are keen rivals in sport, Prince George, doubtless will keep up his tennis and his love for playing the piano. Few people realize what a talented pianist he is, both of modern and classical music. He has the musical gift which makes it a joy over a time he has only heard once.

Walking Comes Back

Many City People Removing Interest In Shoeless Exercise

Walking seems to be regaining its dignity. New York people who used to drop in to the subway to go six or eight blocks are now walking and saving their nickel.

Walking for pleasure is also on the rise. There is not so much evidence of hordes of well-shod hikers comfortably dressed for making mileage, but great numbers with unaccustomed leisure on their hands find walking is pleasant and healthful. They are eager to learn of quiet roads, free from dangerous traffic, shady and picturesque.

In 1915 the Newark public library listed "Walks Near Newark," some twenty short trips. The list was revised four times to the present. The ubiquity of the motor car made many toss the tests or the opportunity for walks. Renewed interest has prompted the library to ask for fresh suggestions about enjoyable trips from individuals or walking clubs.

How Evolution Of Science

Frozen Cider Will Keep Sweet For Several Months

Modern Science is always coming to the fore with some new wrinkle which enables the market for fresh products. One of the latest evolutions is frozen sweet cider. When it comes from the press cider is frozen to zero degrees F. and held at that temperature until thawed for sale or use. When thawed out it is perfectly fresh and sweet. It will keep seven months or more held at zero, and there is every prospect that it may be developed into an important beverage outlet or by-product for orchardists. —Dominion Department of Agriculture.

Don't judge a man by his clan. The biggest fiddle in the orchestra plays the finest notes.

How finished's better ruined but increased 7 per cent. in the last year.

New Mast Careless In Crossing Street

Wrapped Shoes Show Owner Opinions Of Himself

"Men are funnier than women when it comes to crossing the street without getting up on a stretcher," says a Winnipeg policeman. He spoke as if he knew what he was talking about. More than 30 years of watching traffic and "cops-and-robbers" had given him plenty of experience.

"Men," he continued, "will walk in the path of an oncoming car and time themselves so that it will barely miss them. They like to take chances and show off, especially the youngest fellows. And you'll see them, when into a stream of moving autos and dodge their way across the street just to save a few seconds. Women shoot more zeros."

With men it's most often a case of not looking where they're going. They have their minds on a business problem, or a golf game or on nothing in particular, and the next thing they know they're doing a leap. "It's hard to believe," said one cynic cited, "but I know of cases where a man has walked step into the side of a street car, apparently without even knowing it was there until he hit it—and I've yet to see the man who can tackle a street car with any success."

With women, accidents usually result from their getting excited. They see, for instance, an approaching street car which they want to catch and they get so excited about getting to the brake in time to flag it that they run into the path of an auto.

A Haunted Complement

Guest—I wonder if you would mind giving me the recipe for that plum cake you served this afternoon at tea?

Hostess—Why, I'll be delighted to give it to you. But your wife makes the most beautiful plum cake!

Guest—I know, but in this time of depression I want her to be more economical.

Industrial activity in Shanghai, China, is increasing.

Live Stock Food

Investigation Work Under Way To Determine Relative Value Of Different Products

The ruinous prices of grain during the last couple of years has aroused special interest in the relative values of different kinds of live stock feed. Early in 1931, wheat pool officials appealed to the Grain Research Committee, stating that in the preparation of a circular for their members they had found great difficulty in finding authoritative published information, and asking whether something could not be done to summarize the results of feeding experiments, particularly in relation to barley, a home-grown product, and corn, a product largely imported.

The Committee found on inquiry that Professor H. W. Crampton, of Macdonald College, had already started some work along this line. They asked him to undertake the work in extending the scope of his investigation to cover all the modern published literature available on the comparative value of wheat, oats, barley, rye and corn for feeding horses, cattle, sheep and swine. Poultry feeding, it may be remarked in passing, is now the subject of a special investigation by Professor Herner, of the University of Manitoba, assisted by the National Research Council. Professor Crampton's report should be ready for publication before the end of the present year. It will not only give extremely useful information on the value of these grains for feed, as shown by a statistical study of the results of over seventeen hundred experiments, but it will also indicate some of the lines along which future animal feeding experiments might profitably be directed.

Subsidy On Sheep

A railroad company in England runs what is called the "whitewash special." The train carries no passengers, but it is equipped to note every jolt and bump on the tracks. As a bonus to help a splash of white-wash is dropped on the ground to mark the spot for repair crews.

The Anglo-Irish Dispute

Britain Has Treaties And Empire Claims, Eire

We must recognize that Britain and the Free State under her present Government have now definitely to the parting of the ways. For many it is a case of strange bedmates, though it is almost desperately grave, there is here but the slightest excuse for passion or heroics. The Free State can be once a republic tomorrow without the loss of a single drop of blood. She is as free to walk out of the British Commonwealth of Nations as a man is free to walk out of church. Britain offers no threats, and has not the least desire to be vindictive. On the contrary, all her transactions with Mr. de Valera's Government have abounded in good-will. It is manifest however that Britain has counted the cost, and has decided that, as between Free State and Empire, she must choose Empire. She cannot afford to have an alien and distrustful element in the British Commonwealth of Nations.—Weekly Irish Times, Dublin.

Poor Sells Historic Abbey

Was Founded Thousand Years Ago By King Athelston

"It has 67 bedrooms, and who in the world wants 67 bedrooms," was most possibly cheap to 67 bedrooms!"

Thus Sir Eric Hambro, famous banker, explains why he sold remaining old Milton Abbey, historic Dorset seat of the Hambros—but to Sir Eric just an irritating "white elephant and a nuisance.

The name of the buyer of the venerable Abbey is not, for the present, made public.

Milton Abbey was founded a thousand years ago by King Athelston, and remodelled in the 14th century by the Benedictine friars.

Except for the monks' hall and the refectory—"a stately apartment with a roof of Irish oak"—all the monastic buildings were pulled down in 1771.

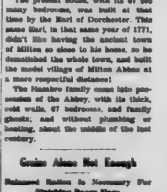
The present house, with its 67 two single bedrooms, was built at the time by the Earl of Dorchester. This same Earl, in that same year of 1771, didn't like having the great tower of Milton so close to his home, so demolished the whole town, and built the model village of Milton Abbas at a more respectful distance!

The Hambro family came into possession of the Abbey, with its thick, cold walls, 67 bedrooms, and family ghosts; and without plumbing or heating, about the middle of the last century.

Grains Alone Not Enough

Balanced Ration Is Necessary For Fattening Hogs

In order fully to realize the opportunity which is his in marketing hogs on hogs the farmer of the prairie provinces, in particular, must realize as a fundamental fact that grains alone are not enough to make good pork. Skim milk in some form is available it supplies the ideal protein supplement, or balance, to the ration, but in many parts of Western Canada, in particular, all that is say form is scarce. In such cases tankage should be included in the meal mixture. It is an ideal supplement and adds meat to the feed even when milk is available in abundance. To make your home-grown feeds count you must feed a balanced ration, and tankage is a good means to this end.



"Can I have tomorrow off, ma'am?"
"Tom, why do you ask?"
"I was thinking of getting married, but if it does not suit you, I can have me by day."—Sam Hoster, Madrid.

FANCIFUL FABLES

Quick RELIEF from pain

A lot of things can cause a headache or other pain, but there is one thing that will always give you relief! Just take a tablet or two of Aspirin. Your suffering ceases. Relief comes instantly, regardless of what may have been making your head throb with pain.

Aspirin is harmless—cannot depress the heart. So there's no use waiting for a headache to "wear off"! It is useless to endure pain of any kind when you can get Aspirin. It is a blessing to women who suffer regular systemic pain; to men who must work on, in spite of eye-strain, fatigue or neuralgia.

Learn its quick relief for colds, for neuritis, rheumatism, lumbago. Be sure to get Aspirin and not a substitute. All druggists sell Aspirin tablets. "Aspirin" is a trade-mark registered in Canada.

W. N. U. 1909

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of "The Splendid Outcast," "The Herself Of Her," "The Sunset Bridge," "Dorothy Drummond," etc.

London: Hutchinson & Co. (Publishers) Ltd.

Tortured beyond bearing, this final taunt, leveled at the woman he held more dear than anything in life, snapped the last thread of self-control.

He flung himself forward and his hands were gripping, gripping at the soft ivory throat from which the taunt had sprung. He felt the woman writhe, struggling to pull his hands from her neck. But it meant nothing to him. He did not think of her any longer as a woman. She was something vile—leprous to the very core of her being—a thing to be destroyed. The thing which had made of all Jean's promised happiness a black and bitter mockery.

The mad Tormarin rage surged through him. He was a killer, driven. He would break her—break her and utterly destroy her just as one destroyed a deadly snake.

And then across the thunderous roar that beat in his ears came the beloved voice, the voice that would have power to call him out of the depths of hell itself—Jean's voice.

"Jean," he said very gently and pitifully. "I'm afraid that what Madame de Varigny says may be true. I have no proof that it is not—"

"How have you any proof that it is," broke in Jean swiftly. She swung round on Madame de Varigny. "Where is your proof—where is your proof?"

The Italian smiled.

"Mon cher Tor-me-rin will find his wife in my car. I bade the chauffeur wait with it at the lodge gate."

"Do you mean you have brought Nesta—here?" cried Blaise.

"Why not?" replied Madame de Varigny, with a return to the same exasperating complacency with which she had originally described her white scheme of revenge. "And—here I surely her husband's home is the proper place to which to bring his wife?"

"She cannot remain here," said Blaise with decision.

"Yes? For the moment that was not my idea. I brought her with me because I thought there could be no more convincing proof."

Blaise looked at her contemptuously. He hesitated to declared a false note in her voluble speech, and a new idea, presented itself to him. Was the woman simply putting up a gigantic bluff? Or was it really Nesta, his wife, waiting in the car at the lodge gates? It occurred to him as perfectly feasible that it might be merely some woman whose remarkable resemblance to the dead girl had suggested to the Countess's fertile brain the scheme that she should impersonate her.

His mind seized eagerly upon the idea, bolstering it up with Madame de Varigny's own admission. "I made it all the changes in her appearance," she had said. "The colour of her hair, the way of dressing it." Probably she was relying on those "little changes," and on the blurred recollection remaining from the length of time which had elapsed since Nesta's death, to aid her in her plan of introducing an ally with a woman who closely resembled her. He felt mentally sure of it, and the light of hope suddenly shone bravely.

"I believe you are deceiving me," said quietly. "Lying—as you have lied all through the piece. I'll come and see this 'wife' you have waiting in the car for me"—grimly. He turned to Jean. "Keep up your courage, sweetheart," he said in a low voice full of infinite solicitude. "I believe the whole thing is a put-up job to separate us."

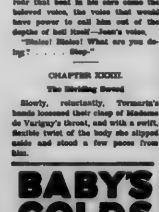
Jean smiled at him radiantly. She felt all at once very confident. In a few minutes this nightmarish story of a Nesta still alive and claiming her rights as Blaise's wife would be proved a lie.

Tormarin crossed the room and closed the door.

"Now, Madame de Varigny—will you come with me?"

The woman hesitated a moment.

"Come," insisted Blaise firmly. "Or



for INDIGESTION
Your Druggist has a name for it. Such indigestion as you've got is MINARD'S KING OF PAIN LINIMENT
MINARD'S KING OF PAIN LINIMENT

—are you afraid, after all, to bring me face to face with my wife?"

She shook her head.

"No," she said. "I am not afraid. It is only that I am so sorry—so sorry for the little Jean."

Her eyes, soft and dark and liquid as the eyes of a doe, sought Jean's heroically.

"I am so sorry," she repeated. And paused, slowly—almost unwillingly, it seemed, out of the room, followed by Tormarin.

. . . . . .

Jean raised her head from Blaise's shoulder and pushed back her hair, damp with perspiration, from her forehead. It seemed to her that, since she had been down, down into some awful, limitless abyss of darkness from which she was now faintly struggling back to a painful consciousness of material things. A great ear had surged over her head, blotting out everything, and remained poised above her like a huge black arch, imprisoning her in the vast, deserted darkness in which she had been groping. Then—after a long time, it seemed—it had surged away again and she could distinguish Blaise's face bent above her.

"Then—then it's true?" she said stupidly. Her voice sounded tiny, even to herself—a mere thread of sound. Blaise made no answer. He only held her a little closer in his arms. She supposed he hadn't heard that little thread of voice. She must try again.

"Is it true, Blaise? Is Nesta—" But somehow she had made herself understood.

"Yes," he said baldly. "It's true. Jean is alive. You were right."

Jean said nothing. She knew it—had known it all the time the ancient wall of sea had kept her down in that awful black waste where there had been neither warmth nor sunshine but only bitter, freezing cold and lightless gloom. She clung a little closer to Blaise, like a frightened, exhausted child.

"Heart's beloved . . . . little dear-est Jean . . . ." She heard the strong murmur of his voice above her head. Then suddenly, his arms tightening round her. "My soul!"

The sunlight still shouted in through the windows, mellow and golden. A gay thrust of laughter came up from

Ardrossan Schools Hold Good Fair

Ardrossan annual school fairs comprised of Agricola, Baker, Brookville, Garden, Ypres Valley, Yorkville, Partridge Hill schools, was held on Friday in the Orange hall and Presbyterian church building. Ideal weather conditions prevailed.

The attendance was not quite as large as last year, as practically every threshing outfit was at work in the various districts. The vegetable exhibits were of high quality despite the fact that dry weather continued throughout the summer.

The speakers and judges present were introduced by the chairman, Mr Webb.

Mr. Robinson was the speaker on education and voiced complimentary remarks on the school exhibits, comparing with 125 other fairs in the association, the above schools had done exceedingly well.

Mr. Black of Vermilion school judge of poultry and livestock, said that the exhibits shown compared most favorably with other districts, with special mention of the poultry which were shown in wire crates with sliding fronts, which showed the exhibits to much better advantage.

Following are the winners of scholarships for agricultural short courses at Vermilion school.

Girls—Vera Grayson, Agricola school; Gladys Grayson, who was also winner in 1931 and attended the Vermilion school in 1932.

Alternate—Ethel White, Garden school and Beryl MacKay, Agricola school are alternates.

Boys—Billy Grayson, Agricola and Joe Rye, Partridge Hill; Kenneth Galloway, Yorkville and Herb Manning, alternates.

CHANGE OF TRAIN TIME

Commencing Oct. 2, train No. 5 Westbound leaves Fort Saskatchewan 5:40 a.m. instead of 6:15 a.m. No. 6 Eastbound unchanged arrives Fort Saskatchewan 10:03 p.m.

No. 5 connects with No. 1 at Edmonton for Vancouver. No. 1 leaving Edmonton 6:30 a.m. instead of 11:30.

COMING EVENTS

The St. George's W. A. will meet at the home of Mrs. Ed. Graham on Thursday, Sept. 29th, at 3 o'clock.

ANNUAL BUSHAGE SALE

Under the Auspices of the Women's Institute.

The annual Bazaar and Sale will be held in the "Furniture Store" on Saturday, Oct. 1st, opening at 9 a.m.

Will citizens please help to make this sale a success by looking up any clothing, furniture, home furnishings, dishes, kitchen utensils etc. that they can spare and have their contributions ready to be called for on Thursday and Friday, Sept. 29th and 30th.

Farms and Farm Mortgages

In these days when so much is heard of the burden of mortgage indebtedness carried by the farmers of the Dominion, and more especially of Western Canada, the official figures contained in the bulletin recently issued by the Dominion Bureau of Statistics at Ottawa, and which are based on information compiled in the census taking of last year, are of more than passing interest. Furthermore, they are important and encouraging in that they dispute the prevailing impression that, with but few exceptions, the farms of Western Canada are under heavy mortgage. The fact is that two out of every three farms in Canada are free from mortgage debt, and while the number of mortgaged farms is naturally higher in a more recently settled country like the three prairie provinces, even in these provinces less than one-half of the farms are mortgaged. This is quite different from the oft-repeated assertion that is to 80 per cent. of all Western farms are mortgaged.

The census bulletin is replete with interesting and valuable information, but space will permit mention of only a few of the highlights of the report. Of the 726,564 farms in Canada in 1921, full owners of farms numbered 384,-809, part owners and part tenants 67,943, and tenants only 74,352, with 41 reported in the Yukon.

While the number of "full owners" decreased by 38,042 in the ten years elapsing since 1921, the number of part owners and part tenants increased by 27,976 and tenants only by 15,627. In the three prairie provinces fully owned farms comprise 77,564,201 acres, and rented farms 23,718,401 acres. Of the partly owned and partly rented farms in these three provinces, 16,-602,881 acres are owned and 13,773,884 acres rented.

The average size of all farms in Canada is 326.45 acres, the average size in Ontario being 112.55 acres and in Quebec 139.51 acres, but in the West the average is much larger, it being 379.10 acres in Manitoba, 460.15 acres in Alberta, and 497.35 acres in Saskatchewan.

The value of land in farms in Canada is stated to be $3,704,760,386, Saskatchewan ranking first with $1,201,134,350, Ontario second with $877,437,-960, Alberta third with $835,372,995, Quebec fourth with $432,168,960, and Manitoba fifth with $360,370,360.

The value of buildings on farms in Canada totals $1,341,052,030, Ontario coming first with $467,260,350, Quebec second with $296,170,300, Saskatchewan third with $226,944,990, Alberta fourth with $187,288,980, and Manitoba fifth with $86,268,380.

Combined land and buildings values, Ontario is first, Saskatchewan second, Quebec third, Alberta fourth, and Manitoba fifth.

Coming back to the subject mentioned in the opening paragraph of this article, "Mortgages," it is to be noted that at the census of 1921 every farmer owner in Canada was asked, for the first time, to state the total mortgage on his farm. The mortgage debt reported under this inquiry included not only the debt secured by an instrument usually known as a mortgage, but also that protected by deeds of trust, judgments, or by other legal instrument that portrays as the balance of a mortgage not which has the same legal effect. The answer to this question did not include debts secured by chattel mortgages, liens on implements, machinery or live stock. Nor did the inquiry apply to farms or parts of farms rented.

The tabulated results show that 384,811 farms out of the total of 726,564 farms in Canada, or 52.9 per cent. were mortgaged to the aggregate amount of $277,984,360, or 16% per cent. of the value of all farms, and approximately 25 per cent. of the value of owned farms to which the inquiry was confined.

Out of a total of 102,174 farms in Ontario, 71,594 reported mortgages amounting in all to $200,781,980, or 57.36 per cent. of the total. The average mortgage in Ontario was $2,810, and the ratio of mortgage to the value of all farms 15.85 per cent. The figures for Quebec and the Maritime Provinces are considerably lower.

Contrasting Ontario with the three prairie provinces we find:

Manitoba—46,116 farms; 16,464, or 35.7 per cent. of the total, reporting mortgages amounting to $60,000,360; average mortgage $3,170; ratio of mortgage to value of farms 20.51 per cent.

Saskatchewan—136,672 farms; 58,607, or 42.86 per cent. of the total, reporting mortgages amounting to $177,669,800; average mortgage $3,150; ratio of mortgage to value of farms 17.67 per cent.

Alberta—97,566 farms; 54,266, or 55.39 per cent. of the total, reporting mortgages amounting to $105,403,760; average mortgage $3,502; ratio of mortgage to value of farms 16.37 per cent.

It will be seen, therefore, that in these newer provinces the percentage of farms mortgaged is much lower than is generally entitled Contrary to the average mortgages is not much larger; and that the ratio of mortgages to the value of the farms is lower in Alberta and Saskatchewan and only slightly higher in the case of Manitoba.—A truly remarkable showing for this country, much of it still in the pioneering stage of development, and a showing that should be full of encouragement for the future.

Visitors to the Slavery of the British Museum are now more than 1,-200,000 every year. There are over 4,000,000 volumes on the sixty miles of shelves.

Stranger: "I've come out here to recuperate from a bereavement in my family."

Native: "Pshaw, there's no competition."

Troubled With Her Children Having Summer Complaint

Mrs. L. E. Montgomery, Ave. E. South, Saskatoon, Sask., writes:—"I am the mother of two children and have a great deal of trouble with them having summer complaint, in fact, several times every Summer they are troubled in attacks.

"I have found Dr. Fowler's Extract of Wild Strawberry to be the most effective remedy and keep it always handy and place it immediately on the first sign of any bowel complaint.

"Thanks to Dr. Fowler's I no longer dread the Summer months."

The Latest Invention

Wireless Communication Without Telegraph Line Now Taken

What is believed to be the first wireless telephone communication without wires in transmission and reception was accomplished recently when Walter Bosse, proprietor of a roadside restaurant along the Lachawanna Trail, demonstrated his invention to a group of witnesses.

Bosse talked over his home-made wireless and wireless telephone for 30 minutes over a distance of more than 100 feet. A head-set and mouthpiece was set in one building and a similar apparatus in another some distance away. Bosse set was operated on a six-volt battery and practically all the parts were made by the inventor, who has been experimenting for some time.

Bosse says that by properly a mail carrier at Doylestown, Pennsylvania, and that the time is near when wireless, tubeless telephone systems can be installed, with a central station operated in the same manner as at the present time. Development and establishment of the system will save an enormous operating cost, he believes.

Bosse also declared that he could transmit across the route of the Suntan of the magnetic needle as a result of extensive experiments which, he says, are practically completed and will be announced on March 6, this year, leading to the

A Big Undertaking

Factory Moved With No Loss Of Time

A complete engineering factory has been removed from London to Chippenham, 94 miles away, without the loss of a single working hour.

At the end of every working day for three weeks a number of the machines on a single lorry and removed to the new factory. They were immediately installed and were ready for work again the following morning.

Every employee, with his family and household effects, moved to Chippenham with the factory. Under the supervision of the engineers, the complicated piece of machinery which it was his work to tend was being removed piece by piece from London in the evening and started work at Chippenham the

Sixty-four machines, valued at £50,000, with a total weight of 1,000 tons, were moved.

Another 750 tons of machinery, the furniture of 36 families, and more than 100 pages were moved.

Ship Has Anthem, Radio's Gift

Anthem a great advantage. The new steamer Ile has entered a business fashion fit grip on the broadcast programmes. Dr. J. D. Kellogg's Anthem Remedy is daily broadcasting news of authors of long standing cures of suffering. Testimonials have been prevailed had the remedy been used when the trouble was in its first stages. Do not neglect asthma, but use this preparation at once.

Children's Hall Of Honor

Many Names Go Record In County Hall, London, England

In one of the corridors of the County Hall, London, England, is a Hall of Honor, there are the names of nearly 600 school children who have received Royal Humane Society awards for saving life or attempting to save, persons from drowning at great risk to themselves. The Hall is one of the most interesting sights of the London Schools Swimming Association, which for 40 years has been doing splendid work among children. The age of the children ranges from ten to 14 years.

Douglas' Egyptian Liniment makes the finest blister known. Invaluable for all pains and aches. Is absorbed and healthy results. Sold by all dealers. No new remedy.

Canada's Wood Pulp Exports

The total quantity of wood-pulp exported from Canada in 1926 according to the figures lately issued by the Dominion Bureau of Statistics, in co-operation with the forest service department of the interior, was 760,259 tons, valued at $30,660,973. The average value was thus $61.28 per ton.

A cake containing cash and jewels worth $6,000, which an American woman reported she had lost after leaving at Plymouth, England, was found later in the boot train to London.

Increase In Indian Population

More Indians In Canada Now Than Ever Before

Department of Indian Affairs official is expressed the opinion there are more Indians in Canada now than when the first white man landed in this country. The 1921 census of the Dominion gives the total number of red men as 122,820, compared with the last department census total of 105,611.

United States has an Indian population of 333,307 according to the 1920 census Canada's population is divided as follows:

Ontario, 8,246; British Columbia, 24,599; Manitoba, 15,617; Saskatchewan, 15,206; Alberta, 13,256; Quebec 12,212; North West Territories, 4,-046; Nova Scotia, 2,191; New Brunswick, 1,620; Yukon, 1,543; Prince Edward Island 324

Diet Requires Fats

Fats Constitute a Protection Against Tuberculosis

A notable fact is that diet plays a most important part in combating tuberculosis. After the German occupation of Warsaw there was an alarming increase in tuberculosis, because the Germans removed as much fat of all kinds as they could with which to make high explosives. When the people of Warsaw were able to return to a diet containing sufficient fat, the tuberculosis declined rapidly. It is generally accepted that a diet rich in fats constitutes a definite protection against tuberculosis. Efforts made to reduce dust in factories are also cited as a contributory cause to the decline, as well as sanitation, water supply, and personal hygiene.—Montreal Star.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm in the constitution of the child. The little sufferers cannot voice their ailment, but there are many signs by vigilant mothers can easily secure that a dose of Miller's Worm Powders is necessary. Then worms are quickly and with equal promise from the system, without any inconvenience to the child.

Mission Farm Bankruptcy

Financial Position Of World's Smallest Municipality Is Serious

Monaco, the world's smallest principality, in which is located Monte Carlo, famous gambling centre, has been hard hit by the world depression, and the consequent decline of interest in causing grave alarm. M. Bouillon Lafonta, vice-president of the French Chamber of Deputies, has been made Minister of state for Monaco. Prince Louis himself has been conferring with the French ministry and from this it is evident that he regards the financial affairs of his country as serious. As a matter of fact, the principality is threatened with bankruptcy.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

Back Home To Be Over

People Are No More Crowding Into United States

Apparently the rush to America as a land of opportunity for people of all sorts has come to an end. Even land which is still available is found uncultivating. Jobs are at a premium here as they are in every other part of the world. The American economic system has arrived at a period of maturity when phenomenal growth can no longer be expected. The wrath to-come has been succeeded by a time when growth is a point considerably beyond consumption needs. Henceforth, economic development of the United States should be slower and more steady.—Washington, D.C., Post.

Where Aurora Is Charted

Returning from his cosmic ray expedition along the northwest shore of Hudson Bay, Dr. Arthur H. Compton, Chicago scientist, was in Winnipeg on his way to his home in Michigan. The point of greatest intensity of "northern lights" is directly about Churchill, he declared. From where he was at Chesterfield Inlet, the lights were to it as seen only by looking directly south.

IN TEARS WITH PAIN OF RHEUMATISM

"For six weeks," a woman writes, I had rheumatism, mostly in my feet and ankles. In fact, I have been in tears with the pain. Owing to stomach trouble, I could not take any kind of medicine, as it made me feel sick. So a lady said I should try Kruschen Salts. I am very thankful that I did so, for now I feel completely restored. I have not been taking anything else, so it must be Kruschen that has relieved me." Mrs. C.

The six mineral salts of Kruschen have a direct effect upon the whole bloodstream, neutralising uric acid, which is the recognised cause of rheumatism. They also restore the alarming organs to proper working order, and so prevent constipation, thereby checking the further formation of uric acid and other body poisons which undermine the health.

Women Loggers Work At Vancouver Inlet

Are Making Good and Not Avoiding Tough Spots

Logging has always been classed as a man's job for rough and hard-muscled, brawny men at that But over at Deep Cove, across the Inlet from Vancouver, lusty young women are engaged in this industry And they aren't avoiding the tough spots either

One woman recently exhibited five cords of fine fuel which represented her work for the week. "It's hard work all right," she admitted, "but it gets easier as you go along. At first it was heart-breaking and I felt that my back would snap in two, but my muscles are pretty hard now. It's healthy all right and I'd sooner be working here in the woods than somewhere down in the stuffy city."

The women loggers aren't all burly specimens of their sex. One woman is the mother of three children. She is a widow with five tots, and if there are muscles in her arms they are well concealed. But with the aid of a patient horse she managed to handle a prodigious amount of fallen timber during a day.

Betrayed By Fingerprints

Long-Wanted Robber Was Caught After Ten Years

Fingerprints which were ten years old recently caught up with Thomas McTyres. He had been arrested by Omaha police on a burglary charge, when his fingerprints were sent to Washington to be checked it was found that McTyres was wanted in Portland, Ore., on a ten-year-old charge of robbing a box car. Sheriff O. H. Abbott of Oregon called for McTyres to serve a prison term.

Premier Baldwin and Premier Jowett have had cordial congratulations, and eliminated the stiff. Premier greet as a flower. Cost as morning dew, fleetingly observed by Ike Simons, making the skin wonderfully soft-textured. Delightful to use as toilet lotion elegance. Delightful to use. Imparts additional charm to the complexion of women. Fashion is the one toilet requisite for the exacting woman. Perfume as a beautifier.

Give No Autographs

The King of England and his son, the Prince of Wales have turned thumbs down on autographing. George Bailey Beak, the British consul general at Montreal, has received this subject and his royal highness have laid down as a rule never to give their autographs, and that no exception to this rule can be made in any

Success Crowns Efforts Made To Save Antelope Herds In Their Native Habitat

Canada's success in bringing back the buffalo has been emulated by wild life conservationists in many parts of the world, but little has been said of her successful efforts in saving the prong-horned antelope in its native habitat in Western Canada. The march of settlement in the West made disastrous inroads on the numbers of these timid animals and when their condition was brought to the attention of the Dominion Government immediate action was taken through the Department of the Interior to establish reserves for their protection and propagation. In 1914 the first sanctuary was established and from that time on the numbers of the antelope in the Department's efforts has been most remarkable.

The main work in the conservation of the antelope is taking place at Nemiskam Park since the area of eight and a half square miles comprising the sanctuary is fenced and a definite record of the progress of the work can be kept. The herd of approximately 400 animals in this park represents the results of an interesting experiment Previous to 1915 efforts at raising antelope in captivity had been unsuccessful owing to the effects of the shock of capture. Consequently officers of the National Parks Branch of the Department of Interior, in charge of the work, hit upon the scheme of corralling a herd of antelope on a suitable grazing area. A herd of forty-two animals were observed feeding north of Medicine Hat, and the work of fencing the animals in without letting them run successfully carried out. Since then they have thriven evidently unconscious of their captivity and these graceful native animals are rapidly being restored in numbers.

At Waterton National Park, as far as observations of those in charge of the park show, the antelope which frequent this enclosed reserve are increasing. Concentrations of these animals are noticeably greater throughout the area than previous to the establishment of the park and their future in this part of the province appears assured.

Higher Wheat Prices Needed

Would Be More Than Anything Else To Bring West Back

However, taking Western Canada as a whole this will not be a deciding factor. More farmers will be able to meet their interest bills and their taxes and so provide for next year's crop, but many farmers will also have enough to pay the current year's bills.

What is needed more than anything else is a substantial increase in the price of wheat. Nothing else can do the job alone.—Financial Post.

China has decided to participate in the Chicago exposition next year.

"You only married me for my money."

"Just the opposite, dear. Because I had none."—Wahre Jakob, Berlin.

Wealth From the Land

Increase In Revenues From Alberta's Farm Products Is Expected

Several million dollars' increase in revenues from Alberta farm products is expected in 1927, compared with the 1926 figures, according to financial men.

The 1926 revenue is expected to exceed $152,000,000 compared with $147,000,000 in 1925.

Alberta farm animal production for 1926 will total $16,000,000 it is estimated. The dairy industry is estimated to realize $12,000,000, while poultry and poultry products may [illegible] It is believed, will return $3,000,000.

These figures, added to $116,000,000 net as the value of this year's field crops, result in the estimated $152,-000,000 total.

This does not allow for probable increases in market prices If any improvement in prices occurs the total will be much larger. It is pointed out

Mild Winter Predicted

Cree Indians Say There Will Be Lots Of Snow

Western Canada can prepare for a mild winter with plenty of snow if tales fall and an early spring will cut down the winter far below its usual length. That's the decision of the Cree Indians at The Pas, Man

Year after year the Indians have been calling the turn on the weather and always correctly The uncanny skill of the aborigines in forecasting the weather for the coming season is highly respected in the north country, that's certain.

To gain their information they closely observe the actions of muskrats and other animals at this time of the year.

Reducing Temperature

Officers Cooled As Well As Heated By Steam

A system for cooling business offices by steam has been tried with success in Detroit Steam under high pressure is passed through a nozzle at high velocity where it acts as a pump in the manner of Air and Water from a tank of water This produces a vacuum, cools the water rapidly, and the water is then pumped through cooling coils to reduce the temperature in the rooms. Modern science has thus destroyed another illusion, and daughter, sir!"

Newly Youth—"How should I know? Do you think I'd be guessing around when I was doing a thing like that?"

DURING recent years there has been an unexplained increase in the number of people who sport of hunting and many Canadians go afield yearly, with rifle or shotgun. No other sections of the world can offer to the sportsman the same opportunities as prevail in Canada with its vast areas of virgin forests, within rapid and comfortable means of access.

Vast Hunting Areas

This country possesses over 1,000,000 square miles of forest, much of which is ideal hunting country for the timid rabbit to the huge and dangerous grizzly bear. Moose, caribou, elk, deer, bighorn sheep, mountain goat, timber wolf and bear are plentiful and may be hunted during open seasons of generous length.

Wild Fowl Abundance

The numerous lakes and ponds of northern Canada are the breeding places of the main avian-fowl population of the American continent. Consequently ducks, geese and other waterfowl are plentiful, in normal years. The ruffed grouse or partridge is the most important upland bird and is common to every province, while woodcock, prairie chicken, Hungarian partridge and ptarmigan provide good sport, in certain districts.

Shooting Licenses Keep Off Anyone

Accessibility is an outstanding feature of much of Canada's hunting territory. The country is well served by roads, railways and steamboat lines, over which the sportsman may travel in comfort to the hunting district. Areas previously inaccessible may now be reached by aeroplane in a few hours' flight Distancing or "packing" outfits and supplies throughout game areas and at those will be found reliable outfitters and trained guides, who are prepared to look after the sportsman's every need and guarantee him the best of satisfaction. In several of the provinces it is compulsory for the hunter to be accompanied by a guide, but, even in those provinces where it is not compulsory, it is often advisable to engage guides. These men, being familiar with the territory in which they operate, are able to add greatly to the enjoyment and success of the trip.

Game Laws Of Canada

In Canada a practical form of conservation is found in the setting aside of tracts of public lands, as game reserves, and in the rigid protection of game in its extensive national and provincial parks. In these areas the game multiplies rapidly, under protection, and spreads over into the surrounding country. This favourable condition, coupled with sound protective legislation regulating the open seasons, bag limits, issuing of licenses, etc., ensures a continuous supply of game animals and birds in their native habitat. Attention to these rules is offer the hunter exceptional opportunities for sport in season.

Information With Cameras

To the camera-hunter and the nature-lover Canada's vast forests and plains offer unusual opportunities for interesting experiences and records. There is no closed season on game to the camera-hunter and, throughout the year, he will find favourable conditions to study the habits of game animals and birds and to photograph them in their natural surroundings.

Game Laws Of The Provinces

The game laws of the different provinces are drafted by the provincial governments with a view to preserving local conditions, consequently there is no uniform game law for the Dominion as a whole. As these game laws are subject to revision from year to year, persons contemplating a hunting trip are advised to obtain copies of the current game laws and regulations of the province in which they intend to hunt

The National Development Bureau of the Department of the Interior at Ottawa will gladly supply information on hunting in Canada, by either complying with requests, or referring same to other sources from which the particulars desired may be obtained.

Exports Of Home Grown Wool Have Developed Rapidly During The Past Few Years

Plymouth Rocks Sent To Arctic Outpost

Ahkvik Residents Look Forward To Having Fresh Eggs

No longer will residents at Ahkvik, one of the last outposts in the western Arctic, sigh for nice fresh eggs, Ahkvik, which is more than 1,-[illegible] miles north of Vancouver, and up in the Arctic circle, has had its population increased by thirteen people and two roosters, and the residents will have fresh eggs that is if the hens continue to lay.

G M Curnie, provincial poultry commissioner, shipped the feathered flock to P Stromberg, described as a trapping trader of Ahkvik Ahkvik has no chickens at the present time, it is stated

The chickens travelled by train to McMurray and then by boat to Ahkvik They are pure-bred-to-lay barred Plymouth Rocks and are five-and-a-half months' old pullets.

The hens are in good condition to face the long winter darkness of the north On the trip north they were fed a special laying mash and whole grain to keep them laying until they arrived.

In announcing the trip by the chickens, the poultry branch remarks that civilization is going north. Ten years ago it might not be recalled that a team of horses went as far south as Arctic Red River by boat and that the Mounties have a number of trained wenis, but imports carpet wools. Russia produces almost entirely carpet wools, and imports both the finer wools and wools of the carpet type. Neither of these countries seems likely to assume any importance in the future as an exporter of raw wool.

After reviewing the development of the sheep population, the wool production and the wool trade of each of the principal countries concerned, together with the course of raw wool prices over the past 25 years, the survey reaches the following conclusions:

There has been no exceptional increase in the sheep population or the wool production of the world in recent years, indeed, between 1920 and 1926 there appears to have been a small decrease in wool production, and although the year 1927, according to the partial estimates at present available probably witnessed an increase in production over 1926, it is not anticipated that the record level of 1925 will be appreciably exceeded. British Empire countries have maintained their share of the world's sheep population at about one-third, and their shares of the world's production of raw wool at about one-half.

In all recent years a check in the [illegible] countries or more exhibitors of the world has been the [illegible] of the United States. Since the year 1920 is the consequence of the war, from producing in manufacturing countries, and very little appear to be no abnormally large accumulation of stocks of new wool in the principal exporting countries At the end of the 1926-27 season, when stocks in certain of the principal producing areas were higher than usual they still formed only a very small proportion of the annual production. No large stocks have been allowed to accumulate through efforts to maintain prices and producers to restrict the sales or stabilize the prices of raw wool have been very [illegible]

WORLD HAPPENINGS BRIEFLY TOLD

Sir Ronald Ross, noted authority on tropical diseases, is dead, aged 75.

The adventurous whaling industry may be revived to prosperity on the British Columbia coast as a result of a run in oil prices of 30 per cent.

Selling an automobile tire before one has driven Cross took off from Welland, Ont., on a seven-year jaunt around the world.

The city of Trenton, home of Sarah Ford, aged eight, by fire. The flames destroyed 164 homes with the loss of $300,000.

The admiralty ordered the host to be held on October 1 for Germany's third "pocket battleship," to be launch for the present as "armored ship C."

Four feet of funds Berlin streets have for years been so badly neglected that a number of important thoroughfares have now been closed for heavy trucks.

Mrs. W. Thrift, of Bishop, England, whose husband was reported missing during the World War, has just been notified that he was killed near Courland.

A number of Alberta crows flew a private telegram between two points of her weather without rain this summer, according to Calgary meteorologists.

Sweden is motorized. Of every 100 vehicles one meets on its roads, only 21 are horse-drawn, the annual Swedish Road Congress at Gothenburg, Sweden, was told.

Sir Henry Simson, the physician who was in attendance at the birth of Princess Elizabeth and Princess Margaret Rose, children of the Duke of York, died suddenly of a heart attack. He was 69 years old.

Big For Shipment

From Tea Valley Of Half a Million Acres From H.B. Region

A ton and a half of fur from the northern barren lands, principally from sleek west coast of Hudson Bay, passed through The Pas, Man., recently, on the way to the markets of the world. The shipment is valued at roughly half a million dollars.

The fur—fox, mink, marten—was caught during the past year by Eskimos, Indians, and white trappers in the sub-Arctic wastes. Only the richest and most choice fur was brought down.

From Chesterfield Inlet and other points it was flown to Churchill by the three Junkers' planes of the Canadian Airways, and then loaded on to the famous sneaking train that plies between the northern port and The Pas, Manitoba.

The fur will go by Canadian National Railways to the Sevilles Preen Company in Canada and the Seligman Hay Company in London, England.

A Rich Old Reminder

Ability To Keep Store Open and Mouth Shut

A man seeking a job advertises in this way in a New York newspaper: "I have just enough brains to keep my mouth shut, my ears open and present a good executive appearance. Do you need a front for your business?"

We suspect the gentleman is not being quite frank with his public. Probably he is a very shrewd, capable person who thinks an air of humility, of self-deprecation, an orderly line of approach, may achieve the results likely to be denied a more orthodox recital of h's good qualities.

The fact is, of course, that ability to keep the mouth shut and the ears open is a mark of considerable distinction and a virtue commonly denied to a great many persons.

The "front" of "good executive appearance" and nothing to back it up is much more apt to keep his mouth open and his ears shut. If he knows enough to reverse the process he is more than just a front.—Ottawa Journal.

(By Ruth Ingram)

A WRAP-ABOUT TO MOVE, YOU'D WANT A WEE BIT HEAVY

Still another smart and flattering style for mature.

And it's cut on the wrap-over lines of becoming ease. There's a deep, slenderizing line line at the front and at the back that reduces the hips with ease. The collar is very becoming. And don't you like the shaped sleeve cuffs?

So many charming materials can be used for this attractive style.

The original was rhesn-brown wool crepe with white piqué trim.

It's perfectly grand, too, in navy crepe satin with a contrasting collar of white. Use the dull back surface for the collar and cuffs.

Style No. 766 is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. It size 38 requires 3½ yards of 39-inch material with ½ yard of 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Veteran Doctor Honored

Kansas People Pay Tribute To Trail-blazer He Represented

When twenty-one thousand persons assembled at Mulvane, Kansas, recently to honor the veteran physician who had ushered them into the world, they paid tribute not only to an individual but also to the traditions he represented.

The old-fashioned country physician was one of the heroes of his profession. Scientific names now dignify the shrewd psychology he administered along with his pills and powders. Under conditions that would be considered impossible today he performed many feats of surgery. No mud was too deep and no blizzard was too blinding to keep him from answering a call to duty. The midnight hour of hoofs along the pike usually meant that he had searched another night's rest in order to relieve some one's suffering.

The old-time country doctor is passing. As with the circuit rider and the cobbler, his type will eventually become extinct. But the recent assemblage in Kansas showed that enough tradition is left to keep the memory of the "horse and buggy" days green.—New York Evening Post.

Altitude Record

Two British Pilots Make Claims To New High Records

British pilots, flying at opposite ends of the Empire, have succeeded almost in two new aviation altitude records.

Captain Cyril Uwins claimed a new record for land planes, with a flight to 40,000 feet at Bristol. The official record is 43,164.8 feet, held by Lieutenant Apollo Onozek, United States navy.

At Port Darwin, Australia, an aeroplane stationed to the German navy's ship, "Emden," was reported as claiming a new altitude record for that type of ship, with a flight to 30,000 feet.

It was also claimed that a balloon released from the "Albatross" (without passengers) reached a height of 40,000 feet, or more than 13 miles. This was not up as a record. There are no official records for passengerless balloons. Professor Auguste Piccard rose nearly 11 miles over Italy in his latest stratospheric ascension.

Epitaph Was Fitting

Tombstone Dealer (after several futile suggestions): "Shall I put down as a epitaph 'Gone Home' do for an inscription?"

The Widow: "I guess that will be all right. It was about the last place he ever thought of going."

SUNDAY SCHOOL LESSON

OCTOBER 9

CHRISTIAN STANDARDS OF LIFE —THE CHRISTIAN'S DEVOTIONAL LIFE

Golden Text: Grow in the grace and knowledge of our Lord and Saviour Jesus Christ." 2 Peter 3:18.

Lesson Psalms 1:1-6. 119 9-16 Daniel 6 10. Matthew 6 5-15 Timothy 3 14-17.

Devotional Reading Psalm 122

Explanations and Comments

Prayer in the Christian's Devotional Life, Matthew 6 5-15. It was the appearance of righteousness that the hypocrites coveted, not the righteousness itself, and Jesus bade His disciples not to pray as they do—standing in conspicuous places to be seen of men. They have received their reward, said Jesus, they have been seen of men and this was what they desired, they have no claim whatever to any further reward.

"After this manner therefore pray ye"—thus the Lord's Prayer is prefaced in Matthew's Gospel. It does not mean that the prayer which follows is the only one to be offered. Rather does it counsel us to let our prayers be constituted like this Model Prayer, in that there shall be divine and human interests, with spiritual and physical traits. It prohibits us of many things which we are prone to forget when we commune with God: Too many thees of prayer as petition for personal needs or desires, whereas this prayer is for others as well as for self, and is concerned chiefly with God's interests in our spiritual needs.

The prayer naturally divides into two parts: first, the things of God; second, the things of man. "Our Father," is the address with which the prayer begins. God is powerful—v.13, prayer begins. God is never in the heavens in the Old Testament, but Jesus Himself always addressed Him as Father.

"Prayer is communion with God, not as the Supreme Governor who controls the universe, but as the Father who advises, strengthens, and forgives His children in answer to their cry of need."—Hiroyp Lake

Our Father, who art in heaven. This is more, shall I say, than God's local address. Our Father is in the sphere of supreme dominion, love rules the universe."—J. D. Jones.

Hallowed be Thy name. The name of God stands for God Himself. His revealed nature. Hallowed means treated as holy, reverenced, rightly worshipped. In this petition we pray that we may honor the Father in thought and life.

There are many ways in which we may fail to hallow God's name. Swearing is profaning God. Irreverent worship is profaning God. Ignoring unworthy ideas of His Nature, thinking Him cruel, sinful, to profane Him. Deeds profane the name of God more than words can.

Thy Kingdom come. Let Thy sovereignty be realized, and it will be when the words of the last petition become true: when every one's will is in perfect accord with God's will as was the will of Jesus.

"The prettiest dress at the picnic" everybody said

I must tell you about going to a big all day picnic," writes a woman from Ontario. "I thought I couldn't go because I had nothing fit to wear and couldn't afford a new dress. The day before the druggist showed me a wonderful new dust powder made by the people who make Diamond Dyes which I have often used in dyeing dark colors. These new Diamond Tints, he explained, are the same high quality as Diamond Dyes. The difference is they are for light shades and don't require boiling. I had a dress left from last year which faded and was so streaked and ugly it was ashamed to wear it. I decided to try Diamond Tints on it. I never grown! I got to the SHADE just dissolved the powder in the rinse water and the dress came out the loveliest green! I got to the picnic after all and everybody said my dress was the prettiest one there, thanks to these new Diamond Tints."

DIAMOND TINTS 15¢ AT ALL DRUG STORES

Many Veterans Employed

England has completed arrangements for the extensive employment in the government employ of more than 13,000 ex-service clerks, who had been given temporary employment. They will be engaged on a permanent basis. In addition more than 2,000 temporary women clerks and stenographers are to be given permanent employment.

Rice was brought to this country by a sea captain, returning from a voyage to Madagascar, in 1694.

DEFINITE HELP FOR DWELLERS IN APARTMENTS

Odorless way found to cook fish, cauliflower and cabbage

CANAPAR IS A PRODUCT OF HAMILTON FIRM

Lives there a woman, in apartment, duplex or home, who has not at some time or other reluctantly foregone fish, cabbage, and cauliflower because of the odors they give off when being cooked? Or who has not suffered from other people class by who cooked these foods regardless?

Canapar entirely does away with this annoyance. More than that, it actually improves flavor and food value. Cooking in Canapar parchlin like Imperial French method of simmering and cooking food in its own juices to the closed casserole.

Canapar comes in large sheets, in a handsome package. When boiling vegetables you simply wet the sheet of Canapar and make a bag similar to a pudding bag. If you are steaming them you line your steamer with Canapar, arrange food and seasoning, and fold over sheet of the Canapar to prevent steam from dripping back.

Boiled or steamed fish is particularly delicious done this way. The fish is cooked in its kinks, so no greasy hands to clean. When roasting meat, line the pan with Canapar. It prevents the fat and juice from burning, and eliminates scouring of the pan afterwards.

Canapar saves fuel. You can cook three vegetables simultaneously in the same saucepan with it, without intermingling of flavors. And it is your "insurance" that you have the most other way to keep it on the towel rack to dry. Use it over and over again.

Lots of women use Canapar for a dish cloth—it is so silky and satisfactory, and does not spread lint. This is a particularly good use if you happen to pierce the sheet of Canapar while using the food during the cooking. Canapar is made by the makers of PARA-SANI, the famous invisible waved paper in the Green box.

Special Offer

Most grocers, druggists and department stores sell Canapar. If they don't, send the coupon direct and you'll get you a new and unique book entitled "Leftovers" containing one hundred recipes as a bonus for your trouble.

Manuscript, Canadian National Railways

TODAY in Vancouver, British Columbia, the Hindu residents form a picturesque contrast to the Chinese among whom they live. Many of them are wealthy merchants and financiers. Vancouver has a Hindu population of 2,000, and there are 5,000 in the province. Most of the Hindus are Sikhs from the Punjab district of Northern India. Vancouver has a Hindu temple.

PREMIER ISSUES SUMMARY OF RAILWAY PROBE

Ottawa, Oct Complete revolution in control and regulation of all railways as well as of the control and management of the National system is directly implied by the official abstract of the report of the Duff transportation commission issued by Prime Minister Bennett.

Three recommendations open an unbridgable chasm between railway administration in the past and railway administration in the future They are.

1—Abolition of the present National Railway directorate and the substitution as the supreme body of control of a board of three trustees.

2 Provision for a joint committee composed of National Railway trustees and Canadian Pacific directors to formulate and put into operation joint economies, to remove duplication, to prevent unnecessary competition.

3 Creation of a super-control board, called an arbitral board, of three members to decide matters upon which the joint Committee cannot agree

This board, within a defined, but wide, field of jurisdiction, is to have authority over both railways as well as over the board of railway commissioners. From a decision of the arbitral board there is to be, really, no appeal

These are the major recommendations, but there are others:

1- There is a thinly-veiled reference to the "inelasticity" of freight rates being one of the important contributing factors in the present problem. This can have reference only to the Crow's Nest Pass rates, enforced on the railways by statute in 1925. The complete report, when issued, seems likely to carry a recommendation that statutory or board control of railways be withdrawn.

2- There is an intimation that an official plan for the National Railways will be found in the official text of the report, which indicates that the National's capital structure may be up for revision.

In the negative sense, the report is important because it strongly condemns any scheme of railway amalgamation or of the leasing of the National to the Canadian Pacific.

Accompanying the abstract of the report is a brief statement from Premier R. B. Bennett, in which he declares that legislation giving effect to the recommendations which the government decides are in the public interest, will be introduced shortly after parliament opens in October.

Manitoba Marketing Board

Syndicate to Handling The Four Million Bushel Issue

Winnipeg, Manitoba—Manitoba's new $4,000,000 bond issue will be placed on the market at $96.75 and will yield a little better than 5.35 per cent. interest, Hon. E. A. McPherson, provincial treasurer, announced. A syndicate of eight banking and investment houses is handling the issue.

All arrangements have been completed for offering the bonds to the public, Mr. McPherson said. They will bear interest at the rate of five and one-half per cent. on their face value, and will mature in 20 years. Principal and interest are payable in Canadian funds.

Judge Of Supreme Court

Ottawa, Ont.—Mr. Justice Oswald S. Crocket, of the King's Bench Division of the Supreme Court of New Brunswick, has been appointed a judge of the Supreme Court of Canada. He fills the vacancy caused by the death late last fall of Mr. Justice E. L. Newcombe, a former member of the Nova Scotia Bar

Approve Shelters Relief Fund

Stresa, Italy The Danubian Conference has approved in principle a draft convention recommending among other steps the creation of a stabilization fund of $75,000,000 gold francs to relieve distress in central and southeastern Europe

Ask Aid For Bay Route

Regina Men Want Traffic Department To Solicit Shipments

Ottawa, that Establishment of an active traffic department by the government which would solicit shipments for the Hudson Bay Railway and the northern ocean port of Churchill has been urged on Hon R J. Manion, Minister of Railways and Canals. This step was advocated by a deputation which included C B. McKee, past president of the Regina Board of Trade, and George A. Ewart, present commissioner of the board.

"Mr. Manion received us very cordially and courteously," said Mr Mc Kee They were assured the matter would be given consideration

Both Regina men advanced the opinion the government, to crown its work in providing an outlet to the sea for the prairie provinces, should have an active traffic department in order that importers may route their orders and that their goods as possible via the new trade channel

"Through the Hudson Bay Railway, western Canada is brought 1,000 miles closer to the markets of the United Kingdom," said Mr McKee "When the insurance rates come down via the Arctic level, a material saving will be effected in export costs," he added.

2,500,000 bushels of wheat would be exported to Great Britain this season over the northern route, and Mr. McKee stated the first shipment of 250,000 bushels had been carried out at a saving of approximately a cent a bushel.

Indians Encamped On Ancient Reserve

Take Possession Of Land Near Selkirk, Manitoba

Winnipeg, Man. —Led by a militant chief a band of 35 families of the Sandteaux Indian tribe has decked orders of authorities and encamped on part of the land they claim as their ancient reserve, 12 miles north of Selkirk, Man.

The Indians claim the move was made in the climax of a dispute of 25 years' standing. In 1907 the band surrendered the reserve at St. Peter's and under the terms of an agreement were to get $90 per head and a reserve at Fisher River Chief Grey Eyes, head of the band, claims the people never received $90 and have been unable to make a living on the Fisher River reserve.

Appeals to the courts and even to the governor-general proved fruitless, he claims, and now he is determined to get back original rights. Other members of the band are preparing to erect houses for the winter at St. Peter's.

All Canada's Gold Comes From Mines

No Outside Hoard Such As Reported From Washington

Ottawa, Ont.—Practically all the gold which flows into the mint here comes from the mines, it was stated at the department of finance.

Despatches from Washington state that Secretary Ickes has been there to keep swindlers from buying gold and thereby at bargain prices on the profits that they want the metal for the federal government. Later this gold is melted down and taken to the mint, there to be exchanged for currency.

Apparently no such swindle has gained any headway in Canada.

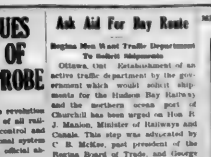
Japan May Leave League

New York.—Hirosi Saito, arriving in this country to be charge d'affaires at the Japanese embassy during Ambassador Katsuji Debuchi's leave of absence, declared his country "would not hesitate a moment" to withdraw from the League of Nations if it finds itself "compelled" to by the report compiled by the commission headed by Lord Lytton of the United Kingdom.

Case All Offshore

Victoria, B.C.—Carrying a full deck complement of certificated officers, the first ship so manned to leave the port of Glasgow, the British steamer "Mavoria," Capt. J. L. McQueen, of the Dominion line, is in Victoria after a passage of thirty days from the Clyde.

Mentioned For Prominent Post



Bishop Owen of Niagara prominent Church of England dignitary who is mentioned for the post of Bishop of Toronto. The election takes place on October 24th when a successor to Archbishop Sweeney will be chosen by synod delegates.

Plan Trip To Arctic

French Explorers May Undertake Journey Across Canada By Car

Montreal, Que French explorers who made expeditions into Africa and Asia by caterpillar automobiles, may soon undertake a journey across Canada into the Arctic circle.

Jean Allouncherie, Parisian journalist, who described the previous explorations, is in Ottawa to discuss the possibilities with General J. H. McBrien, commissioner of the Royal Canadian Mounted Police, and to map out the details of an advance trip into the north country The journalist reached here from France by the Canadien "Aurania."

Allouncherie will proceed to Vancouver and thence to northerly ports of the Pacific. He will visit outposts of the Royal Canadian Mounted Police and missions of the Oblate Fathers in the land of Eskimos From Dawson City, which he knows well and has visited before, he will travel by aeroplane to Aklavik.

Saskatchewan Hay Have London Agent

Premier Anderson Interested Applicant, must Was Being Considered

Saskatoon, Sask —Speaking at a meeting here of the Kiwanis Club, Premier Anderson intimated his government was considering the appointment of a Saskatchewan agent in London, England.

He said one of the duties of such an official would be to see that all merchandise leaving Great Britain for the prairies was routed via Churchill and Hudson Bay In addition, the agent would develop trade for Saskatchewan in British markets. He also declared the people of Saskatchewan, by insisting that goods be brought in by the Bay could greatly assist in developing the route.

Court Rules Farm Investment Firm Of Mackay and Sharpe Out Of Business

Winnipeg, Man. The second firm with which J A Mackay, former bursar of the University of Manitoba, chancellor of Church of England and prominent Winnipeg lawyer was associated, has passed out of existence The investment firm of Mackay and Sharpe was declared bankrupt and last Saturday the legal firm of Mackay, Sharpe, Parker, Crawley and Richardson, was dissolved.

Evidence revealed at the hearing of the bankruptcy petition is only a small part of the tale that yet will have to be told," Mr. Justice Macdonald declared in granting the university's petition.

The hearing, which Mr. Justice Macdonald said had revealed "alarming disclosures," disclosed that books of the company were kept in a "slipshod manner," that all monies handled by the firm were kept in a single bank account, that the company books were audited by an accountant from the Manitoba government comptroller general's office, also employed by Mackay and Sharpe, that the firm had cash assets of only $600, and that clients were notified periodically that all accounts were in order though some trust accounts had not even been totalled in the last 16 or 17 years.

Chinese Win Case

Legal Of Orient Wins Convincing For Toronto Magistrate

Toronto, Ont.—Unanswerable logic of the Orient won a case for Lee Hi in health court. Lee was accused of dumping rubbish over his back fence on to a piece of city property.

Arguing his own case Lee answered that. The grass on the lot was nearly a foot high but where the rubbish lay there was no grass at all. Therefore, it had lain on the property for a much longer period than two weeks. Lee moved in only two weeks ago.

Magistrate Arthur Fisher, speechless, dismissed the case with a wave of the hand.

Lawyer Drowned At Coast

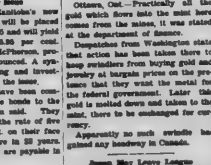
K. C. Saville Lost Life When Boat Was Upset

Salmon Arm, B.C.— Bustace Claude Saville, barrister and solicitor here for more than 20 years, was drowned while fishing off the Adams River, 16 miles from here on Shuswap Lake, when he was in a boat with Major H. W. Roberts when it overturned. Another fishing party went to the scene on learning Major Roberts' boat had capsized and Saville had evidently been drawn under by the strong current.

Debate Is Delayed

Geneva, Switzerland.—The World Disarmament Conference Bureau, resuming its deliberations without a representative from Germany, postponed discussion of the German demand for arms equality so that the German government might have time to respond to a letter urging it to continue participation.

CANADIAN BAR OFFICERS AT BANFF



The executives of the Canadian Bar Association and guests on the terrace of the Banff Springs Hotel. The convention visited the famous Rocky Mountain resort as luncheon guests of Rt. Hon. R. B. Bennett, Prime Minister of Canada. Left to right are, (standing): C. H. Barr, K.C., Regina; Louis St. Laurent, K.C., Quebec, past president; E. H. Coleman, K.C., Winnipeg, secretary-treasurer; D. H. Laird, K.C., Winnipeg; E. K. Williams, K.C., Winnipeg; Robert Taschereau, K.C., M.L.A., Quebec, honorary secretary; J. E. A. MacLeod, K.C., Calgary, Alberta. (sitting, left to right): Maitre Olivier Jalla, Paris, official French delegate; Hon. W. P. MacCracken, Washington, D.C.; Hon. H. W. Rowell, P.C., K.C., Toronto, president of the Association; Madame Jalla, Mrs. A. L. Smith, Calgary; Hon. W. P. MacCracken, Washington, D.C., official American delegate; and A. E. MacNeill, K.C., Vancouver, B.C.—Canadian Pacific Railway Photo.

HOME SECRETARY EXPLAINS ACTION ON TRADE PACTS

London, England Trade agreements reached at the Ottawa Imperial Economic Conference by the United Kingdom and the Dominions were condemned in a resolution adopted by the executive of the National Liberal Federation.

The resolution urges the government, parliament and all electors to "seriously consider the dangers and vicious principles inserted in the Ottawa agreements and opposes them by every means in their power" However, no call is made on Liberal ministers to resign from the National government.

Sir Herbert Informed the meeting Sir Herbert Samuel, Home Secretary Simonsty under-secretary for India, attended the meeting

Lady, and the daughter of Lethens parish that the Ottawa proposals were discussed by the cabinet on August 28 immediately after the return of the United Kingdom delegation. Two days later he had sent to his Liberal colleagues in the government a memorandum in which "the situation which had arisen was reviewed and a definite course of action suggested."

Hutchinson Says Route Was Safest Possible

Wrecking Of Trans-Atlantic Plane Laid Bare

Aberdeen, Scotland - The Hutchinson family, who with their crew of three were rescued from the bleak Greenland coast after wrecking their trans-Atlantic plane recently, landed at Ertbol, Scotland, from the steam trawler, "Lord Talbot."

George Hutchinson, his wife and two small children were all well, although the two little appeared to be tired. They are en route back to New York.

"If our radio had a little more range we would have been able to pick up our bearings and would have been all right," Hutchinson said describing the accident.

Hutchinson said he wanted it understood that the adventure of his flying family" was not a "stunt flight."

"The children have always been with us in our flying," he said. "Our route was the safest possible and we were only 14 miles from safety when the accident happened. It was just a bit of bad luck."

Britain Faces Rail Strike

Strike Forces For Present Is Ashed By Farmers

London, England Britain, Tuesday night, September 20, faced a countrywide hold-up of milk supplies on receipt of farmers' decision to inaugurate a "milk strike" October 1, following breakdown of negotiations between their representatives and representatives of the milk-distributing combines over contract for the forthcoming year.

A statement issued by the National Farmers' Union says the decision of the milk distributors to refuse farmers better prices for their product during the coming year renders inevitable a hold-up in the supply. Unless a last-minute step is taken, the "strike" will go into effect at the end of the month.

No Holiday For Commons

Ottawa, Ont.—The House of Commons will sit on Thanksgiving Day, Monday, October 10 Inquiry made in highly informed official circles elicited the definite informat on that the Commons would proceed with the debate on the address on that day. Parliament opens the preceding Thursday.

Claims Record

Kiel, Germany.—Lola Schuster claimed the world's record for a woman's parachute jump, reporting she had dropped 7,500 metres (about 22,000 feet) in 36 minutes.

Executed

All Soviet railway officials who appear on duty without wearing uniforms will be punished.

A Gratifying Comeback

Conditions in Saskatchewan Outlined By Winnipeg Tribune

Saskatchewan has reaped a 50 per cent comeback in one short year and the big crop rosea of the province represent substantial buying power this year, says W. L. MacTavish, editor of the Winnipeg Tribune, who has made a survey of conditions.

The Tribune article, from Regina, reads in part:

Last year the government had to find $18,000,000 for relief. This year $1,000,000 will be ample.

This spring 3,000,000 acres were seeded with wheat supplied by the government. Next spring requirements will not exceed 100,000 bushels.

Last year 35,000 families required relief. This year there will be 9,000 families.

Ninety per cent of the farmers of the province will be able this year to pay current year's taxes, repay the government seed, binder twine and binder repairs, pay all expenses of the year's work, and have enough money left to live until after harvest, and do next spring's seeding without assistance.

Three-eighths of the province plowed 20 bushels to the acre or over, one-fourth 15 to 19 bushels, one-fourth 10 to 14 bushels, only one-eighth averaged less than 10 bushels.

Saskatchewan government will balance its budget the year. Bonds maturing this year will be able to operate in normal fashion. There are no unemployed in Saskatchewan cities; they are in harvest fields together with many hundreds of transients."

Hot Rubbish Oil Produced In World

First Noranda Well is Supplying First Few Barrels

First Noranda oil well, believed to be the farthest north producer in the world, is turning out 300 gallons daily of excellent quality refined gasoline. It is intensely interesting the hands for gasoline and fuel oil in connection with the operation of boats to Great Bear Lake and the operation of machinery at the mineral field.

Ray McPhie, of Edmonton, who went north by the winter roads to Great Bear Lake, was the first customer at the well.

The oil is being obtained from Imperial Oil Well No. 1, situated about 30 miles downstream from Port Norman. It was drilled in 1920 and has been practically inactive since, except for a small amount of experimental work. It was drilled for geological information, after Discovery Well No. 1, was drilled 160 feet nearer the river and had been brought in as a producer. No. 1 for years has had a certain amount of overflow, running an oil slick along the river for many miles downstream.

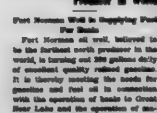
No. 2 well was reopened on June 24 by R. N. Matheson of the Imperial Oil, and his assistant, J. Rennie, and since has been a hive of activity.

Night Not Work

"There's only one solution," the Border Cities Star of Windsor has decided "Railroads will simply have to build signal towers so that locomotive can reserve out of the way of 'extras.'" But supposing no day is at the moment that the other says.

The new Strahov Stadium, being built by the government in Prague, Czecho-Slovakia, will cost $250,000.

Italy has banned the release of original French versions of talking pictures.



"I hear you are having a new house built."

"Of course. Hear hear of anybody having an old house built?"—Yorkshire, Manchester.

British naval exercises near Portland Bill, England, were abruptly terminated when a collision occurred between the mine-sweeper, "Dundalk," and the submarine "H32" in a fog. There were no casualties although the mine-sweeper was badly damaged above the water-line. Above is a picture of the submarine, one of the most highly efficient vessels in the navy. Although it is one of the smallest boats in the British navy, the "H" submarines are capable of crossing the Atlantic Ocean under their own power. Inset is a picture of the "Dundalk."

Judge Kept His Word

Retired Mr. Baldwin An Ideal Present Indeed Answer

As incidental to connection with the departure of the St. Hon. Stanley Baldwin, Mrs. Baldwin, and the other United Kingdom delegates to the Imperial Conference in the "Empress of Britain," will remain as an interesting memento to Judge Cassidy, retiring recently to Judge Cassidy, Ottawa, and the presence of Mr. Baldwin on the Island of Orleans.

Five years ago when Mr. Baldwin came to Canada as Prime Minister he was presented by Judge Pentlet with an English edition of his book on the Island of Orleans. On his return to England Judge Pentlet sent Mr. Baldwin a French edition of his book, as an appreciation of the respect of Mrs. Baldwin for the beauty of the island.

Judge Pentlet was among the guests at the banquet that "O Canada," be sung, and invited Mr. Baldwin to visit him on the Island. Mr. Baldwin, Mrs. Baldwin, and the other members of the party accepted the invitation.

"If we cannot have the pleasure of your visit, we shall endeavor to see the Empress of Britain," wrote Judge Pentlet. Accordingly, as the liner was passing the point on the island where lies the Manoir Mauvide-Genest at St. Jean, watchers on the bridge and deck of the "Empress" saw the flag, Irish and French flags, floating at their masthheads dipped three times. At the request of Mr. Baldwin, the "Empress of Britain" was provided with three pennants from her stem.

Tomato Was Originally Considered Plant

Not Recognized As Substitute Food Until Modern Times Century

With this tomato so widely used and enjoying such universal popularity as it does today, it seems hard to realize that for nearly two centuries it was used only as an ornamental garden plant. Like the tobacco plant, the tomato is a native of the Western Hemisphere, its original habitat probably having been Peru. The natives of Mexico called it the tomatoe and its first appearance in North America records about 1671. It was not until well on in the nineteenth century that the tomato, one of the most nutritious of fruits, came into popular favor on the continent.—Dominion Fruit Branch.

Send Clover For Silage

Before Ye Get Crop In Quickly After Cutting

The most suitable stage at which to cut sweet clover for ensilage is when the majority of plants are in full bloom, writes H. S. Hopkins, Dominion Field Husbandman, in his annual report for 1931. He also observes "It is feasible to haul the crop to the silo immediately after cutting or within two or three hours, while the addition of water to sweet clover silage is said to be unnecessary. Add to the case with corn-preserveth ensilage, sweet clover had to undergo in the silo for periods ranging from three to nine months does not appear to contain any damage or loss any of its palatability.

Wynndmel now has only five hotels, and Kenora Colony only four.

Plane May Come Back

Clever Propeller Instrument Has Made Near Friendships Over Radio

In the plane, the source of as much household equipment before the appearance of the phonograph and the radio, in process of ringing a comeback? Those observers say that it is and that people are tired of depending for a place for a more sing a few years ago are now returning to purchase of the instrument.

At first when the plane began to go out of the homes and radios to take its place, the manufacturers looked considerably dubious. Here was furniture music listening; often simply having being substituted for the native joys of music-making with its concomitant challenge to resourcefulness, its endless diversities and heartfelt triumphs. This passivity was wrong then it had been with the gramophone, they argued.

But the musicians, fearful of their jobs, were making without the plane. What new Republic it has made over a sadly commercialized radio. Countless listeners, old and young, have been led into regions of unthousand local wonders where the Muse plays its brilliant part. They have thrilled to its sweep and power under master hands and to its impertinent sounds and marvellous imitation of rhythm and color. They soon recognized its capacity for limitless imitation. Now in greater numbers than before, they are wanting for themselves the spiritual exercise that most highly organized mechanism ever invented for the making of music by one performer.

Britain Still Pirate

It may amuse some people to learn that the value of the second and not all the Seas of the United Kingdom made that of agricultural production in other lands—Africa or Australia. For the average producer of goods it is estimated by a writer in the London Times at £200,000,000, as against £375,000,000 in the dominions mentioned.

English Aspirants Worried

Mentor Of Lime Tree Has Intentionally Effects On Boys

Beetmasters are shocked for their keen hand on getting drunk.

Several have written to a London newspaper about it.

The boys, they say, appear to be in helpless attitudes on the ground, falling off their flowers, refusing to work, and lapsing into drunken stupors.

"Drunk? Oh, yes, the boys really are drunk. Their condition is due to the nectar of the lime tree. It has some strange toxic ingredient which has not been fully investigated.

"Only one or two other plants have the same effect. The bee has invented a good many lime flowers to drink an intoxicating quantity of nectar, but eventually he is overcome and falls to the ground.

"It is exceedingly dangerous for a bee to get drunk. If left alone he will come round in a few hours. But too often, when he is so drunk as to be helpless, a bird just eats him.

"Wasps are even more dangerous when under the influence of an intoxicant. Over-ripe Victoria plums, eaten as they lie on the ground, makes wasps drunk. When moderately drunk they go mad, and get busy with their stings, when thoroughly intoxicated they go to sleep.

"Bees have not enough have to bore through the skin of a plum, but they sometimes seize the opportunity of a crushed plum to get drunk."

Heroine Had No Attention

After struggling for a year to keep going the only theatre in Chester has folded up like an accordion. More than 500 men camped there on consecutive nights failed to thrill at nearly stars. Silent pictures were a flop. Amateur nights didn't draw them either. Talkies failed dismally.

Part of the wall of the 200-year-old "cage" at Camberwell, England, believed to have been used by Dick Turpin, has collapsed.

The Earth's Age Interests Scientists

But Problem Is Still Far From Being Solved

It would be within the scope of scientific statement to say that the mother of all things living is the earth itself. It may seem a little discourteous, therefore, to inquire too closely into the age of the spinning globe which has nourished every generation of life since the beginning, but such calculation and speculation are of perpetual interest to chemists.

A new attack is to be made on the problem by studies in Finland, where the Carnegie Institution of Washington is working with the Geological Commission of Finland to measure the radioactivity of pre-Cambrian rock formations. Of all the rocks in the world, those of Finland are chosen because their geological age can be closely estimated, and the microscopic rock layers of the earth's crust are there in comparatively undisturbed condition.

The basis of estimate of the earth's age is the relatively simple calculation of the time needed to convert sedimentary ooa deposits into stone, together with other scientific guesses at the rate of cooling of the earth's interior. Discovery of the fact that nearly all surface rocks contain minute quantities of radioactive elements has seriously upset the figures based on the measured cooling of the earth. It is known that some of the lines of heat comes from this radium contained of the rocks and not from the hot core of the earth. The earth's age, therefore, is now considered much greater than the estimate of 27,000,000 years which astronomer Lord Kelvin, one of the first scientists to make serious efforts to solve the problem.

Measurement of the loss of heat by radioactivity in Finland's oldest rock formations is intended to correct still further the Kelvin calculation. This may bring them much closer to estimates based on other evidence, so that some day science may be able to establish at the date of Mother Earth within a few million years or so.—New York Evening Post.

Challenge Of Old Habits

Modern-Going Sheary Now Tired Times Are Hard

It's not keeping up to the Joneses that makes the going heavy and slow for the average man in this country, but keeping up to what it used to be. Ten years ago when the auto demanded an extra two dollars a week it clawed. If a strike would block it from the bean, now the boss is on the can shore smoothing the wrinkles out of his brow; and the man has to do his own sweating, and now the challenge of his old habits makes a heavy demand on him. Indeed it is hard for the man who has fared sumptuously for a long period to return to buckwheat pancakes and fried pork. It's his taste that has changed, but he thinks the pancakes are not as good as they were in the days of his youth.

Trend Now Upward

It seems to be the general consensus of opinion that the proper foundation for future recovery has been laid. That means that from now on the trend is bound to be upward. When it is realized in the mercantile world and with the general public that there is no possibility of lower prices for commodities or necessities of any kind, an incentive to greater buying is inevitable.

The breed of Jersey cattle on the Island of Jersey have been kept pure and apart for 500 years.

What is called the world's largest factory for producing plastics has been completed, at Vladimir, Russia.

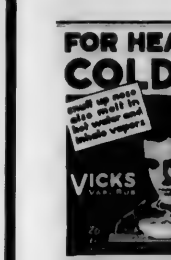
FANCIFUL FABLES

"I never contradict my wife."

"Yes? I mean I have only to wait and she contradicts herself."—All Set Ahead.

FOR HEAD COLDS

Smell up nose also melt in mouth and relieve under vapors.



THE HOUSE OF DREAMS—COME-TRUE

— BY —

MARGARET PEDLER

Author Of "The Sidelong Glimpse," "The Stonor Sculptor & Daughters, Ltd., London.

CHAPTER XXXII — Continued.

"Rest?" she said, "Rest? Do you realize that I shall have all the responsibility of it—and I? Phaugh! he nothing else to do."

She released herself very gently from Tormarin's arms and, crossing the room to the window, stood looking out.

"How funny!" she said in a rather high-pitched unnatural voice. "It all looks just the same although everything in the world is changed."

He came and stood by her side.

"No," he said quietly. "Nothing is changed, dear. Our love is the same as it was before. Always remember that."

"But we can't ever marry now."

"No. We can't marry—now. You'll never have the Tormarin temper to bear with, after all!"

She laid her hand swiftly across his lips.

"Oh, it was dreadful!" she said, recalling the terrible scene which she had interrupted. "It—it hardly seemed you, Blaise."

"For the moment it wasn't. It was the Tormarin devil—the curse of every generation. But I think that Vavigny's remark could turn a saint into a devil if she tried! She said something about you—and I couldn't stand it."

"Was that it? Then I suppose I shall have to forgive you"—with a pale little attempt at a smile.

But the half-hearted smile faded again almost instantly.

"Oh, Blaise, what would your temper matter if we could still be happy, or?" she cried passionately. "Nothing in the wide world would matter then!"

Presently she spoke again.

"But it's worse for you than for me, I think it were more equal."

"How worse for me? I don't understand. Explain with a brief, and smile—"you love me less?"

"Ah, you know I don't mean that! But I've only the separation to face. I'm not tied to somebody I don't love. You've got Nesta to consider."

"Nesta!" He gave a short, grim laugh. "Nesta can go back to where she came from."

There was a long silence. At last Iona broke it.

"Blaise, you can't do that—you can't send her away again," she said in quick, low tones. "She's your wife."

"My wife! She seems to have been oblivious of the fact and to have wished me to be equally oblivious of it for the last few years."

"Yes, of course she's been young, wickedly wrong but that doesn't alter the fact that she's your responsibility, Blaise. You must take her back."

"Take her back?" violently. "I'll be shot if I do. She's chosen to live her life without me for the last few years, she can continue to do so."

Iona laid her hand on his arm. She was smiling wistfully

"Dear, you'll have to take her back," she persisted gently. "Don't you see she's not wholly to blame? You've admitted that. You've blamed yourself in a large measure for her running away. It's up to you now to put things straight, to to give her the chance she didn't have before."

"You're discounting those last few years," he returned gravely. "Those years in which she has lived a lie, allowing me to believe her dead. Admitting and deceiving me as no man was ever deceived before. She's insulted me out of my happiness—heavily 'taken from me!"

"Yes, I know" Iona's voice quavered, but she steadied it again. "But I'm glad, she was not really to blame. Vavigny told me how how weak she is and easily led away. And she's very young. What chance would Nesta have of resisting her will against her sister's, even had she wished to return to you? She ran away to me in a fit of temper and because you had frightened her. After that—you can see for yourself. Madame de Vavigny is responsible for everything that has happened since."

But Tormarin remained silent. The quiet justice of Iona's summing up of the situation struck at him hard.

She waited a moment, then added softly:

"You must take her back, Blaise."

He wheeled round on her violently

"And put her to the test, I suppose? You did you ever love me, Iona, that you can talk so coolly about turning me over to another woman?"

"Not another woman—your wife," Iona's voice had a note of love and all love's faithfulness.

"So to mine yours," she said. "Now and forever. Oh, my dear, my dearest. Oh, Blaise—believe!"—she clung to him in a passion of love and anguish and straining herself—"Nesta must come out to him in reckless helplessness pleading—"do you think it's easy for me to part it?"

For a moment cry plowed him. He caught her in his arms, kissing her fiercely, sobringly.

"Beloved! . . . Forgive me! I'm half mad, I think. Beloved, say that you forgive me!"

She leaned against him, glad to feel the old masterfulness of his manner to her—to rest once more in her impregnable strength.

"Dearest of all," she said tremulously, "there is no question of forgiveness between us now. There never will be. We're just—both of us—struggling in the dark, and there's only duty"—brokenly—"only duty—to hold to."

They stood together in silence, comforted just a little by the mere human touch of each other in this complication of sorrow which had so suddenly come upon them, yet knowing in their hearts that this was the very comfort that must for ever be denied to them in the future.

At last Iona raised her head from his coating shoulder and her eyes searched Blaise's. Was asking the question she could no longer bring herself to put in words. He met their gaze.

"Iona, is it your wish I fix this thing—that Nesta back?"

He felt a shudder run through her frame. Twice she tried ineffectually to answer. At last she forced her dry lips to utter an affirmative.

"So be it."

His answer sounded in her ears like the knell to the whole meaning of life. The future was settled. Henceforth their lives must lie apart.

"So be it," said Blaise. "She shall come back and take her place again at Staple."

Iona clung to him a little closer.

"Blaise, believed—I know the heaviest part will be yours. All mine won't be easy, dear. I shall go to Charnwood to be with Claire at once—tomorrow—and it won't be easy, either. I am in an evening the lights twinkle up at Staple, to know that you two are within, shut in from the world together, while I'm outside—always outside your life and your love."

Easy Teething

"Baby cut all his teeth with no trouble, thanks to BABY'S OWN TABLETS," writes Mrs. Thomas Shaw, Hamilton, Ont. Scores of other Mothers have written in similar vein.

Give YOUR child BABY'S OWN TABLETS for teething troubles, most common of simple fevers, colic, colds, constipation, sleeplessness, or wherever he is cross, restless and fretful. Easy to take as candy, and absolutely SAFE—see medical's certificate in each 25-cent package. *Over 1,250,000 packages sold in 1931.* 26

In Stock

BABY'S OWN TABLETS

"You'll never be outside my love," he said swiftly. "That's yours, now and forever. And no other woman shall rob you of one jot or tittle of it, my wife in the eyes of the world. I will bring Nesta back to Staple, and she shall bear my name and live as my wife in the eyes of the world. But my love—that is yours, utterly and entirely. Yours and no other's."

He lifted her face to his, and their lips met in a kiss that was a seal of love and all love's faithfulness.

"So to mine yours," she said. "Now and forever. Oh, my dear, my dearest. Oh, Blaise—believed!"—she clung to him in a passion of love and anguish and straining herself—"Nesta must come out to him in reckless helplessness pleading—"do you think it's easy for me to part it?"

For a moment cry plowed him. He caught her in his arms, kissing her fiercely, sobringly.

"Beloved! . . . Forgive me! I'm half mad, I think. Beloved, say that you forgive me!"

She leaned against him, glad to feel the old masterfulness of his manner to her—to rest once more in her impregnable strength.

"Dearest of all," she said tremulously, "there is no question of forgiveness between us now. There never will be. We're just—both of us—struggling in the dark, and there's only duty"—brokenly—"only duty—to hold to."

They stood together in silence, comforted just a little by the mere human touch of each other in this complication of sorrow which had so suddenly come upon them, yet knowing in their hearts that this was the very comfort that must for ever be denied to them in the future.

At last Iona raised her head from his coating shoulder and her eyes searched Blaise's. Was asking the question she could no longer bring herself to put in words. He met their gaze.

"Iona, is it your wish I fix this thing—that Nesta back?"

He felt a shudder run through her frame. Twice she tried ineffectually to answer. At last she forced her dry lips to utter an affirmative.

"So be it."

His answer sounded in her ears like the knell to the whole meaning of life. The future was settled. Henceforth their lives must lie apart.

"So be it," said Blaise. "She shall come back and take her place again at Staple."

Iona clung to him a little closer.

"Blaise, believed—I know the heaviest part will be yours. All mine won't be easy, dear. I shall go to Charnwood to be with Claire at once—tomorrow—and it won't be easy, either. I am in an evening the lights twinkle up at Staple, to know that you two are within, shut in from the world together, while I'm outside—always outside your life and your love."

Flush away those ugly

Yellow Stains...

Gillett's Lye cleans closet bowls without scrubbing. Banishes odors, kills germs, frees drains...

WHAT woman doesn't want to get rid of it! The most unpleasant part of house-cleaning. Scrubbing toilet bowls.

Thanks to Gillett's Pure Flake Lye.... this annoying job has been made easy.

Just sprinkle Gillett's Lye—full strength—into the bowl. Let stand overnight. Then flush. Presto! Bowl is white and sanitary. Germs are killed, odors banished.

And more important, Gillett's Pure Flake Lye will not harm septic tanks, or destroy the basic of sinks and bathtubs.

REMEMBER—the powerful cleaning and disinfectant action of your household cleaning easier. Ask for Gillett's Pure Flake Lye.

FREE BOOKLET: The Gillett's Lye booklet shows you dozens of ways to make hard household tasks easy. Write it today. Standard Chemical Limited, Power Building, Toronto, Ont.

Never dissolve lye in hot water. The coldness of the lye will cool your enamel.

GILLETT'S LYE

EAT-RITE

And Tormarin had replied with unbroken tenderness:

"No, you can't hope for that. And I'm glad you understand and recognize the best. Still, we must try to be good friends, Nesta, at least."

But this tranquil state of things only lasted for a comparatively short time. Very soon, to the novelty and satisfaction of her reinstatement began to wear off, Nesta became moody and irritable and, apparently, considerably less frequently visited by spasms of repentance and remorse.

Her husband's every attempt to make her more comfortable and happy was met with jealousy, with a certain amount of insolence. But she did not second his efforts. Instead, she became more eloquent and difficult as time passed on.

She was no longer satisfied by the fact that she was once more installed as the mistress of Staple. She demanded a husband who would surround her with all the little observances that only love itself can dictate, where she could alternately scold and cajole as the fancy took her, but who would always come back to her, after a tiff, ready anew to play the adoring lover.

(To Be Continued.)

The Four Hour's Friend.—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Eclectric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

Before they were married she couldn't bear to let him out of her sight. She loved him so well. After they were married she couldn't bear to let him out of her sight. She knew him so well.

The teacher of a gliding school in Germany has trained falcons to fly within a limited area so that he can study their soaring flights with the aid of a motion picture camera.

PAIN relieved instantly

Aspirin will dispel any pain. No doubt about that. Over a billion and a half H. Bayer Co. The pain is relief to an staggers at the head.

No harmful after-effects from Aspirin. It never depresses the heart, and you need never hesitate to make it three tablets.

So it is needless to suffer from headache, toothache or neuralgia. The pains of aching, lumbago, rheumatism or neuritis can be banished completely in a few moments. Periodical suffering of women can be soothed away; the discomforts of colds can be avoided.

Aspirin tablets have other important uses—all described in the proven directions in each box. Look for that name Aspirin on the box—every time you buy them tablets—and be safe. Don't accept substitutes. "Aspirin" is a trade-mark registered in Canada.
